NURSERIES, SWANLEY. SEED FARM & GROUNDS, EYNSFORD.

NEW, GOOD, AND RARE >>> FLOWERS **

ALL SPECIALLY RECOMMENDED FOR THE YEAR 1898.

LORD CHELSEA.

CANNELLS WINTER-FLOWERING AND EVERGREEN BEGONIAS. See page 120

NEW DOUBLE BEGONIAS.

RAISED AND SENT OUT BY H. CANNELL & SONS.

COUNTESS OF BUCKINGHAMSHIRE-Of a distinct creamy shade and apricot, edged rose; nice form; medium-sized flowers; very free; good habit; well recommended for general decorative purposes. 10s.

DR. E. J. HOPKINS-Of a fiery terra-cotta shade; full double flowers; dwarf habit; free

and showy; distinct. 10s.

LADY COLSON-Fine formed flowers of a sulphur-yellow shade; dwarf and good. 10s.

LADY FRANKLIN-Large bold flowers; guard petals tinted blush, centre of a cream tint. This produces the largest flowers we have yet seen in this class. 15s.

LADY HAMPDEN-Good double flowers of a delicate blush-pink shade, almost erect

flowering: good liabit; strong grower; extra. 10s.

IADY RICHARDS—Of a pleasing and pretty shade of rose-pink; large flowers; free; good bushy habit. 8s.

LORD CHELSEA-A splendid rich crimson scarlet; flowers large; fine habit; one of the

best in this section. 10s.

MISS COURTNEY—Large and fine; salmon-pink; nice formed flowers; good. 7s. 6d.

MISS MABEL BRADBURY—Nice open flowers of a soft salmon tint, slightly crimped; dwarf and free. 8s.

NEW SINGLE BEGONIAS.

DANEBROG -- White, broadly margined lake; very showy and free.

DELICATA-Fine circular well-formed flowers; white, slightly edged pink; very [erect; dwarf and free

LORD PEEL-Deep crimson; of fine substance; large circular flowers; extra.

MISS LOUISE DALE-Rich red, shading off to a magenta shade, yellow centre; erect flowering; free

MISS MABEL HARDY-Of a pretty flesh-salmon tint; of great substance; very effective. MRS. BRINDLE-Very large; orange-red; well-formed flowers; free.

3s. 6d. each.

NEW PICOTEE AND CARNATIONS.

RAISED AND SENT OUT BY H. CANNELL & FO S.

ERIC—Good large and fine, pure white ground, edged and feathered rosy red: pretty. 2s. 6d. each. F. T. TASKER-Attractive, beautiful-shaped petals, broad and bold, of a pleasing shade of light bright red; splendid for buttonholes. 2s. 6d. each.

IRENE-Colours good, sweet scented, searlet bizarre, bold markings, fine flowers, splendid

constitution. 3s. 6d. each.

MISS ROBERTA WALKER-Very free and effective; good habit, fine flowers of a deep rose colour; a grand variety. 3s. 6d. each.

MISS MARY DYKE—Deep primrose, well-shaped flowers, grand petals, good habit. 3s. 6d.

MISS SUSAN-Of a pretty and pleasing shade of pink, well formed; large and good, 3s. 6d. each. MRS. C. J. M. SHAW (Picotee)—White ground, clear and well defined wire-edge of deep pinkish lake, broad and bold petals; fine. 2s. 6d. each.

MRS. P. READE-Ground colour white, speekled, striped, and splashed lake-maroon, large;

a grand variety for conservatory decoration. 2s, 6d, each,

OWEN FREDERICK-Extra good and fine; soft yellow ground, feathered searlet; good habit, very free. 3s. 6d. cach.

PLEASANCE-Pure white, pretty shell-shaped petals, slightly serrated; very fine for border

1 u peses. 2s. 6d. each

PRINCESS MAUD-Pure white, sweet scented; large and fine double flowers. 3s. 6d. each. W. COOMBE-MILLER-Deep buff, ground distinctly marked chestnut-red; full double flowers, large; a grand variety. 3s. 6d. each.

The set of 12 for 30s.

SONS' CANNELL æ

We are sure they will become standing varieties, and further maintain our reputation as sending out the best permanent kinds of any raisers in the world.

GRAND NEW ELEGANT-SHAPED CHRYSANTHEMUM.

An acquisition of the greatest value for Cut Flowers.

MISS HARVEY, or WHITE MRS. FILKINS-It is said by those that have seen it to be the most important and the most useful and valuable variety of all Chrysanthemums. All this is based on the experience they have had of the yellow variety we sent out. It has, and always will be, grown in large quantities, because the shape is so fas inating, and the exact, neat-formed petals that the present fashion requires, from one end of the globe to the other: yes, for both button-holes and bouquets, drawing and dining rooms, this variety always commands most admiration. All the world has been waiting for another colour of the same form; thousands have asked one another who was going to give them a white one. A year ago we should have said it was very, very far off, but we are indeed proud to say it is now a realised fact, and we also hold the entire stock of this much-wanted and anticipated White Mrs. Filkins. This we now offer for the first time under the name of Miss Harrey, by request, after the raiser's daughter—a miss in her teens—trim, neat, and lovely she looks in her snow-white dress. At the present time no flower is so wanted as this; no flower will be so welcomed by all rich and poor-as this gem of jewels amongst lovers of the Chrysamhemmus for the choicest purposes. Should we be favoured with 100 or more orders at a guinea each it will be sent out the 2nd of Mny; if that number is not reached, we shall defer parting with it until next year (1899), which will enable us to work up a much larger stock, and also to exhibit it extensively during the coming season. The price will be the same to the trade as to private customers. 21s. each.

Chrysanthemum, White Mrs. Filkins.—This is one of the many novelties sent out by Messrs. Cannell during the last 20 years, certainly it is not one of the least important of the additions made to the Chrysanthemum list. In size, form, and character the newcomer resembles its parent. but is pure white. For wreaths and bouquets, as well as for the decoration of the dwelling house in vases, a great future hes before this Chrysanthemum. E. Molyneux.

JAPANESE.

1360. C. F. PAYNE - We bave every confidence in putting this variety forward as one of the finest introductions of late years, and will andoubtedly be much sought after and appreciated as a splendid exhibition kind; the ground colour is yellow, heavily dusted and striped red; highly recommended. Crown bud. Plants, 10s. 6d.; after April the 1st, 6s. each or three for 15s.

SINGLE CHRYSANTHEMUMS.

For descriptions, see Nos. 1371, 1372, and 1033, pages ix and 69. (vii)

For description, see No. 1366, page ix.

1361. DUNCAN McHUTCHISON—A most beautiful sport from Lizzie Cartledge, and possessing a more robust growth than its parent, the petals being much longer and broader; colour a warm and pleasing shade of rosy salmon, the centre finishing off to a pure golden yellow. Crown bud. Plants, 6s

1362. KING OF PORTUGAL—This produces grand flowers with very long and broad petals, and forming into beautiful exhibition flowers of a rich chestnnt-red with a brighter reverse.

Second crown Plants, 6s.; after April the 1st, 4s. each, three for 10s.
1363. MRS. C. E. WILKINS-Very distinct and effective; the flowers are deep and full, florets very long and of a lovely tint of silvery-mauve; much admired wherever exhibited. Second crown. Plants, 5%

1364. MRS. ERNEST CANNELL-A most unique flower of grand proportions, full and remarkably deep, a fine addition : colour being of a silvery-lilac shade with a much brighter reverse; a splendid exhibition kind. Second crown. 5s.; after April 1st. 4s. each, three for 9s.

1365. MRS, N. FOLKES-A pure white flower with long florets; a good exhibition variety. A.M., R.H.S. 5s.

1366. QUEEN OF PORTUGAL-Producing an exceptionally broad petal and very long, colour being of a beautiful creamy white, passing off to a pure white. This will be found a grand variety for competition, and although belonging to a full class, we feel sure it will soon find numerous admirers. Second crown. Plants, 5s.

NEW DECORATIVE JAPANESE.

1367. LADY ONSLOW—A grand and useful addition to the spidery section; flowers are of a beautiful lemon yellow, narrow petals, and forming into a perfect ball; habit of plant very bushy and compact. Will be found most serviceable in the decoration of the conservatory and like purposes. Plants, 1s. 6d.

SINGLES.

1368. BLANCHE CHAPMAN We have much satisfaction in placing this before the now numerons and still increasing admirers of this class. The well-known variety Mary Anderson has enjoyed a well-merited reputation for a considerable time, and we predict that this novelty, owing to its various good qualities, will soon be generally used both for decorative purposes and the exhibition tables. Beautiful well-shaped flowers of silvery-rose colour, and forming into well-formed, bushy plants; free and effective. Plants, 2s. 6d.

1369. CANNELLS' GEM -A splendid addition to this class; colour rosy amaranth; most profuse. Plants, 2s. 6d.
1370. FREDA-Will be found a splendid variety for pot work, making a lovely. bush-shaped plant. A fine companion to Miss Rose, but the flowers are much larger, colour being of a beautiful deep pink. Plants, 2s, 6d.
1371. MADGE—This is sure to speedily become a favorrite; a fac-simile of Jane in formation

of flowers, but in colour of a golden-yellow heavily dusted red. Plants, 3s.

1372. KING OF SIAM-One of the best crimson varieties ever introduced in this class, and will be much sought after; very dwarf and free. Plants, 2s. 6d.

After April 1st, the above set of Singles, 10s.

NEW ANEMONE POMPON.

1378. ELLA-A pretty and distinct addition to this class. Makes a splendid plant, and every flower comes good; the cushion and outer florets quite perfect in formation, the colour being of a pleasing self-blush. Plants, 2s. 6d.

NEW POMPONS, UNRIVALLED FOR CUT FLOWERS.

1374. LITTLE DOT-Producing the smallest flower of the whole family of Chrysanthemams, being but only bulf-an-inch across; ground colour yellow, edge of every flower being red and browu—quite a new shade of colour; very hardy, perfectly distinct, and should be cultivated by everyone. Plauts, 1s. 6d. each.

1375. MISS GERTIE WATERER - The competition for the best basket of Chrysanthemums brought out one of the finest contests at the last National Chrysanthemmm Show. Nearly a dozen of the experts all made sure of carrying off this prize, but the great beauty of Mr. Waterer's arrangement, consisting of a sport from Snowdrop, carried off the first prize quite easily, much to the delight of all. It is the opinion of those who have seen it that it is the loveliest pompon variety yet introduced, the colour being of a pleasing flesh-pink shade. Wherever cat flowers are used, owing to its delicate colouring, we are sure this variety will find favour and he much appreciated. Owing to the colouring being of such a soft lovely shade, it will be found beneficial, and also ensure the plant being in perfection for a much longer period, if they are slightly shaded from the san or strong light. Plants, 1s. 6d. each.

The above set of three Pompous, after April the 1st, 4s.

NEW CACTUS DAHLIAS.

RAISED AND HIGHLY RECOMMENDED BY H. CANNELL & SONS.

A. F. ANGUS-Good Cactus shape; medium-sized prettily-shaped flowers of a pleasing and distinct tint of pink and soft salmon; free; quite a different shade to any other variety, yellow at base of florets. 3 ft. 7s. 6d.

GEO. JULL-Good-shaped Cacins; bright terra-cotta red; narrow-pointed petals, medium

size; distinct colour; dwarf. 5s.

F. M. VOKES—Finely-pointed peta's, good-sized flowers; very free; rich shade of red, slightly tinted orange. 5s.

PUMILUS-Pompon-shaped flowers, nicely-pointed petals; orange terra-cotta; free and dwarf. 5s.

CANNELLS' CACTUS DAHLIA, THE CZAR.

THE CZAR-Greatly admired last year wherever exhibited; true Cactes shape, as per engraving, long narrow well-pointed petals, noble refined flowers, and always fit for exhibition; intense fiery crimson-maroon; good habit; free and effective. 7s. 6d. each.

NEW DECORATIVE DAHLIA OF GREAT VALUE,

ORANGE GLARE OF THE GARDEN (SMITH)—As high as many varieties stand in the estimation of the public, we believe none are more appreciated than the good old Glare of the Garden or Fire King. It is always the first and last to give neeful flowers, and is more conspicuous in every garden than almost any other. The variety we are now offering with great pleasure is an exact counterpart, excepting the colour of the flowers, of the above-named general favourite; it produces the same abundance of flowers of the loveliest orange-red ever seen in this family, and might justly be called "Soldier's Tunic," so bright and attractive is the colour. It is sure to become a universal favonrite. 7s. 6d. cach.

GRAND NEW CACTUS DAHLIA.

WE HAVE BEEN APPOINTED DISTRIBUTORS OF THIS DISTINCT AND BEAUTIFUL VARIETY FOR GREAT BRITAIN.

LORELet.

LORELEY—Flowers are of an agreeable size, and for beauty of shape and exquisite tint is far ahead of any other variety in commerce, excelling them in the more chaste and graceful combination of habit and bloom, attracting the eye by its charmingly soft and richly blended rose colours, likened to the beautiful La France Rose, melting or shading towards the centre into ivery-white. It flowers in the wildest profusion, and is more than remarkable for its long stiff wiry stems supporting blossoms of the most perfect porcupine quill shape well above the foliage, and at no time exhibiting even in the slightest degree, heavy or half-developed flowers—so frequently the case with many of our standard varieties. These sterling decorative garden qualities, combined with its inimitable shape and delicate colour, demand for it in the garden and cut flower trade a place that cannot be filled by any other Dahlia at present in cultivation. 3s. each.

NEW FUCHSIA.

A MOST BEAUTIFUL NEW HYBRID FUCHSIA.

ADDINGTON—We have very great pleasure in introducing this variety, because of it being so different and distinct to any other real cross between the well-known old variety Fulgens and one of the ordinary kinds. It shows unmistakable similarity of appearance and character to both. It is a real hybrid—in fact, it gives the world another class of this useful and lovely family, so that all lovers of flowers can see the great work and alteration that is going on. It should be in every conservatory. Mr. P. Fry, the miser, has been studiously at work for many years, frequently exhibiting his remarkable crosses, but hitherto none have shown sufficient beauty and distinctness until Addington appeared. We exhibited this before the Floral Committee of the Royal Horticultural Society, and it was unanimously voted an Award of Merit. 7s. 6d. each. After May 15th, 5s. each.

CANNELLS' NEW SINGLE ZONAL PELARGONIUMS.

ALL OUR OWN RAISING.

COUNTESS DE MORELLA — The finest and most distinct English-raised variety in the much admired Mme, Jules Chretien section. We exhibited this most extensively throughout the country during the last autnum Chrysanthemam exhibitions, and on every occasion it was selected as the most conspicuous and fascinating flower amongst the numerous other graud varieties shown by us on those occasions. We have much pleasure in naming it in honoar of the lady, and by whom it was much admired when it first came into flower. It produces in great pro-fusion well-formed flowers and trussesof a brilliant orange-scarlet, the entire centre of each flower is white and then gradually shading off to a soft lake tiut, which gives it a most attractive appearance; a most perfect habit. We quite anticipate that it will altimately become a most useful and effective bedding variety, and extensively used in all the parks and gardens

NICHOLAS II.—Certainly a fine advance in this colour; crimson-scarlet, of great size and substance, and well - formed over-lapping petals, measuring well over $2\frac{1}{2}$ in. in diameter; large, conspicuous

white eye, bold trusses; habit first-class; will certainly take a place in every collection. 5s.

MR. C. C. TUDWAY—A most beautiful and richly coloured variety, clear magenta, suffused fiery orange crimson, more intense at base of upper petals and onter edges of florets, the large round white eye adding considerably to the lustroas colours; finely formed flowers, which are of bold

white eye adding considerably to the lustroas colours; finely formed flowers, which are of bold discussions, large trusses; free bloomer, perfect habit; an acquisition. 3s. 6d.

LCRD REAY—A worthy variety bearing a worthy name, and without doubt the finest yet introduced into commerce in the purple and magenta shades; massive, well-proportioned flowers of the greatest substance, large white eye showing up the intense purple colouring to the best advantage; babit strong and branching, free bloomer; an indispensable variety.

3s. 6d.

MRS, C. C. TUDWAY-Producing enormous-sized flowers and trusses of the best possible quality, being of a soft rosy-cerise of a distinct and pleusing colour, slightly shaded darker towards

the centre, throughout the winter season; a good grower. 3s. 6d.

MRS. SIMPSON—Although we have introduced at various times splendid novelties in this section, of which the Duckess of Marlborough and Lady Brooke are well-known examples, we consider this a decided advance in the coulated class, not only on account of its beautiful well-formed flowers, but also owing to the purity of its whiteness, combined with a well-defined riag of fiery scarlet-pink and surrounding a large white eye; when in full flower it has a very attractive and pleasing appearance; habit good; a pretty addition. 3s. 6d.

W. E. CORDEN-After this variety had been much admired by an enthusiastic hybridiser

and raiser of Zonals residing at Wakefield, and who is greatly respected by the members of the Paxton Societies in the district, we decided to name it in honour of the ubove-named gentleman. We believe it to be one of the most perfect Zonal Pelargoniums we have yet introduced; of a most clear scarlet colour, very vivid distinct white eye, large circular flowers of the most correct shape, hold trusses borne in profusion, limbit all that can be desired; will certainly take rank as the finest of its class. 3s. 6d.

The set of seven for 25s.

SEEDLING ZONAL PELARGONIUMS.

During the past ten years many p'ants have been much improved and become more useful in numerous ways, and for several seasons it was thought probable some of them would entirely supersede our very old and well-tried friends of our gurdens, but time and experience have proved otherwise, nature seeming to have ordained it that certain plants should continue to be alike suitable and useful ia spite of man's eadeavours, and undoubtedly the Zonal Pelargonium still cominues to be without a serious rival for many purposes, particularly for bedding and winter flowering. So as to encourage and still further extend the usefulness and improve the beauty of the Zonal, and also as an inducement to amateurs and others to take up a most instructive and interesting branch of horticulture by becoming hybridizers and raisers of new kinds, we are willing to pay Five Pounds for One Plant of any new and distinct colours. must be distinctly understood they must be a decided advance on existing var cties, and that we possess the entire stock; also that we ag ce to present the raiser with one plant from the first batch of cuttings struck from the original. There are many lovely varieties that can be purchased so as to commence experiments at once (see page 129), or packets of seed can be obtained, 6d. and 1s. per packet, and guaranteed to have been picked from our anrivalled collection of the best kinds from all parts of the world. We have no hesitation

in saying there is every probability of obtaining a variety worth the reward offered from either a 6d. or 1s. packet.

NEW DECORATIVE PELARGONIUMS.

VICTORIA REGINA Pearly-white flowers, very slightly blotched in upper petals, beautifully fimbriated; flowers large and very solid; good constitution; a sport from Mrs. W

VIOLA-Soft purple-violet, shaded lighter; a most distinct colour in this fumily; flowers well

formed; free bloomer; good habit. 58.
PRINCE GEORGE IMPROVED—Prettily crimped flowers of an enormous size, of a deep salmon shade, heavily blotched maroon. 3x. 6d.

QUEEN OF WHITES—Semi double, of the purest white; a sport from Canaells' Louble, and on which it will be found a great improvement. 3s, 6d.

BRIDEGROOM -- Rosy blush, of a very pleasing maroon shade; beautifully crimped flowers; dwarf and free, 3s. 6d.

ALICE HAYES—A very beautiful white, free flowering and good habit; a sport from the well-known variety *Dorothy*, nu exact counterpart, excepting in colour. 3s. 6d.

PURPLE QUEEN-A sport from the beautiful variety Rose Queen. possessing the fine bold

trusses and flowers of its parent. 3s. 6d.

CRIMSON KING—For freeness of flowering, depth of colour, and good habit, we have no hesitation in predicting it will become one of the most popular varieties for market purposes; as name denotes, it is of a most intense crimson colour. 2s. 6d.

TROPEOLUM PEŒBE,

NEW TROPÆOLUM.

THE MOST BEAUTIFUL OF ALL THIS FAMILY. VOTED A UNANIMOUS AWARD OF MERIT BY THE ROYAL HORTICOLTURAL SOCIETY.

PHE BE-A most attractive and delicionsly-scented variety, producing flowers throughout the winter and summer season of a deep goldenyellow, with a rich crimson feathered blotch in each segment, outer edges notched or scolloped, the whole forming into an exquisitely-shaped blossom; admired by all, and a decided improvement on all existing varieties in this class. A very free and vigorous grower. When in the height of its perfection strings of growth resplendent with its glorious parti-coloured flowers can be ent for decoration, eight to ten feet long. A decided acquisition as a trailer in the greenhouse or conservatory in early spring, and out doors during summer over rockery and banks. Is. each, 9s. per dozen.

NEW VIOLAS.

RAISED BY MR. D. B. CRANE, AND SENT OUT BY H. CANNELL & SONS.

BARTHOLDI-Large circular b'oom, of capital sub-tance, and neat and even finish; colour bright purpl sh crimson, paling off to the edges on the upper petals; neat yellow eye; strong, vigorous constitution. Splendid flower for competition, and useful for association with other plants in the hardy flower garden. First-Class Certi icute, Viola Conference, 1896.

CELESTE—A plant with a beautiful tufted and compact habit of growth, yet free and pleasing

in appearance. The plant is literally covered with pretty medium-sized flowers of pale layenderblue, which are quite fragrant. As a belding variety it is a distinct acquisition, and should be in the gardens of those who value the plant in the hardy flower border.

CREPON-A distinct and pretty flower, useful cit'er for bedding or for competition. Wonderfully free flowering, and possessing a capital constitution; habit of growth good. The blooms are large, and of a pretty pale shade of rose, with a very neat yellow eye; the petals have a crepe-like appearance altogether unique.

CYMBELINE-Another charming little bedding variety; free flowering, of medium size, and with a habit of growth distinctly good for the hardy flower garden; colour pretty shade of bluishlavender, and in especially fine condition late in the season.

GIGANTEA-An immense creamy-white flower, possessing remarkable substance, and rayless. This is a plant with a splendid spreading habit of growth, and with a most robust constitution; very free flowering. Selected by the Viola Conference Committee as one of the best tall growing

white varieties for bedding, and specially adapted for association with other plants.

PERSIMMON—This is a variety known to some as belonging to the fancy type of the Viola, and perhaps better appreciated when described as belonging to the Countess of Kintore type of flower. The colour may be described as upper petals pale violet-lavender, under petals purpleviolet; a nice even circular flower. Habit of growth distinctly better than usual with this type of flower.

2s. each, the set for 10s.

OTHER NOVELTIES FROM VARIOUS SOURCES.

AGERATUM, BLUE PERFECTION

BEGONIA, GOLDEN VERNON.

AGERATUM, BLUE PER-FECTION—This new variety is raised from Aggratum Celestial, to which it equals in the dwarf compact growth, but differing from the same by the darker colour of the large flowers, of a most beautiful Amethyst-blue. This variety is the darkest colour among the large Flowering Ageratums, and coming entirely true from seed, it is a most wonderful plant for borders and bedding. Per pkt., Is.; plants, 9d. each.

AGERATUM, COMPACTUM-NANUM ALBUM-Will be found a most useful vuriety; ulmost a pure white

AGERATUM, MARIANNE— Of a pretty shade of lavender blue. 9d. AGERATUM, MME. LON-GERON-Blue; a fine variety; useful. for massing; effective. 1s.

BEGONIA, SEMPERFLOR-NS, GOLDEN VERNON-A ENS, GOLDEN VERNON-A hybrid between Begonia Semperflorens Bijou mid Begonia Semperflorens Atropurpurea (Vernon), and in itself combines all their merits. It has the golden yellow foliage of the B. Bijou, but each leaf is bordered all round with a wide dark-red band: the contrast between the two colours is very striking, making an agreeable effect. Its flowers are red, and is as dwarf as its parents. Per pkt., 1s. 6d.

BEGONIA SEMPERFLO RENS, ZULU KING (Black Begonia)—This variety is of sturdy habit of growth, the round shape of the leaves, which are formed around the stem, giving the whole plant a rather crisp appearance. The colour of the stem and foliage is a beautiful dark black-rod, which makes an exceedingly attractive effect if grown out of doors in summer. The flowers, of a brilliant searlet with golden-yellow stamens, are produced in great profusion from spring until late in the autumn, and beautifully contrast against the remarkable dark foliage. Per pkt., 1s.

(xvi)

BEGONIA, VIAUDI—The result of a cross between B. Duchartrei and Picturensis; of robust and vigorous habit. A splendid plant for cultivating in a temperate greenhouse; incessantly in flower throughout the winter. Flowers are of a rose colour, apparently tinted deeper owing to the numerous reddish hairs with which the flowers are ornamented; a beautiful acquisition. limited. 10s. each.

CARNATION (Tree), COUNTESS OF WARWICK—Bright claret-red; of good form, with broad smooth petals; of good substance and highly clove scented; a very free

CARNATION (Tree), INVINCIBLE-Vivid searlet; flowers large; full and of fine

form, 5s.

CARNATION (Tree), MURIEL—Soft rose-pink; of good habit and free flowering. 3s. 6d. CARNATION (Winter Flowering), WINTER SCARLET—Will take a foremost place, as well for cut flower purposes as for pot plant, during the dullest months of the year, on account of its wonderful freeness, the ease with which it opens its flowers in the depth of winter, and the brilliancy of its colonring; a splendid variety for use between October and March. 2s, 6d, and 3s, 6d, each.

NEW CANNAS (ORCHID FLOWERING).

ABEL CHATENAY-Deep purplish-bronze foliage, circular flowers, orange-red, shaded brighter. 12s. 6d.

AFRICA-Foliage bronzy-purple and green, flowers very large, rich purple scarlet, goldenyellow and orange inside; splendid. 2s. 6d.

GRAND NEW CANNAS.

ALEMANNIA-Producing the largest flowers yet seen. Gigantic and wonderful spike of flowers—the outer petals are scarlet with a very broad gold-yellow border, inside of blooms scarlet and dark red; beautiful. 2s.

ALLIANCE—Deep green foliage, rich reddish amaranth shaded orange, reverse of petals

chrome yellow; colour novel. 12s. 6d.

(xvii)

AMERICA-Red leaves, spikes large, and flowers one mous; a heautiful glowing red purple, flamed and striped, 2s.

APHRODITE-Broad green leaves, flowers golden yellow, with large spots of salmon colour;

ASIA-Very effective; flowers rich golden yellow, inner petals dotted scarlet; grand. 2s.
ATALANTA-Flowers deep grange-carmine; very large; rich growth. 9s.
AUG. NONIN Large flowers; vermilion, broadly margined golden-yellow; rich foliage.

AUGUSTE CHANTIN-Bold green foliage; enormous flowers, very large petals; orange

BAVARIA-Very large spikes and flowers of a brilliant golden yellow, thickly spotted scarlet; quite unique and handson.e. 1s. BORUSSIA-Enormous spikes, shining canary-yellow, shaded golden, small fiery red spots;

BRILLIANT-Yellow and vermilion; very beautiful and unique; grand form. 2s. 6d.

BRITANNIA-Larger than Italia; very large flowers; yellow ground, flamed carmine. BRONZE-Beautiful bronzy purple foliage, magenta-red flowers; quite distinct in foliage.

BURBANK-Truly gigantic in size; clear beautiful yellow, slightly spotted in centre florets; a splendid bedder.

BURGUNDIA Enormous flowers, like an expanded Cattleya; brilliant golden yellow, rich scarlet spots; a marvel of beauty. 24. 6d.

CAMPANIA- Large; chrome-yellow and su'phur, carmine spots: rich growth. 7s. 6d. CAPRICE-Pink and white; petals creamy white, heavily spotted lilac rose. 3s. 6d.

CITOYEN DE CRONST'ADT-Circular flowers; deep yellow, the kly spotted rosy-red.

12s, 6d. **CH**. NAUDIN-Flowers seven inches in diameter; salmon red, inner petals darker, dark green foliage.

CHAMPION-Pure dazzling crimson scarlet, overlaid with a golden lustre and purplish

reflections; pronounced as the finest Canna in existence. 21s

CLIVICEFLORA- Of a terra cotta shade, somewhat resembling a Clivia; grand flowers 12s. 6d.

CUBA-Enormous spikes of immense flowers; deep chrome yellow and deep vermilion red; entirely distinct in the shades of colouring. 5s.

DANIEL GERARD-Beautiful flowers; bright carmine, shaded scarlet and yellow: distinct

12s. 6d.

DUCHESS OF MARLBOROUGH-Absolutely pure pink, green foliage; numerous

DUKE OF MARLBOROUGH-Dark velvety-maroon, the darkest of all Cannas; very

F DOUARD ANDRE- Bright flery-red, with orange-yellow spots; of sterling merit. 2s. 6d GOLDEN PEARL-Quite irregular in colouring; some of its flowers are golden yellow others are yellow streaked, and shaded red and lilac; dwarf; free. 3s.

HEINRICH SEIDEL-Vivid fiery red, yellow border, spotted with purple; of great

HELLAS—Canary yellow, spotted brown-red; strong growth. 7s. 6d.
H. WENLAND—Large flowers; scarlet, golden-yellow border, fiery red inside; one of the best. 2s. 6d.

IBERIA-Flowers like a Cattleya; onter petals golden yellow, red border; very beautiful 2s. 6d.

KLONDIKE-A pure gilded orange; flowers enormous; the grandest of its colour. 2s. 6d.

KRONOS-Extremely fine form; rich sulphur yellow, spotted red; sea green leaves. LA FRANCE—Very large; splendid purple, and shining as if varnished; foliage brilliant velt wish scarlet; unique. 2s. 6d.

LIGHTHOUSE—Pale yellow, flamed pink and scarlet. 5s

LOF RAINE-Pink, edged white; flowers bright pink, spotted red, each petal broadly and clearly edged pale yellow, changing to creamy white; unique effect. 3s.

MAIDEN'S BLUSH-This colonr is quite new, and might be called a rosy-flesh; distinct. 3s.

MODEL-Grand flowers of tine petals, chestnut-orange and carmine; grand spikes.

MOONLIGHT-A grand improvement over Alsace; a grand acquisition. 7s. 6d.

MME. F. DREER-Fine flowers; beautiful golden yellow, minutely but distinctly spotted clear vermilion. 12s. 6d.

MME. F. PAUL-Circular petals; superb colour, deep go'den yellow, completely covered with spots of rieli carmine. 12s. 6d.

(xvii)

MME, MUSSET-Deep earmine shaded rose, bordered orange-chestnut; grand flowers. OCEANUS-Yellow, spotted red, smaller petals almo t rad; remarkably beautiful. 2s. 6d.

PANDORA—Purple and green leaves; enormous flowers; glowing fiery red, borders and inside gold-flamed; an extraordinary beautiful variety. 3s.

PARTENOPE-Enormous spike of flowers; vivid, dark orange-yellow, difficult to describe: distinct. 24, 6d.

PERSEUS-Immense flowers; pure canary-yellow, scarlet pencillings; rich flowering and lasting. 2s. 6d.

PHCEBE-Flowers similar to a Cattleya; sulphur-yellow, turning to whitish-yellow, petals spotted carmine. 10s.

PRESIDENT VIGER—Circular flowers, rich reddish-seurl t, shaded deeper. 12s. 6d. PLUTO Large and beautiful flowers, scarlet purple, flamed re1 inside. 3s.

PROFESSOR TREUB-Brown red and dark green foliage, flowers minium scarlet, striped salmon red; among the red-leaved Cannas this is one of the most striking. 15s.

PROFUSION—Very dwarf; bright searlet flowers, faintly edged gold; fine. 2s. 6d.

RHEA-Merallie-brown leaves, medium-size flowers of a brilliant crimson. 10s.

ROMA-Numerous and large panieles; flowers large; yellow ground, flamed salmon-red. 10.

SOUV. DE MME, LEONIE VIENNOT-Circular flowers; China-rose, shaded carmine and suffused golden. 12s. 6d.

SOUV. DE ROBT. OWEN-Large fine flowers, clear apricot, shaded rosy-salmon; distinct. 12s. 6d.

SUNSET-Bright orange-yellow, flamed and streaked glowing scarlet; fine heads. 2s. 6d.

SUEVIA-Pure canary-yellow, sating and bronzed inside; splendid. 2s. 6d.

TOPAZ - Grand for effect; the first pure yellow, of large size; ideal in form.

TRINACRIA-Flowers very numerous and large; snlphur-yellow, fading to a paler yellow; a pure colour. 7s. 6d.
TRIUMPH-Velvety-scarlet, suffused with deep marcoon; large, vigorous grower; very fine. 3s

VICE-PRESIDENT SAVOYE—Chestnut-red, shaded orange and suffused earmine; a novel colonr. 12s. 6d.

VICTORIA—Immense trusses, large flowers; pale lemon-yellow, rose spots, rich yellow and velvety amaranth-red; distinct and bold designs. 5s.

WILHELM BECK-Immeuse trusses of sulphur-yellow flowers, scarlet-red pencillings; a remarkable variety. 3s. 6d.

ZEBRA-Yellow streaked, blended and striped golden-yellow, orange, scarlet, and shades of lilae. 5s.

GRAND NEW CHRYSANTHEMUMS.

PRODUCING STRIPED AND STRIATED BLOOMS WITH DEEP CENTRAL COLOURINGS.

To meet the numerous demands received from amateurs and horticulturists, we beg to offer to our esteemed clients the first series of these novelties, the result of fifteen years' work and hybridising, demanding the most careful and constant attention. These will certainly revolutionise the Chrysanthemum world, for they have no resemblance to any others existing. The freshness of the colouring and the sharpness of the striping do not fail to draw the attention of all amateurs. It is a noteworthy fact that growers have hitherto studiously confined themselves to one series of tintsviz., red, yellow, white, &c. Lovers of this flower are becoming weary of this monotonous uniformity, it is therefore with a feeling of pride that we offer the latest creation to our clients. These beautiful varieties are destined to become universally popular.

AMITIE DE L'AGRICULTURE NOUVELLE-Immense flowers. true Japanese form; very long petals, opening with the greatest facility; chrome-yellow, striped and marked reddisherimson, centre brick-red colour; always in beauty; good lasting qualities. 30s. each.

CŒUR ROSE-Very large and fine, regular formation, petals intertwining one with the other, milky-white petals, with a mauve colouring along greater part of florets, and thus forming a centre of mauve, 30s, each.

MLIE. CHARLOTTE PATROLIN—Dwarf; flowers enormous, very double; canary-yellow, dusted and striped red, deep reddish centre; flowers keep in perfection for a very long time. For cut flowers, market purposes, culture in pets, and for exhibitions it is without a rival 20-, each. MLIE, MARIE VAISSIER—Flowers very large; bold white jetals striped violet-carmine,

eentre of flower rose; a beautiful variety. 17s. each.

MME. E. REDERER—Pure white, richly striped and marked violet-earmine, the majority of flowers having a rose coloured centre; continues in full beauty for a long time; one of the finest. 17s. each

MME. GASTON MORIN-Flowers enormons; pure white, richly striped and spotted violet, shaded carmine, an enormous bright rose centre; crown buds should be taken of this variety.

MME, LA COLONEL GERMER-DURAND-Flowers large and very double, pure white, striped and marked crimson-violet, occasionally coming with a rose-coloured centre; n most

beantiful variety. 17s. ench.

PANACHE DE DELAUX (Japanese) - Very large und fine, brilliant yellow, heavily and distinctly marked rich reddish-crimson. 17s. each.

WALTER KLAPP-llybrid, producing colossal flowers, clear chrome yellow. lightly striped and occasionally lined crimson, centre shaded red; a sensation at every exhibition. 30s. each.

NEW CHRYSANTHEMUMS FROM VARIOUS SOURCES.

ALICE F. CAREY-A beautiful light shade of pink; excellent keeping qualities. Terminal buds. 2s. 6d

ARLINE (Inc. Jap.)—Price white; dwarf; splendid for single pot plants. 3s.

AUTUMN GLORY—A grand pink; unsurpassed as an exhibition variety; nothing like it in colour—deep reddish-salmon on opening, and gradually changing to a soft sbrimp pink; very beautiful. Terminal bud. 3s.

BLACK HAWK-The largest and most beautiful dark crimson-scarlet yet raised; late

enttings, either and, 3s.

BOUNDLESS SNOW-Colonr white flushed pink, gradually becoming pure white; very

CHEMPIVEC-Clear bright yellow, sport from Silver Cloud; large. Crown or terminal

buds. 2.6d.
H. W. LONGFELLOW-A finely-rounded incurving white variety; broad petals; large First crown. 3s.

MERRY CHRISTMAS—The best and latest of all whites; well formed. 3s. 6d.

MERZA (Inc. Jap.)—Pure white flowers of the largest size. 3s.

MRS. C. H. PEIRCE—Soft deep yellow; leathery petals; a grand variety. Crown bud.

ROBT. G. CAREY —A beautiful incurved white of good substance; extra fine for exhibition. Terminal binds 2s, 6d.

RUSTIQUE (Inc. Jap.)—Quite distinct in colour, best described as brundore or golden brown; of the largest size. Terminal bind. 3s.

SOLAR QUEEN-Golden yellow, shading lighter; valuable as an early yellow; large. 3s. SPOTSWOOD Bright built incurved light yellow; extra good keeper; valuable as a late Crown or terminal buds. 2s. 6d.

THE YELLOW-Tinted bronze, maturing rich bright yellow; large graceful

bloom with ordinary treatment, 3s.

THORNDEN—The most intense yellow we have yet seen, a bright yellow under all conditions. 3s.

WM. H. CHADWICK- The grandest of the year; immense graceful bloom; waxy white,

tinted pink; cannot be praised too highly. 7s. 6d.

XMAS GIFT—Nankin yellow; flowers very full and compact; probably the largest XMAS GIFT-Nankin yellow; globular incurved variety extant. 2s. 6d.

NEW CACTUS DAHLIAS,

ALFRED VASEY-A colour difficult to describe, reminding one of a reddish sunset, enlivened with aurora-like reflections of amber and pink; of exquisite form; habit one of the best; very free. 7s, 6d.

AMBER-Of a yellow bue, tinted pale orange-red or amber; flowers large; loug incurving

ARACHNE-A most remarkable flower, centre of each petal is pure white, edged along its entire length with a broad band of brightest crimson; is sure to become very popular, and in great BRITANNIA-A most delicate shade of soft sulmon-pink; form of flower perfect; a splendid acquisition. 7s. 6d. request for cutting as well as for exhibition. 7s. 6d.

CAPSTAN-Soft brick-red, tinted apricot at base of each petal; an exquisite flower, both in

form and colour; beautifully pointed; much admired. 7s. 6d.

CASILDA—Pale sulphur-yellow, outer petals diffused and tinted delicate pink; beautiful shape, lovely colour; should not be thinned too much. 5s.

WILSON-Dark scarlet; very large and deep; wonderfully free and easy. DAFFODIL-A charming shade of canary-yellow, petals very pointed, and of beautiful form; indispensable for exhibitors. 7s. 6d.

EASTERN QUEEN-A fine true Cactus-shape flower, rich magenta-maroon. 7s. 6d. EILEEN PALLISER-Probably the finest golden-yellow raised; large flowers, freely

E. J. DEAL-The finest scarlet yet raised; beautifully pointed petals. 7s. 6d.

ETHEL-Of a light yellow colour, onter petals becoming chrome with age; a model flower.

FALKA-Rosy erimson, shaded carmine and violet, a clear distinct colour; fine shape; an immense improvement on Robt. Cannell. 5s

FRANK WOODGATE-Yellow at base of florets, searlet at the points; florets long and

twisted: of beaut ful appearance. 7s. 6d.

F. C. PAWLE-B-autiful rich crimson, shaded rose at tips of florets; splendid habit; constant. 7s. 6d.

GREEN'S VICTORY-Deep and dazzling scarlet; carly bloomer. 7s. 6d.

HERCULES-Bright chestnut crimson, suffused claret, reverse of petals silvery; a wonderful

INDIAN PRINCE—Petals narrow and very finely pointed; greatly admired. 7s. 6d. ISLAND QUEEN—Very distinct and beautiful; of a charming light mauve colour; very

KINGFISHER-Bright carmine or rosy purple, very free flowering; valuable for cutting

purposes. 7s. 6d.

KING OF SIAM—Deep rich purplish maroon; very carly and free flowering. 7s. 6d.

KEYNES WHITE—Undonbtedly the best white Cactus in existence; of the purest ivery

white; a most elegant flower; has every good quality.

LAVERSTOCK BEAUTY-Soft red or vermilion; a spl udid variety for exhibition. 7s. 6d. MAID OF HONOUR—A most fascinating and charming flower, delicate shade of soft amber, with a shading of old gold. 7s. 6d.

MARY SERVICE—A pleasing tint of pinkish heliotrope, shading off to a yellowish brown; one of the most elegant; dwarf; very free. 7s. 6d.

MIDNIGHT SUN—Interse crimson, shaded lighter and darker; very effective. 7s 6d.

MISS AGNES BOX-Beautiful rich scarlet of velvety appearance; one of the best. 7s. 6d. MISS FINCH—Finely pointed petals, very free and distinct; rich carmine-rose shaded crimson.

MRS. ARNOLD-A mixture of terra-cotta, fawn, amber, and such like shades; very distinct. 7s. 6d.

MRS. J. GODDARD-Lovely rich glowing crimson scarlet; handsome, one of the finest.

MRS. SCRASE DICKENS-A lovely rich golden yellow, large handsome flowers. 5s.

NIGHT-Intense dark maroon, nearly black, one of the darkest in existence.

NERO—Soft shade of rosy-crimsou, tiuted deep claret; of high merit. 7s. 6d.

OCTOPUS—A large and nearly white variety; very free; most beautiful in fine weather. 5s.

OAKLANDS—Salmon-rose; a useful and good variety for any purpose. 5s.

PORCUPINE—Petals very pointed, colour dark searlet maroon, oue of the best. 7s. 6d.

PRIMROSE DAME (Miss Aldersey)—Best described as an exact counterpart of Lady Penzance in colour and form, but having long stems. 5s.

PROFUSION-Small flowers, rich rosy-purple; makes a grand display. 5s. REGULUS-Rich deep crimson self, of great substance and quality. 5s.

ROYAL PURPLE—Bluish plum or rich purple: very free. 7s. 6d. ROYAL ROBE—Deep crimson purple, reverse of petals deep cluret; charming. 7s. 6d. RUBY-Rich ruby-red; a most attractive and pleasing flower, tips of petals almost magenta. 7s. 6d.

STANDARD BEARER-Bright fiery scarlet of the same colour as Gloriosa; very free. 7s. 6d.

STELLA-Rich vivid crimson, long beautifully formed petals, large bold flower; very free. 7s. 6d.

TILLIE-Quite a new and distinct colour, salmon suffused pale rose, tinged soft mauve; greatly admired; habit dwarf and perfect. 7s. 6d.

THE PET-Miniature flowering; a pretty shade of rosy-amber, shaded old gold; lovely. 5s

TINY-A mixture of light orange and old gold; charming. 5s.
TRUE FRIEND-Very dark crimson, superb torm; a distinct and elegant flower. 5s. W. J. FROST--Rich crimson, large long-twisted petals, perfectly formed. 5s.

GRAND NEW FERN.

LOMARIA CILIATA MAJOR—A most distinct and effective decorative fern, being of more vigorous hab't than the type; the front's are larger and of good substance, with a graceful spreading hab't. As a market plant it will prove invaluable, being far superior to the popular L. Gibla. 38, 6d, and 58, e.ch.

SAINTPAULIA IONANTHA RUBRA -New variety of this neat Gesneriacea, with deep lilucred flowers, and which comes true from seed. Although this colonr may not by some be considered quite equal in beauty to that of the type, the first new departure from it will still interest everyone who has seen or grown this charming little plant, 2s, 6d.

each.

SAINTPAULIA IONANTHA RUBRA.

NEW DOUBLE ZONAL PELARGONIUM.

DUKE OF FIFE (Hawkins)-Another scarlet sport from F. V. Raspail, and which will andoubtedly pro e of great service for decorative and market purposes; much appreciated and greatly admired when exhibited before the Royal Harticultural Committee last Autumn for its large, open, seml-double flowers. 1s. 6d, each; 12s. doz.

NEW ZONAL PELARGONIUMS OF CONTINENTAL ORIGIN.

DOUBLES.

MME. H. TILMANT.-Fine large flowers and trusses, deeply mettled, white centre, a broad nargin of scarlet; a beautiful and attractive variety.
HUBER CHARRON Orange-scarlet margin, mottled centre; flowers well formed.

JEAN RAMEAU-White ground, mottled and spotted purple, with a narrow margin of same colour: very distinct.
M. J. B. VARRONE—Deep searlet, margin shaded magenta towards centre, which is white;

large trusses; vigorous babit,

PREDICTION-Light magenta of a pretty shade, very large white centre. 2s. 6 . each; the set of five for 10s. 6d.

SINGLES.

N. H. TILMANT-A grand improvement of Mine, J. Chretien, with a deeper rosy shade and larger white centre; bold truss

MME. BLANCHE JANET-An improvement in size of this new section, beautifully marbled white centre and rosy-magenta margin.

MLLE. HONNER-Imense colouring of crimson-magenta, mostled lighter, white blotch in top petals.

(xxii),

COMTESSE DE COURVILLE White ground, slightly mottled magenta, deeper centre and margin

MRS. BEECHER STOWE-Light ground, murbled deep lilac-pink, white centre; large

MME. SAINT-POL BRIDOUX-Very free; distinct and charming; white ground, marbled and edged rosy orange-carmine, deep markings in centre.

JULES LEMAÎTRE Large white flowers, heavily edged with reddish-violet; very distinct 2s. 64, each: the set of seven for 15s.

NEW PINK.

DIAMOND - This is another fine novelty, which for border decoration or marke' purposes will prove a great acquisition. The flowers are of great size, freely produced on stout upright stalks; colour a beautiful satin-pink, most unique; one of the best of the new type. 18, 6d. each

NEW HARDY CLIMBER.

THE PAMPAS LILY, OF THE VALLEY

WICHANIA ORIGANIFOLIA—A native of the Pampas of South America, is a perennial, perfectly hardy in England. Its herbaceous, slender diffusely-branched stems are annual, and attain in a few months 20 to 30 fest in height, covering a large surface; the small, dense, dark green very elegant foliage, which defies dust, diseases, and insucts, produces a thick, impenetrable shade persistent until frosts. It is calculated by thousands of small white flowers, similar in shape to those of our native Lily of the Valley, which are occasionally succeeded by small white or red-orange coloured berries.

It is undoubtedly one of the best and finest climbers to introduce in the gurden, and is of the greatest value for covering summer houses, pillars, walts, trellis, sloping banks, bare trunks of trees, balconies, &c., it succeeds as well in the smoky atmosphere of towns as in the country, and will be most welcomed for planting at the sen-side, thriving admirably where most other climbers fail.

In short, it is a most valuable plant on account of the luxuriant growth, without the drawback of

planting or sowing every year as with annua's.

It undergoes our sharpest winters as well as our warmest summers, and delights in good soil and exposed positions. It is of the eas'est culture, and its perennial roots, when est blished, may remain indefinitely in the same place, care being taken to remove the stems when they are destroyed by frost, 1s. 6d.

NEW HARDY TYPE-HYBRID COCCINEA CLEMATIS.

COUNTESS OF ONSLOW A bright violet-purple, with a broad band of scarlet down the centre of each petal, open bell-shaped form, with four to six petals to each flower; very free flowering, quite hardy and a good climber, the flowers are thick in substance, and when cut will keep fresh in water for several days — First-Class Certificate, R.H.S. — 10s. 6d.

DUCHESS OF YORK — A delicate and very plassing shade of pale blush-pink, with a deeper tinge down the centre of each petal, four to six petals to each bloom, free flowering, and a good climber; useful for cutting. Award of Merit, R.H.S. 10s. 6d.

DUCHESS OF ALBANY — A beautiful bright pink, deeper down the centre, softening down

to lilacy pink round the margin; free flowering, and a vigorous grower; useful for cutting. Award of Merit, R.H.S. 10s. 6d. each.

NEW AND RARE HARDY PLANTS.

ACTINELLA GRANDIFLORA-Close growing lanceolate leaves, forming rosettes and

large veltow flowers on short stems; easily grown, quite hardy. 2s. 6d.

ADONIS WALZIANA—Flowers large, yellow, in early spring. 2-3 ft. 3s. 6d.

ANEMONOPSIS MACROPHYLLA—Flowers produced in loose racemes, and are large, exterior sepals purple, interior sepals lilae, summer flowering; prefers shaded position in loamy or peaty soil. 3s. 6d.

ANEMONE LORD ARDILAUN-A gigantic Honorine Joubert, perhaps a little taller, stronger stems, larger foliage, and of great texture; has also a double row of petals. All desiring a specudid border plant should have this. 2s. 6d. each.

ANEMONE PULSATILLA ALBA—Flowers white, produced in great profusion on short

stems; easily grown, and well adapted for the rockery and front row of the border. 3s. 6d. each.

ANEMONE SYLVESTRIS FL. PL. - Flowers perfectly double and pure white, sre large and resembling Chrysanthemums. A most henutiful and useful herbaceous plant, well adapted for cutting, mixed borders, and margins of shrubbery. 3s. 6d.

AQUILEGIA STUARTI-Very dwarf flowers, large and much expanded; the scenals of a deep rich blue with a pure white corolla. A finer plant than A. Glandulosa, and easier grown.

ASTER PURPURIMUS Dwarf, compact babit, forming complete bouquets of deep purple flowers, blooming early in autumn. 1s.

ASTILBE CHINENSIS—Distinct from all others of this family; erect branching stems, terminating with pretty feathery plumes of pink flowers; fond of a moist situation. 2½ ft 3s. 6d.

CIMICIFUGA JAPONICA—Large oranmental folinge, and long compound racemes of white flowers. 3-4 ft. 1s. 6d.

CHRYSANTHEMUM MAXIMUM (G. H. SAGE)—One of the most distinct bards Marguerites; flowers large and abuadant, pure white; florets deeply notched; habit good. 21/2 ft.

GAILLARDIA SULPHUREA OCULATA-Quite a new type of Gaillardia, obtained by careful hybridising and selection. The flower is of medium size, good substance, well set up on long thin stalks, and is very chaste and refined. The colour is pale sulphur, having a well-defined bright maroon eye, giving it a distinctiveness quite unique in this family. It is the most striking of all Gaillardias, whether as a cut flower or in the border. 2s. each.

GERANIUM SANGUINEUM ALBUM-A fac-simile of the ordinary G. Sanguineum, but with pure white flowers; prostrate growing; dense mass of foliage literally covered with white flowers; very free growing. 2s. 6d.

HELENIUM AUTUMNALE SUPERBUM—The great family of Composite has given us many showy and beantiful garden plants, particularly the section Helianthus and its near relations, but it has remained for Helenium autumnale, a species not very attractive in its typical form, to eadow our gardens and shrubberies in this new and improved variety with the most floriferous, the most showy and the most vigorous and hardy perennial plant yet seen in cultivation, grows 4 to 8 feet high, necording to soil, with strong angled stems \(\frac{1}{2}\) to \(\frac{3}{2}\) inch in diameter, branching at the top into twenty to fifty branches, these dividing again and bearing several (five to ten) flowers. The individual blossoms are 2 to 2\(\frac{1}{2}\) inches in dinmeter with wedge-shaped rays, and are of a rich golden yellow colour, the central disc being of the same colour as the rays. A single crown of this plant makes

colour, the central disc being of the same colour as the rays. A single crown of this plant makes one of these tall stems with an oval mass of several hundred hlossoms, a huge hend of splendid yellow blossoms 2 feet or more in diameter, and is a sight not easily forgotten. 1s. 6d. Seed 1s. per pkt. HELIOPSIS B. LADHAMS—This fine berbaceons plant is the result of many years' selection by seedlings, being four yesrs' development from the Scabra Major—a variety which received an Award of Merit—nnd upon which it is a vast improvement. The flowers are four to five inches across, golden yellow, borne on long graceful stalks, and having a slight twist at the end of each petal, giving to the whole flower a charming and starry appearance. When fully developed the plant forms a handsome and symmetrical bush, 4 ft. high, the flowers being produced in large quantities from every joint. The great value of this novelty is that the blooms have such width and texture of petal, rendering them particularly well ndnpted for cutting purposes, lasting in water, as texture of petal, rendering them particularly well adapted for cutting purposes, lasting in water, as they do, for some two weeks. The blossoms are well set up on loug elegant footstalks, a fact which makes them wonderfully suitable for light specimen glass and epergne decoration; or if whole hranches are cut for large vases they have no equal, as they never drop or shatter, but seem actually to grow when treated in this way. 2s. 6d. each.

GRUM HELDRECHI-Large, rich, orange-colonred flowers in late spring, growing vigorously

in almost any soil or situation. 1 ft.

GNAPHALIUM GRANDICEPS-(Australian Edelweiss)-A remarkable and beautiful plant. one of the treasures of New Zealand Alpines; silvery leaves, and forming a neat bush. 3 ft. 3s. 6d.

HEDYSARUM MULTIJUGUM-The most beautiful of the family; presty pea-shaped

flowers of n bright crimson-purple colour; quite bardy and perennial. 1s. 6d.

HEMEROCALLIS AURANTIACA MAJOR Magnificent new species, one of the finest plants for ordinary garden culture introduced for many years. The habit of the plant is very vigorous, the foliage rises to a height of 2 ft., and is of a deep green, the flower spikes are strong, bearing as many as 12 flowers in succession, which are very large, some 7 to 8 in. across, of a rich orning yellow; quite distinct. The plant is perfectly hardy, and we have every confidence in recommending it. The plant is described and figured in the Gardener's Chronicle for July 20th, 1895, where on page 62 Professor Baker states that it "is the finest Hemerocallis I bave seen." First-Class Certificate, Royal Horticultural Society. 3s. 6d, each.

HYPERICUM MOSERIANUM TRICOLOR—A very bandsome shrubby plant;

leaves greenish yellow on green ground; margined reddish yellow flowers with scarlet stamens. 3s.

SIDALCEA MALVEFLORA LISTERI.

IBERIS SEMPERVIRENS, var. "LITTLE GEM"—Of close compact habit; flowers white; well adapted for planting in sunny parts of the rockery. 4 ft. 1s.

LOBELIA, LORD ARDILAUN—The finest yet raised, and the most richly colo red; a glistening crimson-scarlet. 3 to 3½ ft. 1s. 6d.

LOBELIA RIVOIREI—This will prove to be a valuable acquisition on account of its beanty and large light pink flowers. It is a perennual plant, and blooms during the whole summer and antumn. The best culture is in the open ground; we must, however, say that the germination is very slow and difficult, the seeds must absolutely not be covered with earth. Plants, 2s. 6d. each; Seed, 5s. per pkt.

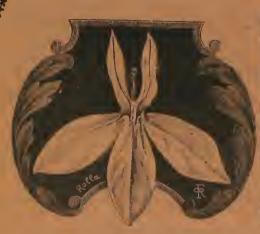

PHYSALIS FRANCHETII—It differs from P. Alkekengi in its much larger size, in the leafstalks being considerably shorter in proportion to the blade, much larger fruits and brighter colours. It is quite hardy and of the easiest culture, requiring only to be planted in any good garden soil, either in the open border or in beds, where it will make a fine display during October and November; great acquisition. 2½ ft. 1s. each; Seed, 1s. per pkt.

PRIMULA CAPITATA CASHMERIANA ALBA—New white flowering variety of this lovely early blooming Primrose, reproducing itself true from seed. The flower heads are much larger than those of *Denticulata Alba*. Per pkt., 1s.

USEFUL FOR HOME DECORATIONS DURING THE WINTER.

PHYSALIS ERANCHETH.

LOBELIA RIVOTRIA

FRIMITAL CAPITATA ALBA.

SCABIOSA CAUCASICA ALBA-A perpetual bloomer, commencing in June and continuing until cut down by the frost; flowers of the purest white 2½ ft. 2s. 6d.

SIDALCEA MALVÆFLORA LISTERI-Hardy, easily grown, splendid for cutting, and of a most charming shade of colour—flowers of a most lovely satiny pink; distinct from all others in cultivation. 1s. 6d.; Seed, 1s. per pkt.

Other NEW PLANTS supplied at Advertised Prices.

PLEASE WRITE US FOR PARTICULARS AND PRICES OF PLANTS REQUIRED NOT MENTIONED HERE.

THE SMALLEST ORDERS, AS ALSO THE LARGER ONES, RECEIVE OUR BEST ATTENTION.

Now the cost of carriage of see's and parcels are considerably lower in price, and goods can reach you in a few hours and direct from us, possessing the best resources and stock, together with the largest and finest facilities for carrying on business successfully to all parts of the World, we are relying on our esteemed customers and the r kind recommendations to still further enable us to add to the usefulness and reputation of our establishments.

HOW TO MANAGE PLANTS, ROOTED CUTTINGS, AND SEEDLINGS SENT BY POST.

TITHERE persons have the convenience and sufficient experience for nursing small plants, at d enjoy seeing them grow, we strongly recommend then having them seut by post, as every care is taken to grow them in such a temperature, &c., that there is no risk about their doing well with a small amount of ordinary care, if the appended instructions are carefully followed.

It must be remembered that plants are like young children; they must be carefully looked after, fed, clothed, and trained in the way they should go, and a little common sense exercised to ascertain their requirements, and to guard against enemies. And should they be forgotten, and get with others of bad character, it is surprising how quickly they will partake of the same habits and disease, and will soon die in sorrow and disgrace. A sweet-smelling bot-bed rather on the decline is preferable,

with the heat at about 65 degrees. When you receive a box of rooted cuttings or plants, immerse them In water at the same temperature from one to two hours. When they are all refreshed, proceed to pot them into small pots, using nice, warm, sandy soil. See that the roots are separated and spread naturally out in the soil without injuring them, pressing the soil firmly. Place them in the fisme, keep them shut close for a few days, be careful of damp, and sdmit air as they get established. Let them be slightly dried each day, but do not allow them to flag from too much air or sun. And if a person possesses a stove, or even a warm greenbox with the too governed with close that these of grow under an air-tight hand-glass or wooden box with the top covered with glass, than those of their own striking or raising.

NEW STRAWBERRIES.

LARGE-FRUITED PERPETUAL SAINT JOSEPH-This is really the first true perpetual large-fruited Strawberry ever offered. During last season a bonn'eous crop of sple did fruit was gathered up to October. The flower stems are produced in succession from May to autumu, and bear an abundance of fruit, for which reason some slight support for them is almost indispensable. The fruit is of good size, dark red in colour (also red inside), solid, firm, very juicy, and of first-rate quality. Early runners planted separate during summer have also produced a very good crop the same autumu. Obtained a First-Class Certificate from the Société Nationale d'Horticulture de France. 12s. per doz.

LOUIS GAUTHIER—A most remarkable variety, producing two good crops of fruit during the year. Beautiful fruit can often be picked during the early part of November. Fruit white, very sweet, and deliciously perfamed. The value of this variety is beyond question. 4s. per doz.

STRAWBERRY LARGE-PRUITED PERPETUAL, SAINT JOSEPH. (xxviii)

PRICES AT WHICH PLANTS, ROOTED CUTTINGS, & CUTTINGS ARE SOLD.

All prices herein denote piants established in pots, and the style of packing of such should be left to us, the material only being charged for; or, if desired, the soil can be shaken away, and nearly all plants sent by Letter or Parceis Post. The following are supplied as rooted cuttings and outtings, viz.:—Ageratums, Bouvardias, Calceolarias (Shrubby), Chrysanthemums (new varieties, outtings half price), Coleus, Fuchsias, Heilotropiums, Lantanas, Salvias, Tropæolums, Verbenas, and Vlolas. Plants priced 6d. a rooted cutting would be 4d., and a outting 2d.

Zonal and other Pelargoniums differ only in price thus—if priced 1s., rooted outlings will be 9d., and outlings 6d., also sent by post, and so on in proportion to the price of the plant. Plants sent by post, without soil, up to the ilmited weight, to all parts of the world

BOXES AND POSTAGE AT ACTUAL COST.

Nearly all the Plants and Seeds mentioned in our Catalogues are in readiness, at all Seasons, to be sent to any part of the World on receipt of the price stated, adding one-third extra for India, China, Australia, and New Zealand, when extra strong plants must be selected to outlive the voyage. Any other flowers not herein mentioned will also be supplied at their fair and proper prices.

The undermentioned plant, although not by any means a novelty, created much attention in the United States and on the Continent, more particularly as a forage plant, but, at the same time, it is of ornamental value, and no better plant could be employed for naturalisation in semi-wild spots, and also intermixed with other vigorous herbaceous plants, the border, pleasure grounds, or shrubbery. Those of our esteemed customers who would like to become acquainted with this wonderful plant can now do so. Per pkt., 1s.

SACALINE (Polygonum Sachalinense).

THE FORAGE PLANT.

Is perfectly hardy, even in Siberia; flourishes in the Indies. Requires no ploughing before planting. Needs no cultivation, no manuring, no re-planting. Roots penetrate deep into the soil. Once planted stands for ever. Endures severest drought with impunity. Grows in poorest soils. Luxuriates in wet lands. Thrives where no other forage plant will grow. Young shoots and leaves eaten as a vegetable. Stems and leaves, green or dry, greatly relished by eattle, sheep, and horses. More nutritious than Clover or Lucerne. Gives three or four cuttings (crops) per year. Produces 90 to 180 tons of green forage per acre. Grows 14 ft. high hy June. Excellent soil enricher. Planted at any time. Affords shade to cattle in summer. Protection against storms in winter. Floods will not destroy it. Fire will not kill it. Cattle cannot trample it out. Endorsed by the highest authorities.

Extract from GARDENERS' CHRONICLE, July 22nd, 1893.

Few Perenuials have a nohler effect on the lawn, or wherever there is sufficient space, than Polygonum Sachaliuense. One drawback it has is that it throws its Asparagus-like shoots about in profusion, and not always where they are wanted. A gravel path, as we know, offers no resistance to this very pushing intruder. We have cultivated this plant since its introduction for purely decorative purposes. The young white shoots are edible, but they do not rival Asparagus. Its splendid foliage may be made use of for garnishing dessert and packing fruit.

The trials made in France on the forage uses of this Polygonum have called the attention of

cultivators to it. The experiments made are conclusive as regards the question of fodder. The total yield can be reckoned at about 95 to 195 tons per acre. Cattle are exceedingly fond of it.

The cultural difficulties are not worth mentioning, and during winter no protection is needed. We may add that the Sacaline is a forage plant with an assured future. Chemical analysis has

demonstrated its superiority in nutritive principles over other fodders.

Compared with dried Clover and Lucerne, which contains only 16 per cent, of nitrogenous and 3 per cent, of fatty matter, the analysis is very favourable. In fact, it is shown that, without cultural care or cost of manurc, Sacaline prospers in all soils and all climates—cold, damp, dry, and by the seaside—and that its yield is so much more considerable, as its growth is prolonged until the autunin.

Its vegetative power is the same in sand, on hanks, slopes, or in flat marshes. Its success in the South, as well as in the North, is assured, in spite of its northern origin. The Government Report from South Australia declares that "The cattle and sheep relish it."

From the JOURNAL OF HORT/CULTURE, May 3rd, 1894.

The statement of a daily contemporary is that Lord Morton is growing the Giant Knot Weed, Polygonum Sachalinense, with a view to test its utility as a fodder plant. It grows vigorously on comparatively poor soils, and is not materially affected by drought. It is also being planted in many parts of France, where, it is stated, the succulent shoots are much appreciated by the cattle.

From the GARDEN, September 2nd, 1893.

In the protracted drought of the present season, horticulture may be able to come to the aid of agriculture, just as, twenty-five years ago, the gardener's art helped the vine-grower out of his difficulties by showing him how to make use of the remedy of grafting vines on the phylioxera-proof American stocks.

The remedy in the present case is a robust and vigorous-growing plant, equally unaffected by excessive heat in summer and extreme cold in winter-namely, Polygonum Sachalinense, &c.

HENRY CANNELL & SONS'

(F.R.H.S., M.S.A.)

ILLUSTRATED

ORAL GUIDE

FOR 1898.

Our system of transmitting Plants, Cuttings, and Seeds through the post to all parts of the world, is emphatically pro-

nounced, by all who have had experience of it, to be of the greatest benefit to all lovers of the garden.

Potted Plants at the very lowest price consistent with best strains, correct naming, and size.

A REMITTANCE IS REQUESTED FROM UNKNOWN CORRESPONDENTS.

To all who accompany their orders with Cash we offer liberal treatment.

All Cheques to be made payable to H. CANNELL & SONS, and crossed Martin's Bank, SWANLEY, KENT. Post Office Orders to be made payable at SWANLEY, KENT. Sums under 5s. can be remitted in Stamps.

When a variety of Plants is ordered (except those advertised at a cheaper rate), extra kinds will be presented to partly compensate for Carriage.

THE TRADE SUPPLIED ON OUR USUAL TERMS.

Torticultural + Establishment,

SWANLEY, KENT.

SEED FARM, ETNSFORD

(L. C. & D. Railway), both adjoining the Stations.

A few Important words to all our Friends and Customers.

The proximity of the rail to the nursery—the London, Chatham, and Dover Railway Co.—is worthy of attention, as this line, heing in immediate connection with all the others out of London, enables us to easure rapid transit to all parts.

The whole machinery of our aursery is constructed to carry on a large and rapid trade of the best and most serviceable plants and seeds in cultivation, at the very lowest possible prices consistent with quality, and we beg that every lover of the Garden will

them, and we promise that they shall not depart without seeing something highly interesting.

Although every care will be taken in the nacking and sending of plants, seeds, &c., risk of every description must be borne by the nurchaser immediately they are delivered

to the Railway Company.

Every article is charged at the very lowest price, therefore no credit can be given. Onr object is to give the ready-money buyers the advantages they are really entitled to. It may happen that prices lower than ours may sometimes be quoted. This invariably means false economy in a variety of ways—good things must be looked after by good men, who must be fairly paid, and good strains are only procured by unceasing labour and care.

Full instructions as to the proper mode of forwarding must accompany each order, as it is calculated to expedite transit of goods, and save vexatious mistakes. All goods are advised the same day as forwarded, and the invoice posted as soon as possible afterwards.

Say by what rail. Please to write the address plain and in full on each order. No complaints cutertained unless made immediately on receipt of goods.

The greatest care is exercised, and utmost liherality shown, when the selection of sorts is left to us.

It is particularly requested that all small Orders be accompanied with remittance, to avoid the necessity of Booking.

Returned Empties.—As all Carriers refuse to receive these naless PREPAID, and they are usually so much damaged during transit that when they reach us they are aearly useless, all packing material will be charged as low as possible, and CANNOT BE ALLOWED FOR IF RETURNED.

We have taken more prizes for Fuchsias than any other Firm at the great Londou shows, and will send every particular how to grow, show, and getithe first prize for them, for three stamps.

All orders by post will be dealt with precisely as if given personally. As the season advances, and the New Plants become cheaper, so are the prices lowered accordingly; and those who send above their value will have additional plants put in to make up the full amount.

It often happens that we are sold out of rooted cuttings of some varieties, and plants are shaken out of pots to complete orders, coasequently plant price must be charged.

When plants are publicly advertised by us, the usual trade allowance will not be male.

To avoid delay and disappointment, all business communications must be sent direct to the firm, addressed "H. CANNELL & SONS," otherwise they will remain unnoticed. Telegraphic address, "CANNELL, SWANLEY."

All Cheques to be made payable to H. CANNELL & SONS, and crossed Martin's Bank, Swanley.

As the numbers shown against the plants herein are altered annually, it is particularly requested that the Edition of the Catalogue from whence such numbers are selected be quoted in ordering, so as to avoid mistakes.

We have every facility for keeping a large stock of everything enumerated in this Catalogue, and are therefore determined to adopt the system of quick sale and ready money. All who enclose remittances will be most liberally dealt with.

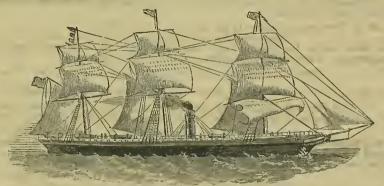

The Home of Flowers is open for business, &c., from 6 o'clock a.m. until 6 p.m., and 5 o'clock p.m. on Saturday. No visitors admitted on Saturday evenings and Sundays, Closed on all Bank Holidays,

Customers are particularly requested, when sending orders for friends (with their own), to do so on separate papers, with each address written plainly, to prevent mistakes.

WHEN SPECIAL QUOTATIONS ARE GIVEN, CUSTOMERS ARE KINDLY REQUESTED TO MENTION SUCH.

H. CANNELL & SONS, F.R.H.S.,

Importers and Exporters of all New and Choice Florists' Flowers to and from all parts of the World.

FOREIGN AND COLONIAL NOTICES.

Plants and Sceds are despatched to India through the Indian Parcel Post, and also by the

ordinary mail. Customers will kindly notify by which service they wish their parcels sent.

In America, Australia, India, and Cape Town, the general expression amongst both the trade and amateurs is "None are so successful in exporting plants as Cannell & Sons," consequently we need hardly say our trade has increased to a very great extent.

When Plants are received abroad let them lie in milk-warm water for a half-hour, without removing the packing from the roots; then napack and put in pots, according to size, being eareful to shade from the sun until they make fresh growth.

ALL ORDERS MUST BE FULLY PREPAID.

Telegraphie address, "CANNELL, SWANLEY, ENGLAND."

OUR FOREIGN TRADE.

E have now so perfected the system of sending plants and seeds into the most remote parts of the world that sneeess is no longer an uncertainty.

AUSTRALIA, NEW ZEALAND, INDIA, AND CHINA.

S there any difficulty in getting plants and seeds out alive and in good condition to the most distant parts? No, none whatever. We have exported thousands of cases with far more success and less expense to those furthermost parts than has ever been done before. The main thing to ensure success is to let us have the order early, giving ns time to prepare the plants, and to send at the exact and best time, and in all cases the way of packing had better be left entirely in our bands. Our post system for most things is certainly prefcrable, but such as Azaleas, Camellias, Fruit Trees, &c., should be left to us. Chrysanthemms we grow many thousands, especially for foreign trade; and there is bardly a show but what the plants that we have sent out are not figuring most prominently.

Mr. Rash Behary-Roy, Queen's Street, Scrampore, India, 4th August, 1897.

I am glad to inform you that the Chrysanthemums have been received here in very good condition. All of them have put forth new shoots during the journey. Many thanks for them.

Mr. H. Kyle, Cowper Street, Greymouth, West Coast, New Zealand, 3rd March, 1897.

The Chrysanthemums I got from you arrived in good order, and I must give you great credit for the eareful way they were packed.

Mr. Jas. Forgan, Crystal Brook, South Australia, 2nd August, 1897.

I received your Chrysanthemum Catalogue, and am surprised at the size and completeness of it. Re seeds I had of you in February last, I have some grand plants from them, several in bloom. I shall have a splendid show in a few weeks.

Mr. E. J. Cann, Paterson, New South Wales, 26th July, 1897.

The plants I received from you last year arrived in splendid condition. All of them took root, notwithstanding the dry season which followed their arrival—the rainfall here for four months only being two inches.

Mr. J. Woolcock, Gardener to Rt. Hon. Chief Justice Way,

Montefiore, North Adelaide, South Australia, 18th May, 1897.

Lalso thank you for the splendid way in which you packed the sceds, and estecially the

I also thank you for the splendid way in which you packed the seeds, and especially the Chrysanthemnus. I saved every one of them, and have them in bloom now.

Mons. F. Coufourier, Jardinier, Villa Victoria, Gr. sse a'm, France, 13th Aout, 1897.

Vos plantes grasses sont arrivées en parfait etat vont je vous remercie infiniment.

JOHN MATHER, Esq., Theodore Street, Ottawa, Canada, 18th December, 1896. I had great satisfaction the past season in the result of the seeds and roots procured from you

P. W. MACKINNON, Esq., Mupooril, N.W.P. India, March 10th, 1897.

You will be glad to bear that the Geraniums and Pelargoniums arrived in very fair condition. only five of the latter being dead, all the rest are flourishing, as are all the Roses. I am much obliged to you for all your trouble in packing. I will get out more plants next winter.

Miss M. S. Davie, Rono, Nevada, U.S.A., December 18th, 1896.

The plants have to-day arrived in good condition. Hope they will do well, so that I may send for some more.

Qta. do Ribeiro Sccco, Funchal, Madeira, December 20th, 1896.

Miss Alice Taylor thanks Messrs. Cannell for plants, which gave her great satisfaction. The Rose trees were in such good condition that they are in leaf already, and everything else doing very well.

Mr. Leonard Brown, Hon. See. National Amateur Gardeners' Association,
Seven Arches, Brentwood, April 13th, 1897.

I bave heard from Cape Town that the Carnations you sent out for me arrived in splendid condition. Mr. Tyson says the packing was the hest he has seen.

J. II. HOFMEYR, Esq., Hof Street, Cape Town, February 3rd, 1897.

The Strawberry plants I imported from you are doing very well, and are now established.

P. C. TREEECK, Esq., Pastoral Exchange, O Connell Street, Sydney, N.S.W., February 22nd, 1897.

Many thanks for your new catalogue. Allow me to compliment you on it, it is more like a book of reference. Mr. H. L. White has exhibited some really good Chrysanthemums he got out from you. I find your Begonia seed the best.

G. T. SMITH, Esq., Nurseryman, Smithfield, Ashburton, Canterbury, N.Z., January 8th, 1897.

I duly received the plants in perfect condition. Many thanks.

Mrs. Buller, 36, Porchester Square, W., February 22nd, 1897. My son, to whom in South Africa you sent Pelargoniums, is very pleased with the condition of plants.

P. W. MACKINNON, Esq., Mupooril, N.W.P. India, January 18th, 1897.

By last week's Indian Parcel Post I received two boxes of roses which, I am very glad to say, arrived in the most perfect condition. The whole lot—43 in all—are as fresh and green as if they had only travelled from Swanley to Norwood. Very many thanks for sending them

so well packed.

Mr. Thos. Palmer, Kopuru, N.Z., December 9th, 1896.
We in this far off country were much pleased to see your success at Chicago. I always pictured you as a man with a well-balanced mind—much pleased to see old England victorions. What we have had from you are a success. Wishing you well.

Mr. F. Tolley, Adelaide, Australia. December 15th, 1896. The Cannas have come safely to hand and all in good condition. Thanking you for your liberality.

J. W. Minchin, Esq., Rocklands, Ootacamund, Madras, India, April 21st, 1897. I have received from you the seeds ordered, and have found them exceedingly good-all have germinated readily.

VERE CALDWELL, Esq., "Pontresina," Quilinus, Buenos Ayres, March 31st, 1897. Thank you for the seeds, which arrived safely by post.

W. A. M. Denison, Esq., Kintyre, Maskeliya, Ceylon, April 7th, 1897. I enclose Certificate of Award (Silver Medal) secured for Dahlias from bulbs you sent me out in December last.

Mr. S. V. Buandarkar, Jambulwadi Lane, Bombay, India, March 26th, 1897. Thanks for the plants; they are in prime condition.

C. Wise, Esq., Mombasa, E. Africa, February 27th, 1897. I have much pleasure in acknowledging the receipt of the plants, which arrived in good condition. Your mode of packing for foreign parts is the best I have ever seen. I have recommended your seeds, &c., to many here.

Mrs. Barston, Stonecroft. Epsom, Auckland, New Zealand, February 27th, 1897. The Bulbs ordered from you arrived in good condition. The Gloxinia seed I had of you last year produced me a splendid display; their colour and size surprised all.

Mr. H. Fairer, Public Park, Uitenhage, Cape Colony, March 8th, 1897.
The Dahlia and Tropcolum tubers came sufely to hand this morning. I am very pleased with them, and shall send for some more next planting season.

Mr. Geo. Green, Gardener, Harman Street, Addington, Christchurch, New Zealand, June 5th, 1897.

The seeds I had from you last year gave every satisfaction. The Asters were very fine, and were quite the talk of the neighbourhood. Many thanks for your splendid Catalogne.

Mr. Jas. Forgan, Crystal Brook, South Australia, May 12th, 1897.

I received seeds from you in February. They arrived in first-class condition, and up to time of writing the young plants are doing splendidly, especially as the season out here is against them. The Pagnin have recognized for all the season of t them. The Begonias have grown into fine plants, and the Rannnenluses and Anemones are just coming over ground.

21, Rua do Alecrim, Lisbon, Portugal, June 25th, 1897. Mrs. Countenay Richards begs to acknowledge the cuttings of Carnations and Fuchsias, which arrived in perfect condition. Kindly let her know what she owes you.

C. E. OLLENBACH, Dehradoon, India, December 29th, 1897. Chrysanthemums received in A1 condition. Thanks for gratis plants.

C. Ward, Esq., Postal Box 44, Alexandria, Egypt,

May 6th, 1897.

I have received the three boxes containing 45 plants all in good order. Your packing and your goods are perfect; you may well say you can send them to Australia in safety. The Chrysanthemmus have sent out shoots in the boxes 2½ inches long; Tuber Begonias ½ inch long, most of them. I lost a great deal in Lilies I had out from England from another firm; they were packed very wet, and I received them perfectly rotten.

M. D. Foscolo, Esq., Constantinople, March 8th, 1897. The Cbrysanthemums you sent to Mr. Mange, also to Mr. P. S. Schilizzi, have arrived in perfect condition. Send on the enclosed list.

J. Jones, Esq., Shipbuilding Co., Constantinople,

I received the seeds and plants in good condition, and have no doubt they will all turn out as good as usual. I have tried both Germany and France, and been sadly disappointed.

Villa Lorenzi, Rifredi, Italy, March 14th, 1897. Mrs. EDGAR MAITHEWS was much pleased with the plants sent her two years ago, and would be obliged by Messrs. Cannell sending her the following order. The Primroses and Polyanthus from Messrs. Cannells' seeds are now a perfect sight.

> Mr G. Bornemann, Blankenberg, Havz, Germany, June 22nd, 1897.

The Dahlias arrived in splendid condition.

Mr. J. Woolcock, Gardener to Rt. Hon. Chief Justice Way, Montefiore, N. Adelaide, May 15th, 1897. Chrysanthemams to hand all safe, and you will be surprised when I tell you that every one is now in flower. I am delighted.

STEPHEN NOWILL, Esq., Constantinople, January 19th, 1897. Please send the following. I leave the choice and price entirely to you, as I have always been satisfied with what you have sent me before.

Mons. F. Mars, Anvers, Belgique, February 24th, 1897. Your seeds gave great satisfaction. I had 50 very fine Double Petnuias from one packet of your seed.

Mr. J. S. Black, Connaught Range, Frimley, Farnborough, Hants,

March 2nd, 1897. I forward you herewith cheque from Mr. Archer, H.B.M. Chargé d'Affaires at Bangkok, Siam, for roses supplied. You will be glad to hear that they arrived in very good condition and are doing well.

Mrs. Bolton, Madeira, March 9th, 1897.

Your seeds are doing beautifully; I never had such good ones. Mr. L. M. Short, Kingston, New York, U.S.A., March 2nd, 1897.

I have tried a good many seedsmen, but have not found any that equal yours. Your Pansy seed is especially choice.

Mrs. Edgar Matthews, Villa Lorenzi, Rifredi, Italy, March 14th, 1897. Having been much pleased with the plants sent her two years ago, would be obliged by Mr. Cannell sending her the following order. The Primroses and Polyanthus from the seed supplied are a perfect sight at present.

Messrs. D. HAY & Son, Montpelier Nursery, Auckland, New Zealand, December 24th, 1897.

We received the plants in the best condition possible. We shall save all the Chrysanthemums and more than half the Carnations and Pelargoniums, we tender you our best thanks for such good results.

IMPROVED PLANTS.

Nothing is hailed with more joy by all lovers of Florienlture than gradual and marked improvement in our Florists' Flowers from year to year. Changes without attractiveness are of little or no value; new colours and stout dwarf growth are qualities immediately sought for. We should be glad to hear from any amateurs or gardeners having new and improved varieties of plants (also vegetables, see Seed Catalogue) enumerated in our Floral Guide; they must be a decided advance on all existing kinds.

Good grow them they only require the ordinary cultivation of the Fuchsia, and if placed in a little heat early they will produce innumerable quantities of bell-shaped flowers, of beantiful and various colonrs. For baskets, vases, button-holes, and decorations, they are most valuable. They continue to bloom in an ordinary greenhouse all the winter, and if planted out in May they will form one of the most continuous flowering shrubs until the frost comes, when they can be easily lifted or propagated by enttings taken from the hard wood early in September, and struck in a mild bottom heat.

DOUBLE FLOWERED.

1. THOMPSONI FLORE PLENO-Habit and foliage the same as the old Thompsoni; very double flowers of a rich orange, veined crimson; novel; for cut flowers a gem. 9d.

GENERAL COLLECTION.

- 4. ANNA CROZY-Deep pink, shaded lilac.

- VEXII.LARIUM VARIEGATUM -Attractive. 9d. each; 6s. per dozen.
- 40. SELLOWIANUM MARMORATUM (Stove)-Most lovely foliage. 1s.
- 41. SAWITZI More variegated than Souvenir de Bonn. 1s. 6d.

HIESE cousist of small, scaly corms or tubers. Shake out the dry soil any time during the winter, and about March or April place three or four in a longitudinal position in a 6-inch pot, just below the surface, put them in a warm temperature, free from cold draughts, as they like plenty of heat, water gently until they get into full growth, and after flowering gradually dry them. The ordinary rich soil suits them, and if well cared for, they are splendid things for decoration all through luly August and Santana College and the surface of th decoration all through July, August, and September. One of our 100-feet houses has again been a splendid sight. Tubers, from October to March, 3d.; our selection, 2s. 6d. per dozeu.

- 1. AMBROSE VERSCHAFFELT-1s.

- 14. GARIBALDI
- LONGIFLORA-1s. 16.
- LONGIFLORA MAJOR-1s. 6d. 17.
 - LONGIFLORA ROSEA. 19.
 - MAUVE QUEEN-1s. 20.
 - MAGNET.

- MADAME AMBROSE VERSCHAF. FELT-ls.
- MAUVE PERFECTION-1s.
- 24. MOORE'S PERFECTION.

MARGRETTA.

All those not priced, 9d. each.

PATENS

27. PINK PERFECTION.

28. RETICULATA

29. ROSEA MAGNIFICA-1s. SIR TREHERNE THOMAS-18.

The prices quoted are for potted plants.

MOST useful class of bedding plant, flowering from June until October, and varying in height from 4 to 14 inches, the flowers are lasting and do not fade in colour, but continue the same throughout the flowering scasor.

- CANNELLS' DWARF-The dwarfest, 6d. each; 4s. per doz.; 20s. pcr 100; April, 16s. per 100.
- 4. JOHANNAS PFITZER-A rich shade of colonr.
 - 5. PERLE BLEU-Taller than No. 2.
- 6. SWANLEY BLUE-6d. cacb; 4s. per doz.; 20s. per 100; April, 16s. per 100.

variety; dwarf, bnshy, and effective. 8. TAPIS BLANC .- Dwarf and compact,

white flowers; useful for massing.

7. ENFANT DE PARIS-The best white

9. THE ZOO .- Habit compact and dwarf, bright shade of blue. A fine variety.

10. LE GEANT-Adapted for the centre of large beds and other prominent positions. Good strong habit, free flowering, and a rich blne tint.

All those not priced, 6d. cach; 3s. per doz. Rooted little plants, 1s. 6d. per dozen. Seeds, 3d. per packet.

UR bed of seedlings last year was again splendid. Planted in a good open situation, with deep rich soil, they would be sure to give a charm in every garden. Seed from this superh collection, 6d. and 1s. per packet.

So good are they that we keep no named kinds, but we have a quantity of splendid nunamed seedlings that will be sure to give satisfaction. It is impossible to find a more distinct selection, consisting of the richest coloured selfs and the most beautifully striped. 3s. per dozen, small; established in pots, 4s. per doz.

HESE are amongst the most charming sights we know of, and are certain to attract notice from those most oblivious to the beanties of flowers, their perfect form and wonderful colouring rendering them the cynosnre of all eyes; whilst, in addition to their great loveliness, they possess that great desideratnm in flowers-long-lasting blossoms.

SEED-Cannells' Show Varieties, 2s. 6d. per packet. Alpine 33 18.

uriculas, named garden varieties, free flowering and effective, our selection, 6s. dozen.

Seedling Alpines, of a most beantiful strain and in great variety, 6s. and 10s. per dozen; named kinds, 12s. and 18s. per doz.

EGO'NIA

N character they are very much like a potato. In winter place the tubers on the top of small pots, three parts full of soil, in some warm, dry, light corner of the greenhouse, so that they may be examined every week; and if they are found to be at all mouldy, they must be dusted immediately with snlphnr. Ont of this hairy-like tuber, as spring approaches, a small red bud will show forth from the centre; then re-pot into a good, rich, light peaty soil, just leaving the bud visible, and in about a fortnight, leaves will hegin to unfold, and another fortnight, in a nice warm moist temperature of 60°, blooms will be showing; and a month after

this let the plants be shifted into 5 or 6-inch pots. Iu a month or six weeks the pots will he filled with roots, and if large plants are wanted, shift into a 7 or 8-inch pot, for deep, good firm potting, as per engraving, which it fully illustrates. Be snre that there are no green fly; if so, the huds will drop off, but it is very seldom that inseets attack them. Be very particular never to allow them to hecome dry; if so, they are injured for the season, and during hot, dry weather, give two waterings, and they will grow and hloom amazingly. Shade during the summer, but admit plenty of air and light—light is one of the great things—just shaded from the snn, only kept near the glass; no syringing, but occasionally a good drenching with rain water from a coarse rose; avoid dnst and cold draughts, administer weak liquid manure, and keep them growing as long as possible. Our Real Manure is unquestionably the hest; if this is not at hand, diluted cow or horse manure. When the plants show signs of decay, lay the pots on their sides in some dry place, in Decemher, shake away all soil, and place the tubers on the top of soil in the pots hefore mentioned. A house can he kept in a hlaze of hloom all the

mentioned. A house can be kept in a blaze of bloom all the summer with Begonias, and all the winter and the remaining parts of the year with Zoual Pelargoniums, either of which only require the treatment any intelligent man can give them. Attention is the great thing.

For the full History, &c., of the Begonia, see Book by B. Ravenscroft, 1/2 post free.

SEED SOWING AND SEEDLING RAISING.—First fill a pot or pan half full of some substance to make it porous for drainage, then cover over with moss, or something similar, to make a separation, and then fill to within a quarter of an inch from the top of light, fine-sifted soil, previously charred or hurnt, so much the hetter, so as to kill all animal and vegetable life; press down level, and on it sprinkle the seed; place over this the smallest coating of the very finest eccoa-nut fibre and sea sand or soil, just so as to support the seed in their places. Keep in total darkness, with paper or glass over the top, in a temperature of 60° to 70°; as soon as they show signs of life above the soil gradually expose, and as soon as they have roots a quarter of an inch long, loosen round earefully, make small holes in similar-prepared soil in small pots. They are too small for manipulation; in fact, they must not be handled. Have a wine-glass of water, dip a pencil in it (use it as a dihher), and by this means these small seedlings will hang to it, and can he easily placed into the hole previously made for them, gently press down, and place in a similar temperature for a few days afterwards; gradually expose and reduce from 60° to 50°, and keep near the glass. The sun, after Fehraary, must not he allowed to shine long on Begonias under glass, as they dislike extreme heat, sun, and cold; they delight in, and must be kept at. a medium temperature.

THE GOLD CLOCK AWARDED TO H. CANNELL & SONS.

FOR NEW DOUBLES FOR 1898, SEE NEW THINGS.

THE GOLD CLOCK COLLECTION.

The highest and most important award yet given, and indicating the excellency of our strains.

CANNELLS' BEGONIAS.

Awarded the only Silver Cup exclusively for Begonias at the Temple Show, 1893, 1894, 1895, and again in 1897.

CANNELLS' DOUBLE BEGONIAS. (10)

UR : BEGONIAS.

MRS. NEWMAN-Large fine flowers of a pleasing and attractive shade of pink; a good exhibition variety

SEYMOUR LUCAS-Splendid rich erimson, prohably the finest; good shape, perfect habit

3s. 6d. each.

LITTLE DEAR BEGONIAS - It was us who first raised rosehud-shaped flowered Begonias, and called by that name in consequence; and it is to this day known and spoken of as the loveliest for shape and colour, even of the many raised since, and may well be compared to a Camellia, as the photo will couvey. It is from this, during the last six years, we have given much

attention in getting up a stock sufficient to raise and offer seed from. All who desire the very prettiest and loveliest of all doubles should certainly have a packet of this, as they are gems of gems in every greenhouse wherever grown. Per pkt., 1s., 2s. 6d., and 5s.

DOUBLE BEGONIAS. ORANGE-SCARLET.

 ECLAT—Bright orange-searlet. 1s. 6d.
 EDWARD BANKS — Medium-sized, well-formed flowers; good habit, soft red. 2s.

213. THE LADY - Good dwarf vigorous habit; well-formed white flowers. F.C.C. 2s.

BEGONIAS WITH SMALL FLOWERS.

215. WORTHIANA-Orange-scarlet, a favourite for bedding, and admired wherever seen. 6s. to 9s. per dozen. Special prices for large quantities.

We have now a sufficient stock, and have also had sufficient experience of the Begonia as a hedding plant (our lawn heds and horders having heen full of the best during the two last summers) to proneunce it as eminently suited to this purpose. Nor are we alone in this opinion; it is the general verdict. Seedlings make a lovely bed; but to have all the plants of one regular height, shape, and colour, a Stock must be propagated as one would Zonal Pelargoninms. They can be propagated just like Dahlias, by cutting the Tubers at the eyes just after they have started. Plant the bulbs ten inches apart, and take them up when the frosts come. This is really all the culture needed. Begonia Worthiana has proved itself a good bedder of the small flowering section.

BEGONTA WORTHIANA.

The best bedding variety in cultivation.

216. CASTANÆFOLIA-Although not a tuberous and purely evergreen variety, it makes a capital bed planted 9 in. from plant to plant. It has a very lovely effect, and, like the others, finds favonr everywhere. 9d. each; 6s. per doz.

SEEDLINGS (SINGLE) FROM OUR FINEST NAMED COLLECTION.

No. 1 QUALITY-Selected to colour, and almost equal to named varieties. 12s. per doz. No. 2 QUALITY—Selected to colour. 7s. per doz.; 45s. per 100 (dry tubers).
No. 3 QUALITY—Selected to colour. 4s. per doz.; 25s. per 100
MIXED—Suitable for bedding. 20s. per 100 (dry tubers).

Special Prices for large quantities.

SEEDLINGS (DOUBLE) FROM OUR FINEST NAMED COLLECTION.

1st QUALITY-Various colours. 18s., 24s., and 30s. per doz. (dry tubers). 2nd QUALITY—Various colours. 10s. per doz.; 70s. per 100 3rd QUALITY—Various colours. 6s. per doz.; 40s. per 100 MIXED COLOURS—For bedding. 6s. per doz.; 40s. per 100. SPECIALLY SELECTED-3s. 6d. to 5s. each.

Many of these are equal to the named kinds, and none but a trifle inferior.

We have a stock exceeding in extent and quality to any house in Write us for quotations before placing your orders elsewhere. Europe.

We are now raising seedlings by thousands, and the result is, from our scientific hybridising, we have many of the finest (voted First-Class Certificates, and universally pronounced the finest doubles ever raised). We have at least 200,000 various bulbs, and all who wish to introduce a great feature into their Conservatories or Gardens should have our seedling doubles.

WINTER-FLOWERING AND EVERGREEN VARIETIES.

Our 100-ft, house during autumn and winter is a grand sight. No other kind can lay claim to so many advantages as a winter-flowering plant as this class, and noue are more useful than the summer-flowering varieties.

217. ARGYROSTIGMA ELEGAN. TISSIMA - Foliage spotted silver; free, vigorous. 1s.

218. ARGYROSTIGMA GIGANTEA -Larger foliage, but not denticulated like above.

219. ASCOTENSIS-One of the finest; large

clusters of a beautiful pink colour.

220. BIJOU DE GAND — Dwarf bushy habit; soft piuk flowers. 1s.

221. CARRIERI-Flowering more particularly during the winter. Beautiful pure white blooms in nice clusters. 1s.

SPLENDID FOLIAGE BEGONIA,

306. ARTHUR MALET - The richest coloured variety yet introduced; an improvement on Louise Closon. 1s. 6d. each.

all plants the Bouvardia, in onr opinion, excels for cut flowers, no matter whether for buttonholes, honquets, or table decoration; a spray of it is sure to be most prominent and pleasing, and the odonr of several kinds is deliciously refreshing, and if well grown they will more or less continue flowering nine months out of the year. They only need the ordinary course of cultivation of the winter-flowering Zonal Pclargonium; hitherto they have been treated as a stove plant, whereas they only need a temperature not higher than 50° or 60°; and in the summer to have every attention like a specimen Chrysanthemum, and on the first appearance of cold weather to he taken in the honse, and when growing and flowering to he supplied with liquid manure occasionally.

1. ANGUSTIFOLIA (species)-Scarlet.

4. BOCKII-Deep coral, tuhe and hase of petals pure white.

8. DAZZLER—Rich scarlet.
11. HOGARTH—Good hahit, scarlet.

35. FLAVESCENS-Distinct yellow. 37. PRESIDENT GARFIELD, syn.

ROSEA FL. PL.-Pink flowers.

Flowering plants in Autumn, 1s. 6d. each and upwards. All those not priced 1s.

HE secret of having good beds of Calceolarias is getting healthy green plants, perfectly free from insects. When planted out very early, good, deep, rich soil is essential, with a quantity of mannre below the plant; this will prevent them going off as they usually do. The main thing is to grow them vigorously, by always having rich soil to root into. Too much moisture causes them to die off.

AMPLEXICAULIS—Lemon colour, good for large beds and borders, late blooming. 6d.

each; 5s. per dozen.
2. AMPLEXICAULIS ALBA (species) creamy white. 1s. each; 8s. per dozen.

3. AUREA FLORIBUNDA - Yellow;

fine. 8s. per dozen. 4. GAINE'S YELLOW - Good bedder. 2s. 6d. per dozen; rooted cuttings in spring, 5s. per 100.

5. GOLDEN GEM - One of the best 2s. 6d. to 3s. 6d. per dozen; rooted enttings in spring, 6s. per 100.

6. PRINCE OF ORANGE-A beantiful variety. 2s. 6d. to 3s. 6d. per dozen.

7. SULTAN-Fine dark variety. 6d. each; 5s. per dozen.

Taken from cold frame in the spring at the usual reduced prices.

TIESE give a very beantiful and tropical aspect to pleasure grounds, by their stately growth and broad, massive foliage, relieved by rich crimson-scarlet, orange, or yellow flowers during the late summer months; their foliage, comprising various shades of rich green, glaucous and chocolate-crimson leaf-tints, fits them admirably for effective groups, their appearance rendering them a striking contrast to other plants.

They are also invaluable for large pot plants as portable specimens in pleasure-ground decoration, and equally so for summer groups in large conservatories, in which their great diversity of foliage appears to advantage, and they are very ornamental for any purpose. The following are the best for conservatory, porches, or standing in tubs, pots, &c.; about a garden they are grand objects, and for beds or single clumps are the finest flowering varieties of this family we ever had.

STILL ONE OF THE MOST USEFUL CANNAS IN EXISTENCE.

97. KONIGIN CHARLOTTE-Very vigorous, with beautiful and massive foliage; very dwarf; the spikes, on which the individual blooms are arranged bonquet-like, are very large, and stand out well around the foliage; the flowers are large with well-rounded petals, bright red, edged one-eighth of an inch wide with gold, the contrast of colonr giving a novel and effective appearance to the plant. A grand variety for the conservatory and greenhouse. We have flowered and shown it all the year—lovely even in December and January. Award of Merit, Royal Horticultural Society. 1s. Strong plants, 1s. 6d.

ORCHID FLOWERING

98. AUSTRIA-Musa-like light green leaves; flowers'very large and compact, of a canary-yellow with a silver hue, inside slightly dotted with brown; magnificent for groups and a grand acquisition.

99. ITALIA—Musa-like foliage, bright green and white bordered; spikes gigantic, about 16 in. long, with a number of flowers which are very large and measuring from 4 to 5 in. across; scarlet, streaked on the margins and tips with yellow. It flowers continually. 2s. 6d. For Newest Varieties, see front part of Guide.

GENERAL COLLECTION.

GLADIOLUS FLOWERED.

A. DE MONTEBELLO—Carmine, shaden orange, green foliage; distinct. 3s.

Twelve useful varieties, our selection, 9s. Other varieties can be supplied, list on application.

CARNATIONS.

THE BEST VARIETIES IN CULTIVATION.

Yes, lovely Carnations! No matter who, all like this flower; yet how seldom we see them in gardens! If once planted in ordinary ground they will grow. Cut out the flower-spike in August, cut a slit half-way through the wood of the side shoots, two inches under the lowest leaf bearing the cut, dividing and replanting in good well-dug ground any time before Christmas, and another year's fine bloom is almost a certainty. For exhibition, they have to be planted in 8 or 9-inch pots and placed under glass when in flower. Their almost only enemy is wireworm, which must be destroyed. Good varieties, 6s. and 9s. per dozen and upwards, our selection.

We have much pleasure in submitting to our esteemed patrons a few cultural notes from an eminent and most successful Carnation Specialist. They will be found concise and to the point. The same also applies to the cultivation of the Picotee.

CULTIVATION OF THE CARNATION.

1. Time for Planting.—From the middle of September until the end of October. In the spring, whenever the weather is favourable. When Carnations are planted too early in the open grounds they sometimes suffer from the effects of drying winds.

2. Preparation of the Ground.—This should be done in September, or sooner, by trenebing it to the depth of 15 or 18 inches, and work some decayed manure in during the process. A good medium clay loan is best, and one rather inclined to be heavy than light; but I have grown Carnations admirably on light sandy soil—but in this case some clayey loam mixed with lenf-mould and decayed manure was placed round the roots

Blanting.—This should be done as soon as the plants are received. The ground having Leen previously prepared. Carry the box containing the plants to the hed, and plant them out as they are removed from the moss and papers. The plants should be six inches from the edge of the bed and 15 inches asunder in the rows. Plant to the first pair of leaves; the roots should be well into the ground, and some fine soil worked in amongst them, pressing it in with the fingers. After planting mulch the surface of the soil amongst the plants with decayed manner; this arrests evaporation from the soil, and acts as a protective agent in winter.

4. Treatment after Planting.—The plants, if well put into the ground, do not usually require any support; but slender, tall plants may require a slight stick to hold them upright. Any plants that may become loosened, or even thrown out of the ground by alternate frosts and thaws during winter, must be pressed in with fingers when the soil is soft.

-5. Pot Culture.—All the successful exhibitors of Carnations grow a considerable number of plants in flower pots. The layers are potted up in the antumn in small flower pots, large and small sixties, two in the larger size and one in the smaller. The potting soil ought not to be too heavy; a good compost is formed of four parts loam, one of leaf-mould, and one of decayed manner, with sand to keep the material in porous condition. After potting them, place in a garden frame, kept rather close for a few days, and if they are potted up early it may be necessary to shade from bright sunshine.

The Carnation Manual contains much useful and practical information for Amateurs.

Copies can be supplied at 3s, 6d., free by post.

NEW MALMAISON CARNATIONS.

LADY GRIMSTON — Large beautifully formed flowers; pinkisb-white, handsomely marked bright rose; sweet seented. 3s. 6d. each.

ZOE-Very distinct and charming; remarkable for its unique colour; a delicate rose-lilac; good form. 3s. 6d.

Carnations made safe against Wireworm, and also vigorous and doubly satisfactory.

Again, out of the many thousands of plants we grow, not onc was lost during the last two seasons; a teaspoonful of our Mauure, mixed with six times the quantity of soil and like quantity of soot, not only keeps them free and safe all the season against this pest, but adds double vigour to the plants, makes the blooms considerably larger, and produced in greater quantity, and intensity of colour much increased. No one should ever fail to sprinkle some, and round every plant immediately after planting; it not only entirely keeps the pest away, but it makes the grass a lovely glaucous green. All would admire your Carnations, and everybody would be proud of their plants grown in pots. Should be used once a month; by strictly attending to this the flowers would be double in quantity and of a larger size.

Cwt., 80s.: 56 lbs., 42s. 6d.; 28 lbs., 22s. 6d.; 14 lbs., 12s. 6d.; per lb., 1s. 3d.

SELF, AND FANCY VARIETIES OF BORDEF CARNATIONS.

TREE OR WINTER-FLOWERING CARNATIONS.

HESE are now greatly sought after in consequence of so many being used all through the winter season in bouquets and button-holes; and in New York it appears they are even more extensively used than in England. Anyone who can grow Chrysanthemums can grow these, for they require just the same treatment, excepting liquid manure, which must be applied more sparingly.

1. BELINDA—Buff ground, flaked with bright red, full flowers; distinct. 2s. 6d.

2. CANARY BIRD—Deep yellow, lightly striped with pink; fine well-formed flowers; vigorous habit. 1s. 6d. and 2s. 6d.

3. CELESTE—Soft rosy scarlet, of good habit and free flowering. 2s. 6d.

4. CLAUDE PERRIN - Yellow, edged rosy red.

CYRIL-Bright fiery scarlet, flowers of good substance; free grower. 1s. 6d.

6. CZARINA-Flesh pick; free flowering, of good habit and vigorous growth. 2s.

DAYBREAK-Pale pink; very pretty and useful.

7. DR. PERRONNET-Buff ground, edged

and feathered ficry orange-red. 8. DUKE OF CLARENCE-Fine deep scarlet, large and full; vigorous. 1s. 6d.

9. DUKE OF YORK - Rich velvetycrimson, large and full, broad petals; sweet scented, vigorous growth. 1s. 6d.

10. FAIRY-Very fine pink; good substance, with broad petals; of free growth. 2s. 6d.

11. FIREFLY—Bright fiery scarlet; well-formed flowers; vignrous grower. 2s. 6d. 12. FOXHUNTER—Fine bright scarlet;

vigorous grower, and a good winter-flowering

variety. 2s. 6d.

13. F. TOKORNY-Soft lilac-pink, fimbri-

ated; distinct.

14. GOLDMINE-Rich fawn yellow, shaded and edged scarlet; modinm size; of good form. 1s. 6d and 2s. 6d.

15. HARVESTER-Rich buff, shaded and

edged deep rose. 1s. 6d. 16. HENRY GIBBONS—Bright clareterimson; broad petals; one of the best for winter flowering. 1s. 6d. and 2s. 6d.

18. JULIETTE-Deep rose, large and full

flower; good habit.

19. LA NEIGE-Pure white, dwarf bushy

hahit; very free flowering.

LEONIDAS - Crimson-scarlet; very large flowers; of vigorons growth and very free. 1s. 6d. and 2s. 6d. 21. LIZZIE McGOWAN — Pure white,

very large, and very finely fimbriated; dwarf habit; a fine bloomer, and the bnds do not burst. 1s. each in sixties; in 5-inch pots, 1s. 6d. each.

22. LORD ROSEBERY-Cream, changing

to pure white; fimhriated.

23. LUCIFER—Rich reddish scarlet.

MISS JOLLIFFE-Soft pink, dwarf habit, free flowering; fine. 1s. and 1s. 6d. 25. MISS JOLLIFFE IMPROVED—An

advance on the old variety, both in size of flowers and colour; fine for winter flowering. 1s. 6d.

- 26. MISS MARY GODFREY Large finely-formed blooms of great substance, full, but not crowded, of the purest white, and highly perfumed. Award of Merit, R.H.S. 1s. 6d. an l 2s. 6d.
- 27. MLLE. CARLE-Pure white; useful
- 28. MME. DE FALBE—Clear yellow self; good substance; large flowers; good habit; free. 2s. 6d.
- 29. MRS. A. HEMSLEY-Rich deep crimson, large well-formed flowers, with broad pctals; has the rich persume of the Old Clove. 1s. 6d.

31. MRS. HAMLET RILEY—Pale flesh in great demand for exhibition, pot work, and general borders; charming colour. 1s. 6d.

32. MRS. H. CANNELL-Deep pink; its habit and freeness of growth renders it a model variety. Sweet scented, flowers all the winter; should he in every collection. First-Class Certificate. 1s. each in sixties; in 5-ineh pots, 1s. 6d.

33. MRS. HENDERSON-Bright crimson.

34. MRS. LEOPOLD DE ROTHSCHILD (syn. Mdlle. Th. Franco)-An improvement on the well-known variety Miss Jolliffe, rather deeper in colour. 1s. 6d.

35. MRS. MOORE-Pure white; large and

fiue.

37 NEGRO—Very dark; fine.
38. PINK GLOBE—Cerisc pink; large full

flowers; vigorous hahit. 2s. 6d.

39. PRIMROSE DAY-Fine deep yellow; large full flowers; one of the fine t yellows ever offcred. Award of Merit, R.H.S. 1s. 6d. and 2s. 6d.

PURITAN-Large and fine white, of

good form.

40. REGINALD GODFREY-Rich Salmon-pink, very large, and of good substance, strongly performed, and they do not burst the ealyx; it is perpetual blooming, robust and healthy grower. 1s, 6d. and 2s, 6d.
ROSY MORN—Clear and bright rose-

pink; much admired.

41. SIR HENRY CALCRAFT — Dcep scarlet; very large, free. 1s. 6d.
42. SIR VISTO—Rosy scarlet; full well-

formed flowers. 2s. 6d.

- 43. SUNRISE-Deep yellow, edged and splashed carmine rose; good habit, very free; also useful for planting in the open ground. 1s. 6d.
- 44. THE CZAR-Very deep crimson; large
- full flowers; good hahit, and very free. 1s. 6d.
 45. THE MOOR—Dark crimson; fine. 2s.
 46. THE SHAHZADA—Fine deep crimson; good hahit, and very free. 2s. 6d.
- 47. T. W. GIRDLESTONE-Bright huff ground, heavily edged, and flaked vermilion; very distinct; large. 1s. 6d.

49. WHIPPER-IN-Scarlet, dark stripes;

large and free.

WHITE SWAN-Robust habit; free. WILFRED H. GODFREY - Light

apricot, edged and flaked bright pink; large. 1s, 6d. and 2s, 6d.

WINTER CHEER-Crimson-scarlet, dwarf branching habit, very free flowering; fine for winter flowering.

52. W. ROBINSON-Fine scarlet wellformed flowers; of good habit and very free. Is. and 2s.

WM. WOOD-Rosy-pink. 1s. 6d. YULE TIDE.

54. ZENOBIA—Buff ground, heavily flaked and margined with deep crimson; large well- 55. ZOUAVE—Red; extra fine.

All those not priced 1s, each; flowering plants, 1s. 6d. and 2s.; seeds, 1s., 2s., and 5s, per pkt.

MALMAISON CARNATIONS.

SOUVENIE	DE	LA	MALMAISON—Bush-white; large and litt. 18, to 28, on.
,,	23	33	,, -Pink, similar in every respect to the above, except in
			colonr, 2s, 6d.
11	2 2		,,MME. ARTHUR WAROCQUE—Dark scarlet self;
*			good shape; dwarf habit; very free: 2s. 6d.
			PRINCESS OF WALES - Rose-pink: a very pleasing

colour. 2s. 6d.

The following limited selection from an immense number of seedlings are of the highest quality, and are true Mahmisons in flowers, seent, and foliage. One feature of the new Mahmisons is their vigorous compact habit of growth, producing their flowers in the greatest abundance.

MRS. EVERARD HAMBRO—Has large massive flowers, of fine form, and of a deep carmine-rose colour. 1s. 6d.

THE CHURCHWARDEN—Very large and full; the flowers of a bright crimson-scarlet colour. 1s. 6d.

All of the above have received First-Class Certificates and Awards of Merit wherever exhibited, and have been greatly admired.

CHRYSANTHEMUMS.

For our New Varieties, see Front of Guide.

That we have been awarded Gold, Silver Gilt, and Silver Medals by the National Chrysanthemum Society every year since its existence.

H. CANNELL & SONS' CHRYSANTHEMUMS.

For our New Varieties see Front of Guide.

Mr. W. H. LEES, well known as a Champion Grower and Writer, eulogises four of our new varieties sent out last year as follows:---

THE GARDENERS' MAGAZINE, 13th November, 1897.

Messrs. Cannell also distributed two excellent incurved varieties last Spring. The one called Austin Cannell is a fine flower, with broad, regularly-incurving petals of a dark purple colour; inside of florets a rich amaranth shado. Ernest Cannell has flowers of equally good form and pale buff colour; the petals are broad and pointed, but closely incurving. These are certainly two of the best incurved varieties sent out for some time past. Two of Messrs, Cannells' Japanese are specially good also. Robert Powell is a charming flower, producing vory fine flowers of a loosely incurving and drooping habit; the colour is yellow, heavily suffused with bronze. Baron Tait has very handsome blooms of a clear yellow shade; the petals are long and drooping, slightly earled at the tips; it is quite an exhibition flower, and the plant grows but five feet high.

NEW VARIETIES FROM AUSTRALIA AND ZEALAND FOR 1898.

1057. CHATSWORTH (Jap.)-Colour bright rosy pink, evenly striped, silvery white reverse, silvery white florets, long and irregular flowers, very large and full centre; a splendid acquisition. Second crown. 2s.

1058. EGMONT (Jap.)—The brightest of all reds or nearest approach to scarlet; reddish or orange-yellow reverse; similar to E. Molyneux, but brighter and more double; one of the best ever sent ont; dwarf habit; mid-scason; good grower. 5s.

1059. FAIR MAID OF ADELAIDE (Jap.)-A pure white, of good form; broad petals,

slightly twisted towards the centre; splendid for exhibition. Second crown. 5s. 1060. GLEN EIRA, sym. EURTERPE (Jap.)—A magnificent variety, producing immense flowers of fine form; colour rosy lilac, reverse lighter; one of the finest exhibition varieties. Crown or second crown. 6s.

1061. JOHN POCKETT—Indian-red, old gold reverse; long, broad incurving petals; large massive perfectly double flower. These colours are well blended, making a pleasing combination. One of the best Chrysanthemnms ever sent out. Mediam height; mid-season. Second erown or terminal. V.C.S., F.C.C. 5s.

1062. MABEL KERSLAKE (Inc. Jap.)—A most lovely sport from Pride of Madford producing flowers of immense size; colour a lovely bright crimson, reverse slightly shaded old gold. 5s.

1062A. MISS VERA MAY FRASER (Jap.) - A lovely shade of terra-cotta, reverse lighter;

a grand exhibition variety. Crown and second crown. 5s.
1062n. MISS MARY UNDERHAY (Inc. Jap.)—In this we have a grand companion to Oceana, but it is much larger and bolder, with broad deep petals; colour a golden yellow. Second crown. 5s.

1063. MISS NELLIE POCKETT-Creamy white, long drooping florets, curled at the tips; fine full graceful flower; dwarf habit; rather early. Second crown or terminal. V.C.S., F.C.C. 5s. 1064. MRS. C. BOWN—Pure waxy white, long drooping florets of medium width, incurving to the centre, forming a most refined and beautiful flower, said to be the most beautiful white in Australia; dwarf habit; mid-seasou. Second crown or terminal. V.C.S., F.C.C. 5s.

1065. MRS. ERNEST CARTER (Jap.)-Colour a lovely clear yellow; flowers large and of

flower Second crown or terminals (rather years arrower). 3s. 6d. flower. Second crown or terminals (rather weak grower). 3s. 6d.

1068. MRS. W. G. McBEATH (Inc. Jap.)—A grand exhibition flower; colour silvery-lilac, shaded with plum colour; very attractive. Crown or early second crown. 5s.

1069. MRS. W. J. TIBBS—A lovely white, sport from Lilian B. Bird, which is very attractive

for its peculiar formation of flower. 3s. 6d.

1070. MR. T. CARRINGTON-Rich earmine-rose, almost the identical colour of Excelsior and the shape and make of V. Morel; medium height, mid season, second crown bud. 6s.

1071. PRIDE OF STOKELL—Chestnut crimson, lined and tipped with gold (E. Molyneux colour), sport from Pride of Madford. This needs no other description. V.C.S., F.C.C. 5s.

1072. PURPLE EMPEROR (Jap.)—A most desirable acquisition; colour a beautiful purple

shaded maroon, silvery reverse; a good exhibition variety. 5s.

1073. THE CONVENTION—Salmon-red, bright buff reverse, long, broad, drooping florets, eentre inenving, slightly whorled. A massive flower, splendid exhibition variety; dwarf habit, rather early, second crown or terminal buds. V.C.S., F.C.C. 5s.

1073A. TUCKER'S PERFECTION (Jap.)—A beautiful silvery-rose, with good long petals.

3s. 6d.

NEW JAPANESE FOR 1898 OF VARIOUS RAISERS.

WITH DESCRIPTIONS.

1258A. ADMIRAL ITO—This is likely to prove a very popular variety, being of very easy culture, and coming good from any bnd. The bloom, which is quite up to exhibition size, is of a soft yellow, shading to a richer tint in the centre, and frequently flushed carmine at the base. From the later bud the carmine tint is much more pronounced. In form a very deep and solid Sunflower,

and certainly the best keeper in cultivation. Good form any bud, giving preference to second crown Good culture A.M., R.H.S. Plants, 5s.; three for 12s. 6d.

1259. AMARANTH (Jap.)-White, heavily shaded amarantb; very distinct. 1s. 6d.

1260. APOLLO (Jap.)—Bronze and amber. 1s. 6d.
1261. AUTUMN BRIDE (Inc. Jap.)—Pure white; very full flower. 2s.
1262. BARON REICHER (Jap. Inc.)—Full and handsome flower of the largest size, with long broad petals loosely incurving; colour rich apricot-yellow, lined and shaded reddish carmine, with golden buff reverse. Height, 5 to 6 ft. Crown bud. Plants, 7s. 6d.

1262A. BEAUTY OF THRUMPTON (Weeks) .- Deep rose purple, full reflexed florets; fine

exhibition variety, and excellent habit. 5s.

1263. BELLE OF PACIFIC (Jap.)—Deep rose; long petals; bairy. 2s.

1263A. BLACK HAWK (Jap.)—This was sent from America for trial as an exhibition variety, but it proves to be much too small for the boards. It is a charming decorative variety, especially if grown in sprays without disbudding. The form of the flower is quite distinct, and the colour is of the richest scarlet-maroon imaginable. Plants, 3s. 6d.

1264. BRIAN BORU (Jap.)-Salmon-pink; very large. 2s.

1264A. CAPT. BELLAMY (Jap.)—True form, with an incurving centre; colour clear and deep canary-yellow; very striking. Stop carly in April, and take second crown bud; good culture. 5s. 1264B. CHARLES PAGE—Deep orange and sbaded bronze; florets broad and whorled, incurving at the tips; blooms large and of handsome form; moderate feeding. Stop middle of May, and take crown bnd. 5s.

CONSTANCE TERRELL (Jap.)-Deep golden yellow. 1265.

CONSUELA (Jap.)—Delicate pink; fine form. 1s. 6d. 1266.

DANCING MAID (Jap.)—Self-pink, forming a ball of twisted florets. 1s. 6d.

1268. DAVID INGLIS (Ref. Jap.)—An exhibition flower of a very bigb order of merit; long broad petals; a very refined and graceful flower, and a colour much wanted; the upper surface rich crimson with golden reverse. Height about 5 ft. Crown bud Plants, 7s. 6d.

1269. DAYDAWN (Jap.)—Creamy white; very large. 1s. 6d.

1270. DAYTON (Jap.)—Pure white. 1s. 6d.
1271. DELICACY (Jap.)—Pure white; of fine substance. 2s.

1271A. DON DE LA MADONE-Recommended by the N.C.S., and awarded Certificates at Paris and Lille. Very late flowering; a seedling from Souvenir de Petite Amié. Can be had in good condition for cutting from the 20th of October to the end of December. Flowers are of the purest possible white, with a centre of sea-green; the formation of petals is most extraordinary. Owing to its lateness, solidity of flowers, decorative purposes, and good travelling qualities, it will surpass Souvenir de Petite Amié, and undoubtedly become the Queen of the Market. Good dwarf

habit, and grows into splendid specimens. Cuttings, 1st of February, 48s. 6d.
1272. EDWIN A. KIMBALL (Inc. Jap.) - Crimson, reverse golden. 2s.
1273. FRAU AGATHA KESSON—An immense Japanese, with very long drooping florets of medium width, and has good lasting qualities; colour deep rose, with silver reverse; fine exhibition variety; good habit. Crown bud. Plants in Spring, 6s.

1273A. GEORGE FOSTER-A superb incurving Japanese of a rich golden yellow; the bloom

1273A. GEORGE FOSTER—A superb incurving Japanese of a rich golden yellow; the bloom is very deep and of good substance; the florets are broad, and whirl into a twist very slightly. Crown bud, moderate stimulating, F.C.C., N.C.S. 6s.

1273n. GEORGE GOVER—This variety has been greatly admired by all who have seen it, and has been highly spoken of by the Horticultural Press. It is a very distinct flower of a rich lively rose colour, a tint hitherto deficient on the exhibition board.

Width which intermingle slightly, showing a silvery reverse. An easy doer, and sbould become very popular. Good culture; stop in April. Crown bud. 6s.

1274. GERTRUDE SALTER (Inc. Jap.)—Deep rosy lilac, with silvery white reverse; a flower of immense depth, about 6½ inches across. When this is fully developed, the centre is very rich, and the under florets meet at the stem, forming a complete ball. The height of this is only

ricb, and the under florets meet at the stem, forming a complete ball. The height of this is only 4 feet when first crowns are secured, but it is best nipped early in April and secure second crowns.

DS.

1275. GOLD STANDARD (Jap.)-Intense yellow. 3s.

1275A. GOLDEN HARVEST-Yellow-coloured Chrysanthemums we have in abundance, still there are none so pretty and distinct as this, both in colonr and form. The softest canary-yellow, slightly paler in the reverse of florets, which are curled in a most charming manner; very striking variety indeed; good culture, 9-inch pot. Top early in March; crown bud. Plants only, 5s.; tbree for 12s. 6d.

1276. GOVERNOR RUDD (Jap.)—Bright cream; very distinct. 2s. 1277. HENRY HURRELL (Inc. Jap.)—Golden yellow. 2s.

1278. INFATUATION (Jap.)-Pure white. 2s.

J. M. GIFFORD (Jap.)—Fine golden yellow. 1s. 6d.

1279A. JOSEPH CHAMBERLAIN (Weeks) - A magnificent novelty, distinctly the gem of the season; bright glowing crimson with golden reverse; seedling from Edwin Molyneux, and the best that has yet been raised from that variety; it has long tapering florets and is a non-damper; easy door on crown bud. 7s. 6d.

1279n. J. R. UPTON.—Golden yellow; another Australian seedling, said to be a magnificent flower of great solidity. This has been described as being one of the finest of all the Australian seedlings. 5s.

1280. KING COLE (Jap.)—A bright flaming bronze. 1s. 6d.

1281. LADY BROUGHAM (Jap.) - An inimense spreading flower, 10 to 12 inches across, narrow curling florets of great length; coloar blush white changing to pink. Height, 5 to 6 ft. Crown bnd. Plants, 5s.

1281A. LADY ELLEN CLARKE.—Pure white sport from Mrs. C. H. Payne. 2s. 6d.

1282. LORD BOSTON (Jap. lnc.)—Broad-petalled flower of large size and solid build, measuring 9 inches across and of proportionate depth, resembling Puritan, but much larger; upper part of flower pure white with pink base. Height, 4 to 5 ft. Crown bnd. Plants, 5s.

1282A. LUCIEN REMY-Flowers attain the greatest dimensions; of the prettiest possible colours, being a combination of citroa-yellow and old rose tints; petals long; an important acqui-

sition; quite a lady's flower, and also the artist's. 6s. 6d.

1283. MARY MOLYNEUX (Jap.)—Has been awarded seven First-Class Certificates—
National R.H.S., Bristol, Hull, Winchester, Southumpton, Portsmouth, and a Silver Medal at the National Show, November 9th, 1897—this grand record speaks for itself. The blooms are an immense size; colour a lovely shade of rosy peach. 7s. 6d.

1283A. MASTER JAMES EPPS (Epps).—Brilliant yellow, long curly florets of great substance a greatly improved form of the old Golden Dragon; very fine. 5s.
1284. MISS BESSIE LUSCOMBE (Jap.)—Large; rich tawuy yellow, margined red; very long petals, gracefully drooping; very refined flower; a good exhibition variety. Crown bud. Plants in Spring, 5s.

1285. MISS HELEN WRIGHT (Jap)—Ivory-white; a massive flower. 2s.

1285A. MISS HUNTER LITTLE—Florets very long and drooping, in colour a charming tint of yellow, each floret distinctly edged rosy-crimson; a large full bloom, of easy growth; any bud, moderate feeding. Plaats, 5s.

1286. MISS M. DONALDSON (Jap.)—Very full; colour blush-pink; good hrond petals; strong grower, medium height; spleudid exhibition variety. Crown bud. Plants in Spring, 5s. 1287. MISS RANDERSON (Jap. Ref.)—Pure white; long, broad, twisted petals, extremities

toothed; a very refined flower of massive build, and must take a foremost place amongst whites. Height, 4 to 5 ft. Second crown had. Plants, 5s. 1288. MISS SHEARS (Jup.)—Good, full, of graceful form; incdium width, reflexing petals;

colour lemon-yellow, tinted green; very dwarf; spleudid keeper; Al exhibition variety.

bud. Plants in Spring, 5s.

1288A. MOOR PARK (Haggart).-A very heautiful incurved Japanese with long rather narrow florets; a distinct shade of golden buff, inside rosy crimson; very distinct and good. Raised by Mr. Alexr. llaggart, and shown by him in his magnificent First Prize Stand at Edinburgh. 6s.

1289. MR. A. B. BASSETT (Jap. Ref.)-Lovely canary-yellow, with petals of medium width beautifully interlacing and drooping; a well-built, I andsome exhibition flower of exceptional merit. Height, 5 to 6 ft. Robust habit, second crown bud. Plants, 5s.

1290. MR. C. W. COX (Jap.)—Large, of good form, somewhat resembling Stanstead White fairly broad petals; pure white. Height, 4 to 5 ft. Crown bud. Plants, 5s.

1291. MR. HUGH CRAWFORD—A magnificent Japanese. This is a grand acquisition, and

absolutely distinct from any existing variety; colonr brilliant golden-yellow, with bronzy-yellow reverse; very broad petal of great substance, strong grower; a superh exhibition variety. E Crowa bud. Plants in Spring, 7s. 6d.

1292. MR. J. FRASER (Jap.)-Immense, with very long drooping florets; colour rich brouzy rellow, sometimes tinted green, quite distinct; grand exhibition variety. Crown bnd. Plants in

Spriag, 5s.

1293. MR. LATIMER CLARK (Jap.) - Hairy variety; an acquisition to this section; colour soft rose, with reverse of a delicate shade of light silvery pink; an immense spreading flower, well covered with hairs. Height, 4 ft. Crown bnd. Plants, 5s.

1294. MR. M. VERSFIELD (Jap. Inc.)-A high-huilt, couical flower with broad petals incurving and overlapping; an exhibition flower of considerable promise; colour light silvery-mauve;

strong, robust habit. Height, 5 ft. Second crown hud. Plants, 5s.

1295. MR. T. DAGG-Seedling from Viviand Morel, and of the same type, but much deeper ia colour; very full massive flower, comes good from any bud; graud exhibition variety. Plants in Spring, 6s.

MR. T. W. SWALES (Jap.)-Large, very distinct and striking in colour, rich chestnut red striped with bronzy yellow; a well-huilt flower; fine exhibition variety. Plants in Spring, 5s.

1297. MR. W. H. GRENFELL (Jap. Iuc.) - A magnificent flower, with extra broad petals of firm texture, rather closely incurving; colour soft rosy-pink; a distinct novelty. Ileight, 4 to 5 ft. Lato crown hud. Plants, 5s.

1298. MRS. A. CROSS (Jap.)-Very large, with long broad incurving florets of great substauce; the colour is rich yellow, with reverse yellow striped red; medium height. Crown bud.

Good exhibition variety. Plants in Spring, 6s.

1299. MRS. ARTHUR GOODRICH (Jap.)-Of immense proportions; broad petals, slightly notehed, incurving at the tip; colour bright rose, silver reverse; fine exhibition flower. Crown

bud. Plants in Spring, 5s.

1299A. MRS. CHARLES BIRCH-A large, massive bloom, quite distinct from any other; florets, which are of great substance, curl and twist into a flower of great depth and solidity. Very pure white, occasionally finshed at base with lavender. F.C.C., N.C.S. Good enlure; stop in April. Second erown hud. Plants, 7s. 6d.

1300. MRS. E. BEUTTNER (Jap.)—Primrose yellow; very fine. 2s. 6d.
1301. MRS. HENRY TOLER (Jap.)—Flesh pink, slightly hairy. 1s. 6d.
1302. MRS. H. GARRAT CUMINES (Jap.)—Large, of the Duchess of Devonshire type;

ontside rows of petals quilled, but open at the tips; centre filled with petals of medium width; colour pretty shade of deep rose, with silver reverse. Crown bud. Plants in Spring, 5s.

1303. MRS. G. A. HAINES (Jap.)—Reddish golden bronze and orange. The flowers are 6 inches across and nearly the same in depth. I shall not mislead exhibitors by pressing it as a large exhibition flower, but as a bush or decorative variety it is simply superh. The glorious colour is charming; the flowers are horne on stiff, erect stems, and last longer than any I know. The height of the plant altogether, when second crowns are secured, is under 4 ft. I would not he surprised to find this on the front row of many grand exhibits, for it will entirely eclipse Col. W. B. Smith. 5s.

1303A. MRS. J. DARLEY (Burt).--Incurved Japanese of a beautiful shade of primrose or pale golden yellow; the florets are not so long as now looked for, but the build of the flower is splendid, and it is one of those varieties that looks well on the hoard. I can much recommend this, as I think

it will be a good constant variety. 5s.

1304. MRS. J. PEABODY (Jap.)—Pure white, of the largest size. 2s. each.

1305. MRS. J. RITSON (White Viviand Morel)—At last we have obtained the long looked-for White Viviand Morel. This sport was obtained two years ago, but I hesitated to introduce it until I was positively certain that the sport was fixed. The well-known judges, Mr. E. Molyneux and Mr. W. Mease, awarded this variety the Scottish Horticultural Association's Silver Medal for the best new Chrysanthemum not in commerce at their great show at Edinburgh, November, 1897.

After this valuable testimony to its merits no further comment is needed. Plants in Spring, 7s. 6d. 1306. MRS. J. W. BARKS-Rosy-brouze sport from Edith Tabor. The inside of the florets is the colour of Charles Davis, the reverse is sladed buff; in other respects it is the same as the

10s. 6d.

MRS. L. HUMPHREY (Jap.)-Very large spreading variety, with florets of immense length, notched at the tips; colour soft shade of primrose; medium height; good habit. Comes good from any bud. Pronounced by all who have seen it to be a variety of great promise for

exhibition purposes. Plauts in Spring, 6s.
1308. MRS. M. T. ATHERTON (Jap.)—White, of broad long petals. 2s.
1309. MRS. PHILLIP MANN (Jap.)—A fixed sport from the well-known variety Charles Davis, this being third year of trial; the colour is rosy hronze, distinctly striped and suffused yellow shading to pure golden yellow in centre; quite a distinct and lovely colour, and a valuable acquisition in every way; same treatment as parent. Plants, 7s. 6d. Stock limited.

MRS. R. D. DOUGLAS (Jap.)—Very large; golden yellow.

1311. MRS. ROWLAND STAGG (Jap.) - Large, novel flower with long petals; lower petals pink, tipped white, with greenish-white centre; easy grower. Crown bud. Plants in Spring, 5s.

1311A. MRS. J. R. TRANTER (Jap.)—Large flower, of grand symmetry, with long florets pinkish lilae at base, with distinct stripe, paler centre, shading to white with age; splendid habit; second crown hud. F.C.C., N.C.S. Plants in Spring, 7s. 6d. habit; second crown had.

1312. MRS. W. MEASE, the Sulphur Madame Carnot—This is a sport from the well-known variety Madame Carnot, which sported with Mr. W. Mease, and is thoroughly distinct from the yellow sport, G. J. Warren. The colour is a lovely and delicate tint of pure sulphur, without any shading whatever; in form it is the exact counterpart of its parent, which it will undoubtedly rival in popularity and usefulness. This variety was shown by Mr. W. Mease in his grand winning stand of forty-eight blooms in the Open Class of the National Chrysanthemum Society's Great Show, held

in November last, and was also awarded a Special Prize of One Guinea and au Oil Painting for the best bloom in the show. Plants in February, 7s. 6d. each, 3 for 20s.; Plants in March, 3s. 6d. each,

1313. MRS. WHITE POPHAM (Jap. Inc.)—White, lined and frosted with earmine; medium

height and good habit; good on any bud, but a lovely colour on the second crowns. 7s. 6d.

1314. NINA DABBS (Jap.)—Deep yellow, with a greenish shade; the florets are as long, but much broader than Edith Tabor, while the make and colour is similar to Phaebus. This will be a magnificent addition; the habit and growth of the plant is of the very best, being dwarf with dark green foliage. 7s. 6d.

1315. OWEN'S MEMORIAL (Jap.)—One of the grandest novelties of the season, the blooms measuring nearly a foot in diameter; florets broad and drooping; colour bright crimsou-red with

golden reverse. Height, 5 to 6 ft. Crown or terminal bud. Plants, 7s. 6d. 1316. PLUTO (Jap.)—Bright red, reverse golden. 2s

1317. PRESIDENT MCKINLEY (Inc. Jap.) - Ox-blood red, reverse old gold. 3s. 6d.

1318. PRIDE OF RYECROFT (Yellow Niveus)-This is a sport from the popular and useful variety Niveus. It has all the good qualities and characteristics of its parent. Its colour is a rich and beautiful shade of primrose-yellow. Plants in Spring, 5s.

1319. PRINCESS CHARLES OF DENMARK (Jap. Inc.)—Colour golden amber outside, shaded inside with reddish bronze; petals broad, beautifully incurved, forming a solid bloom. Two

First-Class Certificates. 6s
1319A. QUEEN OF PINKS—Colour a pure and clear pink, which shows up in a remarkable manner by artificial light; the bloom is well made, the petals of good substance; a very elegant and charming variety of great promise. Good culture; stop in April. Second crown buds. Plants, 5s.

R. F. HIBSON (Jap.)-Pure white; extra large. 1321.

RINALDO (Jap.))—Crimson, reverse old gold. 2s. RUSSIA (Jap.)—Purc white; petals twist like shavings. 2s.

1322A. ROSE QUEEN (Jap.)—One of the most elegant varieties we have. The bloom is a perfect model in form, florets of medium width, very even and full, falling from the centre with regularity. Top in March, and reserve crown bud; good culture. Plants, 5s. 1323. RUTH ELLIS (Jap.)—Shell pink; very flue. 1s. 6d.

1324. S. G. HUGHES (Jap.)-Lemon-yellow; distinct. 1s. 6d.

1324A. SOURIRE DE MON AMIE-Medium-sized flowers, but of a pleasing effective shade of rose, the prettiest of this colour; highly decorative, and recommended for verandahs and gardens; early flowering, and continues in good condition for a long time; very useful grown as specimens and standards. 2s. 6d.

1324B. SOLAR QUEEN-Large size, eight inches in diameter and full to the centre, comes nuiformly good; colour light, but bright and beautiful yellow, and comes nearer our idea of what. a Chrysanthemum should be than any other variety raised by ns; and, further, we are sure it comes nearer what is wanted in England than any variety thus far raised on this side. Height, 3 ft. 5s.

1324c. S. W. GILBERT (Wecks).—Deep crimson; long broad flat florets, between C. W. Childs

and Elma D. Smith, full exhibition size; a decided acquisition and splendid habit. 5s. 1325. THE YELLOW KID (Jap.)—Clear yellow; broad patals. 2s. 1326. TIPPECANOE (Jap.)—A fine pink terra-cotta. 2s.

WILLIAM BARDNEY (Jap. Inc.)-An enormous flower, with very long and loosely incurving petals, building up a flower of great substance and beauty; colour rich velvety crimson inside, with silvery grey reverse; a very distinct novelty. Height, 5 to 6 ft. Crown bud. Plants, 5s. 1327A. W. R. PRINCE (Jap.)—Deep yellow, each floret distinctly edged carmine; florets long and drooping; very striking; plant dwarf and sturdy; first class for grouping. Top in early April, and take second crown bud.

and take second crown bud.

1327B. W. TOWERS (Weeks).—Canary yellow, in form and floret almost identical with Mdlle. Therese Rey; a grand grower and constant. 5s.

JAPANESE DECORATIVE VARIETIES.

1328. NELLIE STRANKS-A very pretty decorativo variety; strong branching habit, grand

for cutting; colour white, edged and finshed rosy-pink. Height, 3 ft. Plants, 2s. 6d. 1328A. PRIDE OF THE MARKET-In this we have one of the finest market Chrysanthemums

ever raised. It is a delightful shade of deep yellow, flushed crimson bronze, the florets stand out free in true Japanese style, and are all produced, no matter how freely grown, on stiff foot-stalks.

ZEBRA-Colour reddish bronze, striped yellow; a capital variety for general decorative and market purposes, makes a good pot plant about 2 ft. high; very profuse bloomer. Plants, 2s. 6d.

NEW INCURVED 1898 VARIOUS RAISERS DESCRIPTIONS

COUNTESS OF WARWICK-An enormous flower of great depth and substance, beautifully shaped petals, colour soft rose, pa'e flesh at base of florets; a back row flower, and has been judged by all who have seen it to be the finest introduction of the year. Plants in March, 7s. &d.

1330A. KING OF THE YELLOWS-A true incurve of the finest form; rich golden-yellow; blooms large and of good substance; undoubtedly will prove a grand addition, the colour being equal to Modesto. Stop in March or carly April and retain. Second crown bud. Plants, 7s. 6d.

1331. MONGOLIAN PRINCE—Colour buff, reverse old gold; flowers a good size, and petals

well incurved; an easy grower, of medium height. Plants, 1s. 6d.
1332. MR. A. E. STUBBS—Bright golden yellow, as large as Chas. Curtis, but much deeper in colour; a well-built flower, dwarf habit; comes good from any bud. Plants in Spring, 6s.

1333. MR. T. W. WILKINSON—Pure white centre, oater petals lilac; good shape, large flower; robust habit, perfect incurving form. Second crown bud. Plants in Spring, 5s.

1334. MR. W. HARVEY—Enormous flower of true type, petals beautifully incurving; colonr a distinct shade of creamy white. Second crown bud. Plants in Spring, 5s.

1335. MRS. N. MOLYNEUX.—This is a true incurved; one of the largest in cultivation; a splendid back row flower; colonr a pleasing shade of ivory white. First-Class Certificate, N.C.S., Southampton and Portsmonth, and Silver Medal at N.C.S., November 9th, 1897. 7s. 6d. 1336. MRS. SARAH OWEN—A very massive flower of perfect form and true incurved type,

broad pctals of great substance regularly incurving; colour reddish bronze, tipped golden bronze.

Crown or terminal bud. Plants, 5s.

1337. PHILIP MANN — A very large true inenryed flower of considerable merit, broad petals, beantifully incurving; colour golden broaze. Height about 5 ft. Second crown bnd. Plants, 5s.

1338. T. LOCKIE-A grand acquisition to this section; of fine bold form, peta's of medium width; colour blush-pink, with lighter centre; requires no dressing, and never reflexes. Height, 5 ft. Second crown bnd. Plants, 5s.

1339. WILLIAM NEISH-Another magnificent incurved variety of great promise; solid build, broad petals; colonr yellow, shaded bronze. This is a strong grower, and will earry four flowers on a plant. Second erown bnd. Plants, 5s.

LARGE ANEMONE, 1898.

1340. MRS. P. R. DUNN-Very fine and distinct variety; pure white gnard and disc, very full centre; dwarf habit. Crown bud. Plants in Spring, 3s. 6d.

1341. VIRGINIA EARLE-Lovely silvery-pink; large, high, and well-formed disc. 1s. 6d.

REFLEXED, 1898.

1342. CHAS. TUTT-This is a good and distinct addition to this section; colour soft yellow, shaded pink; good dwarf habit. Crown bud. Plants in Spring, 3s. 6d.

GRAND NEW EARLY JAPANESE VARIETIES,

1343. ALBERT ROSE—A distinct shade of rose, very pretty habit, strong and healthy. Height, 2½ to 3 ft. Very free-flowering early September. Plants in Spring, 2s. 6d. 1344. DORIS PETO—One of the best pure whites; broad petals, dwarf habit. Height, 2 ft.

Very bushy, producing abundance of flowers in September. Plants in Spring, 2s. 6d.

1345. MISS DOVE ELLIOTT—A very lovely variety, flowering with great freedom in September; colour pure yellow; dwarf, bushy habit. Plants in Spring, 2s. 6d.

1346. MISS MARTIN-A good decorative variety; buds when first opening are a little pink, but when fully expanded are of the purest white, centre incurved, outer petals reflexing; dwarf habit, with abundance of flowers. Plauts in Spring, 2s. 6d.

1347. MRS. GEO. HILL—Very pretty and distinct primrose flower, deeper in the centre, petal slightly twisting; good habit; very free-flowering in September. Flants in Spring, 2s. 6d.

1348. MRS. SQUIRE—A good pure white, flowers 3 inches across; habit very dwarf, and free-flowering early in September. Plants in Spring, 2s. 6d.

1349. PRIDE OF MITCHETT-A very unique and beautiful variety; colour pink, with gold centre; very dwarf und bushy, producing abundance of flowers end of September. Plants in Spring, 2s. 6d.

1350. ANNIE HUNT-Charming chestnut and bronze single flower, with long floret, yellow dise; a true type of this section; dwarf bahit and free. Plants, 2s. 6d.

1351. BEAUTY OF BELFAST-Medium-sized single, deep flesh colour; a beauty (no other

words will describe it); dwarf, bushy habit. 2s. 6d.
1352. CHESTNUT QUEEN—Large single; chestnut, of the largest and dwarfest, and as good for decorative plants as for cutting. Height, 2 ft. 2s. 6d.

1354. EARLSWOOD BEAUTY-Large single; primrosc, with large bold green eye (seedling

from Purity); the florets are slightly reflexing, forming a magnificent flower. Two F.C.C. 2s. 6d. 1355. EARLSWOOD GLORY—Large single; pure white, with large green eye (seedling from

This has broad flat florets and dwarf habit. 2s. 6d.

1356. LOIS-A small-flowered single variety, with yellow ray florets, broad and flat, with dise of same colour; a most profuse bloomer, and sure to become a favourite; dwarf compact habit; about 2 ft. Plants, 2s. 6d.
1358. MRS. W. BIRD-A large and distinct single of the best form, with broad flat florets

pointed at the tips; colour bright velvety red, lighter reverse; good habit, and free. Plants, 2s. 6d.

1359. POINSETTIA-Large single decorative variety; the colour is deep Indian red, and the nearest approach to searlet, hence the name; the florets are very broad and flat, forming a flower grows 18 inches ligh, and has dark green foliage. A plant in a 6-inch pot, with three to six flowers, will be an admiration, and all should try it.

3s. 6d.

CONTINENTAL NOVELTIES OF 1897.

1074. BEAUTE GRENOBLOISE (Inc. Jap.)—Immense flower; ereamy white, slightly tinted lilac and pale yellow; good dwarf habit. Plants, 2s.; cuttings, 1s. 3d.

1075. COMTE CAVOUR (Jap. Ref.) — Deep blood red, with golden points; exquisite. First-Class Certificate. Second crown. 6 ft. 3s.

1076. CONGRESS DE BOURGES (Jap.)-Immense flower, very full; hright red; fine dwarf strong habit. Plants, 2s.; cuttings, 1s. 3d.

1077. CZARINA (Jap.)—Of enormous size; pale lilac, striped rose, long petals, incurving in centre; good habit. Plants, 2s.; cuttings, 1s. 3d.

1078. DIRECTEUR LIEBERT (Jap.)—Very large; pearly mauve, long petals, incurving to ecutre; very full flower. Plants, 1s. 6d.; cuttings, 1s. 1079. FEE DU CHAMPSAUR (Jap.)—Pure white, large size and good shape, very long

petals; plants of good stiff habit. Plants, 2s.; cuttings, 1s. 3d.

1080. HENRI VAUDEWALLE (Jap.)—Golden yellow sport from Mrs. Frank Thompson.
This should he a useful addition to very late varieties. 4½ ft. 1s. 6d.
1081. HENRI YVON—Rosy salmon on yellow ground, sport from Gustave Grunerwald; a grand addition to the early flowering varieties. 2s. 6d. (plants only).

1082. ISERETTE (Jap.)—Very full large flower; colour brick red, pale yellow reverse; graceful petals, twisting in a spiral form; good habit. Plants, 1s. 6d.; cuttings, 1s. 1083. LOUIS LEMAIRE—Rosy bronze sport from Gustave Grunerwald; a grand addition to the early flowering varieties. 2s. 6d.

1084. MADAME A. BRUN (Jap.)-Immense, very full; white, tinted lilae, centre tinted pale

yellow; large petals, good vigorous habit. Plants, 2s.; enttings, 1s. 3d.
1085. MADAME A. ROUSSEAU (Jap.)—Very full; manve, shaded lilae and white; fine

vigorous habit. Plants, 1s. 6d.; enttings, 1s. 1086. MADAME BERGIER (Inc. Jap.)—Large full flower; colour soft rose; good habit.

Plants, 1s. 6d.; cuttings, 1s.

1087. MADAME DEIS (Jap.)—Immense; pure white, with primrose-yellow centre, very long petals; good habit. Plants, 2s.; cnttings, 1s. 3d.

1088. MADAME EDMOND ROGER (Inc. Jap.)-Large full flower; lemon yellow, shaded sca-green, distinct and unique colonr; large pointed petals, tipped green; dwarf vigorous habit. Plants, 2s. 6d.; enttings, 1s. &d.

1089. MADAME FERLAT (Inc.)—A good variety; pure white pointed petals, sometimes tipped light yellow. Plants, 1s. 6d.; enttings, 1s.
1090. MADAME G. BRUANT (Jap.)—Enormous flower; colour light rose, margined deeper, very long petals, with reverse silvery pink; dwarf vigorous habit. Plants, 2s. 6d.; cuttings, 1s. 6d. First-Class Certificate, N.C.S., Award of Merit, R.H.S.

1091. MADAME HENRI DE LA ROCHETERIE (Jap)-Pure white, with distinct shades of green when first opening, as with Florence Davis, but the tips of the florets turn with age to a heautiful pearl colour; an enormous flower. First-Class Certificate. Second crown. 5 ft. 3s.

MADAME LOUIS REMY (Jap.)—Pure white sport from Mrs. C. II. Payne. needs no description from me, as the parent is so well known, and this being pure white must prove a great temptation to all who are looking for monster. Plants only, stock limited. 2s. 6d.

1093. MADAME THERESA CHARVET (Jap. Inc.)—Beautiful rosy carmine, with silver reverse; rather late. First-Class Certificate. Second crown. 5 ft. 5s.

1094, MADAME X. RAY JOUVIN (Inc. Jap.)—Very large flower; pearly mauve, large thick leathery petals incurving in centre; dwarf vigorous habit, the foliage right up to the flower. This variety received a Gold Medal at Lyons. Plants, 2s.; cuttings, 1s. 3d.
1095. MDLLE. E. DE LA ROCHETERIE (Jap. Inc.)—Pure white; a model flower, almost,

if not quite, an incurved flower. First-Class Certificate. First crown. 5 ft. 3s.

1096. MDLLE. LAURENCE ZEDE (Iuc. Jap.)—Large; lilac, shaded white; large petals, incurving and twisting at the tips. Plants, 2s.; cuttings, 1s. 3d.

1097. MDLLE. LOUISE CORDONNIER (Jap. Inc.)—Pure white on first crown buds, but second crowns and terminals are beautifully shaded rosy mauve; the long florets are very ragged. 5 ft. 3s.

1098. MDLLE. LUCIE FAURE (Inc.)—Delicate shade of white, finishing off pure white; a flower of lovely form. Gold Medal at Paris. F.C.C., N.C.S. Plants, 2s. 6d.; cuttings, 1s. 6d. 1099. MARFA (Jap.)—Immense; flower extra full, orange and yellow; shaded red, very fine colonr, petals curling to the centre; vigorous habit. Plants, 1s. 6d.; cuttings, 1s.

1100. M. B. VERLOT (Inc. Jap.) — Immense; colour lilac, without any shading; very vigorons habit. Plants, 2s.; cuttings, 1s. 3d.

1101. M.G. CHABANNE (Inc. Jap.) - Good; colour canary-yellow, petals regularly incurving; dwarf habit. Plants, 1s. 6d.; cuttings, 1s.

1102. M. MASSANGE DE LOUVREX (Jap.)—Large flower; colour canary-yellow, silver reverse; large petals, incurving slightly at the tips; dwarf habit. Plants, 2s.; cuttings, 1s. 3d.

1103. M. W. H. FOWLER (Jap.) - Immense flower, very full; colour pale rose; medium-sized

petals, incurving in the centre; good habit. Plants, 2s.; cuttings, 1s. 3d.

1104. N. C. S. JUBILEE (Inc. Jap.)—Very large; colour lavender, silver reverse; very large petals, incurving in the centre; good vigorous babit. F.C.C., N.C.S. Plants, 2s.; cuttings, 1s. 3d.

1105. ONCLE MICHEL (Jap.)—Large flower; rich carmine, with silver reverse; loug petals

of medium width, form and colour extra. Plants, 2s.; cuttings, 1s. 3d.

1106. PRESIDENT NONIN (Inc. Jap.)—Large; colour bronzy-yellow, shaded red; dwarf vigorous habit. Plants, 2s. 6d.; cuttings, 1s. 6d.

1107. PRINCESSE DE GALLES (Jap.)—Limnense flower; colour creamy-white, with light vellow this very distinct colour. Plants yellow tips; very distinct colour. Plants, 2s.; cuttings, 1s. 3d.

1108. SECRETAIRE FIERENS (Jap.)—Very large full flower; colour blood-red, reverse golden yellow; long petals; good vigorous habit. Plants, 2s.; cuttings, 1s. 3d.

1109 SOLEIL D'OCTOBRE (Jap.)—A large flower of reflexed form; colour canary-vellow; good dwarf habit; a real gem. Commended. Plants, 2s.; cuttings, 1s. 3d.
1110. SOUVENIR DE MDME. F. ROSETTE (Jap.)—Enormous flower; colour dark purple, reverse claret-red; large petals; dwarf vigorous habit. Plants, 2s.; cuttings, 1s. 3d.

1111. SOUVENIR DE MOLINES (Jap.)—Very large flower; extra full; colour brick-red, with reverse bronzy-yellow. A great improvement ou Arona. Plants, 1s. 6d.; cuttings, 1s.

1112. SURPASSE AMIRAL (Jap.)—Large, very full; colour deep golden yellow, sometimes striped red; very dwarf habit. First-Class Certificate, N.C.S. Plants, 2s.; cuttings, 1s. 3d.

1113. TOPAZE ORIENTALE (Inc. Jap.)-Large, full flower; pale yellow, shaded white; medium petal; good habit. Plants, 1s. 6d.; cuttings, 1s.

1114. WERTHER (Jap.)-Large flower; colour purple, shaded red, with light reverse; long petals; vigorous habit. Plants, 2s.; cuttings, 1s. 3d.

AND CHOICE CONTINENTAL AND AMERICAN VARIETIES OF 1896

AUSTRALIAN GOLD (Jap.)-Enormous flower, colour clear canary-yellow; good dwarf habit. First-Class Certificate. 9d.

1116. BARON AD. DE ROTHSCHILD (Jap.)-Very large flower, with florets of great length; colour creamy white. Plants, 1s. 6d.; cuttings, 1s.

1117. BELLE MAUVE—Very large and distinct flower of fine form, the colour is a very beautiful shade of lavender-mauve. Plants, 1s. 6d.; cuttings, 1s.

1118. BELLE OF CASTLEWOOD (Jap.)—Broad incurving petals; very large flower; colour a beautiful shell-pink. 2s. 6d.

1119. BETTY BOCK (Inc.)—A very deep flower, colour silvery pink. 1s. 6d.

BUFF GLOBE-A sport from Good Gracious; colour a pretty shade of charois and

Plants, 1s.; enttinge, 8d.

1121. CHRYSANTHEME BRUANT (Inc.)-A grand addition to the incurved section; good deep flower, and fine baild; eclour a beautiful rosy buff, and will make a splendid exhibition flower. 3s. 6d.

- 1122. DOCTEUR DUVIARD (Jap. luc.)—Another good flower; colour lilac, with paler

Plants, 1s.; cuttings, 8d.

DOROTHY SPAULDING-Deep rose-pink, shade of Mand Dean; globular flower; 1123.extra carly; crown bud. 1s. 6d. each.

FLEUR GRENOBLOISE (Jap.)-Large flower; colour pleasing shade of silvery

white. Plants, 1s.; cuttings, 8d.

1125. FRANCIS B. HAYES (Inc.)-A beautiful bright pink; grand acquisition. 1s. 6d.

1126. GLORY OF THE PACIFIC (Jap.)-A grand addition; one of the most levely pinks ever sent out. Sure to become a standard flower. - 5s

1127. GOLDEN TROPHY—An American of great promise. A large and handsome bloom, full, incurving, and nearly globular; char yellow, strong and healthy foliage. Plants 24 ft. in

height. Described by the raisers as a most valuable variety. Plants, 2s. 6d.; cuttings, 1s. 6d. 1128. GOLDEN WONDER (Jap)—A solid flower, of entra large size and good form; the petals are long, full, very stont, and slightly toothed at the extremity, making up a very full exhibition flower of very great merit; of a beautiful clear golden yellow. F.C.C. ?s. 6d.

1129. H. J. PARK (Jap. Inc.)—This is another magnificent introduction, and sure to take a foremost place amongst exhibition varieties; the colour is yellow, of a particularly rich shade, the florets of broad width; a very promising solid flower; good habit. First-Class Certificate. 3s.

1130. J. H. WOODFORD (Jap. Inc.)—A deep massive incurving Japanese of splendid form and substance, the florets are of extra width, building up a superb exhibition flower; the colour is a lovely pink, shading off to almost white in the centre; good habit. F.C.C. 4s.

LE CHARTREUX-Immense Japanese; colour mauve, reverse of florets of a paler

shade, with yellow tips. Plants, 1s.; enttings, 8d.

1132. L'EMINDRA-A flower of large size, with long florets, slightly inentving at the tips; colour creamy wlute; dwarf habit. Plants, 1s.; cuttings, 8d.

1153. LENAWEE-Immense spreading flower, white, later buds coming soft pink; gold habit.

F.C.C. Plants, 1s.; cuttings, 8d.

1134. MADAME ESCHENAUER (Jap. Inc.)-Massive, somewhat resembling in form

Mrs. C. Harman Payne; colour lilne, with silvery reverse. Plants, 1s.; cuttings, 8d.

1135. MADAME GUSTAVE HENRY (Jap. Inc.)—One of the finest of recent introduction, with florets of medium width; grand full flower of lovely ivory-white; dwarf habit. T cannot be too highly recommended as an exhibition flower. F.C.C. Plant, 1s.; cuttings, 8d.

1136. MADAME J. BERNARD-Lovely golden yellow, with florets of good length. Plants,

1s.; cuttings, 8d.

1137. MADAME J. CHAURE—Colour crimson-red, golden reverse. Plants, 1s.; cuttings, 8d. 1178. MADAME J. SMEERS (Jap) .- Another good white variety; somewhat early. Plants, 1s.; enttings, &d.

1139. MADAME L. BOURGETTE (Jap.)-Very large; colour bright rose; go d strong

grower. Plants, 1s.; enttings, 8d.

1140. MADAME MAILFAIT (Inc.)—Colour deep violet, with a lighter reverse. Plants, 1s.;

cuttings, &d.
1141. MDME. MEEUS DE PROLI (Jap.)—Large flowers of the purest white, with florets of

great length. Plants, 1s.; euttings, 8d.

1142. MDME. R. GRENIER (Jap. Inc.)-Pure white, very large florets. euttings, 8d.

1143. MDLLE. MARGUERITE GUEZE-Large spreading flower, white, striped pink, good full flower; habit rather dwarf. Plants, 1s.; cuttings, 8d.

1144. MDLLE. MARIE ANT. JULIAN-A Japanese incurved of large size; colour deep rose,

reverse silvery pink; medium habit. Plants, 1s.; enttings, 8d. 1145. MAUD ADAMS (Jap. Inc.) - l'etal cup and interlace, forming a perfect ball of vellow;

one of the best late varieties. 1s. 6d.
1146. MODESTO(Jap.)—Very large, resembling instyle the well-known M. Panckoucke. Florets of great length, prettily incurving; grand full bloom of much substance. Colour very deep golden yellow; robust constitution. Plants, 1s.; cuttings, 8d.

M. A. CHARMET-Another variety of great promise, with long tubular florets; colour

deep violet with lighter reverse. Plauts, 1s.; cuttings, 8d. 1148. M. ALFRED RECOURA (Jap. Inc.) - Colour bronzy yellow. Plants, 1s.; cuttings, 8d.

1149. M. DELAMOTTE (Jap. Inc.)—Colour dccp yellow. Plants, 1s.; cuttings, 8d. 1150. M. DESTRE BOURDOIS (Jap. Inc.)—Striking; colour crimson-red with golden reverse; dwarf habit. Plants, 1s.; cuttings, 8d. 1151. M. EDOUARD ANDRE (Jap.)—Immense; colour pleasing shade of old rose; florets long and broad, prettily twisting and curling; good habit. Plants, 1s.; cuttings, 8d. 1152. M. E. ROSETTE (Jap.)—Enormous spreading, with very long florets; white. Au invaluable exhibition variety; capital babit. Plants, 1s.; cuttings, 8d. 1153. M. GERAUD (Jap. Inc.)—Immense, of Violet Rose type, and of similar colonr; very good exhibition variety; dwarf. Plants, 1s.; cuttings, 8d.

1154. M. HOSTE (Jap.).-Immense exhibition flower of true form, with long and broad florets, building up a flower of much substance; colour white, distinctly margined and flushed with rose, slightly suffused with light yellow. F.C.C., N.C.S. Dwarf habit. Plants, 1s.; cuttings, 8d.

1155. M. VILLENEUVE-BUTEL (Jap. Inc.) - Colour beautiful shade of violet with paler

reverse; rather late variety. Plants, 1s.; cuttings, 8d.
1156. MRS. J. LEWIS (Ref. Jap.)—Large, of great substance; pure white. Plants, 1s.;

cuttings, 8d.

1157. MRS. JOHN J. GLESSNER-A light yellow, very distinct in form; broad petals, opening in a whirl, which when matured assume a convexed form, tips turning backward, and twisting in all directions, giving a very irregular outline; flowers, 7 by 7 inches in diameter, a perfect ball, 4½ feet in height, maturing November 1st; robust habit; stem very stout and short when terminal had is selected. (Edward Hatch×Mrs. Jerome Jones.) Recommended for Certificate by the C.S.A. at Chicago and Cincinnati. 3s. 6d.
1158. MRS. MARTIN A. RYERSON (Snowball × Mrs. McK. Twombly) -- Recommended

for Certificate by the C.S.A. at Chicugo and Springfield; also winner, at the latter place, of the \$50,000 prize for seedling, scoring the highest number of points. A pure white, petals narrow; from crown bud it is reflexed, and from terminal the centre builds up with interlacing, incurved petals, making a very high flower, distinct in form, maturing November 10th to 15th. 61 by 61

1159. MRS. R. D. DOUGLAS (Iuc.)—Another graud addition to the incurved section; colour a beautiful old gold dusted red. 3s. 6d.

1160. MRS. R. McARTHUR (Inc.) Pure snow white; one of the most perfect. 2s. 6d.

MRS. W. C. EAGON (Inc.)—A very large flower, with broad incurving florets; colour 1161. silvery lilae. Second crown. 1s. 6d.

1162. NEW YORK (Jap. Inc.)-Pure white, with broad massive petals, but a bad doer. Plants, 1s.: cuttings, &d.

1163. PHRYNE-Extra broad petals, rich red-bronze, very large; good habit and strong

Plants, 1s.; cuttings, 8d. grower. PORCELAIN (Jap.) - Very beautiful; colour blush pink. Plants, 1s.; cuttings, 8d. 1164.

RACHAIS (Jap. Inc.)—Colour old rose, pretty golden reverse. Plants, 1s.; cuttings, 8d. RED WARRIOR—Rich chestnut-red, broad flat petals; a grand flower; large. 1165. 1166. Plants, 1s.; cuttings, 8d.

1167. REVE D'OR (Jap. Inc.)—Another good yellow. Plants, 1s.; cuttings, 8d. 1168. SIMPLICITY—A flower of splendid form, of the purest white. First-Class Certificate. Plants, 1s.; cuttings, 8d.

1169. SOUVENIR DE MA SŒUR (Jap. Inc.)—Colour lilae-mauve, reverse somewhat paler.

Plants, 1s.; cuttings, 8d.

1170. SUNCLAD—Golden yellow flower, in style of H. L. Sunderbruch. Plants, 1s.; cuttings,

1171. SUNSTONE—A very promising flower, with long florets of medium width; colour clear

light yellow; beautiful and distinct. First-Class Certificate. Plants, 1s.; euttings, 8d. 1172. SURPASSE GAMBETTA (Jap.)—A flower of large proportions; colour brick-red;

good habit. Plants, 1s.; cuttings, 8d.

1173. THANKSGIVING (Jap.)-Very sturdy habit; flower very large; colour a beautiful clear pink. 1s. 6d.

1174. TRIOMPHANTE DE CH. MOLIN (Jap.)-Immense flower, very long petals; colour violet-rose, centre of flower slightly tiuted yellow. 2s. 6d.

1175. VELMAR (Jap. Inc.)-Colour rosy carmine. Plants, 1s.; cuttings, 8d.

1176. VICOMTE ROGER DE CHEZELLES (Jap.)—Large, with long florets, hooked at the tips; colour striped red; dwarf habit. First-Class Certificate, N.C.S. Plants, 1s.; cuttings, &d. VIOLESCENT (Jap.)-Extra fine; white, shaded lilac. Plants, 1s.; cuttings, 8d.

1178. YANOMA (Jap.)-Very promising; pure white. Plants, 1s.; cuttings, 8d.

OTHER VARIETIES FROM VARIOUS SOURCES.

1179. AMI TANESSE-Incurved, large, old violet rose, bronzy reverse. 1s. 1180. BEAU RÉVE-Incurved, silvery-white, tinted rose. October. 1s.

COMTESSE JEAN DE LA ROCHEFOUCAULT-Deep carmine, reverse and centro 1181. 1s. 6d. silvery.

LUCILE MATHIEU DE LA DRÔME-Golden yellow, reverse pale rose; extra. 1182.

M. J. MOLIN-Probably the finest red coloured variety. 1183.

MME. DESBLANC-Rose, shaded silver; superb.

- 1185.
- MME. GÉRAND—Incurved, petals large and finc, rosy flesh colour. 1s. 6d.

 MME. LA BARONNE DE HIRSCH—Incurved, very double, and of the purest white; 1186.

Terminal bud. 1s. 6d. superb.

- MME. LIGER LIGNEAU-Undoubtedly the finest yellow early flowering variety; 1187. very dwarf. 1s.
- MME. LOUISE ADLER-Very large, rose passing to pure white, petals long and 1188. large.

NAISSANCE D. L. S. F. D. C.—Blood red, shaded purple; very large flowers. 18. 1189.

PAPA VEILLARD—Deep rosy-mauve, silvery reverse, broad flerets. 1s. 6d. PARACHUTE—Deep rose, tinted earmine and salmon; large and fine. 1s. 1190. 1191.

ROSE ARNAUD—()f immense size. 1s. 1192.

TRIOMPHE D'EVE (Inc.)—Rosy-white; a fine globular flower. 1s. VALLÉE DE GEINSTEIN—Incurved, large rose, tinted golden. 1s. 1193. 1194.

HAIRY CHRYSANTHEMUMS.

BARONNE DE LA ROCHERE-Large, pearly rose, reverse yellow. 1s. 6d. 1195.

BEAUTÉ LYONNAISE-Incurved, chestnut, reverse amber. 1s. 6d. 1196.

BOUQUET DES ALPES-Dwarf, beautiful colour, silvery-rose, marked clear violet. 1197. 1s. 6d.

1198.

1199.

CAPRICE—Delicate rose, incurved. 1s. 6d.

CHAS. BONAMY—Yellow passing to rose; large. 1s. 6d.

DEUIL DU TZAR ALEXANDRE III—Purplish magenta, reverse silvery; beautiful 1200. colour.

DUVET BLANC-Pure white, hairs very long. 1201.

EIDERDOWN-Late flowering; white, large globular shape. 1202.

ESPELATA—The finest pure white variety. 1s, 6d. 1203.

EXPOSITION DE GUITRES - Rosy-mauve marbled white, reverse silvery, very 1204. hirsute.

GLORIE LYONNAISE-Rosy-magenta passing to rose-earmine. 1205.

1206. IDA—Soft rose; large

JOYEUSE PROVENCALE—Rosy colour passing to white, very long petals. 1s. 6d. 1207.

KAT. RICHARD GORDON-Incurved, white, rose towards centre. 1208.

LE PIC LONG-Fine flower, deep violet, reverse clear violet marked white. 1209.

MAURICE BOISSARD-Incurved, large petals, sulphur yellow, reverse emary. 1210. 1s. 6d.

M. CAMPAGUYA—Incurved, rose tinted lilac, reverse silvery, centre yellow. 1s. 6d. 1211.

M. CHALANDON-Splendid, incurved, citron yellow. 1s. 6d. 1212.

M. COUTANT-Incurved, rich lilac, slightly hairy; large and fine. 1s. 6d. 1213.

- M. E. VUILLARD-Nankeen yellow, heavily shaded and streaked red; fine flower. 1214. 1s. 6d.
- M. PIQUEMAL DE ROZEVILLE Enormous and magnificent flowers; reddish 1215. One of the finest, and the coleur most unique. 1s. 6d. crimson.

MLLE. PHILOMENE CLARET-Pretty flower, delicate rose. 1216.

MME. LEON TOUCHARD - Incurved, rosy-pink, reverse silvery; fine novelty. 1217. 1s. 6d.

MOUSSELINE—Slightly incurved, bright silvery rose. 1218.

MYGALE-Tubular shaped petals. 1219.

SAGHALIEN—Large and fine; bronze, reverse golden. 1s. 6d. 1220.

SNOW CAPED-Creamy white, pure white hairs. 1s. 6d. 1221.

ST. BARTHELEMY-Inemved, pretty shade of rose, reverse silvery. 1222.

TATZU KZIRA-Very long tubular petals; old gold. 1223.

TOFFA-Large incurved flowers, bronzy red. 1224. TOUR DE CAROCHE-Incurved, deep rosy lilae, tips of florets citron. 1s. 6d. 1225.

TRIOMPHE DE BELLECOUR-Pale rose, slightly tinted cream reverse of palas; 1226. very hairy. 1s. 6d.
1227. VTE. D'HUMIÈRES—Tubular petals, incurved, white, beautiful.

1228. ZAÏDE—Well incurved, amaranth carmine.

1229. ZAMPA-Salmon, passing to creamy white; very hairy.

BOUTONNIÈRE, ÆSTHETIC, AND SPIDERY VARIETIES.

1230. ALBINOS—Pure White.

1231. ARGENTINE-L'lac, tinted white.

- CHEVEUX VIOLET-Violet tinted. 1232.
- FIL D'ARAIGNÉE. 1233.
- HOUPPE FLEURIE-Rich red. 1234.
- LI-CHAO-PEC-Novel shape. 1235.
- MARQUISE DE CLERMONT-TONNERRE-Tinted white.
- MLLE. MARIE ROSE-Creamy rose. 1237.
- 1237A. MRS. W. BUTTERS-Pure white.
- 1238. PIPER-HEIDSIECK.
- 1238A. SAM CASWELL-Spidery, deep pink; almost the exact counterpart of Mrs. Filkins, except colour. Plants, 2s. 6d.
 - 1239. THIBET—Canary yellow. 1240. TRIOMPHE—Yellowish salmon.

EARLY FLOWERING VARIETIES.

- 1241. A. LEGEUNE-Carmine amaranth.
- 1242. EDMOND DUVAL-Pure white.
- HORTULANUS Rosy salmon, shaded yellow. L'ABBÉ MORLOT Amaranth 1243.
- 1244.
- 1245. M. MARIE-Creamy white.
- 1246. MINISTRE H. BOUCHER-Manve, silvery shading.
- MINISTRE RAMBAUD-Pure white, centre cream. 1247.
- MME. ALBERT MENIER-Creamy-white. 1248.
- MME. ALFRED DROZ-Golden yellow. 1249.
- MME. ARMAND GROZ-Nankeen rose. 1250.
- 1251. MME. CAVÉ -Rosy-white.
- 1252. MME. EMILE NONIN-Creamy-white.
- 1253.
- MME. GAGAC—Rosy-violet.
 M. B. YUNG—Reddish crimson.
 M. LÉVÊQUE PÊRE—Old gold. 1254.
- 1255.
- PRESIDENT ED. BARRE—Rich red. SURPASSE GRUNERWALD—Bright rose. 1256. 1257.
- VICOMTE DE MONTRICHARD-Bright chestnut 1258.

Plants, Is. 6d. each, 15s. per doz.

BOUTONNIÈRE, ÆSTHETIC, AND SPIDERY CHRYSANTHEMUMS.

Where refinement in decorations is desired these will now take the place of the Pompon and single-flowered varieties, and will undoubtedly occupy a position in Chrysanthemums similar to the Cactus-shaped kinds iu Dablias, which have gained such well-merited popularity throughout the world. It is our full conviction that these light, graceful, and yet fantastic shaped Chrysanthemums will attain a prominent position in even a much shorter time, and owing to their lasting properties when cut, which is a great advantage, they will be eagerly songht after and used by every lady who admires something neat and nice for the decoration of the table. For buttonholes and sprays they are even a worthy rival to the Orchid, both in appearance and keeping qualities; no garden or greenbouse ought to be without them. See opinions of the gardening papers and the Press.

ANNIE HARVEY—The white Mrs. Filkins, see front of "Guide."

- ALICE CARTER—Colour reddish brown, tipped with gold; distinct and novel. BOUQUETERRE—White, tipped with yellow and rose.
- 3. CENTAUREA—Deep orange yellow; very distinct.
 4. CHEVEUX D'OR—Rich golden yellow.
 5. COUNTRY OF GOLD—Yellow; very free.

- JITSUJETUI—Silvery pink; very pretty.
 KING OF PLUMES—Rich deep yellow, prettily ent and notched. Award of Merit,
- 8. MIDGET (Jap.)-Smallest and most perfect form of any flower; of lovely refined shape; innumerable small florets; colour wbite, shaded pink; very free and good grower, and bas the most valuable property of flowering profusely all through December.

MRS. FILKINS-Of Japanese form, medium-sized flowers prettily cut and notched very free flowering; a bright golden yellow. Award of Merit, R.H.S.

10. MRS. JAS. CARTER-Colour pale yellow, passing to white.

11.

SILK TWIST—Of a rosy mauve and cream shade, full double flowers; pretty. SOUV. DE MME. G. EYNARD (Dec. Jap.)—A most wonderful arrangement of colours, reddish chestnut tipped golden yellow, tlp of each petal is twisted; very attractive and novel.

13. WHITE ELKSHORN-Pure white; extra.

YELLOW SULTAN-Golden yellow; very compact and dwarf.

6d. each, 4s. per doz.

NEW AND CHOICE HAIRY CHRYSANTHEMUMS.

ABBE PIERRE ARTHUR-A very large bloom, with long petals of the purest white

ineurving in the centre, outer petals prettily drooping; good babit. Plants, 1s.; cuttings, 8d.

16. BARONNE DUTHEIL DE LA ROCHERE (Jap.)—Immense flower; colour a lovely

pearly-rose, reverse deeper. 2s. 6d.

17. BEAUTY OF TRURO-Yellow ground, sport from the hairy variety Louis Bochmer, flushed with purple as in parent. Plants, 9d.; euttings, 6d.

18. BELLE DES GORDES (Jap. Iuc.)—Large; colour brilliant rosy red Plants, 1s. 6d.;

enttings, 1s.

19. CAPITAINE BLANCARD (Jap.)-A grand addition to the birsute varieties; colour a lovely bright rose shade. 3s. 6d.

20. CAPT. L. CHAURE (Jap. Inc.)—Of large proportions; colour yellow chamois, inside

petals bright crimson. Plants, 1s.; cuttings, 8d.

21. CLOVIS HUGAS-Similar in colour to Louis Boehmer, very long petals. Plants, 9d.; cuttings, 6d. 22. ENFANT DES DEUX MONDES (White Louis Bochmer)-Pure white; has the same

vigorons babit as Louis Boehmer. Late erowu bud. Plants, 6d.; cuttings, 4d. 23. ESAU—Salmon blush, tinted yellow; good. Plants. 6d.; cuttings, 4d.

24. GOLD DUST-Pare golden yellow, very brilliant colour; plumy, very full, and finely

incurved; fine dwarf habit; stop early. Plants, 9d.; cuttings, 6d.

25. GOLDEN HAIR—Golden yellow, densely covered with spines. Plants, 1s.; enttings, 8d. 26. HAIRY WONDER (Jap.)-A large flower, with long spreading florets partly tubulated, but opening at the tips, which incurve somewhat towards the centre. The colour is bright reddish bronze, passing to bright golden bronze. The blooms are large and massive, easy to grow, and without a doubt the finest hirsute variety in existence. First-Class Certificate. Late crown bud; 8-in. pot. 1s.

27. KING OF THE HIRSUTES-Colour pale lemon-yellow. Crown bnd. Plants, 9d.;

cuttings, 6d.

28. LADY OF THE LAKE-Colour of a pale heliotrope; very hairy. Crown bud Plants, 9d.; enttings, 6d.

29. LEOCADIE GENTILS—A lovely yellow sport from L. Boehmer. Plants, 2s. each.

LOUIS BOEHMER-Colour a delicate shade of rose-pink; the petals are covered with long silvery hairs. 6d.

31. MADAME ADRIEN DE MONTEBELLO (Jap.)—Immense flower; white shaded with .

rosy-pink. 2s. 6d.

32. MADAME JUDITH JOURDAN (Jap.)—Colonr deep rosy salmon; a very attractive variety. 3s. 6d.

33. MADAME M. MARCHANT-Large flower, colour rosy blush; good habit. Late erown bud. Plants, 9d.; cuttings, 6d.

34. MADAME SECARECK-A distinct hairy variety, the birsute appendages being freely produced and well defined; colour a pleasing shade of lavender, shaded rosy mauve. Plants, 1s.;

35. MDLLE. ROUVIERE-HOULES (Inc.)—A promising flower with long petals, colour

flesh-white. Plants, 1s.; cuttings, 8d
36. MIDNIGHT—Enormous solid bloom; broad petals, densely covered with hairs, in the style of Hairy Wonder. Plants, 1s.; cuttings, 8d.

37. M. FERNAND BERTIN-White, shaded red; broad petals and large bloom; habit good. Crown bud. Plants, 6d.; cuttings, 4d.

38. MR. D. AMBRIERE-Another good bronze variety, centre coming bronzy-yellow with age; dwarf habit. Plants, 1s.; enttings, Sd

(.49)

39. MRS. ALPHEUS HARDY-Pure white, petals broad and incurving. than usual, plenty of charcoal, little manure; stop the plant in March. Crown bud. Plants, 6d.; euttings, 4d.

MRS. C. B. FREEMAN-Deep golden yellow, sport from Louis Boehmer, with all the good 40.

qualities of its parent. Plants, 1s. 6d.; cuttings, 1s.

41. MRS. DR. WARD-Colour a distinct shade of hronze-yellow; flowers large and deep;

dwarf. Crown hud; high culture. Plants, 6d.; cuttings, 4d.

42. MRS. W. J. GODFREY—Large, purest white, broad florets, incurving. 9d.

43. PAPA BERTIN—Large flower; colour delicate flesh-pink; dwarf hahit. Late crown bud. Plauts, 6d.; cuttings, 4d.

44. PERLE D'OR-A lovely shade of canary-yellow, long hroad petals; good habit. Plants,

9d.; cuttings, 6d.

45. P. MARETON-Orange, shaded red, large spreading flower; good hahit. Late crown hud. Plants, 9d.; euttings, 6d. PRIMA DONNA-Colour inside bronze-red, the reverse naukcen-yellow; dwarf. Crown

bud, 10-in. pot. Plants, 6d.; cuttings, 4d.
47. PRINCESS ENA—Colour a clear warm rosy pink. 6d.

48. SAUTEL, 1893—Broad incurved petals, hloom of good size. Colonr earmine, reverse golden hronze. Crown hud. Plants, 6d.; entitings, 4d.
49. SOUVENIR DE L'AMI COYE—Pure white; dwarf and vigorons hahit. Crown bud.

Plants, 6d.; cuttings, 4d.

50. VAUCANSON—A very fine large deep variety, in the way of Louis Bochmer, but in every respect an improvement. Crown bud. Plants, 6d.; cuttings, 4d.

51. WHITE SWAN—A heautiful flower; as hirsute as Hairy Wonder. Plants, 6d.

51. WHITE SWAN—A heautiful flower; as hirsute as Harry Wonder. Flauts, 6d. 52. WM. FALCONER—Blush-piuk, sport from Louis Bochmer. Similar in all respects save colour. Plants, 6d.; cuttings, 4d.

SIMPLY AN ANNOUNCEMENT.

We are on the best of husiness relationship and have special terms with all Trade-growers. Onr orders for new varieties are already given for large quantities, so that we may have the first early plants, and thus enable us to despatch with our own all new kinds of other raisers in one package; and we further respectfully intimate to all those who wish their orders to be sent in first-class condition, that they should forward their commands as soon as possible after receipt of this New List.

NEW CHRYSANTHEMUMS.

EED is now being saved in every country in the world. It comes up readily, and of course each raiser sees wonderful things in his own, so they are thrust on to the public. From long experience, seedlings want carefully selecting with practical knowledge, and even then should be well grown and shown the next year, as there may be many little nasty habits to prevent it ever becoming popular. We have increased our department, hull the grandest and best adapted house, 160 feet long hy 25 feet wide, and appropriated nearly an additional acre of ground house, foo is that we had cut down early before flowering, which we have now taken up with large balls of earth, and are giving us valuable, early, and first-rate cuttings that give more than satisfaction. We only intend to purchase from the principal growers, who have a knowledge of what is wanted, and of others that can he relied upon. Seedlings are raised as readily as Zoual Pelargoniums, and the world can be swamped with many that are not nearly so good as our older When good ones are obtained, they ought to command double what they have hitherto done to make them worth venturing large sums of money. Even some of those that have been cultivated by the greatest experts, in our opinion, will not be heard of again. We only intend to introduce those that will become standing varieties, like those we have hatherto put in commemc, giving us a great reputation for the hest varieties sent out by any firm,

CHRYSANTHEMUM CUTTINGS.

We have adopted quite a new system for the supply of cuttings, which we are sure will be much more satisfactory to the purchasers, and far more successful thau those supplied in the usual way from plants which have stood close together with their long drawn-np cuttings, and often from those not very healthy, whose colours have been strained to the utmost.

We now plant out our stock of young plants first week in May in the open ground, and cut them down the end of September, then lift them with large balls of earth and plant them in our earthstage, close against the glass. They soon begin to throw up quantities of cuttings of a short sturdy nature, quite different to those from exhibition plants, and the difference is such that all growers who have seen our two houses, 100 ft. each, full of these roots, would decide never to grow from the over-worked old stools again.

LARGE-FLOWERING INCURVED VARIETIES

FOR CUT BLOOMS.

Those varieties marked with a (*) are those that have been exhibited, and were amongst the winning classes at the principal shows throughout England. All those with a (†) are the best for exhibition specimen plants. (a) Raised and sent out by H. C. & Sons.

LARGE-FLOWERING ANEMONE, OR QUILLED ASTER-LIKE CHRYSANTHEMUMS.

A stand of these, when well grown, has a most nnique and beautiful appearance, and if once seen they would be grown by hundreds; and the same with Pompon Anemone.

The selection here made includes the best of this somewhat limited but very beautiful class. They should be exhibited in single flowers, like the Incurved.

ANEMONE OR QUILLED ASTER-LIKE FLOWERED POMPONS FOR STANDS OF CUT BLOOMS.

Amongst the many stands of flowers seen at Chrysanthemums exhibitions, none in our opinion surpass these for beauty of colour and chaste appearance. They should be exhibited with three sprigs or shoots, together with from 8 to 10 in. of stem and foliage. As their flower stems are very weak and do not hold up their flowers well they should be strengthened with wire.

JAPANESE CHRYSANTHEMUMS.

SECRETS IN COMPETITION.

Although the Japanese do not require to be made as uniform as if they had been east in one mould, like the incurved and recurved, yet they require similar arrangement, so that they each present a regular and pretty form, whatever their natural shape may be. Massiveness and great depth of flower is most appreciated; flat hollow centres and undecided colours should be avoided. No model can be set np in this section as the one required. Yet whatever style of twisting, enrling, or recurving best suits the variety, to assist that growth of the flower to develop itself, and when done, it must be such as the eye will cause the tongne to say, "That is pretty; I like that variety. It generally follows, what pleases the public pleases the judges, and that is the secret of success.

EARLY-FLOWERING CHRYSANTHEMUMS.

ARLY flowering Chrysanthemnms are making rapid improvement; we now give them more attention and grow them hetter. Onr house, after the Carnations and Picotces were removed, and during Angust and September, was really a fine sight. It cannot he said we have nothing but Dahlias in the autumn, for these can be had in ahnndance; yes, for many continue throwing np flowers after the first lot are ent—so very different to the ordinary November kinds, and for bedding many of the varieties make a grand feature. Mr. Brown, the Superintendent, Hyde Park Gardens, writes us:—" Madame C. Desgrange has again made the most attractive bed in the Gardens this season, and these are fast becoming a most important section of this family, but like all Chrysanthemnms they require to be well grown, otherwise they will end in disappointment."

COUNTRY GROWN PLANTS AND CUTTINGS.

The difference between our country grown plants and enttings, and those grown and sold in or near London or other towns, is so manifest that no comparison can be drawn. True, they like soot at their roots, but not to be covered with it, as they must be when grown in such a situation, and for the want of light arc poor and drawn up; whereas ours arc clean, strong, and healthy, and will root in half the time, and make stronger and healthier plants.

CHRYSANTHEMOMS.—Onr stock of both old and new varieties is the largest, most complete, an 1 in the finest possible condition, grown expressly for amateurs and professionals to win. As a proof, we are proud to see hy the New York Herald that plants supplied by ns have again carried off the American great prize, "Gold Medal."

When ordering, please quote edition of Catalogue, as the numbers are occasionally revised.

CHRYSANTHEMUMS. SINGLE

If we were to print half the extracts from the various horticultural papers, and the letters from those to whom we have sent flowers, including some of the highest titled patrons in the land, they would fill many pages, therefore we are convinced the following will suffice to cause these most highly useful and easily grown flowers to be cultivated in every garden. They are little or no trouble to grow; produce more blooms, last longer in good condition, either cut or uncut, than the doubles, In persistency of petal the single Dahlias bear no comparison, neither do they for real heauty and use. Further, they have a nice perfume, and for all kinds of decoration will not only add a new charm, but fill our tables with brightness and beauty up to and past Christmas.

CHRYSANTHEMUM (MARGUERITES) PARIS DAISIES.

(Golden and Silver Stars.)

This class is really one of the most valuable for cut flowers; with only ordinary care they can be had in flower all the year. During the winter they are indispensable, and if afterwards planted out they make a splendid bed; if they have a fault at all, it is because they are too easily propagated. They were much admired by all visitors at the Paris Exhibition, and are extensively grown in the French parks as bedding plants. The fact of their never ceasing flowering makes them honsehold flowers everywhere.

1038. ALICE CROUSSE—Dwarf and very free; one of the best.

1039. ALMA BRUGGEMANN-Flowers single, beautiful clear golden yellow, edged white.

1040. BRANCHING ETOILE D'OR — Bright yellow; habit and free blooming arc all that can he desired. It is, in our opinion, the most serviceable plant sent out for many years.

1041. CORONARIUM FRUTESCENS—Wbite; splendid hedder.

1042. CORONARIUM GRANDIFLORUM
—Blooms all the winter.

1043. ÉTOILE D'OR—Yellow; blooms nine months in a year. 1s.

1044. MADAME FARFÆILLON.

1045. MAXIMUM — Pure white, yellow centre; fine for cutting. 6d. each; 4s. per doz.

1046. MINIATUM- Wbite.

1047. PINNATIFIDA—Beautiful follage.

1048. SPECIOSUM (Leucanthemum)—Supposed to be the original variety.

1049. ULIGINOSUM (Pyrethrum)—White, large yellow centre, blooms in September; a valuable hardy species, splendid for cut flowers.

6d. eacb; flowering plants, 1s. each.

NEW SINGLE FLOWERED ANNUAL CHRYSANTHEMUMS.

These novelties were obtained by crossing C. coronarium on to C. carinatum, and will prove a valuable addition to this class, and also very useful for cutting and decorative purposes.

1050. *CHIEFTAIN—Large, bright yellow, dark disc; fine.

1051. DUKE OF YORK—Deep yellow self;

1052. *ELEGANS—White, yellow centre;

1053. GOLDEN GEM-A beautiful rich

1054. *PRINCESS MAY—White with deep yellow ring round an orange disc; finc shape.

1055. *SUNSHINE — Bright clear yellow, golden disc, florets broad; large and fine

*Received an Award of Merit. 1s. eacb.

DOUBLE MARGUERITE (CORONARIUM CLASS).

Blooms all the year.

1056. aAURORA, DOUBLE (Cannell)—Bright yellow flowers, small and wonderfully neat and pretty; invalnable for cut flowers, and for button-holes not excelled hy any other flowers. First-Class Certificate. 6d.; flowering plants, 1s. 6d.

THE FIRST CHRYSANTHEMUM SHOW IN ENGLAND was beld at Norwich in the year 1825, and the names of the varieties exhibited were:—Tasselled Yellow, Clustered Pink, Yellow Cluster, Silver White, Yellow Flame, Early Blush, Changeable Pale Buff, Large Lilac, and Golden Yellow. How happy nurserymen and gardeners must bave heen in those days, with so few and such easy names!

SULPHATE OF AMMONIA.

This will be found useful in the cultivation of the Chrysanthemum, more especially to swell out the buds, and give vigour to the whole plant.

6d. per lb.; 7 lbs., 2s.; 14 lbs., 3s. 6d.; 28 lbs., 6s. Special prices for larger quantities.

(69)

FLOWER OF SULPHUR, 6d. per lb. NITRATE OF SODA FOR THE GARDEN.

Warranted of standard purity, as imported.
4-lb. Tin, 1s. 6d., post free.

DISTRIBUTORS.

India-rubher Puffs, for applying sulphur, tobacco powder, &c., to plants.

"The Duplex"...

2s. 9d. each.

Boite-a-Houpe

AWARDED HIGHEST RECOMMENDATIONS BY THE R.H.S. AND N.C.S. OF ANY TUBES YET EXHIBITED.

PROVISIONALLY PROTECTED No. 7141, 1894.

For Exhibiting Chrysanthemums and other Flowers.

The Cup has one Brass Side Spring which enables the exhibitor to adjust his flower with speed and accuracy in the tube or Water Container. It also has a very simple arrangement to prevent the necessity of plugging. × The Tube or Water Container has also one Brass Side Spring which passes through a Flange fixed to the Showboard from the under side.

By using these Tubes the exhibitor can raise his flowers seven inches from the board, with instant adjustment.

ITS ADVANTAGES ARE-

Simplicity, Ease of Adjustment, Durability, Efficiency, and Great Saving of Time.

For Incurved size, I inch diameter

 $\frac{1}{1}$, $\frac{1}{1}$, $\frac{1}{1}$, $\frac{1}{1}$, $\frac{1}{1}$, $\frac{1}{1}$

PRICE 9s. PER DOZEN.

Extract from the "British Gardening."

"It is not generally known that Mr. H. Cannell, of Swanley, proposed that the 'National Chrysanthemum Society' should assume that title. The Society, as reported a week or two ago in this journal, was originally a local organization, but Mr. Cannell, with his characteristic farsightedness, saw a future before it if it would but adopt the title of the National Chrysanthemum Society. The then president scouted the idea and vigorously opposed it. Eventually, however, it was adopted, with the results already known—namely, that it has grown into a powerful institution with a very wide reputation."

H. Cannell, Senr., would be glad to propose those sending 5s. as Members of the above Society.

SHOW BOX AND STAND, WITH CUPS AND TUBES COMPLETE

(Let us have orders a week before you require them.)

Show Box, painted and varnished, with two stands for 24 blooms, 24 Cups and 24 Tubes 2 0 0 1 10 0 Show Box, painted and varnished, with one stand for 12 blooms, 12 Cups and 12 Tubes 2 1 10 0 Show Box, painted and varnished, with one stand for 6 blooms, 6 Cups and 6 Tubes 2 1 10 0 15 0 Best Camel-hair Brushes, for dusting the blooms 2 1 - each.

Of the finest make and best quality. Will last many years

TIDY'S PATENT TELESCOPE CHRYSANTHEMUM CUP AND TUBE.

PERFECTLY WATER-TIGHT. Patent No. 8788.

The distinct advantages of this Patent Cup and Tube is-

1st—It is Perfectly Water-tight, no matter in what position it is placed. Once properly fixed, the box containing the boards could he placed in any position, without the slightest injury to the hlooms, and therefore it is unsurpassed for travelling long distances.

2nd—It is the only tuhe which raises the water with the flower, the bloom can be raised 11 inches, and at the same time with an ample supply of water.

3rd—By the set-screws one is able to place it in any position with security, the bloom not heing twisted but elevated vertically.

4th—Theindia-ruhher ring which fits in the cup is a Distinct Advantage as it is concave, gives to any size stem, and holds the bloom firmly without any plugging whatever.

oth—They are manufactured with the best quality zinc, well-finished, and are practicably indestructible, as seen from the foregoing illustration. It is the most simple and perfect tube in the market, and the sale is rapidly increasing.

It is made in different sizes for Chrysanthemums, Dahlias, Roses in fact, any flower which requires to he exhibited singly.

The letters in illustration are as follow—(A) Cup fits over water container (B), and passes into tube (C), and tube (C) into holder (D); the whole can be compressed for travelling to within 1½ inches of show-board.

Price per dozen, 12s. complete. All sizes.

We hope all exhibiting the produce, either from our Seeds, Plants, and Mannre will kindly drop us a note as to quantity, &c., and sufficient specially printed cards will be immediately sent to affix to each exhibit.

Anyone having seedlings or sports, or newly introduced Chrysanthemums of a distinct character, are respectfully requested to send blooms and full particulars to H. Cannell & Sons, Swanley, whose collection is the largest, hest kept, and most complete, forming a continuous bank of 1,200 feet, blooming lovely; heyond question the finest sight of this grand flower ever offered for public inspection. All are asked to "Come and See" during the season. Many thousands of plants specially grown for export to all parts of the world.

CINERA'RIAS.

HAT a splendid display these make when well grown! yet many have the idea that they are a dirty class of plants, and always infested with fly, but when they are so, it is nearly always because they have heen starved and confined in an unfavourable, dry atmosphere, and often placed next to some other infected plant. When seedlings or young plants are potted, place in a close frame for three or four days until they recover, and afterwards expose during the months of September and Octoher to all favourable weather, and even during the night with as cold a temperature as possible, just excluding the frost, and, as soon as the pots are filled with roots, supply with liquid manure, and at all times well surround with a moist, airy atmosphere. This family of plants should he the king of the greenhouse all through the spring, for really we know of no plant so easily grown as the Cineraria, and very seldom we find it necessary to fumigate until just hefore they are coming into flower. (For other particulars, see Seed List.)

First Prize at Royal Botanic Society's Show, Regent's Park,

Mr. John Don, Chapel Bar, Nottingham, 17th August, 1897. I have seen a gold medal given at one of the largest shows this season for a far less effective group of plants than your levely group of Cannas at Sevenoaks the other day when judging at Knowle Park.

DOUBLE CINERARIAS.

Seeds, 2s. 6d. per pkt.

E have one of the finest collections and were awarded the Gold Medal at Ghent, Belgium, for three dozen of these double flowers, which surprised Their Majesties both King and Queen of the Belgians. 67:10 Our selection to name, 1s. 6d., 2k., and 2s. 6d. each.

SINGLE CINERARIAS.

UR collection of Cinerarius is well known to contain grand varieties, and we invite all to come and see our houses during their period of blooming.

Our selection to name, 2s., 2s. 6d., and 3s. each. Seed, 1s. 6d., 2s. 6d., and 5s. per pkt.

TE MATIS

WITH ABRIDGED DESCRIPTIONS.

For Clematis Indivisa, see Greenhouse Climbers.

LA FRANCE-Lovely dark, brilliant, purpleblue flowers, perfect shape, and wonderful freedom of blooming. 2s. 6d. each.

SMITH'S SNOW-WHITE JACKMANII-The flowers are paper-white, about the same size as those of the old purple Jackmanii, but produced in even greater profusion. It is unrivalled for beds, and also for climbing. 2s. each.

LANUGINOSA TYPE.

Climbing large-flowered Summer and Autumn bloomers, flowering occasionally on short lateral summer shoots, the flowers dispersed.

DUKE OF NORFOLK-Deep mauve.

ENCHANTRESS—Very double; white, the exterior petals flushed with rose. F.C.C. 1s. 6d. *FAIRY QUEEN-Pale flesh, with a striking pink bar in the centre of each sepal.

OTTO FRŒBEL-Grey ish white; very large.

GEM-Deep lavender-blue.

HENRYI-Very fine white. *LADY BOVILL-Light blue, cap shaped.

LADY CAROLINE NEVILL-Pale mauve, deep mauve bars.

LANUGINOSA-Pale lavender. LANUGINOSA NIVEA-White.

WILLIAM KENNETT-Deep lavender;

JACKMANH TYPE.

Climbing, mostly large flowered, Summer and Autumn bloomers, flowering successionally in profuse continuous masses on summer shoots.

FLAMMULA FLAMMULA RUBRO MARGINATA-

Highly scented, creamy white, deeply margined with reddish plum.

*GIPSY QUEEN—Rich velvety purple; very free, late flowering.

JACKMANI—Fine violet-purple.

JACKMANI ALBA

JACKMANI SUPERBA-This has proved with us in every way superior, both in form and eolour, to the old variety.

STAR OF INDIA—Reddish plum, with red

TUNBRIDGENSIS-Deep blaish mauve.

PATENS TYPE.

Climbing targe-flowered Spring bloomers, flowering from the old ripened wood.

ALBERT VICTOR-Deep lavender. DUKE OF EDINBURGH-Flowers large.

of a rich violet-purple.
*FAIR ROSAMOND — Blush-white, red

MRS. GEO. JACKMAN-Satiny white, ereamy bar.

*SIR GARNET WOLSELEY - Bluish ground, plum-red bar.

LONDESBOROUGH - Silvery *LADY grey, pale bar,

LORD DERBY - Anthers reddish purple, with white filaments.

*MISS BATEMAN-Pure white.

STANDISHII-Deep lavender; very free. THE QUEEN-Delicate lavender.

VITALBA-Greenish white, small flowers; rampant grower, 9d.

No. 1. Jackmani Type. | No. 3. Lanuginosa Type. | No. 4. Patens Type.

All those not priced 1s. 6d. cach.

VITICELLA TYPE.

Climbing large-flowered Summer and Autumn bloomers, flowering successionally in profuse masses on summer shoots.

*EARL BEACONSFIELD—A rich royal purple; splendid form. F.C.C., R.H.S.

THOMAS MOORE - Violet, white stamens.

VITICELLA-Purple.

FLORIDA TYPE.

Climbing large-flowered Summer bloomers, flowering from the old or ripened wood.

These are spring and early summer bloomers.

*COUNTESS OF LOVELACE—Double, bluish lilac.

DUCHESS OF EDINBURGH—Double-white, fragrant.

FORTUNEI-Double, white.

JOHN GOULD VEITCH—Lavender, very double.

MONTANA TYPE.

Climbing Winter and Spring bloomers, with medium-sized flower in aggregated auxiliary clusters on the old or ripened wood.

MONTANA GRANDIFLORA. MONTANA—Small white.

Those marked * the hest for pots.

Col'EUS.

THE FINEST COLLECTION EVER BROUGHT TOGETHER.

HE following are the hest and most distinct that have heen sent out up to the present. No other foliage plant can for a moment bear comparison with them, so vivid are the colours of some varieties. No greenhouse in the summer season is complete without these charming plants; rear them in a warm corner of a stove or cucumher-frame, and gradually expose them as the heat of the season increases; give them a shift as they hecome pot-bound, and a few stakes to tie them into a pretty shape, with a little liquid manure twice a week, which is all they really require, for no insects and very few diseases attack them. Heat and moisture, and root-hound plants near the glass, are the main things to insure good high colours.

We devote a 100-feet house to their growth, which is alone worth a visit to Swanley. Plants, rooted cuttings, and cuttings, sent hy post to all parts of Europe. Seed, 1s. 6d. and 2s. 6d. per pkt.

The following variety is very distinct and pretty, shape of leaf quite away from any other:-

LA TÊTE D'OR—Lovely deep green, tinted pink, with a hlack blotch in the centre of the leaf; this, with its exquisitely pretty shaped leaf, renders it a most distinct kind. 9d.

The best 24, and most distinct.

1. BEAUMARCHAIS—Very distinct, crimson, slightly tinged purple at base of leaf.

2. **PETIT** ROBERT — Distinct and attractive; good habit.

- 3. COUNTESS OF DUDLEY—Beautiful colours and foliage, forming into a well-shaped plant.
- 4. BECKWITH'S GEM Splendid high-coloured foliage; distinct and effective.
- 5. VESUVIUS—The richest and hrightest-coloured variety yet introduced for colours. 9d.
- 6. EMPRESS OF INDIA—Bold foliage, creamy yellow, suffused emerald green, and marked deep purple; ground colour deep magenta-crimson intermixed with maroon, almost hlack at the edges.

7. FAITH—Distinct and pretty; handsome plant.

ELEGANS-Large and beautiful foliage, forming into a well-shaped plant.

9. PRINCE ALBERT EDWARD-Foliage serrated and deeply cut; large and bold pale ehrome, splashed emerald green, and bright crimson-lake.

10. HERMIT-One of the most useful black and dark green varicties.

11. C. P. DUEZ-Markings and colouring

of foliage quite distinct.

12. MRS. R. CHRISTIAN-An improvement on Ville de Dijon; very distinctly marked, and rich colouring; a charming variety

13. DISTINCTION-Intensely dark and

velvety.

14. PAUL RODIGAS—Bold foliage

15. DR. JACKSON—Distinct in colouring : foliage of medium size, in the young growth being of a golden-chestnut shade, and later on veined with deep rose: unique.

16. CLOTH OF GOLD—Clear yellow,

shaded green, the nearest approach to yellow.

17. MATTERHORN-Light greenish primrose ground, blotched dark maroon.

18. LOUIS CHRETIEN-Beautifully

serrated, ceutre white with green edge.

19. HART'S CONQUEROR—A very splendid variety; the brilliaucy and strong growth of this variety elicits the admiration of all for exhibition or market.

20. HENDERSONII—A very attractive

and well-known variety

21. RESPLENDENT - Almost black. handsomely marbled greeu, and scarlet-crimson colonrs; good habit.

22. CHARITY- A distinct and beautiful variety, green ground, blotched chocolate, maroon

and yellow; attractive

23. CONRAD ROSENTHAL - Curionsly blotched and spotted with maroon, red, yellow,

24. ARTHUR WHITLEY-Colour intense rnby-purple, mottled higher colour; distinct; quite an acquisition; long leaf.

9d. each, except those priced; the set for 14s. Small plants, by post, 12s.; cuttings, 6s. After April, small plants, 10s.; cuttings, 4s.

BEDDING COLEUS.

BLACK DWARF—Colour rich glossy black. It is too dwarf in growth to be used with the ordinary Coleus; but wherever Alternantheras, Alyssums, or other low growing bedding plants are used in ribbon lines or earpet bedding this can be used with novel effect. 6d. each; 5s. doz.

REFULGENCE—A very useful dark-leaved variety. 6d. each; 4s. doz.

TAYLOR'S PET—Deep erimson-maroon, and when planted out turning to black; it is said to withstand the cold much better than the well-known Verschaffeltii. 6d.

VERSCHAFFELTII—Rich crimson leaves, fine for bedding, plants should be plunged into pots very thickly, so that the pots are covered with soil, and by this means it makes a grand bedding plant. 5s. per dozen: rooted cuttings, 3s. per dozen; on and after April 1st, 2s. 6d. per dozen. VERSCHAFFELTII SPLENDENS ROBUSTA—Similar in character to above, but more

robust. 6d. each; 5s. doz.; after April, 4s.

SPECIES.

AROMATICUS-Very fragrant.

26. FRUTICOSUS-The old Nettle Geraninm. Best for grafting on.

PINEAPPLE BEAUTY.

49. PINEAPPLE BEAUTY—The most remarkable variegation ever raised; strong grower, and producing every leaf as the plant gains size, one half becoming a bright yellow, and the other red; strong and oval. 1s.

E have been awarded Medals for many years past. Although we do not grow for competition, we have exhibited the largest and most complete collections, many of the finest flowers, and made the greatest display.

It should be distinctly understood that we grow above 1,000 plants of the Show and Fancy class alone to the greatest perfection; in fact, they form quite a grand feature in our Nursery, and the following list is unquestionably most complete.

When these are well grown they are one of the noblest and most beautifully made flowers in eultivation, but to grow them well they must have an anxious and industrious master, for their wants are continual from June to Soptemher. They require a good deep soil, well trenched, and full of manure. Obtain, about the end of April, wiry small-stemmed plants, shift them at once into 6-inch pots, keep them in a frame with the lights only kept on at night; plant them out when the first warm nights in June arrive, well stake them as they grow, and cover the ground with four inches of stable manure, watering them overhead every day, or oftener if the weather be very dry, and thinning the lateral shoots out in the case of medium growers, but those with large flowers less, supplying the plants when making their flower buds with a soaking of liquid manure, hesides washing them overhead every night to keep thrip from the flowers. The above directions are for show purposes, and the following varieties are most constant, flucst for exhibition, and also make a grand display in shruhhery borders where allowed to grow as they like.

For ten successive years we were awarded by the Royal Horticultural Society, South Kensington Gold and Silver Gilt Medals for the best and most complete collections,

BEST SHOW VARIETIES.

Spring Prices, 5s. per dozen, except those priced; our Selection, 4s. per dozen.

Pot Roots in Autumn to Spring will be charged at one-third higher prices,

A LL Flowers with ground colours lighter than that of the tips are show kinds, and are included to with the self-colours in this class. with the self-colours in this class.

a perfect gem; useful for exhibition. 3 ft. 2s.

BEDDING DOUBLE DAHLIAS.

216. LE COLOSSE-The size (7 to 8 in. across) the flowers attain is astonishing, and yet of good shape. Mont Blanc as a white variety comes large, but this is much larger, very freely produced, of a reddish colour, leng wiry flower stalks, vigorous habit, and attains the height of 3f ft. All those who wish to have a surprise in their gardens should grow it. A gigantic show variety. 1s. each.

217. GRAND DUC ALEXIS-Very large bold flowers, tuhular shaped petals, almost closed at opening; pearly-white tinged hlush, deeper towards the tips of florets; distinct and nnique. The engraving conveys a correct idea of the wonderful formation of this flower. 9d. each.

223. CARL MENDEL—Deep erimsou-red, good shape and habit. 3 ft.

224. FLORA MACDONALD — Primrose-

yellow. 3 ft. 226. GEORGE THOMPSON—Pure yellow, profuse bloemer, well above foliage; best of its class.

227. 228. KING OF DWARFS—Dark purple. PLUTON—Pure yellow, free and dwarf.

229. RISING SUN-Rich searlet, at times tipped white.

SAMBO—Rich maroon, shaded black.

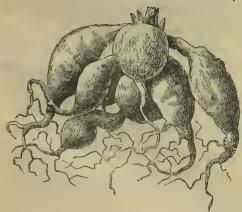

230. SCARLET GLOBE-Bright orangesearlet, producing in abundance small perfect flowers.

231. WHITE BEDDER-White; free and dwarf.

232. YELLOW GLOBE-Similar to the above in growth.

233. YELLOW PET-Pure yellow; free, dwarf and compact.

POMPON VARIETIES, QUILLED FLOWERS.

DAHLIA ROOTS FOR PROPAGATION.

234. ALWINE - Pretty shade of pink, slightly shaded lilac.

BERTHA-Creamy-blush, orange and red; distinct.

BRUNETTE-Red, often blotched and

tipped white. 235. DEEGEN_Deep clear yellow; distinct.

236. DR. RAUCH-Orange-red, small and pretty.
237. GOLDEN CANARY—Rich golden

yellow, tipped red.

238. HERCULES-Dark lilac-rose, beautifully quilled.

Our stock of roots for propagating (as per engraving) numbers from 10,000 to 20,000 every year; these are sent by parcel post all over the world. Prices from 5s. to 18s. per doz., our selection.

THE LARGEST DOUBLE SHOW DAHLIA IN CULTIVATION.

(83)

Spring prices, 5s. per dozen, except those priced; II. C. & Sons' selection, 4s. per dozen. Pot roots, 5s. to 18s. per dozen.

We are the Headquarters for the finest Roots.

DAHLIAS (SPECIES).

380. DAHLIA IMPERIALIS—It requires to be grown in a large pot or tub all the summer, and treated like the others until about October, when it ought to be removed into a large conservatory, and when in perfection it will attain the height of 10 to 14 ft., and produce an abundance of single papery-looking kind of flowers of a rosy white, and when ia full bloom it has an unusually grand appearance. 2s.

381. ARBOREA-Attains a height of about 6 ft.; mauve-coloured flowers. Can only be eompared to a gigantie Anemone. 2s.

382. ARGENTEIS FOL. MARGINATA - Silver-margined foliage, with rosy-purple flowers; ornamental. 9d.

NGLE DAHLIAS.

THE heanty of our collection, covering just upon an acre, last autumn was a sight never to be forgotten by the hundreds that saw them. For show purposes the flowers must be mediumsize, with broad rounded petals, so that they form a perfectly circular flower, with small disc; and these, when individually wired and made to stand out in a symmetrical bunch, present a grand sensational appearance when ranged in a Rose Box with moss.

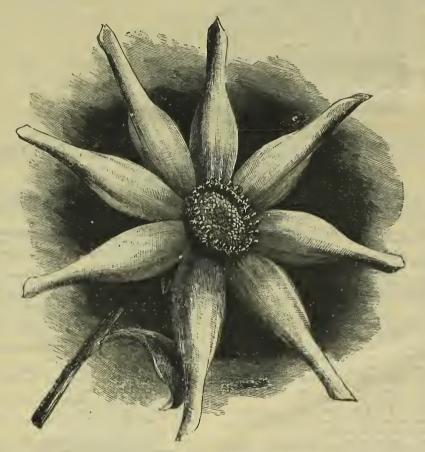

SINGLE CACTUS-SHAPED DAHLIAS.

Special favourites with ladies, because of their remarkably graceful appearance. They have none of the formality and stiffness so characteristic of all the other sections.

ALICE LEE Beautiful pink, shading off to white; one of the best. 3 ft. 383. ALTHEA-Deep glowing crimson; petals twisted and recurved. 3 ft

- ARGYLE-Rich deep crimson, blooms slightly incurved. 3 feet.

- 385. BRUCE—Pale lemon colour of a beantiful shade. 3 feet.
 386. BURNS—Buff ground, splashed with glowing crimson, florets curved and reflexed. 3 ft.
 387. EARL OF RAVENSWOOD—Bright reddish terra-cotta; bushy habit; free.
 388. GUY MANNERING—Creamy-white, sulphur shading; long, twisted petals. 4 ft.
 389. ISABELLA WARDOUR—Bright red; blooms rather flat. 4 ft.
 390. IVANHOE—Bright rose colour, with crimson band round centre, petals beautifully twisted the resists and slightly increased.
- at the points, and slightly incurved. . 3 ft.

SINGLE CACTUS-SHAPED DAHLIA, MARGUERITE.

Pure white, very light in shape and 392. MARGUERITE—Certainly the best variety. character, long stalks. In the formation of wreaths and crosses it will be found of great use.

MARMION—Glowing crimson-scarlet; showy. 3 ft.

393. MEG MERRILEES—Clear yellow petals, large and twisted. 3½ ft.

394. NOVAR-Crimson purple, shading to magenta at the points of the florets. 3 feet. PEVERIL—Deep terra-cotta; very free. 3 ft.

QUEEN MARY—Purest white, with pale yellow disc, twisted florets. 3 ft.

ROB ROY—Purple, with violet shading; medium size. 3 ft.

396.

6d. each.

TOM THUMB DAHLIAS.

We have been Awarded many Silvergilt and Silver Medals for our Cactus Dahlias during the past years.

Seed saved from finest varieties only 1s. per pkt.

NEW CACTUS DAHLIAS OF 1897.

RAISED AND SENT OUT BY H. CANNELL & SONS.

495. AUSTIN CANNELL—It is with much pleasure that we announce our success to having raised the above named, producing its fine spiky-formed petals to a high degree of perfection. It is certainly the finest variety both in shape and habit yet seen, and will help to carry this class to a much higher degree in the estimation of all lovers of flowers. Of a mauvy-pink or rose colour; very pretty. 2s

AUSTIN CANNELL.

496. G DAYRELL REED—Of a charming rosy-red shade, quite an attractive colour; petals very pointed; a general favourite. 2s.

497. MRS. E. CANNELL—We anticipate this to prove the prettiest of all this class—clear yellow with three parts the length of each petal being shaded with a most pleasing tint of light soft red; quite Cactus shape; distinct. 1s. 6d.

498. MRS. WYLLIE—Quite a new shade of fawn-yellow, c: ceedingly pretty, well-pointed petals; certainly the best in this colour. 2s.

(90)

POMPON VARIETY.

499. ILLUMINATOR-For cutting purposes and general decoration this cannot fail to be of great service, flowering most abundantly, and of a more decided red shade than Cannell's Gem; long useful flower stalks. 1s. 6d.

DOUBLE DAHLIAS OF NEW CACTUS

VARIOUS RAISERS.

blooms are of good medium size. 1s.

553. JOHN H. ROACH-Soft yellow, edged sulphur yellow, petals long and twisted, medium size; dwarf, free habit. 3 ft. 9d. 554. JOHN WELCH-Rich glowing crimson; long and beautifully twisted petals; free-

flowering, good.

555. JUAREZII-Most valuable and useful, its blossoms are of a rich scarlet-grimson. 4 ft. Mnst be thinned out to get fine flowers.

556. LADY H. GROSVENOR-Clear yellow, outer and older petals shaded buff. 557. LADY PENZANCE—Clear sulphur yellow, perfect in shape; the finest yellow.

MARQUIS-Deep rich velvety maroon or crimson, lighted up with a tinge of fiery; the long-pointed petals. 4 ft. 9d. erimson; the long-pointed petals. 4 ft.

LEONORA-Bright pink, shaded rose; very fine flower, long twisted petals. Award of

Merit, R.H.S.

559. MABEL KEITH- Clear light yellow, tinted onter petals; free. 1s.

560. MATCHLESS—Rich deep velvety maroon; true Cactus type; the blooms are thrown well above the foliage. Awarded many Certificates. An acquisition.

561. MAY PICTOR—Colour pale yellow; true Cactus, with long petals beautifully twisted; very dwarf and free flowering. Awarded F.C.C. 3 ft.

- 562. MISS A. NIGHTINGALE-Clear yellow ground, flaked and heavily edged searlet; very attractive. 4 ft. 1s.
- 563. MISS IRENE CANNELL-A lovely soft and pleasing shade of light peach-pink colour, shaded primrose towards base of florets; dwarf and free; charming.
- 564. MRS. A. PEART—Creamy-white, true cactus shape; distinct. Four F.C.C. 565. MRS. BARNES—Pale primrose, gradually shading towards the ontside of the flower and towards the tip of each petal with the palest tint of rosy-pink; of exquisite shape, with long, twisted, pointed petals. 31 ft. 9d.

566. MRS. BENNETT-Soft crimson; a large, well-built flower; petals are broad hut well curled, and show a very fine vein-like marking of a deeper tint. 3 ft. 9d.

567. MRS: BROUGHTON STIRLING-Bright glossy ecrise; very narrow pointed petals; similar habit and shape to Robert Cannell; very profuse; flowers well above the foliage. 31 ft. 1s.

568. MRS. GORDON SLOANE—Lovely pinkish terra cotta; splendid ereet habit; very free and distinct; one of the best for cutting. 4 ft. 1s.
569. MRS. H. CANNELL—The most effective in its class, bright amher-shade; well-pointed

medium-sized perfect-formed flowers; dwarf and compact; free.

570. MRS. C. TURNER-Bright yellow; large and distinct flowers, thrown well above the

foliage on long stems. F.C.C., R.H.S. 3 ft. 9d.

571. MRS. LEOPOLD SEYMOUR-Rich golden yellow, shading off to a lovely pale rose

towards the tips of petals; flowers on stiff stems well above the foliage. 4 ft. 1s.

572. MRS. MONTEFIORE-Splendid rich glowing crimson-scarlet; true Cactus; splendid habit, throwing the flowers well above the foliage; fine for exhibition or cutting. Certificate

573. MRS. PORTMAN DALTON-Splendid dwarf busby babit, vivid vermilion colour, shading off to tips of petals to a rosy red, and occasionally tinted magenta.

574. MRS. THONGER—Bright purple; very long pointed petals; free. 3 ft. 1s. 575. MRS. WILSON NOBLE—The colour is a lovely pinkish-salmon, splendid shaped flowers horne in great profusion; a gem for exhibition or for cutting. 33 ft. 1s.
576. OPORTO TAIT—Distinct dark foliage; true Cactus-shaped flowers of a scarlet shade; good

bushy habit. 31 ft. 1s.

577. PROFESSOR BALDWIN—This is a fae-simile of the old Juarezii, hut much freer in bloom and lighter in colour, being of a bright orange-scarlet. 4 ft.

578. PURPLE PRINCE-Rich deep purple, shaded hluish maroon; habit dwarf and compact;

one of the hest. Awarded Certificates.

ROBERT CANNELL - Full-sized flowers; magenta, with a decided bluish tinge

towards tips of petals; free and vigorous. 4 ft. F.C.C

580. ROYAL GEORGE-Soft earmine pink, with a faint suspicion of purple, which towards the end of the season varies; long petals beautifully twisted; medium-size flower, blooms very freely splendid hahit. 4 ft. 1s.

581. ST. CATHERINE -A cadmium-yellow colour, or soft reddish amber; very free. 4 ft.

582. VALKYRIE-Rich cardinal, shaded rose; early; free. 5 ft. 9d.

583. THE BISHOP-Bright coral red; florets long claw shaped, very pointed and curled, perhaps narrower and more curled than any variety; splendid. 3 ft. 9d.

POMPON CACTUS-SHAPED DOUBLE DAHLIAS.

584. CANNELLS' GEM-An Award of Merit. The flowers are freely produced, small and neat, of a soft red, shaded with orange; bushy habit; everybody's favourite.

585. MRS. A. BECK-Rich reddish-salmon; dwarf habit; very free.

DECORATIVE AND REFLEXED DAHLIAS.

The following are most useful and lovely for general garden decoration, and should be generally enltivated:

APHRODITE—Clear straw-yellow; very free; large. 586.

ARTHUR CHEAL-Deep rich purplish erimson; very free. 4 ft. 9d. 587.

BEATRICE MARTIN-White, tinged palest flesh; useful for cutting. 5 ft. 9d. 588.

BEAUTY OF EYNSFORD-Soft huff, shaded velvety chestnat in centre. 590. BLUSHING BRIDE-Blush white, fine flower, well above the foliage.

CANNELLS' FAVOURITE-Yellow-bronze or old gold; free habit of growth. 591.

CHANCELLOR SWAYNE -Bluish plum; free and early. 592.

593. CONSTANCE, OR ARIEL—Pure white, valuable for wreaths, crosses, church decoration, &c.; a good grower and very free bloomer. F.C.C. 6d. each; 4s. 6d. doz. 594. COUNTESS OF PEMBROKE—Attractive; of a delicate lilae colour. 4 ft.

CRAWLEY GEM-Rich crimson scarlet; grand for cutting. 595.

DEAN HOLE-A glowing vermilion-scarlet; good, vigorous, upright hubit; very free

597.

DUKE OF CLARENCE—Deep marcon-crimson; dwarf. EMILY GIRDLESTONE—Orange scarlet; free flowering 598.

ERNEST CHEAL-Bright rosy-scarlet. 599

F. BLAKE-Bright magenta-crimson, green centre. 9d.

601. FRANCES HUMPHRIES-Bright orange. 9d.

602. GERMANIA—Said to be the prettiest-coloured of the whole family; colour white, shaded and tinged flesh, reminding all of that shade seen in La France Rose.

603. GLARE OF THE GARDEN (or FIRE KING)—Producing double the quantity of flowers of any other variety; small, dense, and brilliant are its flowers, with a lovely green foliage.

604. HARRY FREEMAN—Of the purest white; useful. 605. HENRY PATRICK—Petals slightly recurved and twisted, pure white.

606. KAISERIN—Sulphur-yellow, outer florets tinged with lemon; very constant. 4 ft.

607. KENTISH INVICTA-Light chestnut, shaded red at base of petals; free.

608. KYNERITH-A deep rich vermilion, lighter at base of florets. 4 ft.

609. LORD NELSON—Bright crimson-lake; a pretty formed flower, good size.
610. MISS JANE BASHAM—A soft tint of brick red and salmon pink. 3 ft. 1s.
611. MARCHIONESS OF BUTE—Ground colour white, with rosy tips to petals.

612. MARY HILLIER-Buff salmon; very free; good habit.

613. MAYOR HASKINS-Glowing erimson. 9d.

614. MILLIE SCUPHAM - Light golden-bronze, with a richer hue near the centre of the flower.

. MISS ANNIE JONES—Crimson, shaded scarlet; good size and shape; early and free. 4 ft. 1s.

615. MR. A. W. TAIT—It is different to Constance in its serrated un-Dahlia like form and appearance.
616. MRS. FRANCIS FELL—White, tinted lilac-pink, changing to pure white; free

flowering. 1s.

617. MRS. GORDON SHAW-Rich crimson; free and effective.

618. MRS. HAWKINS—Free, close neat habit; rich sulphur colour, tips of petals a lighter shade, and slightly tinted soft red; distinct.

619. MRS. HILL—Deep salmon-rose, shading to yellow at base of petals. 1s. 620. MRS. H. OARTER—Colour lilac and white, with the most exquisite blush. 621. RED DRAGON—Glowing scarlet, a bright golden-green centre; attractive.

SHOW BOX AND BOART.

Show Box, painted and varnished, with 2 stands for 24 blooms (24 Cups and 24 Tubes)... £2 each. Show Box, painted and varnished, with 1 stand for 12 blooms (12 Cups and 12 Tubes)... 30s. each. Show Box, painted and varnished, with 1 stand for 6 blooms (6 Cups and 6 Tubes) ... 15s. each.

SALISBURY WHITE-Of the purest snow white, invaluable for wreaths, bouquets, and decorations of all kinds. 5 ft.

623. VULCAN-Bright reddish erimson, large and open; very free.

624. WILTSHIRE LASS—French-white, tiuted blush; a most beautiful variety for cutting.
625. YELLOW A. W. TAIT—Colour lovely; free bloomer, every flower standing up bold.
626. FLORET DAHLIA—A curious variety; may be called the Triple Dahlia; every petal or

quill is filled with another petal. 9d.
627. THE BLACK AND WHITE DAHLIA, MR. MILLER—Showy; small flowers, intensely dark, with a pure white blotch on each petal; most attractive and beautiful. 1s.
628. VIRIDIFLORA—Pure self green-flowered Dahlia. The flowers are Pompon size.

629. PERLE DE LA TÊTE D'OR-Very carly, pure white, large fine flowers; very free, vigorous; most useful for borders, &c.; valuable for cutting purposes.

630. MAID OF KENT-Rich cherry-red, crimson ground, with pure white tips; free.

All those not priced 6d. each.

We hope all exhibiting the produce, either from our Seeds, Plants, and Manure will kindly drop us a note as to quantity, &c., and sufficient specially printed eards will be immediately sent so as to affix to each exhibit.

NEW DAISY.

BELLIS PERENNIS, THE BRIDE-This Daisy is so unlike all others of its family. Its whole growth is large, truly gigantie-fine large flowers, three times the size of the ordinary old white, even when grown in pots in a cold frame in Winter and Spring. It has stems 10 inches long, flowers pure white and beautifully serrated; very full and striking. For bedding it is altogether far away from others, and pronounced by all to be a great acquisition. It should be in every garden, however small. It flowers all through the Autumn, and in H. C.'s opinion it is of great value. 3d. each; 2s. 6d. per doz ; 18s. per 100.

THE BEST BEDDING.

EW persons-gardeners in particular-have the slightest idea of the effect these have (when planted in lines like other plants) and their easy management, or they would fill their beds every autumn, and so have a grand display, equally as satisfactory, and with half the trouble, as the ordinary summer plants. With these and a few Violas and Primroses, we can be made gay and beautiful all the early spring and summer months.

DOUBLE AND SINGLE-FLOWERED.

AllIS family is perhaps the noblest of all the hardy plants. Few have seen the named kinds, those who have not cannot form the slightest conception of their splendour. We have often been amazed at the intensity of their colours, and spikes of flowers averaging from one to two feet long. They should be in every garden, for if once planted beautiful flowers of all shades of blue may be cut four months in the year.

NEW VARIETIES.

ALBERT EDWARD-Deep plum, violet edges, black eye; semi-double. F.C.C.

ARTEMIS-Bright blue of a light shade, darker plum-blue near the centre, brown eye; semi-

double. ASPIRATION-Rich violet, inner row deep plum-purple, white centre; semi-double.

FUCH'SIAS.

THE BEST DARK VARIETIES.

IT is surprising what beautiful kinds, when well grown, there are in this list, which embraces all the best in cultivation; and the descriptions will be found correct. Onr 100-feet house, filled with the entire family from their first introduction, is a grand sight all through the summer and autumn at Swanley.

AN OLD FAVOURITE RE-INTRODUCED.

DUNROBIN CASTLE—A very distinct bedding variety, small dark foliage, producing au innumerable quantity of small coral-red flowers; when trained into standards it makes a lovely feature in all floral displays. 6d. cach, 5s. doz.

1. ABUNDANCE—Bright red tube and sepals, rich dark purple corolla, shaded maroon; bright and effective; free. 9d.

AMIE—Sepals crimson, exceedingly long (2½ ins.), very rich dark purple corolla.

3. SALOPIA—Sepals crimson, corolla light purple, handsomely expanded corolla, 3½ inches across. 1s.

 ELEGANCE—Sepals crimson, singularly contorted or twisted, corolla deep purple, broadly striped with pale red. 1s.

5. DUKE OF CONNAUGHT — Wellformed flowers; corolla long and of good shape;

purple, veined red.
6. WALTER LONG—Bright pale coralred tube and sepals, clear violet corolla, deeper
in colour towards the edges; a very fine exhibi-

tion Fuchsia.
7. DUKE OF EDINBURGH—Very free;
pnrplc corolla.

8. DELIGHT (Sankey)—Beautiful dark

corolla, sepals well reflexed.

9. EUREKA—Distinct; useful for decoration and market work; bright rosy-red tube and sepals, deep purple corolla, flushed magenta.

10. GAIETY (Sankey) — Very richly colonred, tube and sepals rich red, corolla blackish satiny-purple; effective.

11. HERALD (Sankey)—Schals long and

11. HERALD (Sankey)—Schals long and well reflexed, corolla plum purple; a grand

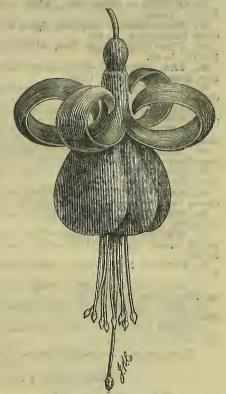

variety.
12. MR. KING-Rich crimson-scarlet tribe, and sepals soft coral-red, corolla rich deep purple; fine habit; very free, medium size, well formed.

13. GENERAL ROBERTS — Beautiful variety, of drooping habit, and will make a splendid (dark) companion to the well-known Mrs. Marshall.

14. PANMURE GORDON—Corolla dark violet purple.

15. PRESIDENT—Free habit, good form, flowers remarkable for their splendid substance, sepals well recurved, and tube of bright vermilion, corolla finely formed, and of a very rich violet.

16. GERTRUDE PEARSON-Qnite distinct form; corolla rich purple. 1s.

. MR. KING.

- 17. ROYAL PURPLE—Corolla dark velvety purple, almost black in the young flowers; massive flowers. 1s.
- 18. RESPLENDENT—One of the most perfect Fuchsias in the way of *Lord Elcho*; habit strong and vigorous,
- 19. DUKE OF YORK—Sepals bright rosy red, corolla rosy violet.

- MARQUIS OF LORNE—Sepals well reflexed; corolla violet, changing to lilac-red.

Young plants of all those not priced 6d. each; larger, 1s. each.

Fuchsias with white tubes and sepals, and scarlet or pink corollas.

- EYNSFORD GEM (Weston) -40. White tube and scpals, corolla ficry rosy-lake colour; without doubt the lovelicst reflexed Fuchsia in cultivation; strong and free. 9d.
- 41. GEM OF LAVINGTON-White tube and sepals, delicately tinted pale pink, very stont carmine corolla, finshed with soft violet; fine
- 42. LADY DOREEN LONG Creamy white tuhe and sepals; deep pink corolla, suffnsed with pale violet.
- 43. LOVELINESS-Flowers large and stout, creamy tube and pale hlush sepals, very long; pale violet-pink corolla, margined with carmine; can be highly recommended.
- ANTIGONE-Tnbe and sepals white, sepals long; corolla soft orange-red. 1s.
- 49. LYE'S EXCELSIOR Creamy tube and sepals, stout and well reflexed, rich deep rosy magenta; corolla shaded carmine; a fine exhibition variety.

50. LUSTRE IMPROVED-Corolla large, bold, and colour intense; habit all that can he

desired; a lovely Fuchsia.

51. MISS MAY CAMERON-Corolla a pleasing shade of lilac-rose; delicate and 18.

52. PRINCESS MAY-Very free, graceful, aud effective.

54. BEAUTY OF TROWBRIDGE-Light varicty, and probably the best in cultivation.

WHITE SOUVENIR DE CHISWICK -Pure white tube and sepals, the latter long

and holdly reflexed; corolla hright rose-piuk and cup-shaped; habit of growth strong.

56. BEAUTY OF SWANLEY-One of the

prettiest light Fuchsias.

58. COVENT GARDEN WHITE-Snperseding the well-known Arabella and Mrs. Lye; the best for market and decoration.

59. MRS. BRIGHT-A very useful aud

distinct light variety.

60. MRS. F. GLASS-White tahe and sepals, deep pink corolla, tinted violet.

MARIE-61. GRAND DUCHESSE Strong grower and a fine decorative variety.
62. DUCHESS OF ALBANY—Extra free

flowering: good for any purpose.
63. ROYAL OSBORN—Tubeand sepals well formed and pearly white, corolla deep rose.

64. MINNIE BANKS-Distinct; five habit, free, and one of the hest for any purpose. 1s. 65. GUIDING STAR-Said to be the most

perfect variety in cultivation.

66. PRINCESS BEATRICE-Exceedingly pretty, tube and sepals waxy white, with a very pleasing, delicate, but hright pink corolla.

67. ROSE OF DENMARK-Corolla light pink, margined rose; habit rather strong, blooms

freely at the points.

68. ROSA BONHEUR-Blush-white tube. sepals well recurved, corolla rich rose, shaded carmine; free, erect habit.

69. ANNIE-Large, good grower; one of the best for drooping or hanging purposes. 1s.

70. ENGLAND'S GLORY-Fine bloom; great substance, strong grower; one of the best. 1s.

Young plants of all those not priced 6d. each; larger, 1s. each.

Fuchsias with scarlet tubes and sepals, and rose and mauve-lavender coloured corollar.

JAS. HOOD—Rosy manye; large.

W. B. LEAF - Wide corolla, deep manve, shaded rose.

W. H. ROWE - Good shape, rosy mauve, corolla large.

71. SWANLEY GEM-Frilled shape, free blooming, splendid hahit. Tuhe and sepals coral-scarlet, the latter very prettily reflexed; beautiful rose coloured corolla.

73. RHODERICK DHU - Corolla blue, large, opening out à la crinoline; babit beautiful; free.

74. DISPLAY - Corolla deep rose, sepals bright red; free and showy.

75. GRACIEUX-Medium size flowers, clear mauve-lavender corolla; free.

Young plants of all those not priced 6d. each; larger, 1s. each.

Fuchsias with white tubes and sepals, and purple corollas.

76. ROSE OF CASTILE (Improved)-Very large corolla; perfect in shape; growth and habit strong; as highly coloured purple as Lord

IMPROVED VENUS VICTRIX—See Fancy Fuchsias.

77. LADY HEYTESBURY IMPROVED A very distinct and effective variety

78. PRINCE ALFRED-Splendid; a most profuse bloomer, a strong grower (must be well stopped when young), and one of the very best.

79. LADY HEYTESBURY - First-class Fuchsia; one of the best.

Fuchsias with scarlet tube and sepals, and satiny-coloured corollas.

80. MR. RICHARD PEXTON—Pyramidal growth, and is in every way very fine.

81. THE LORD WARDEN-A first-rate

variety; corolla very distinct colour. 9d.

82. TULIP-Crimson tube and sepals, large and expanded, tulip-shaped corolla, rich purple.

Self-Coloured Section.

The last few years the following large and otherwise very interesting Fuchsias have been raised, and although their sepals and corollas are similar in colour, they are of a robust habit, free growing,

and exceedingly showy.

MARINKA — Nearly a self-coloured variety; for forming into standards, vases, &c., cne of the finest varieties known; very free and drooping.

83. ABEL CARRIÈRE-Fine and distinct; grown largely for the Paris markets.

AMIRAL GERVAIS-Almost a selfcoloured flower; bright carmine-red. 1s.

84. DR. SANKEY (Sankey)—Splendid; robust grower, dark-glossy foliage, large and

long pendulous blooms of the ricbest rubyred and crimson shades. 1s.

85. FIREWORKS-Of a striking dark ruby. red; a free blooming and attractive variety.

86. SEDAN—Nearly self-coloured. It is a ort, thick-set variety, blooming very freely, short, thick-set variety, and possessing a beautiful habit. Quite a favourite for market purposes.

87. MONARCH-Immense flowers; tube and sepals bright red, and of great length.

Young plants of all those not priced 6d. each; larger, 1s. each

FUCHSIAS, YELLOW.

Varieties possessing coloured flowers of orange-yellow.

88. MR. H. ROBERTS-Corolla very broad graceful growth; sepals well reflexed; tube and sepals rose colour, deepeuing in the corolla into crimson of a dark distinct shade.

89. AURORA SUPERBA-Tube and sepals rich salmon, corolla large, spreading; orangescarlet, suffused yellow; fine babit, free; distinct.

90. EARL OF BEACONSFIELD—One of the best for decoration; very large clusters, and blooms nearly all the year if allowed plenty of root room.

91. MR. RUNDELL - Similar to Lord Beaconsfield. Beautifully shaped flower, the bold quick growth of its parent, with even more freedom of flowering; for general decoration a capital variety.

MRS. RUNDELL - A seedling from 92. Earl of Beaconsfield. Very graceful. F.C.C.

Striped Section.

93. DUKE OF FIFE - Purple corolla,

distinctly striped rose.

96. LORD WOLSELEY-Well expanded corolla, soft rosy crimson, veined red and margined pluish purple, broad reflexed sepals of a deep red;

fine flowers; good habit, constant. 1s. 97. BEAUTY (Sankey)—Tube rosy-red, sepals same colonr but broad, corolla plum-purple, distinctly striped; distinct.

98. BLAND'S NEW STRIPED-Tube and sepals dark scarlet; corolla, rich plum-coloured purple, distinctly striped red and rose; pyramidal shape.

White striped variety.

100. STRIATA PERFECTA-Corolla dis- | corolla bright carmine-scarlet, each petal distinctly tinct; very free; tube and sepals waxy white; striped.

Single white corollas and scarlet tubes and sepals.

102. FLOCON DE NEIGE—Corolla large and well formed, white, sepals clear carmine.

103. TOURNEFORT—White corolla, striped red, brilliant red sepals.

104. CANNELLS'GEM—Habitvery dwarf; foliage small and green; free.

106. DELIGHT—Pure white; tube and sepals bright crimson; corolla large and bell-shaped.

The twelve best varieties out for exhibition for 9s.

Double white corollas and scarlet tubes and sepals.

BALLET GIRL—One of the finest

varieties yet introduced.

BELLONA — Sepals rosy carmine;

large corolla, suffused rose-pink.

115. BERLINER KIND—As free and as beautiful as Miss L. Finnis, but possessing a better and much stronger habit.

109. BUFFON—Corolla white, tinted rose,

good habit; a decided acquisition. 1s.

CERES—Crimson tube and sepals;

corolla pale blush, veined deep pink.

112. COL. DOMINE—Tube and sepals row lake corolla very large and double; fine.

rosy lake, corolla very large and double; fine.

117. DUCHESS OF EDINBURGH—One of the finest double whites yet raised, its dwarf habit and large blooms make it very desirable.

113. EDMOND ABOUT—Large blush white; very free, and double.

122. ELIZABETH MARSHALL—One of

the freest bloomers; grand for market.

114. FORTUNA — Crimson red sepals;

corolla heavily shaded rose.

116. FRAU EMMA TOPFER — Distinct and novel, tube and sepals rosy coral, corolla clear rosy blush, large and double.

111. GUSTAVE DORÉ—Medium size, very free; sepals well reflexed; effective.

IRIS—Broad carmine-crimson sepals;

corolla shaded rose and flaked rose-pink.

108. MADAME JULES CHRÉTIEN—One

of the finest white varieties.

121. MEYERBEER—A very free flowering double variety; white, marbled carmine. 1s. 119. MISS LUCY FINNIS—Pure white;

119. MISS LUCY FINNIS—Pure white; very double; tube and sepals coral red; very free.

METIS—Dark rose tube and sepals; corolla marked deep at base.

107. MOLESWORTH—Corolla pure white and very full; dwarf habit.

118. MRS. A. HUGGETT—A fine double corolla, half the petals white and half carmine.

120. MRS. E. G. HILL — Large fine flowers, sepals very broad.

110. PATRIE-Large open flowers.

ROSALIE—Crimsou tube and sepals; corolla veined at base cerise-pink.

SERENA — Short rosy - pink tube; large corolla, blush rose, veined deep pink.

THALIA - Coral-crimson sepals; white corolla, tinted rose and veiued crimson.

Young plants of all those not priced 6d. each; larger, 1s. each.

Doubles, light rosy-red sepals and beautiful soft mauve corollas.

123. AUG. FLAMENG—Dwarf and free; eorolla large purplish violet.

DE MONTALIVET—Small but very double; light blue corolla, marked with carmine.

BEAUTY OF EXETER—It is a complete cross, or half-and-half between the light tube and sepal kinds and the dark varieties.

Doubles, with scarlet tube and sepals, and dark purple and blue corollas.

127. A. DE NEUVILLE—Reddish violet; large corolla.

AUGUSTE HARDY — Very large flowers enormous corolla, rosy-violet.

124. BOREATTON—Sepals crimson, corolla deep purple, full smooth regular petals. 1s.

CALLIOPE — Corolla rich violetpurple, short tube, and crimson sepals.

126. CHAMPION OF THE WORLD—Colour of the most intense bright dark purple; one of the most remarkable for size. 1s.

128. COMTE LEON TOLSTOI — Very double, corolla large and well formed; blue black. 1s.

black. 1s.
131. D'ORBIGNY—Reflexed sepals, bright armine, violet-amaranth.

DORIS—Broad coral-red sepals; large corolla, reddish purple.

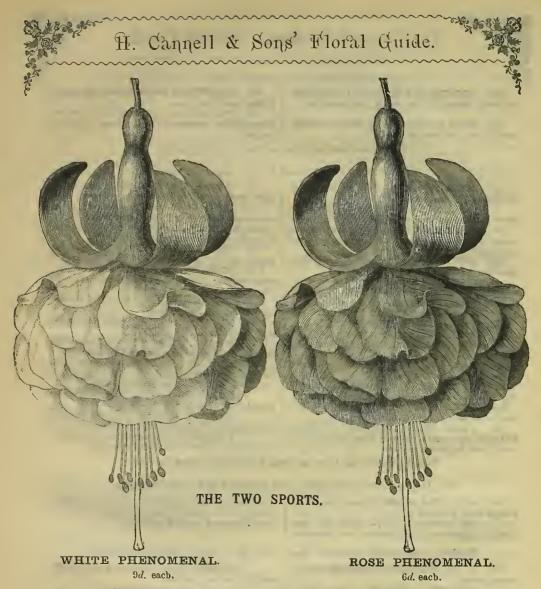

EUGÈNE VERCONSIN - Very dwarf and free; short petals, rosy-white base of petals, remainder of a slaty-blue colour.

LEDA — Reddish crimson sepals; corolla bluish violet, veined crimson.

LOUIS FAUCON—Producing equally as fine flowers as Phenomenal.

125. PHENOMENAL—Producing fine large flowers; distinct.

129. SIR GARNET WOLSELEY-A large and magnificent flower.

GIGANTEA FUCHSIAS. (WESTLEY.)

All lovers of these speak of Phenomenal as the King of the Doubles, by its strong growth, fine habit, and the gigantic flowers it produces, claiming everyone's admiration on account of the rich colouring of the corolla. It has been our good fortune to come into possession of two sports from this wonderful variety, viz., Rose Phenomenal and White Phenomenal, the corolla of the former, instead of as in the original, being of a bright bluish-mauve, comes a light rose colour of quite a new tint; the second and last sport has pure white corollas, and in both cases they retain the same growth habit follage and also same fragrees in flowering as the parent. rctain the same growth, habit, foliage, and also same freeness in flowering as the parent.

132. M. ALPHAND-Large flowers, violet

amaranth; a splendid variety for bedding out.

M. CH. POTIGNY — Short sepals,
double corolla; blue, sbading to violet.

M. DYBOWSKI-Well reflexed scpals. double flowers of a clear rosy-lilac; quite a novelty.

133. CRÉPUSCULE — Corolla distinctly striped with red; fine grower; one of the best.

136. ALPHONSE DAUDET - Beautiful

deep violet; flowers full and double.

AVALANCHE-One of the best babited 137. double Fuchsias; very fine for any purpose.

140. MARVELLOUS-Full, double, bright blue corolla, rosette-like form, tube and sepals red.

142. M. BERAUD MASSARD-Purplish lilac; good flowers and babit.

144. LA FRANCE-Very double and of a beautiful shade of dark blue; sepals recurved and large, bright red.

Young plants of all those not priced 6d. each; larger, 1s. each.

FANCY FUCHSIAS.

145. M. DUFAURE—Beautiful rosy lake, sepals white and red, large; pretty and dis-

146. ALBA COCCINEA - Tube cherrycrimson, white sepals; corolla violet, mottled

147. THE PERFECT CURE-Scarlet tube, and sepals perfectly reflexed; a most extra-

ordinary shaped corolla. 1s.
148. VENUS VICTRIX — The first true variety with white tube and sepals ever raised.

Sent out about thirty-six years ago. This variety must bave come by a freak of nature.

149. IMPROVED VENUS VICTRIX-White tube and sepals, dark-purple corolla; very distinct and effective.

150. ERECTA VAR. NOVELTY-Tube and sepals stained wbitc, corolla light pink; flowers erect and well above the foliage.

151. PRESIDENT GREVY-Tube and sepals coral-red, corolla soft mauve-pink.

FUCHSIA. WHILE

152. COUNTESS OF ABERDEEN-A self white, the most distinct since the pure white corolla was introduced. In this we get a decided alteration; it has pure white tube, sepals and corolla. 9d. each.

All those not priced 6d. each.

HYBRID VARIEGATED FUCHSIAS.

CLOTH OF GOLD - Leaves gold, edged green; an old favourite. 1s.

153. AUCUBÆFOLIA — Large foliage,

variegated and blotched yellow.

154. METEOR - The lower leaves buffyellow, the npper ones rich crimson; first-class for a climber or small pots. Much used in the parks for bedding. 6d. each; 5s. doz.

155. SUNRAY-A fine and distinct decorative Fnchsia, being by far the best with red variegated leaves; quite ornamental and beautiful.

156. RUBENS - Greenish yellow in the eentre and bordered golden-yellow, flowers donble, very dark violet eorolla, elear red recurved sepals.

Those not priced 6d. each.

HYBRIDS OF FUCHSIAS. VARIOUS SPECIES AND

157. TRIPHYLLA-Very distinct, of the Fulgens type; neat, dark, bronze-green foliage, and bnnches of medinm-size flowers of the loveliest brilliant orange-scarlet. 1s. each. Seed,

per pkt., 1s. 6d. 161. SPLENDENS—Orange-searlet flowers,

tips of sepals light green. 1s.
162. FULGENS—The fine old variety.
163. PROCUMBENS—A good basket plant, has small round leaves, and singularly nnique. blooms, succeeded by bright magenta-coloured

berries; very attractive during the winter.

164. BOLIVIANA GRANDIFLORA

Very pretty and distinct. 1s.

167. PENDULÆFLORA - Flowers are produced in clusters from the axils of the leaves and the terminal shoots; rich crimson, shaded with maroon. 1s.

168. DOMINIANA-Large crimson tube; good winter bloomer. 1s.

169. MICROPHYLLA ALBA ROSA -

170. CORYMBIFLORA VIRGINATA -A light stem and flowered variety. 1s.

Young plants of all those not priced 6d. each; larger, 1s. each.

HARDY FUCHSIAS.

171. CORALLINA, syn. EXONIENSIS
-Fine hardy variety for covering walls, and best for open gardens, riehly covered in foliage and flower.

GLOBOSA-The good old variety raised many years ago; one of the best hardy kinds.

172. GLOBOSA VARIEGATA. 174. HARDY HYBRID, No. 3-A most

abundant bloomer. For a mild climate and fine autumn months in Englaud, it is a most valuable outdoor variety

175. INTEGRIFOLIA—Useful for covering walls, &c.

181. RICCARTONI-A beautiful variety. the hardiest of all the outdoor Fuchsias.

Young plants of all varieties, 6d. cach; larger 1s. each.

GLADI'OLI.

IIE Gladiolus constitutes one of the finest features of the Flower Garden during the summer and autumn months for diversity of colour and general effect, either in masses or planted in elumps for border decoration, backed by evergreens. It is also of easy culture, and will thrive in any ordinary deeply dug garden soil, with a liberal supply of manure. Early and deep planting is the secret of success.

CULTURAL DIRECTIONS.

FOR EXHIBITION PURPOSES.—Select an open situation. In October, trench the soil 2 feet desp; use a liheral supply of old hot-bed or cow-manure, well mixed with the soil. Commence planting the first week in March, and at intervals. Plant in bede of three rowe, placing the bulbs one foot apart and 4 inchese deep. Stake as soon as the plante are enfliciently high, and much over the ground with half-rotted manure. As eoon as the plants show hloom, stimulants are beneficial for the full development of the flowers; for this purpose, use our Real Manure once a week.

FOR FLOWER GARDEN DECORATION.—Plant during March and April in horders, in olumps of three or five, at intervals of 4 or 6 feet, between Standard Rosos, Dahlias, &c., or in masses in the centre of large heds, or between Rhododendrone, Azaleas, &c.

The bulbs chould be taken up as eoon as the leaves begin to fads; gradually dry them, clean them, put them into a paper bag, and place out of the reach of the frost.

Seeds, 1s. per packet.

Tube lilac-carmine, yellow lobes, spotted blood-

TYDÆA GIGANTEA-Golden yellow,

striped dark vermilion. 1s. 6d.

TYDÆA LEONIDAS-Tube clear coral-red, lobes cherry-red, yellow, and vermilion. 1s. 6d.

LOXINIAS

Ours is the finest and choicest collection in England.

N our opinion these rank second to no other flowers for noble form and beauty. Our three 100-fect houses in June, July, and August are really a magnificent sight, and many have said "Well, this is alone worth our journey." Pot them into any ordinary good soil, and if kept close in a temperature of 55° to 70°, well shaded from all sunlight, and treated in the same way as warm greenhouse plants—free from cold draughts, and liquid manure once a week—the result will be a grand sight. A 2s. 6d. packet of our seed sown in January to May will give a splendid display.

Selections left to H. C. & Sons will be supplied at 12s., 15s., 18s., 24s., and 30s. per doz.; choice new varieties, 42s. doz.; unbloomed Seedlings, 5s. and 9s. per doz.

Our Exhibit at the Great Temple Show was acknowledged to be the finest ever seen in London.

RAISED AND HIGHLY RECOMMENDED BY H. CANNELL & SONS.

MISS TUDOR-Distinct and good, large and well-shaped flowers; white, spotted rosy-red. MRS. AVORY—White ground with a rose coloured margin; very effective and beautiful.

PRINCE OF WALES—Flowers perfectly creet of the finest form and substance; large and very freely produced, of a beautiful and effective reddish-crimson shade; good strong flower stems, robust habit, and forming into splendid specimens; fine hold foliage. Au Award of Merit.

PRINCESS OF WALES-Of a nent and attractive appearance, and much admired wherever exhibited; medium size but well-formed flowers of a snowy-whiteness, evenly margined on lobes, with a bright orange-crimson shade, thus forming a splendid contrast; for the edging of groups and iutermixed with ferns this will be found indispensable.

2s. 6d. each.

ERECT FLOWERS (RECURVÆFOLIA).

AGAR. 1s. 6d. AMI HOSTE. 2s. AMI SIVAUX. 1s. 6d. BEACON. 2s. CAP. MURRELL. 1s. 6d. COLONEL HALL. 2s. DESIRE ROBERT. 2s. EVATINA. 1s. 6d.

FEU ETNA. 2s. HER MAJESTY. LIEUT.-COL. FISHWICK. 1s. 6d. MAID OF KENT. 25. MARABILE. 1s. 6d. MR. CHAS. MILLER. 2s. MRS. R. ALLEN. 1s. Cd.

MISS CANNELL, F.C.C. 28 REGULARITY. 2s. R. R. SMELLIE. 1s. 6d. RIDER HAGGARD. 2s. ROI DES ROUGES, 1s, 6d VICEROY. 1s. 6d. W. MARSHALL. 1s. 6d.

Seeds, 2s. 6d. per packet. Seedlings, 5s. and 9s. per doz. Leaves of the above varieties, 4d. each in Mav.

SPOTTED VARIETIES.

CELIA, 1s. 6d. LADY GOLDSMID. 2s. MISS HAWKINS. 1s. 6d. MISS MARY PEARSON. 2s.

*WM. KELWAY - Very large, brilliant crimson, gold edge.

Awarded First-Class Certificates. A very free flowering and free growing class of garden plant. 1s. each; 9s. doz. Scedlings from the best varieties, 4s. per dozen.

Mr. HENRY CURWEN, Falcon Road, Battersea, 14th July, 1897. I feel I ought to thank you for the heantiful and very practical Catalogue, which assist me greatly, and I must say what I have had from you proved so very satisfactory in every way that I never possessed such a beautiful garden before. I am continually recommending you to my friends.

P. W. Mackinnon, Esq., Mussoorie, N.W.P., India, 13th January, 1897. I received the 43 Roses in the most perfect condition, apparently as fresh as I used to get them from you when at Norwood, and I wish to thank you. I am looking out for the other plants you are sending me.

HELIOTRO'PIUMS.

THE BEST VARIETIES.

HE ordinary treatment of a Verbena. But very few persons have any idea that they are one of the best plants we possess, and will live for many years, producing an immense quantity of flowers all the year, yielding a most delicious perfume if planted out like a Grape Vine.

- 1. ALBERT DÉLAUX—A vigorous and distinct variety, being distinctly marhled with yellow; constant.
- 2. COMTESSE DE MORTE-MART-Deep violet colour, large white centre.
- 3. **JEANNE** D'AMOUR An advance on *Miss Nightingale*; for general purposes one of the best.
- 4. MINA—Colour not very dark or light—medium; its value is its habit and freeness of flowering either in a pot or hed.
- 5. PATRIOT—Large pip; a very useful variety.
- 6. PAUL PFITZER-Light variety, fine large truss; good shape.
- 7. PRESIDENT GARFIELD—An improvement on Jersey Beauty; bright mauve purple; distinct and useful.
- 8. PRIAPO Bishop's blue, with white eye.
- PRINCESS DE SAGAN—Of a elear blue shade, white centre.
- 10. ROI DES NOIRS—Deep blackish purple, white eye; very distinct.
- 11. SWANLEY GIANT A fine variety, for bedding or pots; massive heads of flowers; colour bright blue, and deliciously fragrant.
- 12. THE QUEEN—Flowers nearly white, and very highly perfumed; a fine variety.
- 13. WHITE LADY—Nearly pure white, free-flowering, large heads of bloom; fine habit.
- 14. FREIFRAU VON KONIG-A pretty variety, light silvery-manve flowers arranged in

HELIOTROPIUM QUEEN MARGUERITE.

graceful arching sprays; sweet-seented; attractive. 9d.

15. QUEEN MARGUERITE—The habit is dwarf compact. Snitable for pot or border culture, and of high value for cut-flower purposes. 1s.

6d. each; 4s. per dozen.

HELIA'NTHEMUMS (SUN ROSES).

No Plants are better adapted for dry rockeries or sunny banks than these; they are Evergreens, and always have a charming and attractive appearance; quite hardy, and, like shrubs, when established, live for many years without trouble. 6d. each; 4s. per dozen.

SEEDLING HOLLYHOCKS.

Splendid seedlings of various colours, that will bloom during the season, 6s. and 9s. per dozen. Named varieties, our selection, 24s. to 36s. per dozen.

HE value of this large and important group of hardy plants is now more generally recognised, and if their accommodating disposition with regard to soil and situation, the rich and varied colours of their flowers, rivalling in this respect the choicest of Orchids, their value as cut flowers for decoration and the extended season of their blooming, viz., from Christmas to August, &c., he taken into consideration, it must be admitted that no collection of hardy plants can have any claim to be considered a representative one which does not include a judicious selection of these plants. 4s. to 10s. per dozen.

For full description of all sections of this family, see our Autumn and Bulb Catalogue.

THE BEST VARIETIES.

IHIS family is exceedingly pretty and of easy cultivation, only requiring the ordinary care of a Pelargoninm; they bloom most abundantly eight months in the year; a fine substitute for the Verhena.

- LA NEIGE—Pure white. 9d.
- PLUIE D'OR-Light canary yellow.
- RUTILANT-Deep yellow; dwarf.
 NE PLUS ULTRA Rose-pink; fine
- hedder.
 - 10. FAVORITA—Yellow to brown-scarlet.
 - DISTINCTION-Orange-scarlet. 11.
 - DON CALMET-Pink centres, peach.
- 16. ECLAT Rich reddish crimson and orange.
 - 17. PERLE POITEVINE—White.
- 19. MAGENTA KING - Bright purplescarlct.
 - 23. RAYON DE SOLEIL-Deep yellow.
 - 27. DIADEME—Rose, centre yellow.

All those not priced 6d. each; 4s. per dozen.

The hest and most useful varieties in cultivation; can be supplied in dry roots in autumn at lower prices.

- 2. LADY ROSEBERY A lovely variegated leaf; fine shaped light erimson flowers. 1s.
- 3. MISS ELLEN TERRY—Broad white margin, deep green centre; hahit dwarf; flowers pure white, deep salmon centre. 1s. 6d.
- 4. MRS. PARKER—Producing a quantity of beautiful double pink flowers; foliage green with white margin; distinct and attractive.
- 5. CHELSEA GEM Profuse bloomer, foliage green, margin of white; large trusses, of a charming lilac-pink colour.
- 6. BRONZE CORINNE—Large flowers of a bright scarlet, chestnut zone on golden ground.
- 7. MRS. STRANG—Golden Tricolor with double flowers. cerise-scarlet; vigorous hahit.
- 8. SOLEIL LEVANT—Bright silver variegated foliage, rich scarlet flowers.
- 9. MARY ANDERSON—Dwarf and free; purple pink flowers, silver variegated; pretty.

SELECT LIST OF PELARGONIUMS WITH COLOURED LEAVES. GOLDEN TRICOLORS.

- 10. MR. HENRY COX—Intensely bright markings, with a well-defined zone of rich crimson, and bright yellow margin. 9d. each, 6s. doz.; May, 5s. doz.
- 11. MASTERPIECE Fine broad zone, very black; good habit; first-class. 6d. each, 4s. doz.
- 1? MRS. WALTERS A very highly-coloured zone, contrasting with a broad golden margin, deep green centre; distinct. 9d.
- 13. ADAM BASS—Dark zone, very broad and even; perfectly flat leaf; dwarf sturdy habit; robust grower. 6d. each, 5s. doz.
- 14. PETER GRIEVE—Round leaf, high colour, good grower. 9d.
- 15. PRINCE OF WALES—Grand variety; colours exceedingly bright; one of the best. 9d.
- 16. SIR R. NAPIER—Fine grower, the streak of red is very bright; distinct.
- 17. MRS. TURNER Rather a coarser variety; vivid colours; one of the best.
- 18. MACBETH—A beautiful variety, habit dwarf and hushy, dark zone, bright scarlet ring, attractive. 9d. each, 6s. per doz.

WILLIAM SANDY—Dwarf; narrow inflamed scarlet zone.

20. ENCHANTRESS - Highly coloured, Vandyke zone, deep golden margin; a fine advance on Mrs. Pollock. 6d. each; 5s. doz.

21. SOPHIE DUMARESQUE-Effective.

22. LADY CULLUM--A well-known variety.

23. MRS. POLLOCK-Λ well known kind.

4s. to 6s. per doz.; 26s. per 100. 24. GOLDEN BEILLIANTISSIMUM — Similar to the old Brilliant; distinctly blotched yellow and white round margin, the remaining part light pea green, vivid searlet flowers. For edging of beds a gen.

All those not priced 6d. each; 4s. per doz.

SILVER TRICOLORS.

25. MRS. MILLER — Λ grand improve-ment, crimson and black zone, very even and conspicuous. 1s.

26. EMPRESS OF INDIA - Effective;

colour very brilliant. 9d.

- 27. MRS. LAING Fine habit, large foliage, broad silver margin, inner zone of hrilliant carmine; vigorous; a grand variety. 9d.
- 28. DOLLY VARDEN Foliage smooth and quite circular, the red bright and glaring.

29. PORTEUS-Attractive; hright earmine

zone, broad white margin. 9d.

30. LADY DOROTHY NEVILLE—Small, hut highly coloured with fiery earmine. 9d.

- 31. MISS FARREN-An improvement on Mabel Morris; vigorous.
- 32. LASS O' GOWRIE Margin white, broad zone of brilliant earmine-rose.
- 33. EVA FISH-Rich lake-rose zone, large leaves, round and flat, margined with a broad band of creamy white; vigorous; distinct. 9d.
- 34. MRS. CLUTTON-A stronger grower, one of the hest for bedding; very effective.
- 35. CHARMING BRIDE -Large reflexed foliage; strong grower.
- PRINCE SILVERWINGS Distinct and heautiful, silver and gold tricolor leaf.

ORNAMENTAL FOLIAGE VARIETIES.

37. A HAPPY THOUGHT-White centre, and green round the outside; habit dwarf and spreading; attractive.

38. FREAK OF NATURE- An improvement on Happy Thought, and very dwarf; its white variegation is most beautiful.

BRONZE. GOLDEN E shall merely give the most distinct features of these, for it will be useless repeating their

colours. They all have golden yellow discs, and are edged with the same colour, with more or less brown bronze, in the shape of a horse-shoe. 39. JUBILEE - Fine hold leaf with

broad hand of deep ehestnut, salmon-coloured

40. HER MAJESTY - Very fine; large leathery foliage, with deep zone, and hright searlet flowers.

41. ZULU-A great improvement on Black Douglas; one of the finest bedders.

42. SWANLEY BRONZE-Splendid broad hand of chestnut on bright golden yellow. 9d.

43. BRONZE QUEEN—Good bold leaf; fine broad zone, the yellow very attractive; a splendid bedder. 9d.

44. MARECHAL MACMAHON-Bold leaf, broad zone, and colours hright.

45. GOLDEN HARRY HIEOVER — Habit of the green variety of that name, thick and bushy; for small beds and front row a gem.

46. DISTINCTION-A novel variety, the rich greeu leaf disc being circumscribed by a narrow zone, and the margin similarly crimped with a sharply notched outline.

47. WHITE DISTINCTION - Beautiful foliage, dwarf dense habit, and bearing white flowers like Madame Vaucher.

48. BLACK VESUVIUS-A sport from the old scarlet variety. The foliage is dark, the stem and flower stalks are coloured; flowers of a darker shade than the parent. Its chief attraction is its dark foliage.

All those not priced 6d. each; 4s. per doz

YELLOW-LEAVED SECTION.

49. VERONA - Beantiful deep yellow foliage and dwarf habit,

50. CRYSTAL PALACE GEM - Wellknown.

51. CREED'S SEEDLING - Dwarf, ahnndant bloomer; bright searlet, small truss, and very profuse.

52. ROBERT FISH-Dwarf habit, never exceeding 6 inches; for small heds and front rows the best.

All those not priced 6d. ach; 4s. per doz.

WHITE-EDGED VARIETIES.

- 53. BOULE DE NEIGE-A great improvement in this section; hushy habit, broad white mar-
- gined leaf, deep green centre; good in all seasons. 54. VARIEGATED PRINCE OF ORANGE-Dwarf habit, small foliage, orange seented. 9d.
- 55. LITTLE TROT-Searcely attaining 6 inches, branching habit, leaves margined with broad band of white; a gem for bedding.
 56. VISCOUNTESS CRANBROOK—Com-
- pact hahit, broad creamy white edge, flowers
- 57. MISS KINGSBURY A first-class bedder.
- 58. FLOWER OF SPRING-One of the best; cream-coloured variegation; splendid, thick, dwarf habit.

- 59. BRILLIANTISSIMUM Great improvement on the good old *Brilliant*. For bedding a grand variety, and makes a solid line of scarlet.
- 60. DANDY-Very small-leaved variegated
- variety, exceedingly pretty; fine for edging.
 61. MANGLE'S VARIEGATED—A fine old variety; its pure white margin makes it very eonspicuous; a most useful kind for edging.
- 62. LADY PLYMOUTH (Graveolens fol. var.)—Λ useful scented variety for hedding.
 63. MME. SALLEROI—Very dwarf and
- eompact; of regular growth and forming into
- well-formed tufts; never been known to flower. 64. MRS. J. C. MAPPIN—White bloom and pink eye; habit and appearance is the same as Flower of Spring.

All those not priced 6d. each; 4s. per doz.

VARIEGATED FOLIAGE WITH WHITE, PINK, & CRIMSON FLOWERS. Xc.

- 65. PRINCESS ALICE-Very bright pink; attractive. 9d.
- MISS GERTRUDE—Blush pink flowers; very striking.
- 67. LORD CARLINGFORD-Free growing, fine truss, colour crimson. 1s.
- 68. SIR THOMAS LAWRENCE-Trasses of good size, magenta flowers; fine shape; attractive.
 - 69. ROSAMOND WRIGHT-Bright rose-pink, round flowers, large truss.
 - 70. WHITE CLIPPER-Large round white flowers.

VARIEGATED IVY-LEAVED SECTION.

- 71. DUKE OF EDINBURGH-Growth free as the green varieties; broad white margin.
- 72. LELEGANTE-Leaves neatly margined white; blooms white. An acquisition as a decorative plant, for hanging-baskets, pots, &c.
 - 73. AUREUM MARGINATUM-Distinctly variegated with pale yellow; good grower. 6d. each; 4s. per doz.

SELECT LIST OF DOUBLE-FLOWERING PELARGONIUMS

- HE various raisers have improved this class wonderfully the last few years—in fact, the strong growth is now superseded by splendid dwarf varieties, and freeness of flower equal to the single; these, with liberal cultivation, are sure to take a far more prominent place for decoration than hitherto, and for cut flowers we have nothing to equal them. The following in their respective colours are the hest in cultivation. For novelties in doubles, see front of Guide.
- 74. DOUBLE NEW LIFE-The flowers are double, with the centre florets white, thus forming a most conspicuous contrast. For cut flowers all the winter it will prove one of the greatest sensations. 3d. cach.

DOUBLE NEW LIFE.

SECTION. SEMI-DOUBLE GIGANTEA

AVING several splendid varieties in this attractive section, we have placed them together for better reference. No doubt in a year or so we shall have sufficient new kinds to still further divide them according to colour; they all produce enormous semi-double flowers, in the way of the well-known Single Gigantea, Aurore Boreale.

COL. BARRÉ-Magenta, a new colour in this section; very large semi-double flowers;

dwarf habit. 1s. 6d.

MME. LANDRY-Deep salmon; enormous trusses; vigorous habit; very bold. 1s. 6d. THOS. MEEHAN-Of a light rosy lake shade; enormous sized semi-double flowers trnsses very large. 1s. 6d. 75. COUSIN BÉLÉ—Pips very fine colour, deep salmon, shading off to a pure white margin;

effective. 1s.

76. BEAUTÉ POITEVINE, syn. KING OF DENMARK-Producing its trasses just above the foliage on very strong foot stalks; large semi-double pips of clear salmon. 1s.
77. ETERANTHE—Semi-double enormous flowers and trusses; fine bold variety.
78. GUSTAV EMICH—Producing gigantic semi-double flowers; rich clear scarlet; a gem for

winter flowering; dwarf habit. 9d. 79. M. ALPHONSE RICARD—Rosy-scarlet; immense sized flowers; free blooming; good bit. 1s.

habit.

80. M. BRUANT-Clear searlet, semi-double, enormous sized trusses; for pot-work or cut flowers one of the most useful.

81. M. D. REYDELLET—Distinct shade of soft cerise-scarlet; semi-Jouble. 9d.
82. MME. CHAROTTE — A splendid acquisition; good dwarf spreading habit, producing enormous sized trusses, 6 to 8 inches across, of a mottled salmon shade; one of the most attractive

83. VILLE DE POITIERS-Light clear scarlet, semi-double, cnormous pips and trusses; a splendid pot plant. 1s. · (=123=)

SCARLET AND ORANGE-SCARLET.

The Prices attached are for Plants in 60's, our selection, from all Classes of Doubles, 7s. doz.; do. in 5-inch pots, blooming plants, 12s. and 15s. per doz.

Cuttings, half the price of Plants.

RASPAIL IMPROVED.

- 84. DUKE OF FIFE-See Novelties
- 85. GOLDEN GATE—Another addition to the much admired and sought after section of orange-searlet shaded varieties; extra quality. 1s.
- 86. RASPAIL IMPROVED The most valuable Double Zonal in existence. Raspail has been for many years almost the only one grown for the market. This is a sport from it, and it is remarkable it should retain its characteristics exactly in every respect, excepting

size of pips and trusses; these are huge and monstrous. Colour deep searlet; for house and general decoration it is a beauty, and will certainly replace its parent. 9d. each, 6s. doz.

87. TURTLE'S SURPRISE (Sport from

87. TURTLE'S SURPRISE (Sport from F.V.Raspail) -- Resembling West Brighton Gem in the variegation of its stems; searlet, like its parent; habit dwarf and spreading; exceedingly free. 9d. each.

free. 9d. each.

88. GOLDEN RAIN—An advance in this section, beautiful well-formed flowers of very large size, clear orange-searlet. 1s.

GOLDFINDER—Dwarf sturdy habit; coming, beautiful orange-yellow. 9d. free blooming, beautiful orange-yellow.

90. CALIFORNIE - Large semi-double flowers of bright orange; very striking. 1s.

91. M. DE LATOUR - Reddish scarlet, fine large trusses; effective.

92. LUDWIG FERCHL - Rich scarlet, large; a fine variety.

93. F. V. RASPAIL - Deep searlet, large pips, good form; compact habit; one of the best.

All those not priced 6d. each. For varieties with variegated foliage and double flowers, vide Collection.

CERISE-SCARLET.

DR. VERNEUIL-Extra large. and fine trusses; good labit. 1s. 6d.

94. MATHIAS SANDORF - Light eerise, very distinct, grand trusses; free. 9d.

95. AUSTRALIAN GOLD - Soft ceriscscatlet, tinted orange; distinct shade of colour. 97.

96. MRS. CORDF'N - Soft rosy cerise, good form; free and effective; first class. 9d.

97. ERL KING - Light orange-scarlet; dwarf and free.

93. ALTHÆA-Rich cerise-searlet flowers, largo and beautifally formed; effective.

99. M. GELEIN LOWAGIE - Large pips; very free.

All those not priced 6d. each; 4s. per doz.

REDDISH SALMON AND PINK.

A NEW CLASS AND QUITE DISTINCT IN COLOUR,

Resembling, more or less, Mme. J. Chretien as regards the colourings.

1(0. APOTHEOSE-Of good habit, clear bright rose, white blo ch in centre, upper petals suffused rich carmine. 1s.

101, HENRI DE PARVILLE - Bright magenta-rose, white blotch, which is suffused rich lake on the upper margins. Is.
102. MME. GOYEUX—Soft rosy pink,

large blotch in centre; a pretty and charming colour. 1s.

CHAS. GOUNOD-Fine large flowers of bright scarlet, large white centre; very distinct and effective. 1s. 6d.

VERA VEND-Mottled rose, deeper margin; very free and beautiful. Is. 6d.

103. GRAND DUCHESSE Mottled centre, with broad margin of purple; very dwarf and free. 1s. 6d.

JEAN PICARD-Light rose; large flowers, semi-double; very dwarf. 1s. 6d.

. GYP — Blush-pink, distinctly spotted deeper; large flowers; dwarf habit. 1s. 6d.

JEANNE D'ARC - Most distinct; heautiful shade of light lavender-piuk, distiuctly spotted with deep pink; fine large flowers; good habit; quite a novelty. 1s.

105. MME. VAUDREY—Producing fine bold trusses, of a beautiful soft lavender-pink shade; very distinct. 1s.

106. AIMÉ HENRIOT-An unusual and difficult colour to describe, being of a pretty shade of old-fashioned peach-pink; flowers of beautiful form; trusses large; habit good. Is.

ROSE-COLOURED.

107. H. M. STANLEY-Deep red piuk; full pips and enormous heads of bloom; dwarf branching habit; a graud acquisition. 1s.

103. L. CONTABLE-Of a very deep shade;

fine form; very free, dwarf habit.
109. LORD DERBY—Both pips and trusses large and fine, rich pink.

110. M. CARO—Of a beautiful and pleasing shade of soft lilac pink; fine bold truss and pips; distinct and pretty.

111. TENDRESSE - Soft satiny pink, flowers and trusses fine; habit good

112. MME. BARNY-Beautiful rosy-pink, flowers and trusses very large; dwarf.

113. ROSA BONHEUR - Beautiful soft rosc-pink, flowers very large; habit dwarf.

All varieties not priced 6d. each; 4s. per doz.

PINK SUFFUSED PURPLE. WITH

114. MME. DE LA RUE-A very rich coloured purple-pink, very intense, large trusses; attractive. 1s.

115. SIR HAMILTON-Producing enormous trusses of bloom, rich purple-pink. 9d.

116. GIROME-Colour highly suffused with

purple; very large flowers and trusses.

117. DUC DE MORTEMART—Large, bold round flowers, of a nearly self brilliant purplepink; very dwarf and free. 9d.

DR. DESPRES - A grand variety; enormous pips and trusses, which are well

formed; good habit. Is, 6d.

DOUBLE JACOBY-As regards colour of flower and hubit, this variety very much resembles the well-known single Henry Jacoby; beautiful well-formed flowers of the deepest crimson; habit first-class; a most useful variety for winter flowering. 9d.
119. COLOSSUS—As name denotes, this

variety is the largest and finest in all respects;

rich reddish crimson. 9d.

120. RAFAËL GARRETA—Splendid large bold flowers and trusses, beautiful rich colour; an acquisition. 9d.

121. LE CONGO-Deep shade, dwarf and free; large trusses; growth and foliage very ninch resembles the bedding variety, West Brighton Gem; distinct. 9d.

122. SOMBRE HORIZON-Colour most intense, producing trusses of great size; habit very dwarf and bushy.

123. CRIMSON VELVET-Very dwarf and

121. CHAS. LALANDE — Intense erimson; flowers and trasses medium sized; habit

125. GRAND CHAN FAIDEHERBE-Well formed, intense colonr.

PURPLE-COLOURED.

JEAN LAHOR Rosy-purple; very dwarf and frec. 1s. 6d.

LUDOVIC CORRET-Bright magenta; dwarf and free. 1s. 6d

146. M. PRESSE-Mottled salmon, at times almost white, with a margin of rose.

147. MAGGIE HALLOCK-Clear soft salmon, large and open, dwarf; fine.

M. Chunell & Sons' Moral Guide.

We should be pleased to hear from any Amateurs or Gardeners having raised new and improved varieties of Zonal and other Pelargoniums, with a view to acquiring the entire stock; and should also esteem it a favour, and would accept with much pleasure from our esteemed Patrons Photographs of Flowers, Views in Gardens or Conservatories, for the purposes of reproduction in our Catalogues.

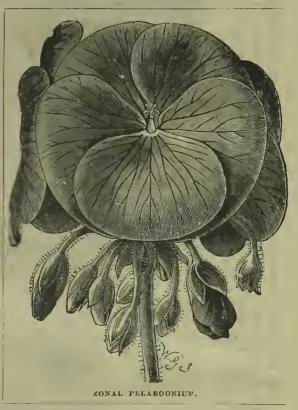

THE BEST ROUND-FLOWERING ZONAL PELARGONIUMS.

SPECIALLY ADAPTED FOR POT CULTURE.

MHE Zonal Pelargonium is hecom-A ing more and more popular every day; vide reports in and around London of the stands of magnificent blooms that we have shown throughout the year, the autumn and winter in particular. Several 100-feet houses are filled with Pelargoniums always in flower, and many are so grand in the winter that they are uurecognisable even by the raiser; in fact, no other flower-not even the Rose-can for a moment be compared with our stand of trusses, many of the pips measuring 2 to 3 inches over, and as round as the engraving, and in some instances better. This may appear incredible, but whoever questions this are respectfully invited to Swanley, no matter the season. To keep plauts in good blooming condition throughout the year, all that is necessary is to keep two or three sets potted, say in March, July, and September, in good rich soil, with a plentiful supply of water, taking out the points of all strong-growing shoots, thus throwing the whole strength into the truss.

We are glad to say that immense strides continue to be made in this class.

DOUBLE WHITE.

148. THE PEARL-Fine trusses of pure

white flowers; fine habit, very free, 9d.
149. LE DONON—Fine large trusses and well-formed flowers, slightly tinted. 9J.

376. MRS. TURNER - Bright rays of purple predominating; a first-class variety. 6d. each; 4s. per doz.

DOUBLE-FLOWERED IVY-LEAF PELARGONIUMS.

T seems but the other day that there were no double-flowering Ivy-leaf Geraniums, yet now we have many and more double than a rose, all distinct, and many of them most valuable for cut flowers. Few people have an idea, and very few can form the slightest conception, what grand kinds we have in this family, and what splendid specimen plants they make trained on trellises; and what is more surprising, all have been introduced within the last few years; and, in fact, no class of plants has made such rapid progress in so short a time. The stands of cut blooms exhibited by us at numerous shows were a marvel for the acquisitions they contained, including many of the following varieties. Our selection in 60-sized pots, 5s. per doz.

377. QUEEN OF ROSES-Rosy-magenta, of a very pleasing shade; large, rose-like formed

flowers; good habit. 9d. 378. BEAUTY OF CASTLE HILL—Very pretty; enormous flowers of a soft rose shade, dark blotch in upper petals; free and effective. 9d.

608. BRIDESMAID — Delicate pale

lavender, edged with white.
609. LORD OF THE ISLES—Deep rosy purple, white centre and edges.

610. MRS. ALFRED WIGAN—Pink, with clear white centre and edges.

611. PRINCESS HELENA—Purplish rose upper petals, under petals veiued.

612. C. WITHAM-Purple, white throat and margin.

9d. each. Our selection, 6s. doz.

HYBRID DOUBLES (REGAL) OF THE SHOW PELARGONIUMS.

HESE are comparatively a new, wonderfully rich, and effective type, and, having more scalloped petals, nearly approaching a double, retain their petals instead of shedding them as the singles do—this, together with their most brilliant colours, makes them quite an acquisition for cut flowers.

The prices affixed are for plants in 60's; our selection, in 60-size pots, 9s. per doz.; our selection in flowering plants of most of these varieties, 15s. and 18s. per doz.

613. PERSIMMON—A sport from the well-known and much admired variety Ed. Perkins, pleasing and intense orange-searlet shade of colour; flowers very massive and bold, of thick leathery substauce and beantifully undulated, from 7 to 9 petals in each individual flower; enormous trusses, vigorous but dwarf spreading habit. Awarded Two First-Class Certificates. 2e, 6d.

614. LADY DUFF—Producing flowers of a deeper shade of colour than Duke of Fife, being of a rich rosy red, distinct white margin and centre; seven and eight petals, and much crimped, more so than any other variety; good constitution. 2s.

615. CHILWELL WHITE — Pure snow white, rich crimson lake blotch on each of the two upper petals; large and beautifully formed.

616. GEN. LASSALLE-Very large fine flowers, undulated petals; white, lightly blotched and marbled rose; very fine. 2s.

617. PRINCESS CHARLES-Soft salmonrose, lightly blotched crimson on the lower petals, upper deep blackish maroon, rose margin; distinct and attractive. 2s. 6d.

618. PINK CHAMPION-A sport from Champion, and having all its good qualities.

1s 6d.

- 619. MRS. INNES ROGERS-Flowers large and of good shape, often producing from six to eight petals; beautifully crimped, rosy-earmine shade, blotched maroon, splendid bold trusses; habit one of the finest. 1s. 6d.
- 620. DUKE OF FIFE Well-developed flowers of seven and eight petals of a clear lake shade, pure white margins and centre; splendid habit, and producing large heads of bloom in abundance; sport from Mme. Thibaut. 1s.

621. W. C. BOYES-Of a pleasing shade of salmon; very large and hold, beautifully crimped. 1s.

622. FIMBRIATA ALBA - Semi-double; very free, dwarf habit. Of great use for ent flowers. 1s. 6d.
623. DEUIL DE LORRAINE — Rich

maroon-crimson, intense black blotch : the richest coloured variety in this class. 1s. 6d.

624. M. BALMONT-Bright searlet, occasionally white edges, heautiful crimped edges;

sturdy habit. 1s. 6d.

625. CANNELLS' DOUBLE - A sport from Volonte Nationale Alba, for cut bloom is a great acquisition; flowers large. 1s.

626. PRESIDENT HARRISON - Sport from Madame Thibaut, deeper in colonr than the parent plant, with deep reddish-pink flowers, blotched in upper petals. 1s. 627. MRS. HARRISON—The flowers are

very large, of pink ground colour reticulated with white, with white centre and margin.

Nothing like it in commerce. 1s.

628. PRINCESS OF TECK - Pure white flowers of innnense size, with nice erimped edges; strong grower and free. 9d. 629. DUCHESS OF FIFE—Of a beantiful

blnsh-white sbade, deep maroon blotch on upper petals; large fine flowers; vigorous hahit. 9d.

630. BUSH HILL BEAUTY - Enormons size, of a mottled-rose shade, much deeper than the parent, Madame Thibaut; an acquisition. 1s.

631. CHAMPION-Gigantic flowers; white, delicately shaded hlush, small lake blotch in lower petals, upper feathered maroon and red; immense trasses; vigorous.

632. PRINCESS MAUD-A sport from Volonte Nationale, but with a deeper coloured blotch in each petal; a decided advance. 1s. 633. SPRINGFIELD BEAUTY — Enor-

mons flowers, much crimped, of a rosy-red shade, large blotch in upper petals; distinct. 1s.

635. PRINCESS BEATRICE-Of a blnshwhite shade, deep crimson blotch on each petal oceasionally; semi-double; a sport from Madame Thibaut. 1s.

636. PRINCE HENRY-Soft rosy-red and chocolate, broad white margin, bold flowers fine trusses; also a sport from Madame Thibaut.

1s. 6d.

PRINCESS OF WALES-Of a rosy-637. lake colour, marbled and netted white; white centre; all the petals margined white, upper petals blotched maroon. 1s. 6d.

638. MISS LILY CANNELL-Maroon and crimson, with a well defined white margin and centre. 9d.

639. VOLONTÉ NATIONALE ALBA-Pure white massive flowers; a grand addition to this much admired section. 1s.

640. DENISE - Beantiful, large, double, pnre white flowers; for button-holes, &c., a gem. 9d.

641. MADAME PAPE-CARPENTIER-Donble white, slightly tinged in top petals in the way of Jeanne d'Arc; large trasses; free. 9d.

642. DUCHESS OF ALBANY (Lewis)-A smooth and glossy scarlet, dark blotch in npper petals; good full flowers. 1s.

643. DUCHESS OF ALBANY (Bull)-Soft purplish violet, margined rose, upper petals

feathered maroon. 1s. 6d.

644. DUKE OF ALBANY-Deep rich crimson-maroon, margined rosy lake, light centre, all the petals beautifully undulated and fringed

fine full flower; showy and attractive. 1s. 645. JEANNE D'ARC — Blusb, small maroon blotch on npper petals, semi-double;

very dwarf and free. 9d.

647. MADAME THIBAUT-White, riebly blotched and marbled with rose; the npper petals marked with crimson-maroon; large white centre; immense trusses of very large fine flowers, with undulated petals. 1s. 648. MRS. C. H. WELLS-Pure white,

deep carmine hlotch on each petal, beautifully

fringed. 1s.

649. VOLONTÉ NATIONALE-Flowers large, good shape, each petal blotched rosy carmine, margined with a broad band of pure white; white throat, beautifully crimped. 1s.

650. GLOIRE DE TOURS-Bright scarlet,

dark blotch in upper petals; good habit. 1s. 651. CARL KLEIN—Deep orange-scarlet, black blotch in each petal, beautifully fimbriated; very free. 1s.

652. EDWARD PERKINS-Grand bright orange-scarlet, maroon blotch in npper petals beantifully fringed and undulated. ' 1s.

653. MADAME EVRARD-Most attractive and distinct; bright purplish crimson, ricbly spotted with dark maroon. 1s.

654. M. PH. ZELLER-Deep red, hlotched on each petal with maroon; attractive. 9d.

655. BOUGAINVILLE—Salmon, bordered pure white, deep chocolate blotch in each petal; thickly netted. 9d.
656. TRIOMPHE DE ST. MANDÉ—Rich magenta, suffused crimson, with trusses resembling a Hydrangea; dwarf, sturdy habit, exceedingly showy and free, slightly undulated. 1s.

658. PRINCE TECK — Flowers large, colour searlet, suffused with purple, upper half of petals rich maroon; large truss. 1s.
659. PRINCE OF WALES — Excellent habit, very free, and produces good trusses of large effective flowers, not really double; colour hydry vermilion, light centre and edges. bright vermilion, light centre and edges. 1s.

660. DR. MASTERS-Large black blotches in the centre, margin rich crimson, lower petals small blotch, broader margin than upper. 1s.

661. BEAUTY OF OXTON - Very rich maroon colour, darkly blotched; light centre tinted with rose; all the petals are regularly margined with white, and beantifully fringed. 1s.

662. QUEEN VICTORIA - Crispy petals, colonr rich vermilion, broadly margined pure white, npper petals blotched maroon. 1s.

663. CAPTAIN RAIKES - Upper petals deep fiery crimson, flaked with purplish black, and bordered with carmine; lower petals clear, bright, fiery crimson. 1s.

664. GEORGE SAND-A beautiful blush tint on white ground, quite distinct, flowers

double, habit dwarf; very pretty. ls.
665. MAID OF KENT — Dwarf habit; flowers white, feathered on each petal, most beautifully fringed; very free. 1s. 6d.

PROPER. GERANI MHB

GERANIUM ARMENIUM - Purplish, rose-coloured flowers; neat babit, 18 inches in height, useful for the border or rockery.

GERANIUM CINEREUM-A showy rock or border plant, silvery foliage, 6 inches in height; white flowers, veined purple. 9d. GERANIUM IBERICUM--Strong-growing,

2 feet in height; rich purplish blue. 9d. GERANIUM SANGUINEUM. 6d.

VILLE DE ST. DENIS—White, lightly tinted violet, carmine in centre; very large.

WEISSE-White, tufted.

PETU'NIAS.

T is surprising this family is not more largely grown, considering how casy they are to cultivate; and if well grown what grand things they are, both for decoration and exhibition! Treat them similarly to a Verbena. Choose nice young plants about March, or any time up to July, give them good shifts and rich soil, well stake out, and you will be highly gratified, for some are certainly surprisingly large, and their colours not equalled by any other flower. The finest varieties ever offered. Seed saved from this collection, 1s. 6d. and 2s. 6d. per packet.

DOUBLE PINK VARIETY.

MRS. CHAS. WILSON—Among the many double fringed pink varieties this stands precminent Very large flowers, and like a ball of fringe; colour deep rose-pink; dwarf babit and free flowering. 1s. cach.

67. WM. BROWN — White and deep rosy pink, very donble and free; a useful and effective variety.

All those not priced 1s. each; 9s. per doz.

PHLOXES.

HESE are a splendid hardy class of plants. Some of them are lovely colours and perfectly distinct to any other flower, and for mixed horders or in shrubberies they are not equalled hy any other plant. Some of their blooms are almost a perfect circle. Their roots can be divided in February, and are quite hardy. Plant them in good, deep, rich soil in an open situation. To get fine exhibition blooms, strong enttings must be taken and struck early in March. For cut blooms they are valuable, also very ornamental, and continue in bloom for a long time.

NEW WHITE PINK.

ALBINO-This superb Pink is of the purest snow-white throughout, a very smooth heavy petal, and fine, full, globular form, of extra large size, many of the blooms being from 2 to $2\frac{1}{2}$ inches across without bursting, the largest non-bursting variety yet introduced, and like all the other Pinks sweetly fragrant. In its exquisite quality and general contour, it more resembles a choice white Carnation than a Pink. The plant is hardy, exceptionally free, and easily forced; altogether the greatest advance ever made in this charming family. Award of Merit. 1s. caeh.

PINK

PINK.

ERNEST LADHAMS-A most beautiful blush-white colour, wonderfully free and effective. F.C.C. A real geni always flowering. 6d. each; 5s. doz.

GENERAL COLLECTION.

WE have often thought, when we have stopped to admire their beauty, that if all were as fond of flowers as we are, these most beautiful plants would be grown everywhere. It must be remembered that their lovely little flowers are very different to the common rough-edged Piuk; in fact, they are about the nicest hardy flowers of the whole garden.

ADA LOUISE-Rosy-purple lace.

ALBA MAXIMA—Large.

ANNE BOLEYN—A nseful variety. 9d.

ASCOT—Pink, dark centre. BERTRAM—Red lace.

BERTHA-Dark red lace; very fine.

DERBY DAY—Deep pink, heavily laced bright rcd; free habit. 9d.

EMERALD-Red; large and full.

ERNEST-Rich ruby, large; one of the finest.

EURYDICE-Rosy red.

GEO. WHITE-Purple; large and finc.

GODFREY-Bright reddish colour.

HEBE-Very dark red.

HER MAJESTY-Has a strong perfume, is of the pnrest white; a decided acquisition. HOMER-Deep rose.

(153)

HYBRIDUS FLORIBUNDUS—Rose self. JESSICA—Red lace. JOHN BALL—Dark plum-purple. LANCER—Free, dark. MASTER HARRY-White ground, heavy and regular plum lacing; distinct. MODESTY—Rosy-purple; one of the best. 1s.

MR. HOBBS. MRS. LAKIN-White. MRS. PETTIFER-Dark laced. MRS. SINKINS-Pure white, large and full, sweet-scented; a useful variety. MRS. WAITE-Rosy-red. TOTTIE-Bright red lace.

All those not priced 6d. each; our selection, 5s. per dozen.

DIANTHUS MULTIFLORUS,

(MULE PINKS.)

Perpetual-flowering Hybrids, very ornamental.

ABBOTSFORDIANA-Intense pink, finely notched, very double. 9d.

LADY CAMPBELL-A beautiful shade of pale pink; dwarf, free and compact. 1s.

MARIE PARE-Pure white. 1s. NAPOLEON III.—Rich erimson; fine. 1s. ROSE PERPETUAL-Rich rosy-pink.

PERPETUAL FLOWERING DWARF DOUBLE MARGARET CARNATIONS.

TOM THUMB—These arc most valuable for pot culture, bedding, groups, borders, &c., and will be highly appreciated by all lovers of the Carnation. The cultivation is quite simple, as they can be sown at almost any time of the year, but must be transplanted at once to the spot where intended to flower. If sown in March they require but very little more attention than many of the eommon summer flowers. Per pkt., 1s. and 1s. 6d.

PICOTEES AND CARNATIONS, mixed. 1s. and 2s. 6d. per pkt. PICOTEES, mixed. 1½ ft. 1s. and 2s. 6d. per pkt.

PICOTEES, mixed. 1\frac{1}{2} ft. 1s. and 2s. 6d. per pkt.

TREE, OR WINTER FLOWERING CARNATIONS, saved from the best varieties. 2 ft. 2s. per pkt.

OLYAN'THUS.

Really first-class seedling gold-laced Polyanthus for garden decoration, nearly as good as uamed varieties. 6d. each; 5s. per doz. Ordinary bedding kinds, 2s. 6d. per doz.

The difference between Oxlips and Cowslips is, the former hold their bloom more creet, the latter drooping.

POTENTILLA

DOUBLE-HYBRID VARIETIES.

N exceedingly free-flowering and ornamental group of Hardy Perennials, producing in great profusion for many weeks full double flowers, with petals of a rich velvety texture, varying from erimson and maroon to rich orange and yellow, many being striped, spotted, or They will thrive in almost any soil or situation.

PRIMROSES.

OUR HYBRID PRIMROSES, OR FANCY POLYANTHUS.

LORD BEACONSFIELD VARIETIES.

THERE is no greater charm to the eye all through the spring than these. Although they are Primroses, they are totally different to what we are accustomed to see, being stronger growers, and their blossoms of an immense size and of great variety of colonrs. Many are of a lovely deep purple-coloured violet, and others approach a distinct shade of red, whilst the yellows and whites are most striking. Equally as good in their various colonrs as Harbinger, introduced by the Marqnis of Exeter, and which has given such great satisfaction. Large flowering plauts, 3s. to 4s. doz.; seed, 1s. per pkt.

PRIMROSE, NEW BLUE.

All must have this lovely variety; it is as beautiful

BLUE PRIMEOSES.

The most prominent feature, and which clearly distinguishes it from all others in cultivation, is its remarkable colour, which is developed into many shades of blue, from pale lavender to deep violet. The flowers are freely produced on foot stalks rising well above the foliage, and are fully equal in size, shape, and duration to the best older varieties. They have received Awards of Merit and other Certificates. Per pkt., 2s. 6d. and 1s. 6d. Good strong plants, 1s. each; 9s. per doz.

MUCH THE BEST PRIMROSE IN CULTIVATION.

HARBINGER—Although numbers of Primroses have been sent out, and justly admired, they can bear no comparison with this one. Harbinger leaves all white ones far in the rear; in fact, it is one of those marches past that seldom occurs—consequently, one of the good permanent plants, welcomed by all with delight and pleasure every year as the hopeful spring comes round. Awarded a F.C. C. 1s. each; Ss. doz. Seed, 6d. and 1s. per pkt.

DOUBLE PRIMROSES.

(PRIMULA ACAULIS.)

PURPLE - A fine variety; very rich and

fine. 6d. each; 5s. per doz.
CRIMSON VELIVET—Very scarce; splcn-did variety. 2s.

CLOTH OF GOLD - A splendid variety, with flowers rich lemon, large and full; perfeetly distinct. 2s. each.

LILAC-Pale lilac, large, fine; carly. 6d. each; 5s. per doz.

CROUSSEI FLORE PLENA-9d. PLATYPETALA PLENA (Arthur Dumollin) -Deep violet; distinct and very fine. 9d. ROSE-Rosy salmon; distinct and very fine;

scarce. Is.
SULPHUR-Pale snlphur; very early and free. 6d. each; 4s. per doz.

WHITE-Pure white; early, large, very fine. 6d. each; 3s. per doz.

(CORTUSOIDES AMŒNA.)

HIS class of Primula are hardy, and in winter they die down to their fleshy roots, and beyond keeping them moderately dry they are no trouble until they are required to be pushed on for flowering, when they merely want the protection of a cold greenhouse, and potting in ordinary soil. Afterwards they can be kept out of doors.

Good plants in various varieties, 6d., 1s., 2s. 6d., and 3s. 6d. each.

List on application.

12 distinct varieties for Border, 8s., 12s., 18s., and 24s. per doz. 12 distinct varieties for Pots, 12s. 18s., and 24s. per doz. 12 distinct varieties for Rockeries, 9s., 12s., and 18s. per doz.

CLUSIANA. 1s. DECORA. 2s. DENTICULATA. 6d. cach; 5s. per doz. CASHMERIANA. 6d. each; 5s. per doz. FARINOSA (Bird's-eye Primrose). 6d. INTERMEDIA. 1s. 6d. INTERMEDIA HEROINE. INVOLUCRATA (Munroi). 9d. JAPONICA. 6d. MARGINATA. 1s.

MARGINATA GRANDIFLORA. 2s. 6d. OBCONICA (Poculiformis). 6d. ROSEA. 9d. each; 7s. 6d. per doz. SIKKIMENSIS. 9d. SPECTABILIS. 1s. 6d. VILLOSA. 1s. VISCOSA NIVEA (Arctotis) (Nivalis) (The Snowy Primrose). WÜLFENIÁNA. 1s. 6d.

(CHINESE PRIMROSE.)

HE double-flowered varieties of this family rank amongst the most desirable of plants for the decoration of the conservatory or greenhouse during the autumn, winter, and spring months; and where cut flowers are in general request are specially valuable, as they retain their beauty for a long time when in a cut state, the flowers never dropping off as with the single-flowering varieties. The white kinds are very fine, and much used for bouquets.

ALBA PLENA-White, much used for cut flowers. 1s. and 1s. 6d.
ALBA PLENA FIMBRIATA — Fringed

white; a beautiful variety. 1s. 6d. and 2s. 6d.

MARCHIONESS OF EXETER—The best of all Gilbert's seedlings; a great acquisition. 1s. 6d.

Special prices for small plants during the antumn; for specimen plants, price on application. See our Seed Guide for list of the finest Single varieties, post free.

We have a large stock of the first-named variety-splendid plants in 5-inch pots, full of flower. For cut flowers more beautiful plants never existed.

Purchaser's selection, 9s. per doz.; our selection, 6s. per doz.

ERHAPS for cut flowers no outdoor plants are more useful, for at the commencement the summer they begin to bloom, and continue as long as the weather keeps open; like other flowers, they delight in having plenty of room, deep rich soil, plenty of manure, and a good soaking in dry weather; treat them thus, and the quantities of aster-shaped blooms will be immense all the summer and autumn.

2. ANDROMEDA-Lilac-rose, yellow centre. ANEMONIFLORUM SANGUINEUM -Rosy earmine, dull white centre; dwarf.

APHRODITE—Purc white. F.C.C. 1s. 6d. 4. ARGENTINE-Pure white, flowers small.

ACRES-THOUSANDS IN POTS.

See page 160. WHITE MARECHAL NIEL.

PRICES OF ROSES WHEN THE SELECTION! IS LEFT TO US:-

Standards and Half Standards, best sorts, and well varied, 18s. to 24s. per dozen.

Dwarfs on the Brier, extra strong good varieties, 9s. per dozen, £3 10s. per 100.

Dwarf Teas. varieties from open ground, 15s. per dozen; extra fine Plants in pots, 18s. and 24s. per dozen.

Hybrid Perpetuals, in pots. good strong plants, 18s. per dozen.

Amateurs selecting their own are respectfully requested to add to their orders a few supplementary sorts, lest by previous orders the stock of any particular variety should be exhausted, this being especially necessary late in the season.

ROSES FOR FORCING.

A large quantity of all the best kinds kept in pots, 12s., 18s., 24s., and 32s. per doz. Our selection.

Also a quantity of Standards in pots for removing at any season. A list of kinds sent on application. A great quantity of well-rooted Dwarf Roses on their own Roots, in pots. A list of sorts on application. Seedling Briers and Cuttings, 6s. per 100.

ROSES.

HYBRID PERPETUALS.

BACCHUS (1895)-Crimson, shaded bright violet-maroon. A distinct improvement on the old dark u.r. Mrs. Geo. Paul; a good medium-sized, finely-shaped flower; perfectly antumnal. Dwarfs, 1s. 6d.

BLADUD (1896)-A very distinct and beautiful light colonred variety; flowers large, very full and globular iu shape, outside petals silvery white, centre pale blush-pink. Will take a high place amongst exhibition kinds, and most useful for bedding purposes. Dwarfs, 2s. 6d.

CLIMBING EARL OF PEMBROKE (1897)—A climbing sport from Earl of Pembroke which, in addition to its climbing liabit, is one of the earliest-flowering crimson hybrid perpetuals, being fully a fortnight earlier than the parent variety and more profuse blooming; a very effective hardy-climbing or pillar rose. Dwarfs, 2s. 6d.

ELLEN DREW (1896)—A sport from Duchesse de Morny; light silvery-piuk, peach shading; very distinct. As an exhibitiou variety it will take a prominent position. Dwarfs, 3s. 6d. HAILEYBURY (1896)—Beautifully refined round shape, colour of cerise crimson; has been

much admired. Award of Merit. Dwarfs, 2s. 6d.

HELEN KELLER (1895)—A magnificent exhibition variety, perfect form; colour brilliant rosy cerise; petals large, shell shaped, of great substance, full and fragrant; a lovely and distinct rose; vigorons. Dwarfs, 2s.

LAWRENCE ALLEN (1896)-Flowers are of large size, full, well built, high ceutre, colour clear soft pink with lighter shading, sweetly perfumed, growth strong and erect; very early and

free in flowering; very promising as an exhibition and garden variety. Dwarfs, 2s. 6d.

MAVOURNEEN (1895)—Delicate silvery-white flesh, shaded rose; large and full; of great

vigour; free. Dwarfs, 1s. 6d.

MERRIE ENGLAND (1897)-Rosy-crimson, very distinctly striped silvery-blush; flowers large, equal in size to others. As a garden rose this is beyond praise. Award of Merit, R.H.S. Dwarfs, 3s. 6d.

MISS ETHEL RICHARDSON (1897)-Almost pure white, pale flesh centre; flowers large,

imbricated form; free flowering. Dwarfs, 5s.

MRS. FRANK CANT (1897)—Beautiful clear pink, the edge and hack of petals silvery-white; flowers large, very full; perfectly formed and produced abundantly. Not only is it a valuable

exhibition variety, but also one of the finest pot roses in cultivation. Dwarfs, 7s. 6d.

MRS. F. W. SANDFORD (1897)—A distinct sport from the well-known Mrs. J. Laing; a most beautiful blush, shading to white; perfect in form, very full, and an exhibitiou rose of the

first quality. Dwarfs, 5s.

MRS. RUMSEY (1897)-A fixed sport from Mrs. Geo. Dickson; lovely rose-pink of large size; one of the hest late pink roses, free from mildew, valuable for bedding or massing. Award

SAL'VIAS.

ERHAPS at no time of the year do gardeners find it more difficult to keep up a display of flowers than about the commencement of October, but if the following Salvias were once seen, and persons were determined to grow them, there would be no more searcity of either the most intense blue, scarlet, purple, rose, striped, and several other intermediate colours, than there is of having in November the conservatory full of Chrysanthemums, and with not nearly so much trouble, for Salvias are much more easily propagated and grown.

GREENHOUSE VARIETIES.

1. SPLENDENS BRUANTI - Dwarfer, and flowers much brighter than the old variety, and produced in greater abundance.

2. PITCHERI, syn. AZUREA GRANDI-FLORA-Branching stems, 2 to 3 ft. in height; colour a beautiful azure-blue.

ANGUSTIFOLIA-Lighter and larger than Pitcheri; flowers and spike not so compact.

3. BETHELI-Rose, shaded white; both the flowers and foliage are most lovely.

- 4. RUTILANS (Pineapple scented) Growth neat and graceful; foliage is delightfully fragrant; pretty neat spikes of flowers of a lovely magenta colour.
- 6. SPLENDENS—The old variety.
 7. SPLENDENS INGENIEUR VENAD—Dwarf and very free flowering. 1s.
- 8. LEUCANTHA (barbata)-Woolly appearance; base of tubes rosy mauve, upper part of tubes pure white

COCCINEA GRANDIFLORA - Deep reddish salmon; dwarf and branching habit.

ALBO-CŒRULEA - Dwarfish habit; long sleuder leaves of a deep green.

11. GESNERÆFLORA - Somewhat resembling the Gesnera; bright scarlet.

ELEGANS.

13. DULCIS-Scarlet; very fine.

HEERI-Red, shaded orange.

15. GONDOTII.

VARIETIES. GARDEN

FULGENS—Glowingsearlet flowers, 6d.

Messrs. H. C. & Sons carried off the only Medal for Verbenas ever given by the Royal

Horticultural Society.

ERONI'CAS.

SHRUBBY VARIETIES .- GENERAL COLLECTION.

VERY nseful and ornamental group of small half-hardy evergreen shrnhs, but in many places perfectly hardy, especially in the south of England and near the coast, forming into luxuriant hushes, and ornamental both in foliage and flower. As pot plants they are useful the whole year, and in the autumn are amongst the prettiest of flowering sbrubs; planted out during the summer and lifted in the approach of frost they will produce flowers for a long time.

- ANDERSONI-Large ample foliage, dark green, with spikes of blue and white flowers. 1s.
- ADOLAR HERLL-Fine variety. 3. BLUE GEM-Very dwarf, free-blooming; light blue, small foliage.
 - BOLIDE-Fine; red; good habit.
 - 4. CLAUDINE.
- 5. CELESTIAL-A pleasing variety, skyblue, white centres; free, good habit.
- CREME ET VIOLET-Bushy; fleshpink, clear mauve at the hase; splendid.
- 7. DECUSSATA Small box-like lcaves, and spikes of blue flowers.
- DIAMANT-Flowers deep red, darker centre; effective.
 - 8. DIOGÈNE

YORK AND LANCASTER - White, distinctly striped with rich rosy purple; extra

All those not priced 3d. each; 2s. 6d. per doz.; 10s. per 100; £3 10s. per 1,000; Clumps for immediate

effect, price on application, per doz. or 100.

For others, see Bedding Pansies.

Many other varieties can be supplied.

VIOLETS.

F there is one flower more than another that can lay claim to the honour of being everybody's favourite, it is the Violet; it cheers the most saddened spirits, and gladdens the most robust. We are pleased to say the hybridisers and the most anxious and hopeful seedling raisers are at work, and to those who present flowers double the size of our present kinds with a perfume, the whole universe owe at least their thanks. Violets, like all other flowers, have their wants, and if these wants are not supplied at the right time they become weak and unsatisfactory. plants must be divided early in April, and replanted in good, deeply-dug, and well-manured soil, sixteen inches from plant to plant for large growers; the double and smaller leaf kinds, twelve inches, with their roots well down so as not to suffer in dry weather, and at all seasons their runners must be kept ent off; they will then produce flowers such as are seldom seen.

DOUBLE WHITE VIOLETS.

BELLE DE CHATENAY — Pure white; large and fragrant. 6d. each; 5s. doz.

QUEEN-White, slightly fluted violet rose; bighly fragrant; large flowers, 1s,

SWANLEY WHITE, syn. COMTE BRAZZA—A beautiful and useful white form of Neapolitan, fragrant, hardy, and free, much grown in America, to where we have exported it largely. 9d. each, 6s. doz.

Rooted little plants, 2s. 6d. per doz.; 15s. per 100. Cuttings, 9d. per doz.; 5s. per 100.

DOUBLE VARIETIES.

DE PARME—Pale lavender-purple, which is produced in great abundance; earlier than Neapolitan. The finest variety for growing in frames; very free.

DOUBLE RED-An old and well-known

DUCHESS OF EDINBURGH—Very light ground, shaded; each petal tinted mauve, bordered with azure-blue. 1s.

Special prices for large quantities

A VIEW OF OUR TWO ACRES.

Representing Marie Louise, Neapolitan, De Parme, and Victoria. when well grown. (174)

PRINCESS OF WALES.

GRANDIAVIOLETS, SINGLE

AMIRAL AVELLAN - A grand improvement on Odorata rubra, being brighter in colour and stronger in scent. 6d. each; 4s. per doz.

· CALIFORNIA - Plant vigorons and absolutely free from disease; flowers single, immeuse in size; colour violet-purple (does not fade); flowers borne on strong stems 10 to 14 inches in length. We last season picked quantities of flowers from a single plant. 6d. each; 3s. per doz.; 20s. per 100.

ITALIA-Oue of the finest in cultivation. 1s. each; 7s. per doz.

PRIMAVERA-Nearly equal to above; splendid on some soils. 6d. each; 4s. per doz.

PRINCESS OF WALES-This, in our opinion, is the largest and finest variety in cultivation. a quantity of plants growing and flowering all last winter a d spring. Its blooms are more like a Viola than a Violet. We are accustomed to see the colour similar to Victoria Regina, but this is more of a decided bright blue; flower stalks 6 to 8 inches long, and standing almost erect; habit vigorous. We confidently recommend all growers and lovers of this family to obtain this variety at once. Award of Merit, R.H.S. 6d. each; 4s. per doz. : 30s. per 100.

PRINCESS BEATRICE - Somewhat similar to the above; flowers large, and equally as vigorous in habit of growth. 6d. each; 3s. per doz.

YELLOWRETTE (SULPHUREA) - Producing medium-sized flowers of a decided creamy-yellow shade; very distinct, and a perfect contrast to all other varieties. 1s. each; 8s. per doz.

SINGLE VARIETIES.

ARGENTÆFLORA-Colour white, tinged with pink, long footstaks, flowers small, strong grower, and should be in every garden. 6d. each; 5s. per doz.

DEVONIENSIS—Deep purple, and very sweet.
GLOIRE DE-BOURG-LA-REINE—A vigorous-growing variety; fine large flowers on long footstalks. 9d.

ODORATISSIMA-Its size and roundness of flower more resembles a Pansy, accompanied with a powerful odour. 6d. each; 4s. per doz.

RAWSON'S WHITE-White, tiuged with pink; very dwarf and free.

SINGLE RED or PINK - Distinct.

THE RUSSIAN AND LONDON-Are of a much dwarfer growth, with small leaves, their runners become quickly interwoven, and in the early spring produce their flowers so thick as to give quite the appearance of a bedding plant. 3s. per doz.

VICTORIA REGINA-Is very similar, possessing a fine flower, long footstalks, and when wellgrown can be readily distinguished from all older varieties. 6d. each; 4s. doz.

WELLSIANA -F.C.C., R.H.S. An improvement on Victoria Regina and Odoratissima-larger

dowers, longer footstalk, and blooms much more continuous.

WHITE CZAR—This variety occasionally changes, and for a time produces purple coloured dowers, but when it comes true it is a useful single white; strong grower, free bloomer in the spring. 6d. each; 5s. per doz.

All those not priced 6d. each.

VIOLETS IN POTS.

We have always a large quantity of fine plants in 5-inch pots, 8s. and 10s. per doz., £3 3s. per 100, of Swanley White, Marie Louise, and Neapolitan. Blooms all the winter when grown under glass. Fine clumps from ground now ready to be planted out in cold frames, 25s.; smaller, 18s. per 100.

GREEN CARPET BEDDING PLANTS.

Where the splendour of Carpet Bedding is desired to be in perfection these must be used.

HERNIARIA GLABRA—The darkest green of all the carpet bedding plants; very neat, close growth, one of the best for this purpose. 6d. each; 4s. per doz.; 20s. per 100. Cuttings, by post, 5s. per 100.

MENTHA PULEGIUM GIBRALTARI-CUM—Dwarf, dense, green growing plant; effective when surrounded with brighter colonrs. 2s. 6d. per doz.: 12s. per 100; rooted enttings, by post, 5s. per 100.

SEDUM LYDIUM—A different tint of green, never exceeding more than 3 in. high. 2s. 6d. per doz. Rooted little plants, 5s. per 100.

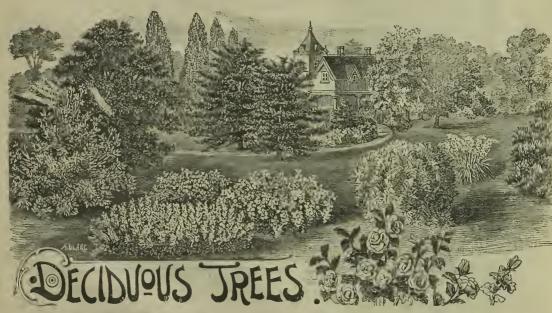

SEDUM GLAUCUM — Light blue-green; for covering mounds of earth and margins of beds it is most nseful, particularly in dry situations. Can be supplied cheap, 6d. each; 6s. per 100 from ground.

PYRETHRUM TCHIHATCHEWI— Dwarf moss-like growing plant for standing very dry weather. 6d. cach; 4s. per doz. Cuttings by post 5s. per 100.

tings, by post, 5s. per 100.

VERONICA REPENS (Alpina)—Another tint of pea-green, and in every way similar in growth. Never more than an inch high, and very effective. 2s. 6d. per doz.; 14s. per 100.

HARDY EYERGREEN, DECIDUOUS, AND FLOWERING TREES AND SHRUBS.

For full List of the above, and also Fruit Trees, see Autumn Catalogue, post free on application.

SMALL

EVERGREEN SHRUBS WITH VARIEGATED FOLIAGE.

EUONYMUS JAPONICUS AUREA MARGINATUS—Leaves green, hroadly and distinctly margined with gold; very showy; a very beautiful little shruh. 1s.

EUONYMUS JAPONICUS AUREA VARIEGATUS—Leaves dark green, with bright green-yellow blotch in centre. 6d. and 1s. each; 8s. per doz.

EUONYMUS JAPONICUS LATIFOLIUS VARIEGATUS—Leaves dark green, regularly margined with white. 1s.

EUONYMUS RADICANS VARIEGATUS
—Leaves green, broadly and heantifully margined hright silver; exquisite plant for edging to flower beds. 6d. to 1s. each; 7s. per doz.

A SELECT LIST OF HERBACEOUS

HARDY PERENNIALS & FLOWERING PLANTS.

SEVERAL ACRES

OUR COLLECTION IS ONE OF THE LARGEST AND THE MOST COMPLETE IN ENGLAND.

For New and Rare Hardy Herbaceous Plants, see front of Guide.

N the wide range of hardy plants, consisting of several thousand species and varietics, some mere weeds, the following will be found all choice and most telling useful kinds, and such as should be in every garden. They are selected with the greatest care, and we think none choicer can be recommended. We have well-established plants, such as will travel with safety to all parts of the world, and give satisfaction.

THE SWANLEY COLLECTION OF HARDY PLANTS.

100 Plants in 100 varieties for 25s.

Collections of 100 useful Border Plants, flowering at various seasons, 30s. and 50s.

The Bijon collection for the rock garden earefully selected. 50 plants in 50 varieties, 20s. Older and commoner sorts:—25 varieties for 7. 6d.; 50 varieties, 14s.

Having had frequent proofs of the great difficulty experienced by many of our patrons and others, in making an effective and satisfactory selection of the above plants, we veuture to think that we shall meet a general requirement of the present day, by offering at the above exceedingly low price our Swauley Collection of Hardy Harbaceous Plauts, Florists' Flowers and Bulbs, carefully selected for the purpose of giving more or less bloom in the open garden during at least nine months of the year. The plants are all such as will live and increase in effectiveness from year to year in an ordinary border, and all are sufficiently hardy to thrive in any part of the United Kingdom.

We shall be happy to advise intending purchasers as to quantity of plants, &c., for any given beds or borders, if particulars are sent as to dimensions, aspect, and soil.

flowers; a tufted plant. 3 ft. 9d.

ARTEMISIA ARGENTEA — Ornamental foliage, finely divided silver leaves. $1\frac{1}{2}$ ft. 1s. ARUM ITALICUM-Producing handsome

foliage in winter and spring. 6d. cach; 5s. per doz. ARUNDO CONSPICUA-Strong growing grass, fine companion plant to the Pampas Grass; well snited for isolating on a lawn. 1s. 6d.

ASCLEPIAS INCARNATA—Umbels of pink flowers; sweet secuted; useful for bees. 3 ft. 6d.

ASCLEPIAS TUBEROSA-Rich orange; flowers in autumn. 1 to 2 ft. 9d.

ASPERULA ODORATA (Sweet-scented Woodroff)-A plant that will thrive best under the shade of trees in moist soil. 1 ft. 6d.

ASPHODELUS LUTEUS, syn. ASPHO-DELINE LUTEA--Spikes of yellow flowers, 3 feet in height; narrow grass-like foliage. 6d.

ASPHODELUS RAMOSUS (King's Spear) -A bold and striking plant, spikes of white flowers; distinct. 3 ft. 9d.

ASTERS-See Collection.

ASTILBE RIVULARIS- Elegant plant, bearing long racemes of white flowers. 3 ft. 9d. ASTRAGALUS HYPOGLOTTIS ALBUS

-- A fine free-growing prostrate plant. \frac{1}{4} ft. 9d. ASTRAGALUS MONSPESSULANUS-Purple flowers, of a sbrubby nature. $\frac{1}{2}$ ft. 9d.

ASTRANTIA MAJOR (Black Masterwort) -Showy; compact heads of pink and white flowers. 2 ft. 9d.

ASTRANTIA MINOR—Pretty and useful. 6d. AUBRIETIA DELTOIDEA- For edging and rockwork; violet-blue flowers. 6d. caeh; 5s. doz.

AUBRIETIA DELTOIDEA CROATICA-Habit compact flowers large and fine. 1s.

AUBRIETIA GRÆCA, IMPROVED—One of the finest; compact habit; flowers large and fine. 9d. each; 6s. per doz.

AUBRIETIA HENDERSONI—Of a deep violet-purple colour; very free; most effective.

§ ft. 6d. each; 4s. per doz.

AUBRIETIA LEICHTLINI—Dwarf habit; of a carmine rose shade; distinct. ½ ft. 1s.

AUBRIETIA PURPUREA VARIEGATA

—An elegnat rock or edging plant. 6d.

AUBRIETIA ROSEA—Softrose-pink, neat and compact. $\frac{1}{2}$ ft. 9d.

AUBRIETIA VIOLACEA—The best of its class; dark violet, compact habit. 9d. each; 6s, doz.

BAPTISIA AUSTRALIS—Blue pea-shaped flowers, fine border plant. $2\frac{1}{2}$ ft. 9d.

BETONICA GRANDIFLORA. 1 ft. 6d. BETONICA ROSEA NANA—Neat growing plant, bearing spikes of pink flowers. 6d.

BOCCONIA CORDATA (Plume Poppy)—One of the finest hardy plants. 6 ft. 9d.
BUPHTHALMUM CORDIFOLIUM—

Folinge large; golden orange flowers. 3 ft. 9d. BUPHTHALMUM SALICIFOLIUM—Flowers golden yellow, on stems 2 ft. in height. 6d. CALAMINTHA GRANDIFLORA FOL. VAR.—One of the very old-fashioned bedding

and border plants, known as Variegated Mint. 6d. each: 4s. per doz.

CALTHA PALUSTRIS FL. PL. (Double Marsh Marigold)—Fine for a moist spot; golden yellow flowers; showy and attractive. 1 ft. 9d. CALLIRHOE INVOLUCRATA — Showy,

trailing habit: large crimson flowers. 6d.

CAMPANULA ABIETINA—Deep purplish blue: dwarf and neat. 1 ft. 1s.

CAMPANULA CARPATICA—Large creet blue flowers. 1 ft. 6d.

CAMPANULA CARPATICA ALBA—Pro-

ducing pure white flowers. 1 ft. 6d.

CAMPANULA CARPATICA PALLIDA—

Pale blue; pretty. 1 ft. 6d.

CAMPANULA GARGANICA—Sheets of

purplish flowers, fine for rockwork. $\frac{1}{4}$ ft. 9d. CAMPANULA G. F. WILSON — Hybrid hetween C. pulla and turbinata; da k hlne;

dwarf and compact. ½ ft. 1s. 6d.

CAMPANULA GLOMERATA CŒRULEA

AND ALBA. 6d. each.

CAMPANULA GRANDIFLORA (Platycodon)—Large blue flowers in early autumn;

effective. 2 ft. 9d. CAMPANULA GRANDIFLORA ALBA—

Large white flowers. 2 ft. 1s.

CAMPANULA GRANDIFLORA FL. PL.

-Large blue semi-double flowers. 1s.
CAMPANULA GRANDIS-Large blue salver-shaped flowers. 2 ft. 9d.; 6s. doz.

CAMPANULA GRANDIS ALBA—Very free growing; nsefal for cutting. 2 ft. 6d. each; 5s. per doz.

CAMPANULA HAYLODGENSIS—A charming rock plant of great merit, fine blue flowers. ½ ft. 1s.

CAMPANULA LATIFOLIA—Steat stems; large blue flowers in great abundance. 3 ft. 6d. CAMPANULA LATIFOLIA MAC-

RANTHA—An extra fine form of the preceding. 9d.

CAMPANULA HENDERSONI—A hybrid of great merit; flowers large, of a pretty mauve shade. 1 ft. 9d.

CAMPANULA HOSTII—A native of the Alps; fine rock plant. 1 ft. 1s.

CAMPANULA ISOPHYLLA ALBA—A dwarf species, pure white flowers. ½ ft. 9d.

CAMPANULA MACRANTHA ALBA—Long white spikes; a noble border plant. 1s.
CAMPANULA NOBILIS ALBA—1 ft.

6d. each: 5s. per doz.

CAMPANULA PULLA—Charming when seen in a mass; deep purple flowers. 4 ft. 9d. CAMPANULA PERSICIFOLIA—Flowers blue. 2 ft. 6d.

CAMPANULA PERSICIFOLIA ALBA FL PL.

CAMPANULA PERSICIFOLIA ALBA FLORE PLENO—Flowers pure white; valuable for cut flowers. 2 ft. 6d. each; 4s. per doz

CAMPANULA PERSICIFOLIA ALBA GRANDIFLORA (Backhouse's Var.)—Fine pure white flowers, fully half as large again as those of the old type, and lasting very long when cut; a grand variety. 2 ft. 1s.

CAMPANULA PERSICIFOLIA CORO-NATA ALBA - A beautiful free-flowering variety. 9d. each; 6s. per doz.

CAMPANULA PORTENSCHLAGIANA, syn. MURALIS-Distinct and pretty. 1 ft. 6d.

CAMPANULA PUMILA, syn. PUSILLA- $\frac{1}{4}$ ft. 6d. each; 5s. per doz.

CAMPANULA PUMILA ALBA—Very neat and distinct. $\frac{1}{4}$ ft. 6d.

CAMPANULA PYRAMIDALIS (Chimney Campanula)—A fine plant for the back of the herbaccous border, or for pot culture, forming a pyramid composed of numerous stems 4 to 5 feet in height, each stem crowded with large blue salver-like flowers. 6d.

CAMPANULA PYRAMIDALIS ALBA—Pretty, 4 to 5 ft. 6d.

CAMPANULA RHOMBOIDEA - Flowers deep blue, on slender stems. 1 ft. 9d.

CAMPANULA TURBINATA-Large bell-shaped bluish purple flowers. $\frac{1}{2}$ ft. 9d.

CAMPANULA URTICÆFOLÍA FL. PL.— A very old and useful form. 1s.

CAMPANULA VAN HOUTTEI-A charming hybrid, immeuse dark blue flowers 3 in. in length. 2 ft. 9d.

CARDAMINE PRATENSIS PLENA-Growing freely in any damp situation on the rockery and border; purplish colour, changing to snowy-whiteness. 1 ft. 9d. to snowy-whiteness.

CARDAMINE TRIFOLIATA—Very pretty white-flowering spring plant. $\frac{3}{4}$ ft. 6d.

CARDUUS HETEROPHYLLUS—Very

large purple flowers; ornamental. 3 ft. 9d. CATANANCHE BICOLOR—Free-growing

effective border perennial; flowers blue and white. 2 ft. 6d. each; 5s. doz.

CATANANCHE CCERULEA — Easily

grown, free blooming, useful; blue. 2 ft. ('d. CENTAUREA GLASTIFOLIA-Graceful

habit; flowers golden yellow. 1s. CENTAUREA MACROCEPHALA — A strong growing form, large bright yellow flowers. 3½ ft. 9d.

CENTAUREA MONTANA (The Perennial Cornflower)-Blue, very useful for cutting purposes. 13 ft. 6d.

CENTAUREA MONTANA ALBA-Very

useful. $1\frac{1}{2}$ ft. 6d.

CENTAUREA MONTANA LADY FLOR-ENCE HASTINGS-A new creamy white form, very useful for cutting. 11 ft. 1s.

CENTAUREA MONTANA RUBRA-Ped flowers, quite distinct from the form usually sold under this name. 9d.

CENTAUREA RUTHENICA-Useful bor-

der plant; flowers pale yellow. 3 ft. 1s.
CEPHALARIA ALPINA—A sulphur-

flowered Scabious; fine border plant. 4 ft. 9d. CERASTIUM TOMENTOSUM — A wellknown rock or carpeting plant. 6d. each; 3s. per doz.

CHEIRANTHUS ALPINUS - Forming dense cushions covered with sulphur coloured flowers. 1 ft. 6d.

CHEIRANTHUS CHEIRI LUTEUS PLENUS (Double Yellow Wallflower)—A free-flowering old favourite. $1\frac{1}{4}$ ft. 9d.

WALLFLOWER (DOUBLE).

CHEIRANTHUS MARSHALLI-Orange eolour; fragrant; useful for cutting. 1 ft. 9d. CHELONE OBLIQUA ALBA - A white flowered variety. 3 to 4 ft. 9d.

CHELONE OBLIQUA, syn. PURPUREA (Snake's-head). 3 to 4 ft. 9d.

CIMICIFUGA RACEMOSA - Handsome foliage, long feathery spikes of white flowers. 3 to 5 ft. 1s.

CLEMATIS INTEGRIFOLIA-A herbaceous species, with elegant bell-like purple flowers. 9d.

COREOPSIS GRANDIFLORA - Yellow; a large free-flowering variety. 3 to 4 ft. 9d.

COREOPSIS LANCEOLATA - A handsome kind, flowering nearly all the summer; bright yellow. 2 ft. 6d.

CORYDALIS NOBILIS-The handsomest of this family; flowers rich golden yellow. to 1 ft. 1s.

CRUCIANELLA STYLOSA-A ueat trailing plant; globular heads of rose flowers. 6d.

CHRYSANTHEMUM-For sum::er-flowering varieties, see Catalogue.

LATIFOLIUM-CHRYSANTHEMUM One of the best late Pure white, yellow ecutre. hardy Marguerites. 3 ft. 9d.

CHRYSANTHEMUM LEUCANTHE-MUM-Semi-duplex; a distinct and useful plant for cutting; flowers pure white, double. 1 to 2 ft. 9d.

CHRYSANTHEMUM MAXIMUM (True) -One of the most useful Percunials in commerco; large, well formed, pure white flowers.

CHRYSANTHEMUM ULIGINOSUM-See Pyrethrum Uliginosum.

CISTUS-See Flowering Shrub-like Plan's.

CORONILLA IBERICA-A capital rock or border plant; large yellow pea-shaped flowers; trailing habit. 9d.

CORONILLA ROSEA-Strong growing, for

banks and stony places. 1 ft. 9d.

CYCLAMEN—The greenhouse varieties are familiar to everyone, but how few have any idea of the modest beauty of the hardy species; they only require planting in light loamy soil, in a shady position. 4 to 1 ft. high.

CYCLAMEN AFRICANUM (Macrophyllum)-Large red flowers in autumn. 1s.

CYCLAMEN ATKINSI ALBUM-White;

winter flowering. 1s.
CYCLAMEN ATKINSI PURPUREUM—

Bright purple. 9d.

CYCLAMEN COUM-Red; flowers in February. 1s.

CYCLAMEN EUROPÆUM - Summer

flowering, rosy pink; very free. 6d.

CYCLAMEN HEDERÆFOLIUM-Rose, foliage marbled; antumnal: one of the best. 9d. CYCLAMEN HEDERIFOLIUM ALBUM -Puro white. 1s.

CYCLAMEN IBERICUM-White flowers,

bright purple spot at the base. 9d.

CYCLAMEN REPANDUM VERNUM-

Deep reddish crimson. March. 9d.

CYPRIPEDIUM ACAULE (Stemless Lady's Slipper)—Flowers rose colour, varying in shade to almost white, but invariably tinted with rose. $\frac{1}{2}$ ft. 1s. 6d. to 2s. 6d.

CYPRIPEDIUM CALCEOLUS (English Lady's Slippor)-Sepals and petals of a brownish purple, and the lip of a clear bright yellow.

1 ft. 1s. and 1s. 6d.

CYPRIPEDIUM MACRANTHUM (Siberian Lady's Slipper)—Flowers of a rich purplish crimson colour. 1 ft. 2s. 6d. and 3s. 64.

CYPRIPEDIUM PARVIFLORUM-Fragrant flowers, with a bright yellow labellum; sepals and petals of a brownish purple. 13 ft.

CYPRIPEDIUM SPECTABILE -- Labellum is much inflated; delicate rose colour, sepals and petals white. One of the best species for all purposes. 1½ ft. 1s. 6d. and 2s. 6d.

DAISIES—See Collection.

DELPHINIUMS-See Collection.

DIANTHUS ANNULATUS-A very beautiful rock plant. 1 ft. 1s.

DIANTHUS ALPINUS (Alpine Pink) Roso flowers, spotted crimson. $\frac{1}{4}$ ft. 1s. 6d.

DIANTHUS BARBATUS MAGNIFICUS - Large heads of deep crimson; double flowers. 6d. DIANTHUS CŒSIUS (Cheddar Pink).-Rose coloured; very fragrant. 1 ft. 6d.

DIANTHUS CRUENTUS-Deep crimson-

scarlet. 1 ft. 9d.

DIANTHUS FRAGRANS. 1 ft. 6d. DIANTHUS NEGLECTUS-One of the best; bright rosy pink; compact tufts. 4 ft.

DICTAMNUS FRAXINELLA - Curious red flowers; fino border plant. 3 ft. 9d.

DICTAMNUS FRAXINELLA ALBA

(Burning Bush)—White, fragrant. 9d. DIELYTRA (DICENTRA) EXIMIA—A charming spring-flowering plant, raceines of drooping reddish-purple flowers; fine for spring decoration. 13 ft. 9d.
DIELYTRA FORMOSA— Also a very useful

and pretty varioty. 13 ft. 6d.

DIELYTRA SPECTABILIS-One of the finest spring-flowering plants, either for border or greenhouse, that we possess; well known. 2 ft. 9d.

DIELYTRA SPECTABILIS ALBA-White, faintly flushed pink; beautiful. 11 ft.

DIGITALIS GRANDIFLORA, syn. AM-BIGUA—Yellow-flowered perenuial Foxglove. 3 to 4 ft. 6d.

DODECATHEON JEFFREYANUM, syn. LANCIFOLIUM-The largest of this group; drooping rose-coloured flowers, with yellow centres. 1 ft. 9d. and 1s.

DODECATHEON MEADIA ELEGANS— Purple flowers, suitable for the rockery or shady position. $\frac{3}{4}$ ft. 1s.

DODECATHEON MEADIA (The American Cowslip) - Bearing umbels of purple flowers; form of flower somewhat like the Cyclamen; quite hardy. 1 ft. 6d.

DODECATHEON SPLENDIDUM (Shooting Star)—Deep crimson colour; a little gom for a cool, shady spot. 1 ft. 1s.

DONDIA EPIPACTIS, syn. HACQUETIA -Umbels of yellow flowers; in spring likes a

damp position. 1 ft. 9d.

DORONICUM AUSTRIACUM — Bright golden yellow; very effective. 11 ft. 6d. each; 5s. per doz.

DORONICUM CLUSII—Rich yellow flowers, very free and effective. 11 ft. 6d.

DORONICUM PLANTAGINEUM EX-CELSUM, syn. HARPUR CREWE - A grand variety, producing freely large, bright yellow flowers; the finest for cutting purposes. 2 to 3 ft. 6d.

DRABA AIZOON—Moss-like growth; small yellow flowers. 1st ft. 9d.
DRABA AIZOIDES—A pretty yellow.

spring-flowering rock plant. & ft. 9d.

DRABA BRUNLÆFOLIA-Dark foliago, yellow flowers; a useful rock plant. 4 ft. 1s. DRACOCEPHALUM RUPRECHTI—

Lilac-blne. 1 ft. 9d.

DRACOCEPHALUM VIRGINICUM -Pink flowers ulong the two-thirds the height of stems. $2\frac{1}{2}$ ft. 9d.

DRYAS OCTOPETALA-A creeping evergreen plant; white flowers and yellow stamens;

pretty. 1s.

ECHINACEA PURPUREA (Rudbeckia)-Very stately untumn flowering peronnial, with large reddish purple flowers on stems 3 feet in beight. 9d.

ECHINOPS RITRO (Globo Thistle) - A handsome foliage plant, having also globular heads of rich blue flowers. 2 ft. 9d.

ECHINOPS RUTHENICUS - Blue; a

showy border plant. 2 to 3 ft. 9d.

ECHINOPS SPHEROCEPHALUS -

Flower heads white. 6d.

EPILOBIUM ANGUSTIFOLIUM-Adapted for sbrubberies, borders, &c. 3 to 4 ft.

EPILOBIUM DODONÆI, syn. HALLERI. Pretty rose coloured, narrow leaves. 1 ft. 1s. EPILOBIUM FLEISCHERI-Rosy purple flowers; useful for rockery. 1 ft. 1s.

EPIMEDIUM ALPINUM (Barren Wort)-Yellow and crimson; elegant group of rock or border plants. 1 ft. 6d. border plants. 1 ft.

EPIMEDIUM MACRANTHUM - White,

tinged violet. 9d.

EPIMEDIUM RUBRUM-Reddisb brown. 9d.

EPIMEDIUM NIVEUM-Capital plant for foreiug; white. 1 ft. 9d.

EPIMEDIUM PINNATUM-Bright yellow. 1 ft. 9d.

EPIMEDIUM SULPHUREUM—Pale yel-

EREMURUS BUNGEI - Long spikes of straw-colonred flowers, with conspicuous anthers; very rare and beautiful. 7s. 6d.

EREMURUS HIMALAICUS - Spikes of pnre white flowers; hardy and free flowering.

5s. and 10s. 6d. EREMURUS OLGŒ—Dense spikes of rosy flesh-coloured flowers. 3 ft. 5s.

EREMURUS ROBUSTUS-Of a lovely pink, sweet scented, massive spikes, 7 to 8 feet high, native of Turkestan. Small plants, 3s. 6d.

AURANTIACUS - Largo ERIGERON bright orange flowers, on stems 9 inches high. 9d. GLABELLUS - Blue and ERIGERON

yellow flowers; dwarf. \(\frac{1}{2} \) ft. \(6d. \)
ERIGERON PHILADELPHICUM—Free

flowering rose colonred variety. 6d. ERIGERON SPECIOSUS SUPERBUS-Large blue flowers, yellow centres; fine for the autumn. 2 ft. 9d.

ERINUS ALPINUS—Rose colour, snitable

for old walls, &c. $\frac{1}{4}$ ft. 6d. each; 4s. per doz.

ERINUS ALPINUS ALBUS-White. 4 ft. 9d.

ERODIUM MACRADENIUM, syn. GLANDULOSUM - Fern-like foliage roseeolonred flowers, blotched black. 1 ft. 9d.

ERODIUM MANESCAVI-A showy handsome species, purplish red flowers. 1 ft. 9d.

ERYNGIUM OLIVERIANUM, syn. AMETHYSTINUM - Should be in every collection; stem and flowers a fino amethystine blue. $2\frac{1}{2}$ ft. 1s.

ERYNGIUM GIGANTEUM - Effective. 11 ft. 6d. each; 5s. per doz.

ERYNGIUM MARITIMUM (Sea Holly)— Pale blue; glaucous foliage. 15 ft. 1s.

EUPATORIUM PURPUREUM-Branching heads of purple flowers. 6-7 ft. 1s.

EURYBIA GUNNIANANA-Erect muchbranché l shrub, aster-like flowers of snowy whiteness. 2 ft. 2s.

ERYNGIUM ALPINUM - Of a lovely metallic blue, stem as well as the bracts being of the same lovely shade. 11 ft. 1s.

ERYNGIUM PLANUM — Good border plant; distinct, 2 ft. 9d.

ERODIUM REICHARDI-White flowers;

pretty little Alpine. \(\frac{1}{4}\) ft. 1s.

FERULA COMMUNIS—Attractive during the early Spring. When it has arrived at maturity, it is one of the graudest hardy foliage plants. 5 ft. 1s.

FRANCOA APPENDICULATA-Spikes of

pink flowers. 2 ft. 1s.

FRANCOA RAMOSA — Fine racemes of white flowers. $1\frac{1}{2}$.2 ft. 1s.

FUNKIA FORTUNEI—Blue-green foliage; distinct. 1 ft. 1s. 6d.

FUNKIA LANCEOLATA MARGINATA -Belonging to a beantiful genus of handsome foliage plauts. 1 ft. 9d.

FUNKIA OVATA, syn. HEMEROCAL-LIS CŒRULEA-Large green foliage, flowers purple. 6d.

FUNKIA SIEBOLDI-Ornamental. 1½ ft.

FUNKIA SUBCORDATA GRANDI-FLORA-Broad green leaves and noble spikes of pure white flowers. 11 ft. 9d.

FUNKIA UNDULATA FOL. VAR.—1 ft.

GAILLARDIA GRANDIFLORA - Sec Collection.

GALEGA OFFICINALIS-Of free growth.

GALEGA OFFICINALIS ALBA-Strong growing wbite, pea-shaped flowers; very useful

for cutting. 3-4 ft. 6d.
GENISTA HUMIFUSA — Deep Yellow flowers, prostrate habit. 1s. 6d.

GENISTA TINCTORIA FL. PL.—Suitable for the rockery. 9d.

GENISTA TRIQUETRA (Triangularis)— Curious trigonal prostrate stems, and yellow pea-shaped flowers. 1s.

GENTIANA ASCLEPIADEA - Spikes of dark purplish blue. 2 ft. 9d.

GENTIANA ACAULIS.

GENTIANA ACAULIS-The Gentianella; charming cushions of leathery glossy foliage, ercct bell-shaped flowers of intense blue. 1 ft. 6d. each; 5s. per doz.

GENTIANA ANDREWSI-Rich purplish blue; one of the handsomest. 1-2 ft. 1s.

GENTIANA CRUCIATA—A vigorous growing species, flowers deep blue. 1-11 it. 6d.
GENTIANA GELIDA—Tufts a foot bigh,

with large light blue heads. 1s.
GENTIANA LUTEA (The Great Yellow Gentian) — Rich yellow flowers, bold habit.

GENTIANA PNEUMONANTHE (Heath Gentian)—Light blue flowers; fine. 3-1 ft. 9d.

GENTIANA VERNA-It forms dense tufts of deep green glossy foliage, and in early spring is covered with brilliant blue flowers, with a white or yellow eye; succeeds best in a rich loamy soil. ¼ ft. 1s. GERANIUM—See Collection.

GEUM COCCINEUM PLENUM-One of the finest of our hardy perennials, large double flowers of a dazzling scarlet. 1\(\frac{1}{2}\) ft. 9d.

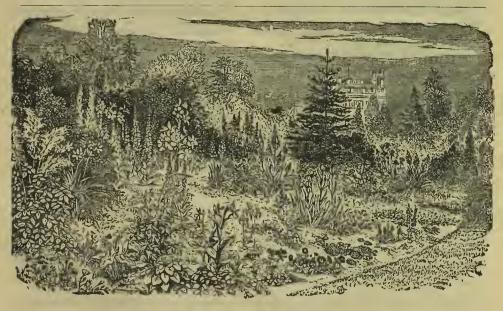

GEUM MINIATUM—Distinct; ricb orange coloured flowers. 1\(\frac{1}{2}\) ft. 9d.

GEUM MONTANUM-Useful for rockwork or border; compact tufts; clear bright yellow. $\frac{1}{2}$ ft. 9d.

GILLENIA TRIFOLIATA—Large panicles of pink and white flowers. 2-3 ft. 1s.

GLAUCIUM LUTEUM, syn. FLAVUM-Useful for winter decorative bedding. 6d. GLOBULARIA CORDIFOLIA—Fine rock

plant; evergreen foliage, blue flowers 4 ft. 1s. GLOBULARIA TRICHOSANTHA — Flowers dark blue, in globular beads. 3 ft. 6d.

THE HARDY FLOWER GARDEN.

GNAPHALIUM LEONTOPODIUM.

GNAPHALIUM LEONTOPODIUM (The Edelweiss)—A curious Alpine species, producing heads of flowers enveloped in a soft silky suhstance like cotton-wool. Easily grown on a raised border or piece of rockwork, in very sandy soil mingled with stones. ½ ft. 9d.

GUNNERA MANICATA-Large, handsome

foliage. 4-5 ft. 2s. 6d.

GYNERIUM ARGENTEUM (Pampas Grass). 1s. to 2s. 6d.

GYPSOPHILACERASTIOIDES-A pretty trailing plant; flowers white, streaked violet.

GYPSOPHILA PROSTRATA - Compact trailing habit, white flowers; a charming rock plant. ½ ft. 6d. each; 5s. per doz.

GYPSOPHILA PANICULATA-Forming a symmetrical bush about 2 feet high, and covered with miniature white flowers. 6d.

HARDY FERNS-See Collection.

HARDY HEATHS-In variety. 12s. to 18s.

HARPALIUM RIGIDUM (Helianthus)— One of the best of our autumn plants; flowers large, of a hright golden yellow, black disc; free and showy. 3 ft. 6d. each; 4s. per doz.

HARPALIUM RIGIDUM (Miss Mellish's Variety)—The hest of all the family. 1s.
HEDYSARUM OBSCURUM—A brilliant

and compact perennial. 1 ft. 9d.

HELĖNIŪM AUTUMNALE — Flowers large, hright vellow, and produced in ahnndance; very useful for cutting purposes. 5-6 ft. 6d.
HELENIUM BOLANDERI—Dwarf hahit,

with large yellow flowers, centre black. 5-6 ft.

HELENIUM GRANDICEPHALUM-Yellow; very vigorous. 1-11 ft 9d.

HELIANTHEMUMS - See Collection.

HELIANTHUS DECAPETALUS. 4.5 ft. 6d. each; 5s. per doz.

HELENIUM PUMILUM-Of a dwarfer hahit than the above; free. $\frac{3}{4}$ ft. 9d.

> HELIANTHUS MUL-TIFLORUS GRANDI. PLENUS (Soleil d'Or)-Large double yellow flowers; the finest of this class. 9d.

HELIANTHUS OCCI-DENTALIS — Rieh yellow dark centre. $2\frac{1}{2}$ ft. 1s.

HELIANTHUS LÆTIFLORUS - Rich golden yellow; free. 3 ft. 9d.

HELIANTHUS MULTIFLORUS (The Great Perennial Single Sunflower) - Grows from 3 to 4 feet high, and has a brilliant effect planted in masses, in shrubby borders, and other places. 4-5 ft. 6d. cach; 5s. per doz.

HELIANTHUS MULTIFLORUS PLENUS (The Double Perennial Sunflower) —A vigorous growing perennial, large double deep yellow flowers; very nseful for cutting. 4 ft. 6d. each; 5s. per doz.

HELIANTHUS STRUMOSUS - Small flowers, useful for cutting. 3-4 ft. 9d.

GYNERIUM ARGENTEUM.

HELIOPSIS SCABRA-Snitable for mixed border; flowers bright orange. 3 ft. 6d. HELLEBORUS ATRORUBENS (Lenten

Rose)—Bright rosy purple. 1 ft. 1s.
HELLEBORUS CAUCASICUS PUNCTA-TUS-Very free, rosy crimson flowers, spotted deeper, 1 ft. 1s.

HELLEBORUS COLCHICUS "COCCI-NEUS"-Widely expanded hell-shaped flowers of a clear purplish earmine colour; very floriferous and robust in habit. 1 ft. 3s. 6d.

HELLEBORUS COLCHICUS ROSEUS-A rosy purple coloured hybrid of fine vigorous growth, flowers widely expanded. 1 ft. 2s. 6d. HELLEBORUS FŒTIDUS-Greenflowers;

a pretty winter foliage plant. 1 ft. 9d.

HELLEBORUS GUTTATUS — White, freely spotted purple. 1 ft. 2s. 6d.

HELLEBORUS NIGER (Christmas Rose) -Perfectly hardy, and if planted in the garden aud taken up and potted when it becomes large elumps, and placed in a cold frame, it will continue to give a profusion of flowers for two months, with no other trouble than the ordinary watering. 1s. 6d. each; 15s. per doz.; smaller, 12s. per doz.

HELLEBORUS NIGER ALTIFOLIUS (Maximus)-Very large and fine, far surpassing the type for eutting purposes. 1-2 ft. 1s. 6d. and 2s. 6d.

HELLEBORUS GUTTATUS LEICHT-LINI-One of the finest yet raised; very large; pure white, covered with small rosy-purple spots. 2s. 6d.

HELLEBORUS NIGER ANGUSTI-FOLIUS (St. Bridgid's Christmas Rose)-Very large, free blooming, of the purest white. 1s. 6d. and 2s. 6d.

HELLEBORUS NIGER MAJOR-Wonderfully free-flowering; large white flowers. 1s. 6d. and 2s. 6d.

HELLEBORUS OLYMPICUS - White, slightly tinged green. 1s.

HELLEBORUS ORIENTALIS - Deep purpla-red; one of the most effective. 1s. each; 9s. per doz.

HELLEBORUS PALLIDUS — Creamy white, tinged green; free. 1s. 6d.

HELLEBORUS PURPURASCENS-Flowers large, dove coloured inside and out; oue of the earliest in bloom. 3 ft. 2s. 6d. HELLEBORUS VIRIDIS — Sea green,

bandsome foliage. 1 ft. 1s.
HELLEBORUS WILLIE

SCHMIDT-Pure white; one of the best. 1 ft. 2s. 6d. HEMEROCALLIS DISTICHA FL. PL.-

Bronzy yellow; flowers large and double. 3ft. 9d. HEMEROCALLIS DUMORTIERI — Flowers soft rich yellow; a gem for the border or rockery; useful for cutting. 1 ft. 9d.

HEMEROCALLIS FLAVA (Day Lily)-Golden yellow, very fragraut; fine for cutting and forcing. 3 ft. 9d. each; 7s. 6d. per doz.

HELENIUM BOLANDERI.

HEMEROCALLIS FULVA—Large tawnyorange flowers and handsome foliage. 3 ft. 6d. HEMEROCALLIS KWANSO FL. PL. FOL. VAR .- Ornamental foliage; fine. 3 ft. 1s. 6d.

HEMEROCALLIS MIDDENDORFIANA -Terra-eotta coloured flowers; very useful for eutting; distinct. 21 ft. 1s.

HEMEROCALLIS THUNBERGI-Deep sulphury-yellow; fragrant; very useful for cutting. $2\frac{1}{2}$ ft. 1s.

HEPATICA TRILOBA-

Single blue Single white 9d.Single red each. Double red Double blue. 1s. 6d.

HEPATICA ANGULOSA - Largest and earliest; sky-blue. ½ ft. 6d.

HESPERIS MATRONALIS—See Rockets. HEUCHERA SANGUINEA (Alum Root)--

One of the best garden plants; exquisite flowers for cutting; light coral-searlet; dwarf, compact,

branching growth. 11-2 ft. 9d. HIERACEUM AURANTIACUM— Flowers bright orange; fine for cutting. 1 ft.

HIERACEUM VILLOSUM-Large goldenyellow flowers, suitable for rockwork or border.

HIPPOCREPIS COMOSA-Growing freely in any exposed part of the rockwork; yellow. 1 ft. 6d.

HUTCHINSIA ALPINA -- A neat little plant, with shining leaves and pare white flowers. 6d.

HYPERICUM CALYCINUM (Rose of Sharon, St. John's Wort.)-Bright yellow flowers. 1 ft. 6d.

HYPERICUM MOSERIANUM-Very fine; bright yellow flowers. 2-3 ft. 1s.

HYPERICUM PATULUM—Forming neat and well-shaped bushes. 3 ft. 1s.

HYPERICUM REPTANS-A pretty trailing species, useful for rockwork; large flowers. 1 ft. 1s.

IBERIS CORRŒFOLIA—One of the finest of the evergreen Candytufts; pure white, flowers early in spring; very useful for cutting. 3 ft. 6d. caeli; 5s. per doz.

IBERIS GIBRALTARICA HYBRIDA-Colour silvery white, tinged pink, plants completely covering themselves solid with bloom. 3 ft. 9d.

IBERIS LINIFOLIA-Very compact growing variety. 1s.

IBERIS SEMPERFLORENS. 6d. eacb;

5s. per doz.

IBERIS SEMPERVIRENS FLORE PLENO (Double White Perennial Candytuft) -For edgings, beds, borders, rockwork, &c. It is a dwarf, compact and beautifully-rounded busb. 6d. each; 4s. doz.

INULA GLANDULOSA - Large yellow

flowers; fine border plant. 2 ft. 9d. INULA HELENIUM — Large heads of bright yellow flowers. $1-1\frac{1}{2}$ ft. 9d.

IRIS—See Collection.

ISOPYRUM THALICTROIDES - White flowers, Maidenhair-like foliage. 1s.

LATHYRUS GRANDIFLORUS (Biflorus) -The finest of the Perennial Peas, flowers very large, of a bright crimson-scarlet, produced in abundance. 4 ft. 1s.

LATHYRUS LATIFOLIUS (The Perennial Pea)-Having red flowers in hunches. 4 ft. 1s. LATHYRUS LATIFOLIUS ALBUS-One

of the finest white flowers in cultivation for entting purposes. 4 ft. 1s. 6d.

LATHYRUS LATIFOLIUS SPLEN-DENS-A fine dark variety. 4 ft. 1s. 6d.

LAVENDULA SPICATA (Lavender). 6d. each; 4s. per doz.

LIATRIS PYCNOSTACHYA-Long spikes of purple flowers, 3 ft. 1s.

LIATRIS SPICATA-Purple. 13 ft. 6d. LILIES-See Collection.

LINARIA ALPINA-Purple and orange flowers; neat trailing habit; effective. 6d. LINARIA CYMBALARIA (Ivy-leaved Toad Flax)-Pretty for dry sunny spots. 6d. LINARIA DALMATICA - Rich goldenyellow; very striking and free. 9d.

LINARIA PILOSA-A dwarf, free-flowering perennial, well adapted for covering walls and rockwork; flowers lilae colonr. 9d.

LINUM ARBOREUM - Free flowering, requiring a snnny positiou on borders or rockwork, in sandy, well-drained soil. 1 ft.

LINUM FLAVUM (Luteum)—An invaluable border or rock plant. 1-13 ft. 9d.

LINUM MONOGYNUM (The New Zealand White Flax)-Large pure white flowers. 1 ft.

LITHOSPERMUM PROSTRATUM-Rich blue; one of the best rock plants. \frac{1}{2} ft. 9d.

LOBELIAS-See Collection. LOTUS CORNICULATUS FL. PL. -

Pretty. 6d. each; 4s. per doz. LUPINUS ARBOREUS (Tree Lupin)— Finc yellow. 2-4 ft. 9d. LUPINUS FOXII—Dark purple and white;

fine for cutting. 1s. LUPINUS NOOTKATENSIS-Blue and

white; dwarf variety. $1\frac{1}{2}$ ft. 9d.

LUPINUS POLYPHYLLUS — A grand border plant. 4 ft. 6d.

LUPINUS POLYPHYLLUS ALBUS-A

showy plant for borders. 4 ft. 6d.
LYCHNIS ALPINA—Rose coloured; dwarf

and pretty. 🚦 ft. 6d.
LYCHNIS CHALCEDONICA FL. PL.— Immense beads of double searlet flowers; fine for cutting. 3 ft. 9d.

LYCHNIS CHALCEDONICA ALBA FL. PL.—White; very fine. 3 ft. 1s. 6d.

LYCHNIS DIOICA RUBRA FL. PL.-A very bandsome neat border plant; large double crimson flowers, fine for massing and cutting purposes. 11 ft. 6d. each; 4s. per doz.

LYCHNIS FLOS CUCULI ALBA PLENA — Snow-white flowers, beautifully fringed; useful for the border, exhibition, or cutting purposes. 11 ft. 9d.

LYCHNIS FLOS - CUCULI ROSEUS PLENUS—A free flowering showy variety, with bright rose-coloured flowers; most useful for cutting purposes. 11 ft. 9d.

LYCHNIS HAAGEANA-In variety. 1 ft.

6d. each; 5s. per doz. LYCHNIS VESPERTINA PLENA—Fine, double white; very free bloomer; useful for cutting. 2½ ft. 1s. LYCHNIS VISCARIA SPLENDENS

PLENA -Spikes of very double red flowers. 1 to 11 ft. 6d.

LYSIMACHIA CLETHROIDES - Pure white; very effective. 2 ft. 6d.

LYSIMACHIA NUMMULARIA AUREA

(Golden-Leaved Creeping Jenny)—6d, LYTHRUM ROSEUM SUPERBUM— Fine. 3 to 4 ft. 6d. each; 5s. per doz. LYTHRUM SALICARIUM ROSEUM—

Long branched spikes of rosy-pink flowers; a useful border plant. 3 to 4 ft. 9d.

MALVA MOSCHATA ALBA—Flowers pure white and very fragrant. 2 ft. 6d. MEGASEA CORDIFOLIA-Foliage large

spikes of bright rose flowers. 1 ft. 6d.

A LONG AND LASTING WATER Z FLOWERS OPENING WHEN TIME

LYCHNIS FLOS-CUCULI ROSEUS PLENUS.

MEGASEA CORDIFOLIA PURPUREA -Rich purple flowers; the finest of this genus. 1½ ft. 9d. and 2s. 6d.

GEM.

FLOWER

CUT

FOR

MEGASEA PURPURASCENS - Light purple flowers, tall stems; searce. 1 ft. 1s. 6d. MEGASEA LIGULATA—Early flowering; pinkish-lilae. 1 ft. 9d.

MEGASEA STRACHEYI-Pretty blushpink flowers; a select frame plant. 1 ft. 1s. 6d. MERTENSIA SIBERICA-Drooping clusters of light blue flowers. 1 ft. 1s.

MERTENSIA VIRGINICA (Pulmonaria)

-Flowers purplish blue colonr. 1\(\frac{1}{2} \) ft. 9d.

MIMULUS CARDINALIS — Very showy

and effective; flowers scarlet. 1 ft. 1s.

MONARDA DIDYMA, syn. FISTULOSA AND KALMIANA (Bee Balm) - Scarlet; fragrant. 2 ft. 6d.

MONARDA DIDYMA ALBA - A white flowering form of the above, showy and attractive. 6d.

MONTBRETIA "FIERY STAR"-Habit robust, most floriferous, producing in long succession brilliant vermilion widely-expanded flowers. 3 ft. 1s.

MONTBRETIA "GOLDEN SHEAF"-A vast improvement on Crocosmæftora aurea, having larger, more expanded, golden-yellow flowers, and a dwarf compact habit; excellent for cutting. 3 ft. 1s.

For other varieties of Montbretia, see Bulb Catalogue.

MORINA LONGIFOLIA - Highly ornamental, both in foliage and flowers. $2\frac{1}{2}$ ft. 9d.

MYOSOTIS, in variety-See Summer flower-

MYOSOTIS IMPERATRICE ELIZA-BETH—Colour very rich. $\frac{3}{4}$ ft. 9d. each; 6s. per doz.

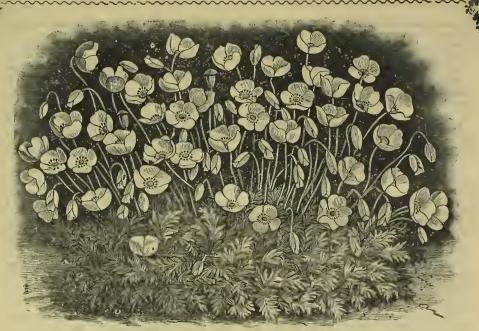

NIEREMBERGIA RIVULARIS - Large pure white flowers; dwarf, slender, creeping stems. 2 in. high. 9d.

ŒNOTHERA FRASERI and YOUNGI-Both very showy. $1\frac{1}{2}$ ft. 9d. each.

CENOTHERA FRUTICOSA MAJOR -Large deep yellow flowers; fine. 1 to 1\forall ft. 9d. CENOTHERA MACROCARPA (Evening

Primrose) - Deep golden yellow flowers. 1 ft. 6d. CENOTHERA PILGRIMI - By far the finest of the yellow Evening Primroses. 1 ft. 6d. CENOTHERA RIPARIA. 1 ft. 6d. each;

5s. doz.

PAPAVER NUDICAULE (ICELAND POPPY).

CENOTHERA SPECIOSA — Free-growing large white fragrant flowers, and for horders few can be found to equal it. 1 to $1\frac{1}{2}$ ft. 9d. each; 6s. per doz.

CENOTHERA TARAXACIFOLIA—One of the prettiest of the dwarf Evening Primroses; large white flowers changing to red when fading.

1 ft. 6d.

OMPHALODES LUCILIÆ—Delicate blue flowers; a beautiful Alpine. ½ ft. 1s, 6d, and 2s, 6d.

OMPHALODES VERNA—Charming little plant; blue. ½ ft. 6d. each; 5s. per doz.

OMPHALODES VERNA ALBA-1 ft.

6d. each; 5s. per doz.
ONONIS ROTUNDIFOLIA (Rest Harrow)
—A free-flowering and effective horder plant;
will thrive in sandy soils. 1½ ft. 9d.

ONOSMA TAURICA—Bright yellow; very

fragrant. \(\frac{3}{4} \) to 1 ft. \(1s. \) 6d.

OPHIOPOGON SPICATUM—A neat evergreen, with grassy leaves and spikes of white

OPUNTIA RAFINESQUEI (Prickly Fig)

—A truly hardy Cactus, with yellow flowers; indispensable for the rockwork. 1s. 6d.

OROBUS AURANTIACUS (Luteus) — Bright orange flowers; very distinct. 1½ to 2 ft. 1s. 6d.

OROBUS CANESCENS—One of the most showy; blue purple. 1 ft. 1s.

OROBUS LATHYROIDES — Numerous spikes of small blue flowers, closely arranged; a showy plant. 2½ ft. 6d.

OROBUS VERNUS—Purple pea-shaped flowers; one of the prettiest spring flowering plants. 1 ft. 9d.

OSTROWSKIA MAGNIFICA—The giant bull-flower from Central Asia; flowers bell-shaped; mauve-lilae and white. 3 to 4 ft. 2s. 6d.

OURISIA COCCINEA—Spikes of drooping searlet flowers; a gem for a moist shady spot. $\frac{3}{4}$ ft. 9d.

PÆONIA MOUTAN (Tree Pæonies)—See Collection.

PÆONIAS, HERBACEOUS—See Collection.

PANSIES-In great variety-See Collection.

PAPAVER BRACTEATUM—Large brilliant crimson-scarlet flowers, black blotch at base of each petal; fine for horders. 3 ft. 9d.

PAPAVER NUDICAULE—Showy forming tufts of bright yellow flowers. 1 ft. 6d.

PAPAVER NUDICAULE ALBUM — A pretty white variety of the preceding; fine for entting. 1 ft. 6d.

PAPAVER NUDICAULE COCCINEUM FL. PL. — New double flowering form of the bright orange-scarlet variety of the *Iceland Poppy*. 1 ft. 1s.

PAPAVER NUDICAULE MINIATUM-Brilliant orange-scarlet flowers; one of the most showy of the Iceland Poppies. 1 ft. 6d.

PAPAVER ORIENTALE - Immense deep crimson flowers, black hloteb. 3 ft. 6d.

PAPAVER ORIENTALE "BLUSH QUEEN" - Beautiful soft rosy-pink flowers; more erect in growth than Orientale. F.C.C. $3\frac{1}{2}$ ft. 1s.

PAPAVER ORIENTALE "PRINCE OF ORANGE" - Dwarf, compact habit; clear orange-scarlet flowers; exceedingly handsome.

PAPAVER ORIENTALE "SALMON QUEEN "-Of a charming soft salmon-scarlet shade. 2 ft. 9d.

PAPAVER ORIENTALE "SEMI-PLENA "-Rich crimson flowers. 1s.

PENTSTEMONS (FlorIst's varieties)—See Collection.

PENTSTEMON BARBATUS COC-CINEUS-A desirable plant. 3 ft. 6d.

PENISTEMON HETEROPHYLLUS-Lovely sky-blue flowers, at times tinted rose; dwarf. 1s.

PENTSTEMON OVATUS—A good border plant, quite hardy, and a fine blue. 3 ft. 9d.

PENTSTEMON PUBESCENS - Lilae, with white month; a good border kiud. 1 ft. 9d. PENTSTEMON SCOULERI — Flowers large and inflated, of a lovely hluish-lilae; perfectly hardy, easily grown. 2 ft. 1s. 6d.

PHALARIS ARUNDINACEA FOL. VAR.

(Lady Grass)—Pretty. 6d. PHLOX AMŒNA. 1s.

PHLOX CANADENSIS-Pale blue; slender-growing species. 1 ft. 9d.

PHLOX DOUGLASI, var. DIFFUSUS-Dense-spreading tufts, delicate pink flowers; from the Cascades of Northern United States (gritty and very sandy well-drained soil). 2s. 6d.

PHLOX NELSONI - Snow white flowers. 6d.

PHLOX OVATA-Rosy purple flowers, late in spring; one of the best hardy plants. 1 ft. 9d.

PHLOX SETACEA sym. FRONDOSA—
Bright rose-coloured flowers. ½ ft. 6d.
PHLOX SETACEA "ALDBOROUGH ENSIS"—Pale lilae; very distinct. 9d.

PHLOX SETACEA ATROPURPUREA-

Purplish rose-coloured flowers, crimson eye; 6d. each; 4s. per doz.

PHLOX SETACEA "BRIDE"-Pure white, red centres; very conspicuous. 9d.

PHLOX SETACEA "COMPACTA"—Lovely rose; effective. 9d.

PHLOX SETACEA "FAIRY"-Pure white, with a red eye; free. 9d.

PHLOX SETACEA "GRANDIFLORA"-Rich mauve; distinct. 9d.

PHLOX SETACEA "MODEL" - Bright rosy earmine, neat habit; effective. 9d.

PHLOX SETACEA "PALLIDA" - Ros

shaded lilae; flowers large. 9d.
PHLOX SETACEA "PERFECTION"-White, purple ceutre. 9d.

PHLOX SETACEA "VIVID"-Fiery rose colour, rich carmine centre; the brightest of

PHLOX VERNA—Deep red. ½ ft. 5s. per doz. 6d. each.

PHLOXES (Florist's varletles), Early and Late Flowering—See Collection.

PHORMIUM TENAX (New Zealand Flax) -Perfectly hardy; a splendid green foliage plant. 1s. 6d. and 2s. 6d.

PHORMIUM TENAX VARIEGATUM-Alternate bands of green and golden yellow, running the entire length of the leaf; oue of the finest foliage plants; hardy in warm, sheltered positions. 2s. 6d. and 5s. each.

PHORMIUM TENAX ATROPURPUREA Leaves narrower and more creet; purple foliage. 3s. 6d.

PHYGELIUS CAPENSIS - Very effective spikes of long tubular flowers of a rich vermilion; yellow throat. 3 to 4 ft. 9d.

PHYSALIS ALKEKENGI (Winter Cherry) White flowers, succeeded hy numerous transparent red berries. 1 ft. 6d.

PHYSOSTEGIA VIRGINIANA-A handsome plant; rosy-lilae. 2 ft. 6d.

PITYROSPERMA ACERINUM—Spikes of white flowers, 3 ft. in height, late in autumn. 9d. PLUMBAGO LARPENTÆ-A pretty

ornament for rockwork, banks, &c. 9d. each; 7s. 6d. per doz.

PODOPHYLLUM EMODI - Large green foliage, flowers creamy white, succeeded by bright scarlet fruit; thrives best in shade. 1 ft.

PODOPHYLLUM PELTATUM—Beautiful wrinkled leaves, small white flowers; shady position. 1 ft. 1s.

POLEMONIUM CŒRULEUM (Jacob's Ladder)—Elegant fern-like foliage. 6d.

POLEMONIUM CŒRULEUM ALBUM.

POLEMONIUM HIMALAICUM-A noble plant for the mixed border, strong grower; should be in every collection. 2 ft. 1s.

POLEMONIUM REPTANS-Valuable blne spring flowering plant. 1 ft. 9d.

POLEMONIUM RICHARDSONI, syn. HUMILE—A beautiful hardy perennial; lovely sky-hlue flowers. 11 ft. 9d.

POLYGONUM BRUNONIS - Useful for its pink flowers and coloured foliage; dwarf. 1 ft. 6d.

POLYGONUM COMPACTUM - White flowers, much hranched stems. 2 ft. 9d.

POLYGONUM SACHALIENSE - Tall stout stems and very large foliage; a plant of suh-tropical appearance, very useful for the margins of waters, shrubbery, borders, &c. 1s.

POLYGONUM VACCINIFOLIUM-Pink flowers, late in autumn; dwarf and pretty. 1/2 ft.

POTENTILLAS (Double)-See Collection. POTENTILLA FORMOSA—Bright cherryred flowers in profusion. 1 ft. 6d.

PRIMULA—See Collection.

PYRETHRUMS, DOUBLE AND SINGLE -See Collection.

PYRETHRUM ULIGINOSUM, syn. SEROTINUM - Producing large pure white flowers; a fine plant for autumn decoration; useful for entting. 5 ft. 6d.
PULMONARIA AZUREA—Early flower-

ing; fine clear blue. 1 ft. 9d.

PULMONARIA SACHARATA - Prettily marbled leaves, red and violet tubular flowers.

RANUNCULUS ACONITIFOLIUS PLE-NUS (Fair Maids of France)-Flowers pure white, very double; grows freely in any sitnation. 1 ft. 9d.

RANUNCULUS ACRIS FL. PL. (The Old Bachelor's Button) - Double golden yellow flowers; will grow in any damp shady corner. 3 ft. 6d.

RANUNCULUS AMPLEXICAULIS-Large white flowers; very distinct. 1 ft. 9d.

RANUNCULUS MONTANUS-A pretty Alpine plant; flowers yellow. 9d.

RANUNCULUS RUTÆFOLIUS-White

flowers, dark yellow centre. 4 ft. 1s. RANUNCULUS SPECIOSUS FL. PL.— Immense double golden yellow flowers, produced in abundance. ½ ft. 1s.

RAMONDIA PYRENAICA-Flowers of a casily grown, perfectly hardy, shady-damp spot. ½ ft. 1s.

RHEUM EMODI-A gigantic leaved plant.

RHEUM PALMATUM-Large and handsome foliage, fine for isolating on lawns. 5 ft. 1s.

ROCKETS — Hesperis matronalis alba plena and purpurea plena—Tbey are as showy and as beautiful as any Stock, quite hardy, and bloom twice the length of time, and for cut flowers are amongst some of the best hardy plants. 2 ft. 6d. each; 4s. doz.

RUDBECKIA CALIFORNICA-Light yellow flowers in autumn; very distinct. 5 ft. 9d. RUDBECKIA LACINIATA-Yellow Mar-

gnerite-like flowers. 3\forall ft. 6d.
RUDBECKIA NEUMANII — Showy golden yellow and black flowers; very nseful for cutting purposes. 2 ft. 6d. cach; 4s. per doz. RUDBECKIA SUB-TOMENTOSA—Com-

pact heads of clear yellow flowers, with a distinct dark centre; very free, useful for cutting. 3 to 4 ft. 9d.

SALVIA OFFICINALIS AUREA. 6d. SALVIAS—See Collection.

SANTOLINA INCANA-Neat dwarf, and compact. 1 ft. 6d. eacb; 4s. per doz.

SAPONARIA OCYMOIDES - Trailing perennial; bright rosc-coloured flowers; invalnable for covering large stones. \frac{1}{2} ft. 6d.

SAPONARIA OCYMOIDES, var. SPLEN-DIDISSIMA-Flowers large, circular, and deep rosy crimson in colour; fine for rockwork, 1s.

SAXIFRAGAS-In variety. (See Collection.) SCHIZOSTYLIS COCCINEA - A handsome semi-bulbous plant, the flowers, which are produced late in the autumn, are of a bright crimson; good for cutting purposes. 11 to 2 ft. 6d. each; 4s. per doz.; 30s. per 100.

SCABIOSA CAUCASICA—Beautiful heads

of lilac-blue flowers. 9d.

SCUTELLARIA MACRANTHA-A showy dwarf border plant, flowers blue. 9d.

SEDUMS-See Collection.

SEMPERVIVUMS—See Collection.

SENECIO DORONICUM-Large golden yellow flowers; fine for cutting. 11 to 21 ft. 6d. SENECIO PULCHER - An exceedingly vigorons habit, and perfectly hardy; brilliant

purplish crimson flowers, with a golden yellow disc, of a good form and substance. 2 to 3 ft. 9d. SHAMROCK-The true variety from Ireland.

6d.SIDALCEA CANDIDA - Long spikes of white flowers. 23 ft. 6d.

SIDALCEA MALVÆFLORA-Useful for cutting. 2 ft. 6d. each; 5s. per doz.

SILENE ACAULIS-A dwarf Alpine herb; piuk flowers. 9d.

SILENE ACAULIS ALBA-A pretty rock plant; pure white flowers. 9d.

SILENE ALPESTRIS-A charming evergreen rock or border plant, glossy white flowers;

fine for massing. 6d. cach; 5s. per doz.

SILENE MARITIMA FL. PL.—Prostrate tufts of glaucons foliage, scarcely an inch in height, bearing double flowers as large as the old "Double Wbite Pink." $\frac{3}{4}$ ft. 9d.

SILENE SCHAFTÆ-A neat trailing autum species, rosy purple flowers; fine for massing. \(\frac{1}{2} \) ft. 9d.

SISYRINCHIUM GRANDIFLORUM—

Rich purple bells in February. 3 ft. 9d. SISYRINCHIUM GRANDIFLORUM ALBUM-Pure white flowers. Both of these are amongst the élite of spring flowering plants. 3 ft. 18.

SMILACINA BIFOLIA-Pure white, flowers like a miniature Lily of the Valley. 1 ft. 9d.

SOLDANELLA ALPINA-Forms a mass of dark green leathery foliage; bell-shaped flowers on slender stems of a bluish purple, beautifully fringed. $\frac{1}{2}$ ft. 9d. and 1s.

SOLDANELLA MINIMA - Forming a dense tuft, pretty fringed blnish flowers. 1s. 6d. SOLDANELLA MONTANA-Larger than Alpina, but much finer flowers. $\frac{1}{4} - \frac{1}{2}$ ft. 1s.

SOLIDAGO VIRGAUREA (Golden Rod)

—A very useful autumn blooming plant. 6d.

SOLIDAGO VIRGAUREA NANA—Neat and effective, bright golden-yellow flowers. $1\frac{1}{2}$ ft. 9d.

SPIGELIA MARILANDICA—Crimson and yellow flowers, of much interest and beauty. A damp shady position in peaty soils snits it well. 1 ft. 1s.

SPIRÆA ARUNGUS—A useful border or pot plant, feathery panieles, composed of innumerable small white flowers. 3-4 ft. 9d. and 1s.

SPIRÆA ASTILBOIDES—A fine species; elegant dense plumes of pure white; well adapted for the border or for forcing. 2-2½ ft. 1s. and 1s. 6d.

SPIRÆA CRISPIFOLIA (Bullata) — A charming rock or border plant, erisp leaved, and earmine budded. 1 ft. 1s.

SPIRÆA GIGANTEA (Kamtschatica)—Feathery ereamy-white plumes, large palmate leaves. 8-10 ft. 1s. 6d.

SPIRÆA JAPONICA—As useful for the border as it is for pots. 2 ft. 6d.

SPIRÆA JAPONICA AUREA RECTI-CULATA — Handsome variegated foliage; a uscful pot or border plant. 1s.

SPIRÆA JAPONICA COMPACTA—Deuse plumes, couble the size of the ordinary variety.

SPIRÆA PALMATA—Distinct and beautiful, palmate leaves, and strong bright red flower stems, surrounded by numerous broad corymbs of beautiful deep erimson flowers. 2½-3 ft. 6d. and 9d.

SPIRÆA PALMATA ALBA — A most charming plant; flowers pure white. 2 ft. 6d.

SPIRÆA PALMATA ELEGANS—A very distinct and pretty plant; soft rose. $2\frac{1}{2}$ -3 ft. 9d.

SPIRÆA VENUSTA—Lovely deep rosy carmine flowers; very useful for cutting. 3-3½ ft.

SPIRÆA ULMARIA FOLIA VARIE-GATA—Very pretty. 2 ft. 6d.

SPIRÆA ULMARIA FL. PL. 2½ ft. 6d. SPIRÆA FILIPENDULA FLORE PLENO—Corymbs of double white flowers, with a slight ereamy tinge. The pretty fern-like foliage is exceedingly attractive during the whole year, and is very useful for cutting. 1½ ft. Strong clumps, 1s.; small plants, 6d. STATICE INCANA—Enormous heads of

STATICE INCANA—Euormous heads of flower, blue, white, crimson, and purple. 1 ft.

STATICE LATIFOLIA (The Great Sea Lavender)—Forming an immense branching panicle 2 ft. across, composed of small blue flowers; useful for cutting. $2\frac{1}{2}$ ft. 9d.

STATICE LIMONIUM—Dwarf, free flowering, deep blue. 1 ft. 9d.

STATICE GMELINI — Small dark blue flowers; one of the best. 1 ft. 9d.

STENACTIS SPECIOSA — Large, showy, pale purple flowers with a yellow centre. 2 ft. 6d.

STIPA PENNATA—Very elegant grass. 6d. STOKESIA CYANEA—Light blue Centanrea-like flowers. 1 ft. 9d. and 1s.

SYMPHYTUM BOHEMICUM—Reddishpurple flowers; handsome. 1-1½ ft. 9d.

SYMPHYTUM OFFICINALE ARGENTEUM VARIEGATUM—Large handsome foliage, highly ornamental. 2 ft. 9d.

SYMPHYTUM OFFICINALE AUREUM VARIEGATUM—Gold variegation. 2 ft. 9d. THALICTRUM ADIANTIFOLIUM—Perfectly hardy; in delicaey of structure it is equal to the Adiantums or Maidenhair Fern. 1 ft. 9d.

THALICTRUM ANEMONOIDES—Pure white flowers, nearly an inch across, near and dwarf; sandy peat. $\frac{1}{2}$ ft. 9d.

THALICTRUM AQUILEGIFOLIUM— Cream coloured flowers. 3 ft. 6d.

Cream colonred flowers. 3 ft. 6d.
THALICTRUM AQUILEGIFOLIUM
RUBRUM—Flowers and foliage alike ornamental; fine for cutting. 3 ft. 1s.

THALICTRUM GLAUCUM—Deep green, minute foliage. 2 ft. 6d.

THERMOPSIS MONTANA—Yellow peashaped flowers. $2\frac{1}{2}$ ft. 6d.

THYMUS LAÑUGINOSUS—Greyish coloured foliage. 6d. each; 4s. per doz.

THYMUS MARGINATUS ELEGAN-TISSIMUS—A compact and effective plant, the best of all the garden variegated Thymes. 6d. each; 4s. pcr doz.

THYMUS ROTUNDIFOLIUS — Useful. 6d.; 4s. per doz.

THYMUS SERPYLLUM ALBUM— Snowy white; one of the prettiest rock plants. If ft. 6d.

THYMUS SERPYLLUM, var. COC-CINEUS—A variety of the Mountain Thyme, but with deeper and more brilliant flowers, forming sheets of rich erimson. If 2d

forming sheets of rich crimson. \(\frac{1}{8}\) ft. 9d.

THYMUS VARIEGATUS—Each leaf is varicgated with silver, and for spring gardening; a very beautiful plant. 6d.

TIARELLA CORDIFOLIA (Foam Flower)
—White flowers like a small Spirea; very beautiful in pots, perfectly hardy. $\frac{3}{4}$ ft. 6d.

TRADESCANTIA VÏRGÎNICA ALBA MAJOR—The best white variety; a fine border plant. 1½ ft. 9d.

TRADESCANTIA VIRGINICA RUBRA PLENA—A showy and highly decorative group of border plants; free. 1½ ft. 6d. to 9d. TRILLIUM ERECTUM—Brownish purple.

3 ft. 1s.

TRILLIUM GRANDIFLORUM - Pnre white, the largest of this group; one of the best of our spring flowers. # ft. 1s.

TRILLIUM GRANDIFLORUM MAJOR A splendid giant variety of an already beantiful plant. 3 ft. 2s.

TRITOMA (Kniphofia)—Torch Lily, Red Hot Poker.

TRITOMA BURCHELLI-Early flowering, dark red passing to orange, large spikes. 21-3 ft.

TRITOMA CAULESCENS - Yucca-like lcaves and growth, reddish orange flowers; effective. 4 ft. 2s. 6d.

TRITOMA CORALLINA-Dwarf; coralred, shading into orange-red. 2 ft. 1s.

TRITOMA H. CANNELL-Immense, long spikes, of a bright coral-red. 4 ft. 3s. 6d.

TRITOMA MACOWANII—A dwarf species, rich golden orange, passing to a bright orangered. 21 ft. 1s.

TRITOMA NOBILIS-Fine spikes of scarlet and yellow. 5-6 ft. 2s. 6d.

TRITOMA PFITZERI-A splendid rich erimson; a really first-class variety. 2s. 6d.

TRITOMA ROOPERI - Large spikes of bright scarlet-orange; rohust and free flowering. $2\frac{1}{2}$ -3 ft. 1s.

TRITOMA SAUNDERSI-Deep red, tipped yellow; heautiful foliage, and nohle spikes. 4-5 ft. 1s. 6d.

TRITOMA UVARIA GLAUCESCENS-Large spikes of flowers of a hright orange and scarlet colonr. 23-3 ft. 1s.

TRITOMA UVARIA GRANDIFLORA-Deep crimson and orange flowers, the last in hloom. 4 ft. 1s.

TROLLIUS ASIATICUS—Orange. 2ft. 9d. TROLLIUS EUROPÆUS - Well known. 1 ft. 6d. each; 5s. per doz.

TROLLIUS GIBSONI-Superior to Japonicus. 1s. 6d.

TROLLIUS GIGANTEUS Lemon coloured. 2 ft. 9d.
TROLLIUS LODDIGESIANUS—A fine

form of Europæus; pale yellow. 21 ft. 9d.

TROLLIUS NAPELLIFOLIUS - Yellow flowers. 2 ft. 1.8.

TROPÆOLUMS-See Collection.

TUSSILAGO FRAGRANS (Winter Heliotrope)-Resembles in appearance and odour the Heliotrope, and will continue blooming as long as the frost holds off. 1 ft. 6d.

TUSSILAGO FARFARA VARIEGATA-Pretty variegated foliage. 4 ft. 9d. Atrong

growing horder plant. 6d. each; 4s. per doz.

VANCOUVERIA HEXANDRA-Plumes of pretty, erect, snow-white flowers; useful for rockwork. 1 ft. 1s.

VERATRUM ALBUM-One of the finest hardy foliage plants. 2 ft. 9d.

VERATRUM NIGRUM—A noble plant; very distinct; blackish-purple flowers.

VERBASCUM CHAIXI (Orientale) bold stately perennial; yellow flowers, with a purple centre; very effective as single specimens in the shrubbery or mixed borders. 3 ft. 9d.

VERONICA AMETHYSTINA-One of the very best of the taller growing species; clear hlue. 1 ft. Strong clumps, 6d. each; 4s. per doz.

VERONICA INCANA—Grey or silvery foliage. $1\frac{1}{2}$ ft. 6d. each; 4s. per doz.

VERONICA GENTIANOIDES - Slaty hlne; vory distinct. 1 ft. 6d.

VERONICA GENTIANOIDES ELEGANTISSIMA-6d. each; 4s. per doz.

VERONICA GUTHREANA-Deep hlne; very dwarf. 1s.

VERONICA LONGIFOLIA VAR. SUB-SESSILIS—Dense erect spikes, of a deep rich hlue. 13 ft. 6d. each ; 4s. per doz.

VERONICA MARITIMA ALBA — A very distinct and free-flowering white variety. 6d.

VERONICA PECTINATA—A pretty trailing kind. 6d.

VERONICA PROSTRATA - Dark green foliage, in compact tufts, and namerous spikes of deep blue flowers. 6d.

VERONICA REPENS-Dense close growing creeper. 6d.

VERONICA RUPESTRIS - One of the finest of rock plants. 6d.

VERONICA SPICATA - Long elegant spikes of the richest hlue. 6d.

VERONICA SPICATA ROSEA—A neat and . nseful plant for mixed horder, hearing pyramidal spikes of light rose coloured flowers.

VERONICA PULCHELLA FOL. VAR.— 6d.

VERBASCUM OLYMPICUM — Flower spikes from 6 to 8 feet in height, clear yellow flowers; large woolly leaves. 1s.

VERBASCUM PHŒNICEUM-Very effective and free growing; purple flowers. 2 ft. 9d. VICIA PYRENAICA—Dense dwarf tangled

stem, large crimson pea-shaped flowers. & ft. VINCA MINOR AUREA MARGINATA -A pretty variegated Periwinkle. 6d.

VINCA-Singlo blne. 6d.

VINCA—Donble. 6d. VINCA MAJOR ELEGANTISSIMA— Useful for large rock work. 6d. each; 4s. per doz. VIOLAS, TRICOLOR and ODORATA-For full list, see Collection.

WALDSTEINIA TRIFOLIA — A pretty rock plant; golden yellow flowers. ½ ft. 9d. ZAUSCHNERIA CALIFORNICA—One of the best autumn plants. I ft. 1s.

ZAUSCHNERIA CALIFORNICA SPLENDENS - Flowers intense vermilion. 1 ft 9d.

ASTERS (MICHAELMAS DAISIES),

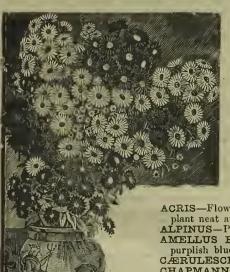

A beautiful genus of hardy Herbaceous plants, consisting of a great number of varieties, many of which are amongst the best of our autumnflowering plants; they are of easy culture, and will thrive in any ordinary soil, and produce in profusion during several months their beautiful star-shaped flowers. Many kinds continue a long time in bloom, and are elegant and well

adapted for cut flowers, and also worthy of a place in shrubberies and mixed borders. The following will be found all first-class, and

Collections of 100 useful Border Plants, flowering at various seasons, 30s. and 50s.

Spring flowering plants, 12 varieties, 9s. 7, 50 , 30s. Antumn Flowering Perennials, 12 varieties, 6s. to 15s. 25 , 12s. to 30s. 50 20s, to 60s.

The Bijon collection for the rock garden carefully selected. 50 plants in 50 varieties, 20s. Older and commoner varieties:—25 varieties for 7s. 6d.; 50 varieties, 14s.

ASTERS (MICHAELMAS DAISIES).

ACRIS—Flowers sating mauve, heads of bloom of great width; plant neat and compact. 2-3 ft 9d.

ALPINUS—Pale blue, large. \(\frac{1}{2}\)-\(\frac{3}{4}\) ft. 9d.

AMELLUS BESSARABICUS — Flowers large, rich deep purplish blue; one of the best. 2 ft. 9d.

CÆRULESCENS—Large bright blue flowers. 4 ft. 1s.

snitable for general decoration.

CHAPMANNI-Pale azure-blue, medium size, but borue in great profusion; a most effective species. 3-4 ft. 9d.

CORDIFOLIUS — Mauve, blooms abundantly and early, foliage massive. 4 ft. 1s.

CORYMBOSA—Stellate white flowers with yellow centre

borne in large clusters. 3-4 ft. 1s.

DISCOLOR—White, changing to rose with age, forms a neat dense bush. 1-1½ ft. 9d.

ERICOIDES-Flowers small, but borne in abundance; white with yellow eye; very ucat. 2-3 ft. 9d.

FORMOSISSIMUS—Rosy purple flowers; very distinct. 3-4 ft. 1s.

GRANDIFLORUS — Large, deep lilac-coloured flowers. 3-3½ ft. 1s. 6d.

HORIZONTALIS-Reddish flowers; neat stiff habit. 2 ft. 9d.

LEVIS — Clear blue, yellow centre.

effective and distinct; one of the best and most showy. $4-4\frac{1}{2}$ ft. 9d.

floriferous. 2-3 ft. 1s.

LONGIFOLIUS VAR. FORMOSUS-A dense bush with rose-coloured flowers. hahit neat and dwarf; very distinct. 2 ft. 9d.

NOVÆ-ANGLIÆ-Large purplish blue flowers. 3-4 ft. 9d.

NOVÆ-ANGLIÆ, ROSEA - Flowers purplish red; very fine. 4.5 ft. 9d.
NOVI BELGI—In variety. 9d and 1s. 6d.
POLYPHYLLUS—White flowers, very

pure, flowers in August. 4 ft. 9d. PTARMICOIDES-Dense heads of milk-

white blossoms. 1-14 ft. 9d.

PULCHERRIMUS - Much branched panicles of whitish fringed flowers.

SALSUGINOSA - Bluisb white. 11 ft.

SHORTII — Small azure blue flowers, leaves cordate. 1½-2 ft. 9d.
SPECTABILIS—Very pretty, bright violet flowers; neat habit. 1 ft. 9d.

STELLATUS-Flowers blue, yellow eye; plant very dwarf and compact; useful for front row of the border. $\frac{1}{2}$ - $\frac{3}{4}$ ft. 9d.

TRINERVIS—White, with purplish and yellow disc. 3 ft. 1s.

TURBINELLUS-Mauve, very free. 3 ft. . 1s. 6d.

VERSICOLOR-White, changing to purple, very floriferous. 5.6 ft. 9 %.

A FEW SELECT HARDY AQUATICS.

Those marked * may be grown in the greenhouse.

ACORUS CALAMUS-Long green follage, somewhat resembling an Iris. 6d.

ACORUS GRAMINEUS FOL. VAR .-Variegated foliage, useful for margins of lakes or streams. 9d.

ALISMA PLANTAGO (Water Plantain)-Perfectly hardy, producing rosy white blooms from June to September. 6d.

*APONOGETON DISTACHYON (Water Hawthorn)—A beautiful plant; white flowers baving the scent of May blossom. 1s.

BUTOMUS UMBELLATUS (Flowering Rush)-Large umbels of pink flowers.

HOTTONIA PALUSTRIS (Water Violet)-ale blue flowers; beautiful. 6d. Pale blue flowers; beautiful.

HYDROCHARIS MORSUS RANÆ-A pretty and scarce native plant; will succeed best in stagnant pools. 9d.

*LIMNOCHARIS HUMBOLDTI-Yellow, deep orange centre; most charming. 1s.
MENYANTHES TRIFOLIATA — White,

sweet scented flowers. 9d, -

MYOSOTIS PALUSTRIS (The Water Forget-me-Not)—Flowers blue, and continues in bloom throughout the summer. 6d.

NUPHAR ADVENA (Striped Water Lily) Very beautiful. 2s. 6d. to 5s.

NUPHAR LUTEUM (Yellow Water Lily)

—A well-known native plant. 1s. to 3s. 6d.

NUPHAR PUMILUM, syn. N. KALMIANA (The Small Water Lily)—Yellow; a pretty little plant for small basins. 1s. 6d.

NYMPHÆA ALBA (White Water Lily)-1s. 6d.

NYMPHÆA MARLIACEA CHROMA-TELLA-Canary yellow, very double, foliage

large, spotted reddish brown. 6s.
NYMPHÆA ODORATA (Sweet-scented Water Lily)-White, very fragrant and beautiful. 1s. 6d.

NYMPHÆA ROSEA — Splendid rose-coloured; a most lovely bardy aquatic. 5s. PONTEDERIA CORDATA (Pickrell) -Perfectly hardy, producing fine tufts of blue flowers from June to August. 1s. 6d.

SAGITTARIA JAPONICA, FL. PL.—A large flowering form, pure white, and very donble. 2s. 6d.

SAGITTARIA SAGITTIFOLIA (Arrowhead)—A bold plant; rosy white flowers. 9d. STRATIOTES ALOIDES (Water Soldier)

—A singular and very handsome plant, with white flowers; does not require any soil, but floats perfectly detached. '9d. and 1s.

TYPHA ANGUSTIFOLIA—Narrow-leaved

Cat's Tail. 1s.

TYPHA MINIMA—A neat little plant for small lakes. 2s.

*VILLARSIA NYMPHÆOIDES, syn. LIMNANTHEMUM NYMPHÆOIDES — Another floating plant, with golden yellow flowers. 9d.

VILLARSIA RENIFORMIS, syn. MENY-ANTHES EXALTATA — Strong growing; flowers yellow; distinct and pretty. 2s.

Coloured-leaved Plants for Effective Bedding.

HESE small-growing pretty little plants are rather tender, and require to be treated the same as the Coleus, well hardened off, and planted in a warm sheltered situation. They are admired by every one, and no carpet beds are complete without them.

PANDANUS VEITCHIL

SAINTPAULIA IONANTHA.

*SAINTPAULIA IONANTHA—One of the most charming stove plants introduced of late years. It belongs to the family of the Gesneriaceas, and was found on the Usambara Mountains in East Africa. The tiny plants form a flat rosette of deep green hairy leaves, which are similar in form to those of the Gloxinia, butsmaller in all parts, and most reddish brown underneath. The

(201)

flower stems, 2 to 4 inches in length, are crowned by beantiful deep blue flowers, hearing a close resemblance in form as well as in colour to those of the sweet-scented violet; stamens deep golden-yellow. Will bloom continually throughout the year. The seed is extremely fine, and requires similar treatment to that of the Streptocarpus. Per pkt., 1s. 6d.; plants, 1s. 6d. each.

SEDUM AZOIDEUM VARIEGATUM— Ornamental plant. 6d.;

JAPONICUM, VAR.OF "FABARIUM," FOL. VAR.—Each leaf marked with white.

SIEBOLDI—Of a thick substance, with wax-like blotch in the centre of each leaf. 9d.

SIBTHORPIA EUROPÆA (Cornish Moneywort)—A splendid little trailing plant for the rockery in conservatories; foliage small. 6d.

ODORATUM - Foliage heautifully

scented. 6d. cach.

EUROPÆA ARGENTEA MARGIN-ATA-Very elegant. 1s. cach.

STATICE HALFORDII — A superb blue variety, useful for the decoration of the greenhouse. 2s. 6d. and 3s. 6d. cach.

IMBRICATA-2s. 6d. and 3s. 6d. each. STREPTOCARPUS REXII. 1s. 6d. each.

STREPTOCARPUS HYBRIDS—We have a fine stock of scedlings of various shades, plants that will be sure to bloom this scason. 1s. 6d. each; 15s. per doz.

*STROBILANTHES DYERIANUS
—Brilliant and exquisite colouring. It is of
casy growth, and most useful as a decorative
plant. 1s. each.

*TILLANDSIA (VRIESIA) SPLENDENS.

3s. 6d.

*TABERNÆMONTANA CORONARIA FL. PL.—Resembling the Gardenia in growth and fragrance, pure white double flowers. 2s. 6d.

*TRADESCANTIA ZEBRINA—Easy growth, dark foliage, and makes a very effective contrast with brighter colonrs. 6d. each; 4s. per doz.

*ALBO VITTATA—Prettily marked, of

a silvery white; very clear. 1s.
*MULTICOLOR—Most heautifully variegated with purple, lake, and white. 9d.

STOVE AND GREENHOUSE CLIMBERS.

Those marked thus * arc for the Stove.

ABUTILONS—See Collection.

ACACIA DEALBATA. 2s, 6d. LONGIFOLIA MAGNIFICA. 3s, 6d. VERTICILLATA. 2s, 6d.

The above in 5-inch pots.

THE GARDEN, 29th May, 1897.

The collection of Tuberous Begonias was widely representative, and contained many very excellent and lovely varieties.

FLOWERING SHRUB-LIKE

The members of this useful genus of dwarf shrnb-like plants have been so far too much neglected, when their beanty and general value for the decoration of hot dry positions where not many things will thrive are taken into consideration. The only are taken into consideration. The only wonder is that they are not grown by everybody.

OTAKSA-1s. and 1s. 6d. THOMAS HOGG - Of the purest white, 1s.

(The Old Variety)-Well known; often tinted with blue. 6d.

PANICULATA GRANDIFLORA -1s. and 2s.

SCHIZOPHRAGMA HYDRAN-GEOIDES (Climbing Hydrangea). 2s. 6d.

WHITE AND YELLOW FOLIAGED PLANTS. FOR EDGING OF BEDS AND BORDERS.

ACHILLEA TOMENTOSA. 6d.

UMBELLATA, 1s. ACORUS JAPONICUS VARIEGATUS. 9d. ALYSSUM VARIEGATUM. 6d.

ANTENNARIA TOMENTOSA (Snow Plant). 6d. cach; 3s. per doz.; 12s. per 100 ANTHERICUM-

LATIFOLIA MEDIO PICTA-1s.

VARIEGATUM. 1s. ARABIS ALPINA VARIEGATA. 6deach; 4s. per doz.

LUCIDA FOL. VAR. 5s. per doz. ARUNDO DONAX VARIEGATA. 3s. 6d. AUBRIETIA PURPUREA VARIEGATA 8d. each; 6s. per doz.

BAMBUSA FORTUNEI VARIEGATA. 1s. MAXIMOWICZII VITTATA. 1s. 6d. CENTAUREA

PRINCE OF WALES. 2s.

PRINCESS OF WALES. 2s. 6d. RAGUSINA COMPACTA. 5s. per doz. CERASTIUM TOMENTOSUM (Snow in Summer)-2s. per doz.; large elumps, 1s. cach. COPROSMA BAUERIANA VARIEGATA 1s. each; 9s. per doz.

DACTYLIS ELEGANTISSIMA-4s. per

ELEGANTISSIMA AUREA - 6d. each; 5s. per doz.

GLOMERATA LONGISSIMA AUREA-6d.

FUCHSIA GOLDEN FLEECE-6s. per

GNAPHALIUM LANATUM FOL. ELEG. VAR.—6d. each; 4s. per doz.

LEUCOPHYTON BROWNII-6d. each; 4s. per doz

LONICERA AUREA RETICULATA -6s. per doz.

LYSIMACHIA NUMMULARIA AUREA -9d.

MESEMBRYANTHEMUM CORDIFO-LIUM VARIEGATUM-6d. each; 4s. per doz. MYRTUS VARIEGATA-1s.

POLEMONIUM CŒRULEUM VARIE-GATUM—9d. each; 8s. per doz.

PYRETHRUM AUREUM LACINIATUM -6d. each; 5s. per doz.

SALVIA OFFICINALIS AUREA-6d. SANTOLINA INCANA-6d. each; 5s. per doz.

SPERGULA PILIFERA AUREA each; 4s. per doz.

STACHYS LANATA—6d. STELLARIA GRAMINEA AUREA -

3s. per dozen plants; enttings, 2s. per 100.
THYMUS MARGINATUS ELEC ELEGAN-TISSIMUS-6d. each; 4s. per doz.

VARIEGATUS-6d. LANUGINOSUS-6d.

VALERIANA PHU AUREA - 6s. per doz.; 30s. per 100.

VERONICA ANDERSONI VARIEGATA -1s, each.

INCANA-6d. each; 5s. per doz. VINCA ELEGANTISSIMA-6d.

MINOR FOL. AUREIS VARIEGATA -6d.

VITIS LABRUSCA FOLIIS ARGENTEIS -1s. each; 10s. per doz.

BULBOUS PLANT (IN POTS.)

AMARYLLIS (Hybrids)-2s. 6d. and 3s. 6d. AMARYLLIS FORMOSISSIMUS (Jacobæa Lily)—Crimson. 9d. each; 7s. 6d.

ARUM SANCTUM (The Black Calla, Arum Palestinum, or Solomon's Lily) - These magnificent flowers often measure more than a foot in length, by 5 to 8 inches in width; the inside colonr is of the richest velvety purplishhlack imaginable, while the outside is of a pleasing green. 2s. 6d.

BABIANAS-A collection of 16 of the finest varieties. Per pot of 3 hulhs, 9d. 1

BEGONIAS-The finest collection in cultivation; also a great quantity of seedlings bloomed and unbloomed. See Collection.

CALOCHORTI (Butterfly and Star Tulips)

—A fine collection. 1s. to 1s. 6d.

CHIONODOXA LUCILÆ — Pretty blue

flowers. 6s. per doz.

CROCOSMA AUREA - Bright orange in autumn; extra fine. Per pot, several hulbs, 9d. EUCHARIS AMAZONICA-One of the hest white-flowering stove plants. '1s, to 2s. per bulh; flowering plants, 10s. 6d., 15s., and 21s. each.

CANDIDA - 1s., 1s. 6d., and 2s. 6d. MASTERII-2s. 6d.

FREESIA REFRACTA ALBA-The fragrance of these charming flowers is most agreeable; pure white; a geni for forcing. Per pot of 3 bulbs, 2s.

LEITCHLINI—Per pot of 3 bulbs, 1s. 6d.
HYACINTHUS (GALTONIA) CANDICANS—Hardy. 6d. each; 4s. per doz.
IRIS—See Collection.

ISMENE CALATHINA (Sea Daffodil)-White trampet-shaped flowers; very fragrant. 9d.

UNDULATA-Pure white, heautifully fringed. 9d.

IXIA-A collection of 30 of the finest. Per pot of 3 bulhs. 6d.

LACHENALIA TRICOLOR. Per pot, 5 bulbs in each, 1s. 6d.
LILIES—See Collection.

MONTBRETIA POTTSI - Orange scarlet; tubular flowers, horne on one-sided spikes; three hulbs in each pot. 9d.

CROCOSMLÆFLORA - Orange-red; exceedingly free and hardy. 1s. 2 MONTBRETIA CROCOSMLÆFLORA

ELEGANS-Bright. yellow flowers, exterior vermilion and yellow. Is. 6d.

For other varieties, see Bulb List.

NARCISSUS-A fine collection of horder varieties, in pots; price on application,

NARCISSUS—continued.

CORBULARIA MONOPHYLLUS — Silver white; early bloomer. Per pot of 3 halbs, 1s.

JUNCIFOLIUS-Dwarf species; rich yellow flowers; neat. 6d.
TRIANDRUS (Cyclamen Daffodil)
Very rarc and beautiful. Per pot,

Per pot, 3 hulbs in each, 2s. 6d. ORNITHOGALUM ARABICUM - Large

beads of white flowers, with deep black AUREUM—A miniature species, with

golden-yellow flowers; rare. Per pot containing several bulbs, 2s. 6d.

OXALIS-A collection of the most useful and effective varieties. Per pot of 5 roots, 1s.

PANCRATIUM CARRIBEUM-The hest of all the section. 1s. 6d.

ILLYRICUM - Large white flowers;

fragrant. 1s. MARITIMUM-White; fragrant; fine pot plant. 6d. each.

PARVIFLORUM-Large white flowers; fragrant and showy. 9d. This is the

RICHARDIA ÆTHIOPICA (Calla), the well-known Arum Lily. 9d., 1s., and 1s. 6d.

ALBO-MACULATA—Leaves beautifully spotted. 9d.

HASTATA-Yellow, with dark centre. 2s. 6d.

SPARAXIS-A collection of 12 of the finest varieties. Per pot of 3 hulhs, 6d.

TIGRIDIA-See Collection.

TRICHONEMA SPECIOSUM-Large carmine flowers, of a satiny texture, issuing from tufts of slender grassy foliage. Per pot of 3 bulhs, 1s.

SPECIOSUM ALBUM - Pure white; effective. 9d. cach.

TRITONIA-A collection of 10 of the finest varieties. Per pot of 3 bulbs, 9d.

TROPÆOLUMS—See Collection.

VALLOTA PURPUREA (Great Scarboro Lily)-Splendid Amaryllis-like flower; heautiful summer flowering plant. 1s. to 1s. 6d.

WATSONIA—Long spikes of flowers, reseming Gladioli. A collection of 7 very fine bling Gladioli. varietics, 6d. each,

ZEPHYRANTHES CANDIDA (Lily Daffodil)-Large, silver-white flowers. 1s. each.

CARINATA-The finest of the genus, deep rose colonr. - 1s.-TREATI—White slightly tinged with roso 1s.

TUBEROSE (POLIANTHES).

CULTURAL DIRECTIONS.—Pot into 4's, place in 65 degrees temperature, hottom heat; keep moist until roots have made a growth, then increase temperature from 70 degrees to 80 degrees. When full of roots, re-pot into 6-inch pots, and place near the glass; after bloom spike appears, place them in a cooler honse; train np under the glass. They must be well syringed, and amply supplied with liquid manure.

AMERICAN (Double)—For choice huttonhole houquets, &c., no other flowers are of more value at all seasons than the Tuberose, and should he used in succession in every forcing-house during the winter. 2s. per doz.

AFRICAN (Double)—Direct from the Cape; have bloomed heautifully with ns all the summer, and can highly recommend them.

Started in pots, 4s. per dozen. Fine dry Bulbs, 2s. 6d. dozen.

FERNS AND FERN CULTURE. By J. Birkenhead. 1s.; post free, 1s. 3d.

THE GARDENERS' CHRONICLE, 29th May, 1897.

Begonias.—Messrs. H. Cannell & Sons had a splendid group of Begonias, the double-flowered varieties strongly predominating. The habit of the strains is decidedly good, the colours of the flowers very bright, and their size and substance all that could be wished. Many named varieties are of exquisite description.

THE JOURNAL OF HORTICULTURE, 27th May, 1897.

Double Begonias claim a special word of praise, many of the varieties being exceptionally fine.

THE GARDENERS' CHRONICLE, 29th May, 1897.

LIST OF AWARDS. - Silver Cnp to Messrs. H. Cannell & Sons for group of Begonias

HALF-AN-HOUR WITH CACTACEOUS PLANTS.

PRACTICAL HINTS ON THE CULTURE OF CACTI,

The members of the Cactus family in general possess a peculiar attraction which no other of the vegetable kingdom can boast. Their point of attraction does not lie alone in beauty of flower, but in their queerly shaped, oft times grotesquely distorted stems, which in some instances are closely covered with a network of fine hair-like spines; in others the spines are formidable, either erect or depressed, and are often found to attain the length of four inches. The variation of colour in the blooms of Caeti is rivalled by that of their spines, the stems of some varieties are blue, others range through different shades of green, and some are even black. Then, still again, many species after flowering present us with a lavish display of brightly coloured berries through various shades of colour ranging from white to crimson. Some of the magnificent blooms are delightfully seented, and many remain open for a considerable period, while others again only expand for a few hours and then droop and wither. The flowers of some varieties of this peculiar family of plant life expand only at night time, when their appearance is always hailed with delight by every true lover of flowers. Thus it may be seen at a glance that this unique family, by presenting so many striking attractions, responds in a most worthy manuer to a comparatively small amount of eareful attention, and is undoubtedly an unlimited source of interest from year's end to year's end. The popular taste in this direction of floriculture, after lying dormant for something like half a century, is gradually but surely awakening to the varied beanties of succulent plant life, and to our mind the interest once aroused will not easily flag. Gardeners of the present day, amateur or otherwise (with but few exceptions), are not fully awake, unfortunately, to the amount of pleasure and interest which this class of plants can command if properly treated. It seems to be a common idea that Cacti only bloom at very indefinite periods. This is quite erroneous. If by our lamble efforts we are successful in raising in the reader's mind a desire to peuetrate and examine for himself the mysterics of Caetus culture, which will cause him to procure a small, carefully-assoried representative collection of the plants in question, he will be amply rewarded for his ontlay of money and time by a wealth of gorgeons bloom from January to December. To give an idea of the average quantity of bloom carried by these plants under proper treatment, a well-grown plant of the genus Epiphyllum, in a 5-inch pot, will earry 100 blooms or more; a correspondingly good specimen of the genus Phyllocaetus, in a 7-inch pot, will in its season annually present us with from 60 to 70 magnificent flowers, each of which measuring from 8 inches to 1 foot in diameter, according to the variety. Another charm associated with these curious plants is the vast amount of interest which, with a comparatively small amount of trouble, can be aroused from the process of grafting one variety on to another of a different genus. This operation, when nicely performed, will result in some most peculiar productions. It is resorted to not only from a love for the grotesque, but for the reason that some weak-growing sorts are liable to rot off at the base during the period of our usually foggy, damp winters. These, when grafted on to a variety of stronger growth and habit, will grow away without showing any signs of decay. The amateur, as a rule, has but little time to devote to the requirements of his floral pets, and with this fact in mind we may confidently assume that no plant other than a Cactus will so well repay the small amount of labour expended on it by its grower. For want of space we are debarred from giving any cultural notes in these pages other than a mere synopsis of the general requirements of the family. A word on propagation at this stage will no doubt go far to convince the reader of the simple requirements of the Cactus in that respect. Propagation may be effected, according to the genns to be operated upon, by both seeds, cuttings, and decapitation, or by detaching the young growths from the parent stock. This is an exceedingly interesting branch of their culture. The peculiar natural construction of the stems of Cacti enables them to live for an amazing length of time without water—in fact, the plants constituting some genera do not require any water at all from the middle of antumn until the following spring. This fact aloue should commend them to the attention of amateurs. They appeal also to the gentler sex by reason of the adaptability of many varieties to culture in window cases. Those varieties which are nearly hardy in this country are very interesting when well grown, a nice assortment of them planted on a sunny rockwork forming a very attractive subject. The elimbing varieties are suitable for training over the back walls of heated glass structures, and grown either in that manner or twined round supports or posts form a refreshing feature from the monotony of more commonly cultivated plants. The fact that the plants which form the subject of these pages are children of the tropics must be borne in mind at every stage of their cultivation in this country to ensure, as nearly as possible, those genial surrounding, and natural temperature There are altogether some 800 varieties of Cacti, duly which they enjoy in their habitat.

arranged in about 14 genera, and the only way to arrive at snecess in their cultivation, without trusting to chance, is to write to a worthy unrseryman who makes a specialite of these plants, advising him of your facilities for culture, and leaving entirely to his discretion the selection of such varieties as he considers are suited to your requirements. To those readers who intend forming a collection of Cacti or succulent plants, large or small, we say, write to Messrs. H. Cannell & Sons, the well-known horticulturalists of Swanley, Kent, who are reputed to possess the largest collection of these quaint plants in England. It may be a matter of passing interest to some readers to know that the horizon of course writing of Course a matter of passing interest to some readers to know that the herries of some varieties of Cactus are used in medicine as remedies for bilions and other complaints, also that earmine colonring matter is extracted from the Coccus or cochineal insect, which subsists upon the Nopalia or Opuntia cochinellifera. The Saguarro or Cereus giganteus is the largest known species, often in its habitat (Mexico) attaining a height of 80 feet and more, whilst the smallest specimens of the entire family are found in the genus Mamillaria. As a help to those undertaking the culture of Caeti in this country, to enable them to fully grasp the natural requirements of the different genera, it will be as well for them to know that the species of the genera Epiphyllum, Phyllocactus, and Rhipsalisure wholly or mostly epiphytal—that is, they grow naturally upon the trunks and stems of various tropical trees, mostly depending for their food upon the hunid atmosphere which pervades the districts in which they are found. The fruits of many varieties are edible. The buds of such gooseberry), Opuntia tuna (the prickly pear), and O. fieus indica (the Indian fig) are either eaten in their raw state or converted into or mixed with jellies, sonps, &c. From the different genera of Cacti ve pass to that class of allied plants—viz.; the Sucenlenti. These plants are quite as interesting, and as or more diversified in form, as Cacti—in fact, with the uninitiated the whole class is one. Converted procedure when we have the converted first or the converted first or the class of allied plants—viz.; the Sucenlenti. class is one. Generally speaking, when we hear a person descant upon the aspect of his Cactus, eertain doubts arise in our mind as to whether the plant in question is a Cactus or not. In most cases it is not. The idea seems to be firmly imprinted upon the mind of the unateur that any plant approaching to oddity of form and peculiar habit must of necessity be a Cactaceous plant. Consequently, they administer that starving treatment to them, in conjunction with true Cacti, the bad appearance of which, consequent upon such innatural treatment, they soon begin to assume. The bumau eye tires of such ordinary plants us are commonly met with both in our stoves and greenhouses and in outdoor gardening, and gratefully appreciates anything appertaining to the rare. Such plants as these are the subjects of our present remarks, und most striking effects can be arrived at in the garden beds by the judicious intermingling or dotting about of a few choice succulents. Dotted here and there, on inverted pots or otherwise, in the stove or greenhouse, they form centres of attraction, and by drawing personal attention to themselves help by contrast to illuminate the splendonr of their floral neighbours. For planting in window boxes, as specimens in vases or tubs, as centres or edgings to beds upon the lawn, dotted in and out amongst rockwork, or to form lines—or, in fact, any floral design in carpet-bedding—they are invaluable. An interesting feature of the cultivation of succulent plants is their freely disposed habit of propagation. As with many species of the Globular Cacti, which obstinately refuse to produce offsets, propagation may readily be effected by cutting out the centre of the plant, or by carefully detaching a ripened leaf from either the plant or flower stean, which will strike with certainty if laid upon silver sand, the leaf base gradually swelling until the small plant appears. Has the reader ever tried this interesting experiment with leaves of Begonias, Chrysanthemams, or Colens? That enrious plant Bryophyllum calycinum possesses perhaps the greatest peculiarity in this momer of propagation, the young plants being produced all round the parent leaf. The quaint plant known as Mesembryanthemum tig; inum is frequently mistaken for a Coctus; it is an interesting plant, much resembling a bunch of tigers claws. The habit and general appearance of this curious plant is very different to that of the rest of the genns. They are generally natives of South Africa. Various salts are obtained from the leaves of the plants constituting this genus. The fruits of Mesembryanthemum edule (the Hottentot fig marigold) are eaten with gusto by the Hottentots; but to our palates they appear mawkish, as do the fruits of Cacti. A regular trade is carried on by the natives in the troples where the so-called Ice Plant, Mesembryanthemum crystallinum, abounds in the soda which they obtain from the burnt ashes of the plants. Several varieties of the Sedums are edible, and are looked upon in the light of luxuries by the natives who are lucky enough to find them. Another curious succellent is the one known as Sempervivum arachnoidenm. A well-grown specimen of this plant is always attractive by reason of the peculiar closely-woven web with which the rosettes are covered. The juice extracted from the leaves of many of the Sempervira (honse leeks) is very efficacious in various skin disorders. It has the tendency to allay itching, and it is also used by travellers and untives alike as a dressing for wounds. No collection is complete without a specimen of Stapelia. These plants are quaint alike in stem and flower, and are good subjects for planting in hanging baskets in the stove or greenhouse. The flower produced by a Stapelia is veritably a curiosity amongst curios. It is most strangely marked with various colours, in some varieties measures as much as seven or eight inches in diameter, and in many

(211)

instances exhales a most feetid odonr which has carned for it the name of the Carrion flower. A most welcome sight is some nicely grown bushy specimens of Rockea falcata, a choice winter-flowering plant. This species is almost as deliciously scented as a tuberose. Another good winter-flowering plant is Crassula lactea—a good healthy plant in a 5-inch pot should carry eight to nine trusses of bloom. We must not omit a word in favour of the Echeveria, which in its varieties Metallica or Funcki makes handsome specimens for greenhouse or conservatory decoration. Of the Echeverias alone there are more than 20 varieties known. The cut blooms from some varieties—Globosa, Secunda, and Secunda glauca—are very much admired when used in conjunction with others for table decoration. Thus it will he seen there are many varieties of sneculent plants to select from to flower at all periods of the year, and to please the most critical eye and fastidious taste. So having accomplished our task, we will conclude by wishing the reader all success in his experiments with these enriosities of nature.

They do not require much attention, and thus providing ample time for admiration

A photographic view of the entrance to our 150-ft. house, filled entirely with this family of plants.

(212)

CACTI.

Silver Medal awarded for our collections at the International Horticultural Exhibition.

Many of our specimens are now getting large and give a noble appearance. Our house of them alone is worth the journey to Swanley.

LECTION OF BEDDING PLANTS FOR THE DECORATION OF THE FLOWER GARDEN ON AND AFTER 20th MAY.

For the convenience of persons who have not the time to make their own selections, we beg to say, in the first place, our whole attention is devoted to this branch of Horticulture; and as we have all kinds of new and best bedding plants as soon as they are out, and propagate them in large quantities, and only the very best older varieties are allowed to remain in our nursery, we have good reason for saying they will include plants that cannot be equalled by other florists.

Best Collection, comprising 250 Plants, left to our selection, for 50s. ; half the quantity for 25s. ; quarter the quantity for 14s.

They will consist of Plants emhodied in this Catalogue. Packing, 4s., 2s., and 1s. 6d., according to Collection.

N.B.—All kinds of bodding plants will be considerably lowered in price after the 1st of May. A List, and special arrangements for large quantities, on application.

COLLECTION OF PLANTS FOR THE DECORATION OF THE CONSERVATORY.

100 Showy Plants of our selection from this Catalogue for 35s.

If this Collection is shifted into larger pots as soon as received, and with the ordinary amount of attention, they will make a grand display through the scason. They will be packed as closely as possible, so the cost of the carriage will be but trifling. At this cheap rate all orders must be accompanied with the amount. The Collections will be sure to give satisfaction.

FOR GREENHOUSE DECORATION AND FOR CUT FLOWERS,

We have an almost unlimited supply of the following Flowering Plants to offer at the proper seasons, in pots full of flower, or coming on.

BOUVARDIAS—In great variety.

15s. per doz. BULBS-Dutch, in great variety.

Catalogne CALCEOLARIAS. 12s. to 18s. per doz. 12s.

CARNATIONS, TREE-In variety.

to 18s. per doz. CINERARIAS. 6s. to 18s. per doz.

CYCLAMEN PERSICUM-In variety. to 18s. per doz.

DEUTZIAS. 9s, to 18s. per doz. DIELYTRA. 12s. to 18s. per doz. GLOXINIAS. 12s. to 24s. per doz.

LILY OF THE VALLEY (Convallaria)-Strong; imported. 6s. to 18s. per doz.

PELARGONIUMS-Forcing. 12s to 24s.

PINKS—Forcing, in variety. 6s. per doz. PRIMULA—Double white. 12s. to 24s, per

PRIMULAS-Single varieties.

per doz. ROSES-6 and 7-inch pots.

per doz. ROSES, TEAS-6 and 7-inch pots. 36s., and 42s. per doz.

SOLANUMS-Full of herrics. 12s. to 18s.

SOLOMON'S SEAL (Polygonatum)-Good strong crowns; useful for forcing. 4s. and 6s.

per doz. SPIRÆA JAPONICA. 6s. to 9s. per doz. ZONAL PELARGONIUMS - Full of flower. 12s., 18s., to 24s. per doz.

HOW TO MANAGE PLANTS, ROOTED CUTTINGS, AND SEEDLINGS SENT BY POST.

HERE persons have the convenience and sufficient experience for nursing small plants, and enjoy seeing them grow, we strongly recommend their beginning. is taken to grow them in such a temperature, &c., that there is no risk about their doing well with a

small amount of ordinary earc, if the appended instructions are carefully followed.

It must be remembered that plants are like young children; they must be carefully looked after, fed, elothed, and trained in the way they should go, and a little common sense exercised to ascertain their requirements, and to guard against enemies. And should they be forgotten, and get with others of bad character, it is surprising how quickly they will partake of the same habits and disease, and will soon die in sorrow and disgrace. A sweet-smelling hot-bed rather on the decline is preferable, with the heat at ahout 65 degrees. When you receive a box of rooted cuttings or plants immerse them in water at the same temperature from one to two hours. When they are all refreshed, proceed to pot them into small pots, using piec, warm, sandy soil. See that the roots are seplated and spread naturally out in the soil without injuring them, pressing the soil firmly. Place them in the frame, keep them shut close for a few days, be careful of damp, and admit air as they get established. Let

them be slightly dried each day, but do not allow them to flag from too much air or sun. And if a person possesses a stove, or even a warm greenhouse, there is no more difficulty in getting them to grow under an air-tight hand-glass or wooden box with the top covered with glass, than those of their own striking or raising.

AZALEAS, 2s. 6d. and 3s. 6d. each.

HARDY GHENT AZALEAS. 24s. and 30s. per doz. AZALEA MOLLIS—In variety. 18s., 24s., and 30s. per doz.

RHODODENDRONS—Best whites, scarlets, &c., unusually well set with bloom buds, 24s., 30s., 40s., and 50s. per doz.

CAMELLIAS.

Price, 14 inches high, 2s. 6d.; 18 inches, 3s. 6d.; 24 inches, 5s. each.

NEW YEAR'S PRESENTS OF SPLENDID PLANTS

JUST COMING INTO FLOWER.

We have some thousands of winter early-blooming plants.

HYACINTHS, strong, in 5-inch pots. 10s. per doz.

TULIPS, strong, 3 and 4 in a pot. 9s. per doz.

CROCUS, full of roots. 8s. per doz.

NARCISSUS, double. 8s. per doz.

LILY OF THE VALLEY, very strong. 9s. per doz.

CINERARIAS, showing flower. 9s. per doz.

PRIMULAS, showing flower. 9s. per doz.

CYCLAMEN, heautifully coming into flower. 12s. to 18s. per doz.

CALCEOLARIA. 9s. and 18s. per doz.

DUTCH AND OTHER BULBS.

The finest and cheapest, and we hope our patrons will favour us with their orders—we are sure the Bnlbs will give every satisfaction.

Our Autumn Catalogue of all the most useful Bulhs and Winter-flowering Plants, with reduced prices of New and other Plants, ready and posted to all customers in September. Should any fail to receive it, please send us a post-card.

All through the autumn, winter, and spring, a large quantity of Flowering Plants, &c., always kept ready for immediate effect for all purposes.

CUT FLOWER DEPARTMENT

(PRIVATE TRADE ONLY).

Have your Cut Flowers direct from us, the ACTUAL PRODUCERS, you thus effect a great saving. We have erected a large and spacious building for the reception and making up of Flowers. All kinds, large or small quantities, even to a 9d. (post free) button-hole flower, are regularly sent by post to all parts of Europe.

The advantage, in both price and freshness, in having them direct from the actual growers is something considerable, particularly as a Post Office official meets five trains per day from Swanley at Holborn, and immediately conveys postal matter to the Chief Office.

Wedding and other Bouquets from 7s. 6d. upwards; Wreaths from 10s. 6d. upwards; and Funeral Crosses from 10s. 6d. upwards. Loose Flowers, also Foliage and Ferns for Table and other decoration.

Orders for Cut Flowers from 2s. 6d. upwards can be sent by Letter or Parcel Post.

Boxes of mixed Cut Flowers, with Ferns, sent daily to all parts of the United Kingdom, 2s. 6d., 5s. 7s., and 10s.

PERFECT MUSHROOM SPAWN.

Having every facility, and to be quite sure that nothing but the best shall come from us, we collect samples from all sources where manufactured, immediately test which is the best, and purchase largely; consequently, all our customers succeed, most of them far above their expectations. At this moment we have a large stock, and beyond all question the finest ever offered.

Per brick, 6d., postage 4d.; per peck, 1s. 6d., postage 9d.; per bushel, 5s.

"A Practical Treatise on the Cultivation of Mushrooms," by J. Wright, F.R.H.S.

Price 1s.; post free, 1s. 2d.

We can confidently recommend the above as a most safe and effectual remedy.

What a lovely refreshing fruit! And when we hear it is the firm belief of the highest in the medical profession that if we were to eat more we should hear less of gout, rheumatism, and other pains; seeing how easy Strawberries are to grow, it should be the set determination of all to cultivate their own, and have them with all their heautiful freshness, morning and evening, as long as possible. When so, they are one of the greatest charms and benefits that mankind can possess.

NEW VARIETIES.

LEADER.

First-Class Certificate from the Royal Horticultural Society, May 14th, 1895.

An enormous handsome mid-season Strawberry of rich Pine-like flavour. The fruit is of enormous size, of a bright crimson or carmine shade of colour, flesh and skin firm, and of a dark scarlet tint throughout, the seeds set in shallow basins projecting beyond the surface, the fruit travelling well—flavour very rich and Pine-like, with a pleasant aroma; plant very compact in habit, and a robust grower. The variety was raised from Latest of All crossed by Noble. For forcing purposes Leader is likely to be in great request, for which purpose we recommend it to follow Royal Sovereign. It forces very freely, the trusses setting well, with little if any artificial fertilisation, and its compact habit is a great point in its favonr.

Strong Plants in Pots, 25s. per 100; 4s. per dozen. Strong Open Ground Runners, 15s. per 100; 2s. per dozen.

MONARCH.

First-Class Certificates from the Royal Horticultural Society, June 11th, 1895; Royal Botanic Society, June 11th, 1895; and York Gala, June 19th, 1895.

A most distinct richly-coloured second early variety of enormous size, wedge-shaped, and of a rich Queen-like flavour. A worthy companion to Leader, ripening before that variety, and following closely on Royal Sovereign.

Strong Plants in Pots, 25s. per 100; 4s. per dozen. Strong Open Ground Runners, 15s. per 100; 2s. per dozen.

OF GREAT VALUE FROM THEIR LATENESS.

SCOTCH VARIETIES. NEW

Raised by WM. CARMICHAEL, formerly Chief Gardener at Sandringham.

QUEEN OF DENMARK-Raised from Frogmore Late Pine crossed with Waterloo. It is new in colour, firm in flesh, very prolific, and A1 in flavour; it has every indication of becoming the Strawberry of the future for forcing and general culture; a genu.

RICHARD GILBERT—In the way of Royal Sovereign, but finer fruit; grand.
WM. CARMICHAEL—Very distinct; immeuse strong stems, throwing its fruit well above the foliage; of very fine flavour.

Hand Laid Runners, 12s. per dozen; £5 per 100.

A. W. HAYDEN, Esq., Vinings Cottage, Sandown, I.W., August 8th, 1897. I am pleased to tell you I received the Strawberry plants quite safe this morning, they arrived in splendid condition.

William Carmichael's Royal Seedling Strawberries.

5th July, 1896.

Dear Mr. Carmichael,—The Princess desires me to thank you very much for the delicious Strawberries you were so kind as to send her, and the Princess is very proud that they should be called by her name.—Yours very truly, CHARLOTTE KNOLLYS.

12, Fettes Row, Edinburgh, 25th July, 1896.
Mr. D. T. Fisu says:—Having recently resided in Edinburgh, I have had many opportunities of seeing these Strawberries grown, and of testing them in Mr. Carmichael's private garden at Warriston Park, and have much pleasure in bearing the following testimony to their merit:—

PRINCESS OF WALES.

Latest of All crossed with Frogmore Late Pine. Full size, dwarf habit, fine Queen flavour, excellent constitution.

PRINCE OF WALES.

Waterloo crossed with British Queen. Larger size, rich flavour, Queen foliage, dwarf habit, very prolifie, not so dark as Waterloo, vigorous constitution; one of the very best late Strawberries.

Runners, Price 4s. per doz.; £1 10s. per 100.

PERFECTION (Veitch).

The result of a cross between British Queen and Waterloo, fruit of large size and deep colour, the flesh is juicy and luseious, of British Queen flavour; very prolific. First-Class Certificate, Royal Horticultural Society, July 14th, 1896.

Plants, in Small Pots, 6s. per doz.; 42s. per 100. Strong Runners, 4s. per doz.; 21s. per 100.

STEVEN'S WONDER.

Said to be the carliest variety in cultivation, and very prolific solid fruit; good flavour, high perfume, grand forcer. Awarded First-Class Certificates, 1895.

We are pleased to be able to state that everyone who has grown this early variety pronounces it to be the best for earliest forcing.

Strong Plants in Pots, 20s. per 100; 4s. per dozen. Strong Runners, 4s. per 100; 1s. 6d. per dozen.

ROYAL SOVEREIGN.

CERTAINLY ONE OF THE BEST IN CULTIVATION.

This variety has now been grown and tested and subjected to all kinds of conditions and seasons, and has fully confirmed everything previously said of it, so that it is now universally admitted on all sides to be the best introduction since $Sir J.\ Paxton$, and should be extensively planted in every garden, totally setting aside many of the older kinds which we have discontinued growing.

Small Runners, 3s. per 100. Fine Selected Runners, 4s. per 100; 12s. per 1,000; small rough, 8s. per 1,000.

Fine Plants in small pots, 15s. per 100. Fruiting Plants in large 5-inch pots, 30s. per 100.

ALL THE BEST OLD STANDARD VARIETIES.

AUGUSTE NICAISE—Fruit of this variety has been repeatedly shown in fine condition.

BICTON PINE—Conical shape, white fruit; distinct; large. 3s. 6d. per 100.

BRITISH QUEEN—The best-flavoured fruit in cultivation, should be grown in every garden.

5s. per 100.

(222)

COMPETITOR—Very large; splendid Strawberry.

COUNTESS (Dr. Roden)—Large second early; fruit good colour and flavour, of handsome cockscomb shape. First-Class Certificate from the Royal Horticultural Society.

COUNTS—A really good old variety; does splendidly in our fields, and produces enormous crops.

DR. HOGG-Similar to British Queen; fine variety; should be tried everywhere,

DUKE OF EDINBURGH—Large, handsome; deep crimson; juicy. ELTON PINE—One of the best late varieties in cultivation.

EMPRESS OF INDIA-(New) good flavour; bright searlet; requires good culture.

KEEN'S SEEDLING—Oue of the best for forcing and small gardens.

LA GROSSE SUCREE—Sweet flavour; one of the best for forcing.

LATEST OF ALL—As its name denotes, it is several days later than most varieties; free; fruit large; good cropper.

LAXTON'S No. 1—Very early; an improvement on Noble.

LORD SUFFIELD—(New) rich flavour; free and large.

PRESIDENT—One of the best; a general favourite for all purposes.

SCARLET QUEEN—Very attractive; Queen flavour; a favourite with many.

SIR CHAS. NAPIER-One of the very best for forcing.

SIR J. PAXTON-This is the variety so popular throughout Kent for field and market. Special prices for large quantities.

VARIEGATED—Beautifully white variegated.

VICOMTESSE H. DE THURY (syn. Garibaldi) - Although small, it is one of the best in cultivation to answer all general purposes, soil, and climate. 3: 6d. per 100.

WATERLOO—The darkest coloured fruit of any, and for dessert indispensable.

Rooted Runners from fruiting plants, all best rooted and picked, 4s. per 100; selectel, 5s. per 100, except those priced. In small pots, to fruit the first season, 12s. to 14s. per 100; in 5 and 6-inch pots, for forcing, 25s. to 40s, per 100.

Special Prices per 1,000, 50,000, and 100,000.

We cut off all fruit trusses of our plants when in flower, so as to induce early strong runners and make plants more fruitful. This alone makes what we supply nearly as good again as from any other firm.

HAUTBOIS AND ALPINE STRAWBERRIES.

ALPINE WHITE.

COMTESSE DE FRETIAKOFF-A good cropper.

CRIMSON GALLANDE.

HOLLOND'S GLORY.

ROYAL HAUTBOIS-An immense eropper good of its kind.

TRIOMPHE D'ORLEANS-Large

Hautbois.

3s. 6d. per 100; 6d. per dozen.
Other named varieties supplied at current prices.

RASPBERRIES.

NEW VARIETY,

SUPERLATIVE-This kind, like Royal Sovereign Strawberry, for all garden and general purposes, by its constitution, freeness, large fruits, and excellent flavour, stands at the head of its family, and is a real acquisition.

Per dozen, 2s. 6d.; post free, 3s. Extra strong, 5s. per dozen. Price per 100 and 1,000 on application.

SUMMER-FRUITING KINDS.

CARTERS' PROLIFIC—Large; red; a splendid kind; requires the ground well prepared and manured, otherwise it soon dies out. 2s. per dozen, 10s. per 100, 40s. per 1,000.

FALSTAFF—Large; red; well flavoured; vigorous; very prolific. 2s. per dozen.

HORNET—Large; red; first class. 2s. 6d. per dozen.

NORTHUMBERLAND FILLBASKET-Large; red; strong grower and abundant bearer.

2s. per dozeu, 16s. per 100.
NORWICH WONDER-Of strong growth, fine fruit; a capital variety. 1s. 6 l. per dozen, 8s. per 100, 30s. per 1,000.

WHITE ANTWERP—Very sweet; useful for dessert. 1s. per dozen, 8s. per 100.

Prices and sample for large quantities on application.

NEW KINDS.

BAUMFORTH'S SEEDLING—An improved Northumberland Fillbasket; one of the best. Planting canes, 2s. 6d. per doz., 15s. per 100. Fruiting canes, 4s. per doz., 21s. per 100.

LORD BEACONSFIELD. KEIGHLEY QUEEN. LORD BERESFORD. PRINCE OF WALES.

Prices on application.

AUTUMN FRUITING AND YELLOW VARIETIES.

BAGLEY'S PERPETUAL-Red; prolific; very good Autumu bearer.

BELLE DE FONTENAY-Red; late fruiting. 1s. 6d. per doz.

GOLIATH-Dark red; fine fruit; prolific.

GREGG-A black variety of excellent quality; a great bearer; very hardy. 1s. 6d. each.

MERVEILLE DES QUATRE SAISONS (Yellow, October) - Freely producing fruit up to November; large and fine.

MERVEILLE DES QUATRE SAISONS ROUGE (Red, Ootober)—Large bunches of fruit till November. 1s. 6d. per doz.

NOIR D'AUTOMNE-Large, almost black; juicy, good flavour. 1s. 6d. per doz.

PERPETUAL DE BELLARD-Red; as large as Hornet; a good perpetual sort.

QUEEN OF THE MARKET-Red; vigorous grower; very prolific.

ROUGE D'ANVERS-Very large, conical; dark red; rich and juicy; early.

SURPRISE D'AUTOMNE-Much larger than the old Yellow October; good; free.

THE VICTOR—Red; vigorous; perpetual bearer; very prolific.

VICTORIA-Yellow; prolific.

YELLOW THORNLESS-1s. 6d. each.

4s. to 6s. per dozen, 30s. per 100,

BLACKBERRIES.

CUT-LEAVED (Rubus laciniatis)—Strong grower; bears fine clusters of large and rich-flavoured fruit, lovely to eat, and make splendid jam or jelly; also a very ornamental climber; one of the best. 1s. each, 8s. per doz.

WILSON JUNIOR—A fine large-fruited variety. 1s. each, 5s. per doz.

CHILD'S EVER-BEARING TREE. CRYSTAL WHITE. ELDORADO. ERIE. KITTATINNY. LOVETT.
MAMMOTH.
MAXWELL.
NEWMAN'S THORNLESS.
OHMER.

1s. 6d. to 2s. 6d. each.

RATHBUN.
SNYDER.
TAYLOR'S PROLIFIC.
THE LAWTON.
WILSON'S EARLY-

FILBERTS AND

CANNON BALL.
CROSS HEAD PROLIFIC.

FRUIT TREES OF ALL KINDS.

(224)

NDERFUL A1 REAL

TREBLE YOUR PRODUCE.

For GREENHOUSE PLANTS, FOLIAGE and POT PLANTS, ROSES, VINES, FRUIT, FLOWERS, and VEGETABLES.

Double production of everything is obtained by using it. Nothing is so important in every part of the garden as two or three applications during the season. It gives more than satisfaction to whatever it is applied to, and in most cases trebles the size, making the whole garden the treasure of one's life. A 1-lb. tin will show its effects and guarantee its general use.

1-lb. tins, 1s., per post, 1s. 4d.; 3-lb. tin, 2s. 6d., per post, 3s.; 6-lb. tin, 4s. 6d., per post, 5s. 3d. In bags—14-lbs., 7s.; 28-lbs., 12s. 6d.; 56 lbs., 23s.; 1 cwt., 42s.

DIRECTIONS FOR

FOR LAND IN GOOD CULTIVATION AND GROWING CROPS.—Three-quarters of an ounce to the square yard, one and-a-half hundredweight to the acrc. Mix with treble its quantity of fine, slightly damp soil, and scatter it regularly; you can see to a line how far it has been put.

FOR POOR LAND AND POTATOES.—Three to four hundredweight to the acre. FOR POTTING.—One ounce to the bushel of good compost, and thoroughly mix. Tor Dressing.—Two ounces to a bushel of good soil.

LIQUID MANURE.—Half ounce to a gallon of water, and jucrease it a little twice a week until the plants are well in flower. On each occasion pot or water two or three without the Real Manure, and watch the difference; it will show one way to get money, and the other to lose it.

J. Crake, Esq., Loddon, August 23rd, 1897. I have proved your Real Manure to be a very powerful stimulant. I tried it on Cauliflowers, Celery, Onious, and Tomatoes with splendid results. I have some beautiful flowers at the present time from your seed.

Dr. Maclogalin, Cloughjordan, Co. Tipperary, April 5th, 1897. Please send 14 lbs. Real Manure; it is the best in the world.

Mr. A. Cawson, Flaxman Road, Camberwell, S.E., May 20th, 1897. Your Real Manure is the mannre par excellence.

Miss Molineux, Kempsey, nr. Worcester, June 1st, 1897.

Miss Molineux considers the Real Manure the best she has ever tried.

Mrs. W. Stedman, Penolver Cottage, Beddington, Surrey, July 1st, 1897.
Please send me another tin of Real Mannre. The other gave great satisfaction, as every thing I have had from you has done. All my friends say what grand flowers I have, and I tell them I had them from you.

Mr. Walter Rhymes, The Gardens, The Chestunts, Shrbiton, June 30th, 1897. I must say your Real Manure is the best I ever used for plants and crops.

Miss Dennis, Eadestown Lodge, Baltinglass, May 8th, 1897.
I have dressed a plot of strawberries with your Real Manure, and it is incredible the improvement it has made in them, and the difference between them and another plot which have been in all other respects but this treated the same way.

BOUQUET WIRE (SILVER WHITE)

This Wire is of the finest quality, does not rust, consequently smooth and easy to work, no matter how long kept.

Stalk Wire in $\frac{1}{4}$ lb. packets (about 500 wires), two different thicknesses of wire in each. Price 6d. Fine $\frac{1}{4}$ lb. reels for binding, price 9d. Extra fine, 1s. per reel. Sent by post, $\frac{1}{4}$ lb., $2\frac{1}{2}d$. extra: under 1 lb., 3d. extra; 3 lbs., 6d. extra.

WE DON'T SAY THEY OWE US ANYTHING;

NOTWITHSTANDING, THEY HAVE APPARENTLY REMOVED FROM THEIR FORMER RESIDENCES.

H. CANNELL & SONS would feel greatly obliged if any readers, who may happen to know their present addresses (they used to reside at addresses given below), will kindly forward the same to them. They will gladly pay postage, &c.

CLAUDE E. BENNETT, Strelna, Atkins Road, Clapham Park, S.W.

JACOB ROSE,

261, Earlsfield Road, Wandsworth Common.

TOBACCO PAPER AND CLOTH FOR FUMIGATION.

Of our own manufacture, free from injurious properties to plants. For full particulars how to use it, and to exterminate the Green Fly, see Cannell's Art of Gardening, sent post free to customers. 1s. per lb.; 5 lbs., 4s. 6d.; 10 lbs., 8s. 6d.; 28 lbs., 25s. Postage extra.

MISCELLANEOUS ARTICLES, MANURES, GARDEN REQUISITES, &c.

TOBACCO POWDER-In tins, 1s. and 2s. 6d. each.

HUGHES' FIR TREE OIL-1s. 6d. and 2s. 6d. per bottle.

STANDEN'S MANURE-In tius, 1s. and 2s. 6d. each.

GISHURST'S COMPOUND—In boxes, 1s. and 3s. each.

FOWLER'S GARDENER'S INSECTICIDE—In jars. 1s. 6d. and 3s. each.

FOWLER'S LAWN SAND—For eradicating weeds, daisies, dandelions, &c., from lawns; very effectual. Tins, 1s. and 2s. 6d. each.

RAFFIA GRASS-For tying. 1s. 6d. per lb.

SHAW'S TIFFANY-In pieces, 20 yards long by 38 inches wide, per piece, 5s

GLOVES, PRUNING-Best, per pair, 2s. 6d., 2s., and 1s. 6d.

FUMIGATORS, APPLEBY'S-5s. each.

WOLFF'S SOLID INK PENCILS-For writing on wood. 3d. each.

WOOD LABELS—For flower pots (painted), in bundles of 100; per bundle, 4-inch, 8d.; 5-inch 10d.; 6-inch, 1s.

GARDEN NETTING, TANNED-2 yards and 4 yards wide, per yard run, 3d. and 6d.

THERMOMETERS—Boxwood. 1s. 6d. and 2s. each.

VERBENA PEGS-Per hox, 1s., containing one gross.

CLAY'S FERTILIZER, or PLANT FOOD-Packets, 1s.

HUGHES' APHICIDE-For applying insecticides on small plants, &c. The Aphicide is made so as to fit an ordinary bottle. Price 1s. 6d.

APRONS, GARDENERS', SHALLOON.—First quality, 4s. 6d. each.

GARDEN TROWELS-6-inch. 1s. each.

GISHURSTINE—For preserving gardeners' boots. In tins, 6d, and 1s.

SYRINGES-Patent Ball Valve, two roses and one jet, 17s. 6d. and 22s.

CAMPBELL'S FUMIGATING INSECTICIDE-8d., 1s., 1s., 3d., and 2s. 3d. each.

LETHORION CONES-6d., 1s., and 1s. 6d. each.

TWEEZERS-Ivory, 3s. 6d.; steel, 1s. 9d.

INSTRUMENTS—Complete set for dressing Chrysanthemums. 17s. 6d. and 21s.

CUCUMBER GLASSES -12-in. to 24-in. 1s. 6d. to 3s. each.

INDELIBLE INK-For writing on zine labels. 6d. and 1s.

SILVER SAND-2s. per bushcl.

SULPHUR-6d. per lb.

THOMSON'S VINE MANURE-20s. per cwt.; in tins, 1s.

FISON'S EXTRA CONCENTRATED FERTILIZER-23s. per cwt.; in tins, 1s.

INVENTIONS, ACHIEVEMENTS, &c., &c.,

BROUGHT TO LIGHT BY

Mr. HENRY CANNELL, F.R.H.S., M.S.A., R.A.S.E., H.M.C.A.B., SWANLEY.

Although I had no connection with the first-held Fruit and Flower Committees that met at South Kensington, nevertheless I regularly attended, and have now been a member of the Floral Committee of the Royal Hortienlural Society 25 years, and

as a proof I append the following extract:-

GARDENER'S CHRONICLE, 1862.—Dr. LINDLEY says: "Of Fuehsias an admirably grown collection was shown by Mr. Cannell. It consisted of medium-sized conical plants, every one of which nearly covered their pots with gracefully drooping branches laden with flowers. Than this group nothing in its way could possibly be more perfect, and it received, as it well deserved, universal admiration. Very much larger plants were contributed by Messrs. Webb, Gardiner, Harper, and Higgs; but as regards fine growth they were considerably inferior to those just mentioned."—Royal Hortienltural Society's Show.

Making it plain that I was busy in horticultural matters in those days. I was not only successful at the above Society's shows with my exhibits, but also previously at the Crystal Palace. Success there and in other similar places went far to secure me the appointment as chief gardener at one of the most important gardens in those days—Portnal Park—where all branches of horticulture were expected to be carried out to the fullest extent. A full knowledge of grapes, and, in fact, the art of the highest cultivation of everything, in those days of 1860 were entirely different to what they are to-day. The proprietor and myself differed over the vines in three vineries, so rootless were they that in sunny weather the foliage drooped as if they were in perfectly dry soil. However, soon afterwards I obtained an appointment where £1,000 had just previously been expended in vineries and vines, and to see the glorious growth of these young vines in the more modern constructed houses was indeed a treat to my eyes and heart. These light-admitting houses enabled me to grow some of the finest fuchsias yet seen in London. I carried off nearly £20 in prizes that year, and at three of the largest London shows.

At that time the "sample post" was introduced, so that merchants could send their samples to every shopkeeper, and I could foresee what a grand advantage and opportunity it would be to those availing themselves of it, and more especially how advantageous to send cuttings, rooted cuttings, and seeds to all parts of Great Britain. Many laughed at the idea, nevertheless I built houses and carried this mode of transit until perfectly successful to the farthest parts of the world, thus lessening cost of carriage immensely, and bringing floral treasures and seeds within the reach of all; and, after an elapse of two or three years, it was said by numerous patrons who had derived such great pleasure from it that the plants I sent by sample post did more real good for the spread of horticulture than anything else ever brought forward. I repeatedly arraigned the postal authorities respecting the parcel post; and the country have much to thank me, perhaps, for this coming as early as it did. This system gave another fillip to my business, and added much to the enjoyments of gardens and gardeners in remote parts.

(228)

In 1866 I issued my first catalogue, and in it appeared the following: - "Doctors have done away with the knife as much as possible; so must gardeners. Do not trim your vine-rods up every year as if they were rafters; if you do, prune the roots likewise, if not they will be sure to rot, and create all kinds of disease, and then you will wonder what is the cause of it. Out the top of an oak tree after it has been planted ten years, and keep it so for another ten years, and see if you can make it young and vigorous again." Immediately the editor of the Gardener's Chronicle (T. Moore, Esq.) saw this statement he wrote asking what I could say respecting it. I replied, showing the cause of the above-mentioned vincs being in such a wretched condition by hard cutting and restricted growth, and how they could be re-invigorated, and even made fruitful again, by adopting the extension or the natural system of vine This brought out the strongest and most animated discussion that ever appeared in the Gardener's Chronicle, and it brought to light many hidden or little understood facts. It showed grape growers the normal and correct system, and at the time I predicted it would reduce the price of 20s, per lb. down to 2s, or 3s,; and it has done so, benefiting the sick and poor. The latter price was then deemed ridiculous, but we have only to refer to the market prices to confirm the correctness of this prophecy. I afterwards issued 1,000 copics of the whole discussion in book form, and sold all except two or three treasured copies. All this has long since been nearly forgotten, and others have sprung into existence, claiming the system who know nothing about my discussion. There are not many now living that hold the honour of a first prize, as I do, for six splendid fuchsias from the first and only really creditable great International Horticultural Exhibition in 1866, held on the very site of the present National Museum, South Kensington.

The year after this I adopted the top system of heating—this is suspending the pipes from the rafters. In growing plants to the utmost perfection in winter it is invaluable, and in colder climates, such as North America, and on the Continent it is generally adopted, also at Kew and many other places. Indeed, so valuable is it considered that it is entered at the British Museum as a valuable invention. I soon afterwards assisted in bringing about the Pelargonium Society, which did splendid, useful work, and from which we are deriving britliant results up to the present day. I offered £5 for the best essay on the history of the Zonal and other Pelargoniums, and which was read in the old council room at South Kensington. Had it not been for the results of this, and the late Mr. Peter Grieve's paper showing the origin of the Golden and Silver Tricolors, this information would have been lost, or partly so, to the world.

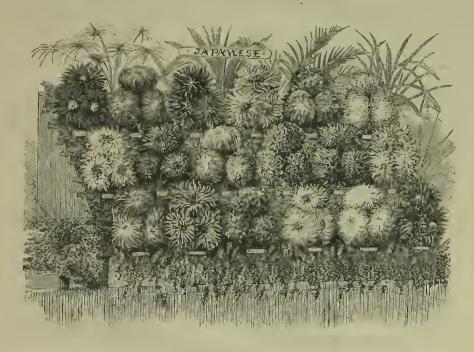

These I sell at 6d. each, post free.

I can also lay claim to putting forward the advantages of disbudding the Japanese Chrysanthemum (see my catalogues from 1867 to 1873). At that time they were considered poor, loose, unattractive flowers, not worth the attention of anyone. My work amongst the Chrysanthemums commenced in 1850. That year I visited the second show at Stoke Newington, and ever since 1 have grown and sold probably more than any other living person, and certainly raised and sent out some of the finest varieties in cultivation, having taken my lessons when visiting Messrs. Salter

& Forsyth.

I was the first to break away and set up cut Chrysanthemum flowers different to that of the show boards. The late Shirley Hibberd says as follows in 1884:—"At the last meeting of the Floral Committee, Messrs, Cannell & Sons showed a lot of cut flowers of all the sections mounted on green moss in the manner of roses. About nine-tenths of the cultivators of these flowers would find it impossible to follow the excellent example, but the practical lesson has its value, for if green moss is not everywhere obtainable there may be some suitable substitutes in the world that town

amateurs could seeme for the purpose. For the present we must jog trot with our green boards, and keep the long stalk in mind as a pleasant thing to dream about."

I was the first south of the Thames that took a prize for Chrysanthemums at the first show held at the Crystal Palace in 1858.

It was I in 1864 who first built model low span-roofed greenhouses, the most serviceably shaped houses, such as now feed the markets and the public. Particulars of these I issued in leaflet form containing diagram, and the size and length of every part, so that any amateur or nurseryman could build their own without asking a question, and the result was that you can see this exact form of greenhouse all over the country and America. This information I sold for 3d., and undoubtedly the world has been harmfirst to the convert of section 1.

benefited to the amount of several million pounds.

I established a nursery in 1864 on a bare and barren railway bank at Woolwich, and soon created a business that required all the room possible, and at last I had eight landlords and one landlady—often one is too much—and only occupied an acre of ground. Business still increasing, and to make a bold and successful move, in 1874 I leased 17 acres in the midst of the hop gardens at Swanley, at that time a place almost unknown, containing only half a dozen cottages. One 300-feet well served the village, and from which we had to obtain water. However, I soon prevailed upon the Water Company to extend their pipes four miles for me. After this the neighbourhood rapidly rose, shops and cottages were erected, and the whole surrounding districts became flourishing and busy. One postman came five miles and delivered all our letters, now it requires nearly 20 persons to do the business connected with our post office.

I was the first to suggest jam being made on the fields, or in close proximity to where the fruit had been grown. This was quickly adopted, and is now a gigantic business.

As popular as Dahlias were 50 or 60 years ago, for some reason they fell out of public appreciation for several seasons, soon after the Floral Committee was established at South Kensington, and only the late Mr. C. Turner and myself showed them, simply to let the public see we sold such flowers, and also to try and induce the world at large to appreciate them again more keenly. This we did, and agreed to write to the secretary of the Crystal Palace with a view to holding a show there, and also to found a National Dahlia Society. Mr. Flood Page met us, and discussing the matter, he very pleasantly said, "We shall be very pleased to give you every facility for holding a show," and offered us I think it was £50 towards expenses. This was the beginning of the great National Dahlia Society, and also how it came to be started.

At the Chrysanthemum Congress, held in the large vinery at Chiswick, I had the largest and finest collection ever exhibited in England at that time, and on that occasion I had on a board a dozen very fine blooms of Etoile de Lyon, which was

pronounced as a variety too large—not so to-day, however.

Dahlia, Single Paragon.—I well remember first exhibiting this. When carried before the Floral Committee, so great was the teeling against Single Dahlias that I heard afterwards it was only through Mr. T. Moore, a former editor of the Gardener's Chronicle, that this lovely flower was certificated. I had to encounter and contend against an enormous amount of prejudice; however, myself and the beauty of poor Paragon overcame it all, and the world has enjoyed it immensely. I also introduced and sent out Alba and Picta Formossissima, the former a fine white single, and to this day grown and highly valued. The Cactus class I was the first to exhibit and send out under the name of Juarezil. The very same variety is yet grown, its sprawly crab-like florets caused it then to be pronounced as utterly useless for the public taste; nevertheless I ultimately got it certificated as a curiosity. I have since raised a great number of seedlings, and introduced a great quantity of colours from it, and at this date England can boast of even a pure white, yellow, crimson, purple, and a host of various coloured kinds, so that at the present time we have many different colours, and all of the same attractive shape. Most of this work has been done by me, and the evolution of this flower has been wonderful, and should be rewarded; but unfortunately all horticultural work, even if as wonderful as the telegraph, falls flat and passes unnoticed when once obtained—all "'spect they growed, like Topsy."

For above 40 years I have been raising seedling Zonal Pelargoniums so as to improve that flower, and have succeeded to a wonderful extent. For 25 years I have been showing and proving that the Zonal yields more flowers and colour during three of the dullest and darkest months in winter than any other plant. Our exhibits all over Great Britain are said by everyone to be wonderful, and they always claim chief attraction, yet our judges pass them by as they do an "old hoss," although Mr. Fry, the oldest exhibitor, says "Our exhibits are wonderful." In France and Belgium they give gold medals, not a sham promise. Had I resided there instead of England, doubtless I should have had a just reward. Certainly not more than one in the trade has exhibited more regularly and more remarkable exhibits during the last 35 years than Cannell. The same may be said of introducing new and good

plants, too numerous to mention.

I can also lay claim without fear of contradiction to a good deal respecting the improvement of vegetables. My Pea English Wonder is pronounced the best dwarf early variety in cultivation, some going so far as to say we require no other.

In Potatoes Victory is unquestionably the best variety for the select table, and as much might be said of Come-to-Stay and National, and other species of vegetables, our exhibits being officially pronounced as "wonderful." Such a designation coming from the Royal Hortieultural Society, is, we believe, quite unprecedented.

Dukes, Earls, Lords, and several Seedsmen, have been for many years exhibiting vegetables before the same society and judges, nor do we believe they ever received such a high and honourable distinction as the word "wonderful," as officially set forth on the following facsimile post-eard, and which really speaks volumes—

SIR, ~

Oct 26 1897

The President and Council of the ROYAL HORTICULTURAL SOCIETY thank you for your exhibit at the Fortnightly Meeting of the Society on Tuesday last.

Yours very faithfully,

W. WILKS, Secretary

Remarks (If any)

muðuful Vegstables en Gilt Hnightvan hirda

This proves absolutely that my seeds are the best, as well as their produce, and also that Kent yields the best fruit.

In Primulas certainly none can approach me. I have been awarded more honours, medals, and certificates than all other firms put together. Nearly as much can be said of other flowers—as an instance, Asters. All our seeds formerly had to come from the Continent, otherwise it was quite thought they could not be good. We have now demonstrated most conclusively that not only is our Eynsford-grown seed superior in plumpness, but it is saved from the best selected flowers year after year; my exhibit of 3,000 blooms, consisting of all fine flowers in every section, showing that, instead of degenerating, they were much finer than the Continental. The same applies to my Ten-week Stocks. It is quite certain we grow better what is wanted, and thus keep thousands of pounds in the country which formerly went out to pay for seed imported.

Cannas only a few years back were positively condemned and considered almost next to useless plants, except for their foliage. I could see they might be improved by hybridization. A few such as Ehmanni 1 figured 12 years ago, others soon took the

same view as myself, and soon after Queen Charlotte gave the ideal of my prophecy. I immediately bought £50 worth of the raiser, and then another £25 worth. At the International Exhibition at Antwerp the raiser could only show his coloured plate; but in my exhibit, which was next to his, I had half a dozen lovely spikes. The King of the Belgians and all the nobility were brought to view these loveliest of all flowers in the whole show, and Baron Rothschild purchased two dozen plants at 15s. each.

When the Belgian gentlemen nurserymen, headed by Comte Kerchove, paid a visit to England to see the most important gardens, my nursery at Swanley was the very first establishment selected to be visited. I hospitably entertained them to luncheon, and organized a conversazione, and also conducted them through my great fruit-growing district, and for this they conferred on me the Honorary Membership of the Cercle d'Arboriculture Belgique.

Flower Pots.—It was I who in 1865 had made specially by Mr. Gates, of Plumstead, the deep nearly upright rimless pots, ever since—and always will be—ealled "Long Toms." This set the correct shape to all the world.

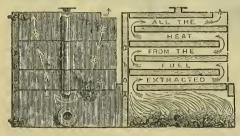

It was I in 1858 who first began wiring flowers, so as to make choice and refined bouquets. It is owing to me for what is seen in shows and all shops; it was never before mentioned, and it is not much good talking about it now the world has had the benefit.

However, I innocently gave the world the full benefit of all my inventions and modes of operation for the true spread of horticulture. I well remember how in 1865 I was laughed at by all the great hot-water engineering firms for making pipe-joints with common Portland cement (costing next to nothing and lasting for ever). Those that ridiculed it most adopted this method three years afterwards, and this alone makes the horticultural world indebted to me. Before that every joint cost from 1s. to 2s., now they are better made for $1\frac{1}{2}d$.

I wrote and published the first Allotment and Small Holdings Guide - the best book and friend to induce working people to produce and live on fruit and vegetables the same as I do—and it is said the information I gave has done more real good than all the technical classes that have been given. 100,000 copies have now been issued.

I have also issued the best essay, "How to Move and Transplant Trees and Shrubs Successfully," showing planters what to do and what to avoid; and it quite proves that there need be no, or very few, losses or vexation in plants transferred from one place to another. Every word is quite new and original, and should be read by all eultivators.

About 1872, during the coal famine, I invented and brought out the Victoria Hot-

EXTERIOR.

INTERIOR.

water Circulator, to economise fuel to the utmost extent. I use them, and they are far and away the best. Nearly 1,000 were fixed. Parts of my patent can be seen adopted in nearly all of the more recent inventions, particularly in the present horizontal pipe-boilers, extension of flues to extract all possible heat from the fuel into the water, and also making use of india-rubber joints. This is another great national gift.

BEGONIAS.—Only two Gold Clocks have ever been awarded by the Royal Horticultural Society, one was to me for a splendid group, 40 ft. long, at the great Temple Show, and graciously handed to me by H.R.H. Princess Christian, thus stamping my seedlings with everlasting fame.

The President of the United States of America (1892) invited seedsmen and nurserymen of all nations to send the exact seeds and plants they possessed to the Chicago Exhibition to be thoroughly tested, week by week. The result was, after years of suspense, that I was awarded the great Medal and four Diplomas, the inscription on that for seeds being, "They are large, perfect, great advancements, finest yet attained." Surely England should be proud of her sons bringing this great honour to England, particularly as it was awarded by experts from all nations.

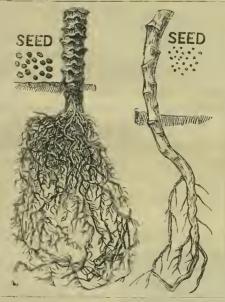

THE GOLD CLOCK AWARDED TO H. CANNELL & SONS.

A HITHERTO MYSTERY SOLVED.

IMPORTANT.

The reasons why Cabbages go prematurely to seed (bolting) instead of turning into heart are, first they have a natural tendency to revert to their former wild condition, and the next is feebleness of constitution from poor undeveloped seed.

IMPORTANT.

The same with Double and Single Stocks, and when taking either from the seed bed reject those favouring or similar in shape of the long-tap-rooted, shown on the engraving hastening to seed.

Plant out only those with short stems and bushy fibrous roots, as per other engraving.

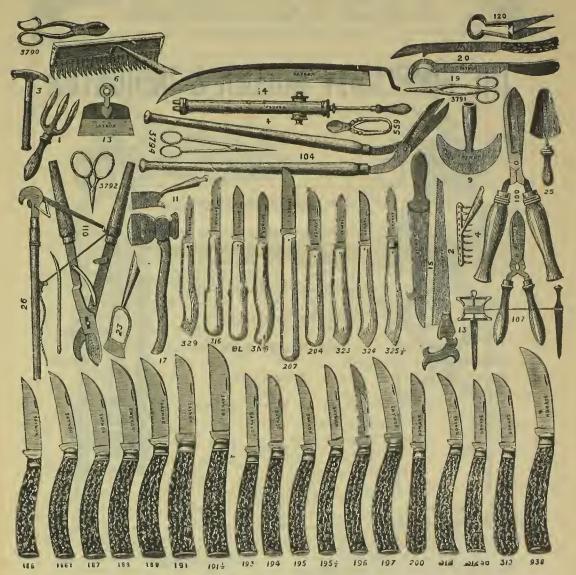

Finer the seeds, finer the crops.

My Floral Guide or Plant Catalogue—the contents of which are well known and highly valued, and acknowledged an authority and reference all over the world—is the most correct and useful published during this last year.

I have the honour of supplying Her Majesty's gardens at Frogmore and Balmoral, H.R.H. the Prince of Wales, Sandringham, and nearly all other royal gardens in Europe.

"MOLLIA TEMPORA FANDI,"

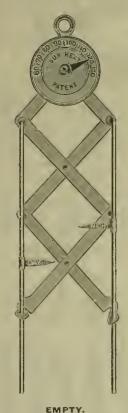

PRUNING AND BUDDING KNIVES, SCISSORS, &c.

Warranted by the Makers, and specially made for Horticultural Purposes.

THE SIMPLICITY HOLDER & INDICATOR

Daliaca.

Is a Novel Invention for hanging Thermometers in to indicate the required temperature of Glass Houses, Living Rooms, &c .in fact, in any place where temperature plays an important part.

IIE Holders are so constructed that they will receive any sized Thermometer. By taking hold of the ladder and drawing it out, turning the pointers back, and langing the Thermometer on the projecting knob in the centre of disc, and pressing the ladder to until the side wires are level with the face of the Thermometer, and turning the pointers on to the face of the glass. they will not only indicate the required temperature, but will help to keep the glass in position. As will be noticed in the engraving, the words "day" and "night" are stamped on the pointers, which slide up and down the wires to indicate the maximum or minimum heat required. For instance, in the forcing season say, a vinery started at a day temperature of 60 deg., night 55 deg.; all one has to do is to move the pointers on to the figures, so that the man who is in charge of the house or heating apparatus will have no cause to trouble the gardener as to temperature required, hence doing away with the old-fashioned plan of writing tickets or labels. The disc at the top also has a pointer, which is moved by the projecting knob that the Thermometer lungs on. This is to indicate the degree that the house may run up to by the sun heat.

These Holders are not merely useful but ornumental, as the disc and pointers are made in brass with figures embossed, therefore giving the Thermometer a much neater and better appearance.

Price of the Holders, 1s. each.

TO LADIES AND GENTLEMEN IN REQUEST OF GARDENERS.

Our Mr. H. Cannell, Senr., gives personal daily attention to all applications for Gardeners (good all-round men). His wide connection, and being a large employer, makes him intimately acquainted with most of the best practical and deserving men in the country, and he would feel a real pleasure in assisting and fitting in the right man to fill the situation for which any lady or gentleman may require him.

THE "MALBEC" BELLOWS.

A farmer always keeps his gun handy to kill his enemies the moment they appear; the "Malbee" Bellows is even much more useful and valuable, and should always be kept charged with Snlphur, and at the first speck of mildew, or any fungi and rust, it should be sprinkled and killed, inst as if it were a lion in the garden. In our opinion this is the most invaluable instrument aver invented to make the garden a success. Spray the powder hardly sufficient to be seen, 99 out of 100 persons will use five times more than it needs. By using this you will often save erops, otherwise detestable diseases will beset the eye when walking round the garden.

PRICE 9s. EACH.

BEST PLANTS AND CHOICEST KINDS Fruit and other Trees and Shrubs. COME AND SEE THE

GARDENERS' CHRONICLE.—LESSONS OF THE GREAT FRUIT SHOW.—The very best and finest fruit, and therefore the most profitable, came to the great show chiefly from Kent. That county stands at the head of all other counties in the Kingdom. They get more sunshine, the air is purer, and they have generally better and warmer subsoils.
